One Dozen in a Box.

CURRY COMBS

ALSTON'S PATENT CLOSED BACK

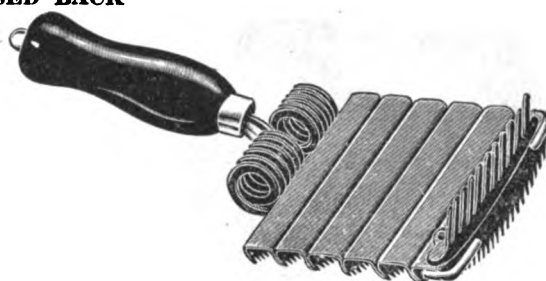

Without Mane Comb.

No. 90—7 Bars, Spring Handle, All Steel, Lacquered,
Black Enameled Handle.....**\$3.00**

These Combs always comb to a level; every tooth is working and wears alike. Spring is of one continuous piece of spring steel wire; cannot be bent or broken.

One Dozen in a Box.

With Mane Comb.

No. 95—7 Bars, Spring Handle, All Steel, Lacquered,
Black Enameled Handle with Mane Comb.....**\$3.60**

REVERSIBLE

No. 15—Improved Arc, 4 Blued Steel Circular Spring
Steel Bars, Malleable Shank, Carmine Handle, Two
Faced Teeth**\$3.50**

This Comb can be reversed by taking the handle in the right hand and the comb in the left hand with the fingers of the left hand astride the shank, pull back with the right, and at the same time twist the handle to the right or left which will reverse the comb.

One Dozen in a Box.

REFORM

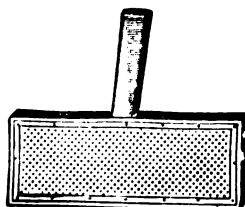

No. 7—Reform, 6 1/2 x 4 1/4 inches, 3 Shallow Cold Rolled
Steel Trays, Riveted, Brass, Lacquered, Heavy
Russet Strap**\$2.50**

Will clean with equal thoroughness a short coat or the long, furry ones incident to the winter season, as not the smallest part of the coat can escape the many teeth, which, however, will not irritate the most sensitive skin nor will they otherwise injure the brush. It is self cleaning, a gentle tap on the face will rid it of all the dirt.

One Dozen in a Box.

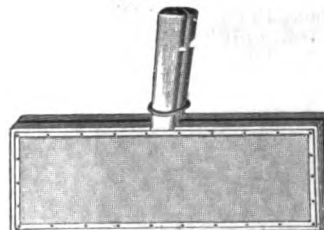

CURRY CARDS

No. 4—5 3/4 x 3 1/2 inches, Leather Face.....**\$2.10**
No. 2—8 1/4 x 3 1/2 inches, Leather Face.....**2.40**

AUTOMOBILE OILS

NORTHLAND

Highest quality, suitable for use in all makes of cars. 1 and 5 gallon cans have spouts and are beautifully lithographed.

Note—Prices in barrel lots are for oil in wooden barrels. See bottom of next page for extras.

NORTHLAND SPECIAL

A highly filtered Pennsylvania oil with very high fire test and with practically no free carbon. Used most successfully on fast running, expensive cars with close fitting bearings. If bearings are not perfectly ground will burn up quickly without residue. Used most successfully on any make of car.

Barrel Lots	Per Gallon, \$0.76
5 Gallon Lithographed Cans, 1 in a Case.....	Per Case, 5.80
1 Gallon Lithographed Cans, 6 in a Case.....	Per Case, 6.70

NORTHLAND PALE ZERO

Very highly refined oil. Considering refining and lubricating merit there is not a better oil made. Especially adapted for winter use.

Barrel Lots	Per Gallon, \$0.76
5 Gallon Lithographed Cans, 1 in a Case.....	Per Case, 5.80
1 Gallon Lithographed Cans, 6 in a Case.....	Per Case, 6.70

BARTLES MOBILINE

A very high refined oil. Considering price it is impossible to secure an oil of better lubricating merit.

Can be used in most any make of car with good results.

Per 100	\$4.40	5.00	5.00	6.25	5.60	5.60	5.60	6.25

The Star Screw Anchor is made of a lead composition metal in one piece and is so constructed that the screw cuts its own thread. This enables its use with any wood machine or special screw, its efficiency with all styles being equal. The Star Anchor requires a smaller hole for its insertion than any other kind, a point of great importance. The Star will not break, mark or deface the finest marble or tile. The lead composition is non-rusting.

COACH OR LAG SCREWS

Square Head, Gimlet Pointed.

List Adopted November 12, 1908.

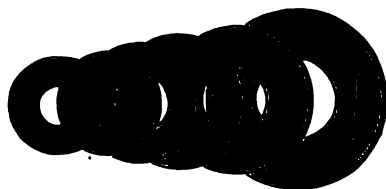

Price Per Hundred.

No. 122—Polished, Solid Cast Steel Blades, Rule from $\frac{1}{2}$ to 4 $\frac{1}{2}$ inches \$22.00
 Weight Per Dozen 5 $\frac{1}{2}$ Pounds.
 One-half Dozen in a Box.

BELT PUNCHES

ROGER'S

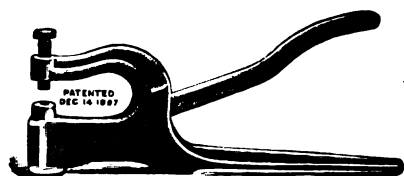

Per Dozen
 Roger's—Will Cut Any Size Hole from $\frac{1}{16}$ to $\frac{3}{8}$ inch in Canvas, Rubber, Heavy Double Leather or Oak Tanned Belting \$9.00

In using the Punch, simply extend the blade to the size hole desired, push the blade straight through the belt up to the handle, pressing the end of the handle firmly against the belt, and turn it one-half around, which takes out the core of the size of hole desired. Do not bend to an angle. Easily carried in the vest or overall pocket.

One Dozen on Display Card.

GASOLINE VAPOR LAMPS

AIR-O-LITE

For Indoors, Producing a 300 Candle Power Light, Burns 25 Hours, Capacity of Fount 4 Pints.

Safer and more durable than oil lamps. Burn their own gas from common gasoline. Give a bright white light, make more light than 20 oil lamps. The Brass Tank is tested to 200 lbs. pressure. The lamps operate at 15 lbs. pressure.

These Lamps are clean, no greasy wick to trim or chimney to clean, no dirt, no odor, just a convenient portable light of great efficiency.

Complete with Shade, 2 Mantles, Lighter, Pump, Wrench, Hanger, Extra Asbestos Filter, Extra Tip Screen and Set of Cleaning Tools for Removing Old and Inserting New Filter.

Nos. A307W
and A307G.

No. A317.

No. A307G—With 10 inch Green Opal Ribbed Shade, Otherwise Same as No. A307W. \$13.00

No. A318 —With 12 inch Beautiful Decorated Shade, Brown and Tan Tints with a Delicate Green Vine and Small Wild Rose, Otherwise Same as No. A317. 12.80

Shipping Weight Each 12 Pounds.

One in a Carton.

QUICK-LITE

For Indoors, Producing a 300 Candle Power Light, Burns 25 Hours, Capacity of Fount 4 Pints.

The "Quick-Lite" is a match lighting gasoline lamp of great brilliancy and extreme simplicity. No torch or alcohol needed to light it. No hunting around for a bottle. No expense for lighting, just use common matches. Each

No. Q307—22 inches High, 10 inch White Opal Ribbed Shade, Nickel Plated Tank and Parts, Universal Shade Holder, Complete with Two Junior Rag Mantles, Extra Generator, Pump, Wrench, Hanger and Cleaning Tools. \$10.00

In experimental tests we have found that one generator will burn from 500 to 1,000 hours without cleaning. This means the "Quick-Lite" can be depended upon to burn 3 hours every night for six to twelve months with little attention.

An extra generator is furnished with each lamp, thus insuring at least a year's use without additional expense.

Shipping Weight Each 9 Pounds.

One in a Carton.

No. P307.

GASOLINE VAPOR CHANDELIER LAMPS

AIR-O-LITE

Producing a 600 Candle Power Light, Both Burners Burn 18 Hours, Capacity of Fount 6 Pints. Each

YALE HOLLOW WIRE LIGHTING SYSTEMS

SAFE, SIMPLE AND ECONOMICAL, FOR STORES, CHURCHES, SCHOOLS, ETC.

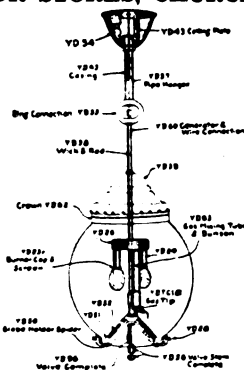

The "Yale" Hollow Wire Gasoline Lamps are the best all around wire lights for the dealer that are to be found on the market.

A study of the principle and construction and comparison with similar lamps has convinced us that they are worthy of our strongest endorsement. We will cheerfully replace any "Yale" lamp that does not give entire satisfaction.

A "Yale" Hollow Wire Lighting System consists of a galvanized steel tank, pump and wrench with hollow wires cut to proper length for conveying the fuel from the tank to the ceiling fixtures that the purchaser selects. Each fixture or lamp generates and burns its own gas as wanted, thus making it very economical to use. They are made of brass nickel plated and will last for years.

A variety of styles for different purposes will be found on this page. All "Yale" lamps operate successfully from 15 to 25 lbs. pressure so they can be attached to any hollow wire system. The standard length of ceiling fixtures is 24 inches, if wanted longer add 40 cents per foot to list price.

Space does not permit of a full description, but catalog will be sent upon request.

to be lighted, showing desired location of lamps, tanks, etc., and distances between. The wire will be cut and connections soldered in place so when you receive System it will be complete and ready to install.

A Yale Lighting System produces the best yet cheapest artificial light known.

The accompanying X-ray illustration is of our 2 mantle lamps. The above even numbered lamps use small mantles, others use regular size soft rag mantles.

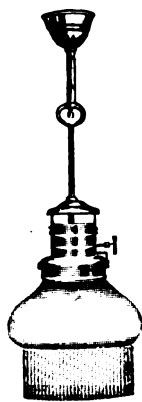

Note the simplicity of construction. With the adjustable shade holder used on these, glassware with fitters ranging from 3 3/4 inches to 6 inches in diameter may be used, either supported from the bottom or top.

All lamps shown on this page are equipped with eccentric tip cleaner. The special construction of lighting torch used enables you to generate and turn the light off or on from the floor, regardless of height of lamp.

Weight Each 9 Pounds.

CARRIAGE HEATER COAL

CLARK'S

WAGON HEATERS

CLARK'S

- No. 1W—Clark's, 9 inches Long, 8 inch Diameter, Steel Body, Adjustable Ventilators..... \$2.80

It burns carbon brick. Two or three of the bricks are sufficient in the coldest weather. They yield a strong, steady heat without flame, smoke or odor and one filling is enough for ten hours.

Heater occupies very little space and can be hung in the top of wagon if desired.

Adjustable Ventilators permit regulation of heat. Strong, safe, practical, in use by florists, bottlers, etc., everywhere.

One Dozen in a Crate.

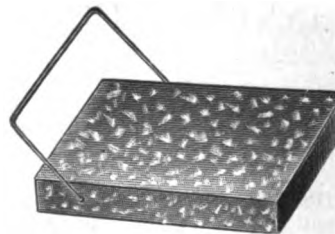

- No. 1—Clark's, High Grade, Size of Brick $7\frac{1}{2} \times 2\frac{1}{2} \times 1\frac{1}{4}$ inches \$1.00

- No. X—Good Grade, Size of Brick $7\frac{1}{2} \times 2\frac{1}{2} \times 1\frac{1}{4}$ inches. .60

The bricks are formed under enormous pressure and therefore contain the largest possible volume of latent heat. One-third of a brick is sufficient for the average drive.

Weight Per Dozen 9 Pounds.
One Dozen in a Case.

ALCOHOL STOVES

UNIVERSAL

These Stoves burn denatured alcohol, converting it into gas and burning with a blue and intensely hot flame.

These Stoves are absolutely safe, long burning and economical.

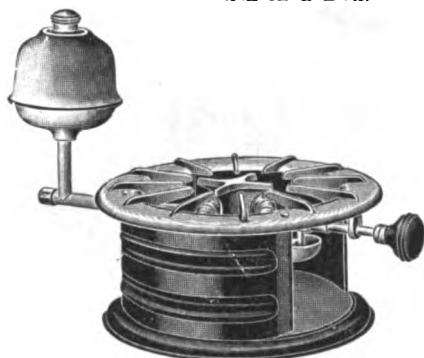

Brass Reservoir and Burner, Tin Plated Steel Legs and Rack. Each

No. 02—4 1/2 inches High, 6 inch Diameter Base, 6 1/4 inch Diameter of Rack, 3 1/4 inch Diameter Burner, Capacity 1 Pint.....\$1.40
Inexpensive yet thoroughly efficient. Burn with 2 circular series of hot blue flames.

Weight Each 1 Pound.
Six in a Box.

Nickel Plated Brass Lamp, Nickel Plated Steel Base and Shield, Nickel Plated Cast Iron Grill, Nickel Plated Iron Wire Holder and Grill Supports, Each

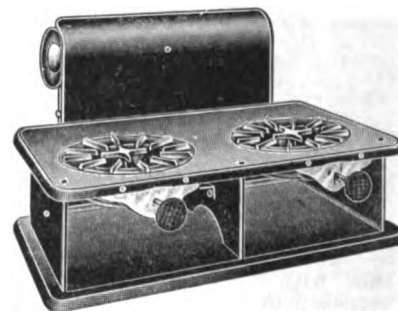

No. 0—5 1/2 inches High, 6 3/4 inch Diameter, Capacity 1/2 Pint, with Detachable Wind Shield to Permit its Use Out of Doors.....\$4.20
Weight Each 3 Pounds.
One in a Box.

Nickel Plated Brass Alcohol Reservoir and Burner, Japanned Sheet Steel Body. Each

No. 10—10 3/4 inches High, 10 3/4 inch Diameter Grate...\$7.20
Weight Each 11 Pounds.
One in a Box.

These Stoves are equipped with the "Universal" Wickless Gravity Feed Burner, which converts denatured alcohol into gas and burns with an intensely hot blue flame. The Burner is as simple and easily operated as an ordinary gas burner. It boils a quart of water at 50° F. in a few minutes. It is self-cleaning, odorless and absolutely safe.

Nickel Plated Brass Alcohol Reservoir and Burners, Japanned Sheet Steel Body. Each

No. 20—13 1/4 inches High, 13 3/4 inches Wide, 21 1/2 inches Long, Capacity of Tank 2 Quarts.....\$14.00
The Stove accommodates a standard bake oven and regular cooking utensils. The Tank is protected by an apron which keeps the heat away from it. It is strong, safe and durable.
Weight Each 30 Pounds.
One in a Box.

EKKO

The strong nickel plated non-rusting wire stand folds up compactly so it can be placed together with a can of Ekko Instant Heat inside the sauce pan.

The sauce pan is mounted with two wire handles, which when opened and snapped back into each other, form one strong, rigid lifter.

No. 2E—2 Pint Seamed Sauce Pan, Nickel Plated Stand, Complete with a Can of Ekko Instant Heat.....\$4.50
Per Dozen
Weight Per Dozen 144 Pounds.
One-twelfth Dozen in a Box.

INSTANT HEAT

EKKO

Per Dozen Cans

Ekko—Capacity 3 1/2 Oz. Alcohol in Solid Form, Safe, Economical, Always Ready, Cannot Spill or Explode, no Smoke or Odor.....\$1.50

Ekko Instant Heat may be used under percolators and chafing dishes, or practically anywhere that liquid alcohol is employed for heating.

Weight Per Dozen Cans 4 1/2 Pounds.
One Dozen in a Box.

STERNO

The handles of the boiler are hinged and curved to fit closely to side.

The can and stand fit inside the boiler.

The three grooves of the can fit firmly into the stand, making a rigid, non-upsettable stove that burns steadily for over an hour.

Per Dozen

No. 4001—1 Quart Heavily Nickel Plated Boiler, Nickel Plated Collapsible Stand, Complete with a Can of Sterno Canned Heat.....\$8.40

Weight Per Dozen 12 Pounds.
One-twelfth Dozen in a Box.

CANNED HEAT

STERNO

Per Dozen Cans

No. 4006—In Seamless Tin Cans, 2 1/4 inches High, 2 1/2 inch Diameter, Non-Explosive, Does not Leak, Cannot Spill when Carried, Safer than Liquid Alcohol, Keeps in All Climates.....\$1.70

Sterno Canned Heat is a solid paste. All you have to do to use it is to take the lid off the can, touch a match to the paste and you have a strong, intensely hot flame.

Weight Per Dozen 4 Pounds.
One Dozen Cans in a Box.

ALCOHOL AND LAMP STOVES

GLOGAU ALCOHOL

No. 25—4½ inches High, Capacity of Tank ½ Pint, All Brass, Nickel Plated, Tinned Steel Vessel Supports.....\$11.50

Generates its own gas, is wickless, odorless and smokeless. Cannot explode. For use in sick rooms, camps, traveling, light housekeeping, etc., or where gas is not available.

Weight Per Dozen 6 Pounds.

One-twelfth Dozen in a Paper Box.

MAYFLOWER ALCOHOL

No. 1020—Open Work Brass Stand, Brass Lamp, Polished Asbestos Wick, Removable Lamp, Weight Each 3 Oz...\$5.00

Stand being same shape as lamp, it can be inverted over lamp and placed in a box 3½ x 1¼ inches. Easily carried in pocket.

Weight Per Dozen 3 Pounds.

One-twelfth Dozen in a Box.

PEERLESS LAMP

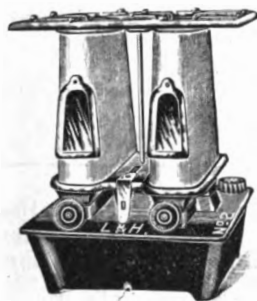

No. 50—Combined Curling Iron and Water Heater, Polished Brass, Nickel Plated Removable Cover\$1.00

The cover is made double, thoroughly protecting the handle of curling iron from heat. When water is to be boiled, the cover is removed. Highly finished and ornamental.

Weight Per Dozen 1 Pound.
One Dozen in a Box.

BLUE FLAME OIL COOK STOVES

BON AMI

Safe and Reliable, Odorless and Smokeless, with Kerogas Burner.

Steel Body, Steel Legs, Handsomely Finished in Black Japan and Decorated, Removable Safety Glass Oil Tank and Automatic Feed, Seamless Brass Burner, Blue Enameled Steel Burner Drum.

The "Kerogas" Burner is very different and far superior to that used on any other style of Oil Stove. It automatically generates gas from kerosene oil by a perfect mixture of air. This is accomplished so successfully that hundreds of bushels of air are utilized while consuming one gallon of oil.

The Heavy Glass Oil Tank is removable and is carried to an outer room for filling. No danger of explosion.

Simple to use and regulate as a common Kerosene Lamp. Indicators show how high or low to turn wick.

A lever is provided for each burner for raising blue enameled burner drums when stove is not in use. Makes it unnecessary to tilt or even touch drums for lighting.

No. 272.

No. 372.

Notice that the heat is first diffused around to all sides of oven by the spreader. Then it ascends into the oven proper and fills it, the heat accumulating until it is intense. Circulation is provided to carry off the steam and odor and to make room for fresh heat to enter, and this is accomplished by means of the flues between the outer and inner walls. The air is forced by the incoming current from below through the small holes at the top of the inner walls, and slowly down through the flues (slowly because heat does not naturally go down) until it passes out of the holes at the bottom of the outer walls. This system keeps a pressure of hot air within the oven while providing perfect circulation and makes these ovens the best and quickest bakers known.

Polished Dark Steel Body, Stamped Drop Door. Each

No. 185—Set up, 13x11 $\frac{1}{2}$ x11 $\frac{1}{2}$ inches, Wt. Each 8 $\frac{1}{2}$ Lbs...\$2.20

Covers one burner and is adapted for kerosene as well as vapor stoves. Plain top and sides. Heavy wire racks and wire handles. Double side walls with space between inner and outer provides ventilation and insures good baking.

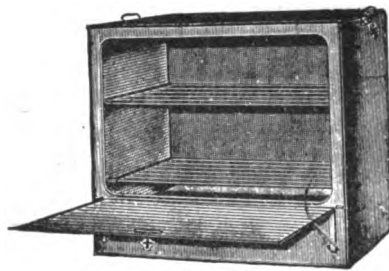

Polished Steel Body, Glass Drop Door. Each

No. 184—Set up, 12 $\frac{1}{4}$ x12 $\frac{1}{4}$ x12 inches, Wt. Each 10 Lbs...\$2.45

Covers one burner and is adapted for kerosene as well as vapor stoves. Heavy wire racks and wire handles. Double side walls, with space between inner and outer, provide ventilation and insures good baking.

PORTABLE OVENS

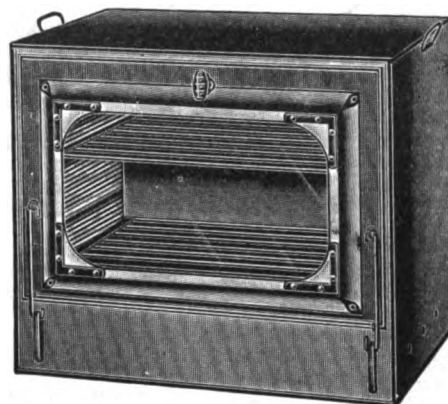

FOR OIL, GAS AND GASOLINE STOVES

Polished Steel Body, Stamped Hinged Door. Each

No. 151—Set up, 14x13x18 inches, Round Hole in Bottom, Weight Each 17 Lbs...\$2.60

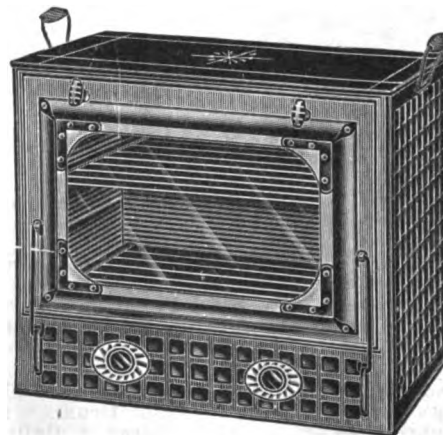

No. 251—Set up, 20x13x18 inches, Oval Hole in Bottom, Weight Each 19 Lbs... 3.00
Plain sides and top, one piece front frame, tinned lined door and sides. Two heavy wire racks and wire handles.

Polished Steel Body, Glass Drop Door. Each

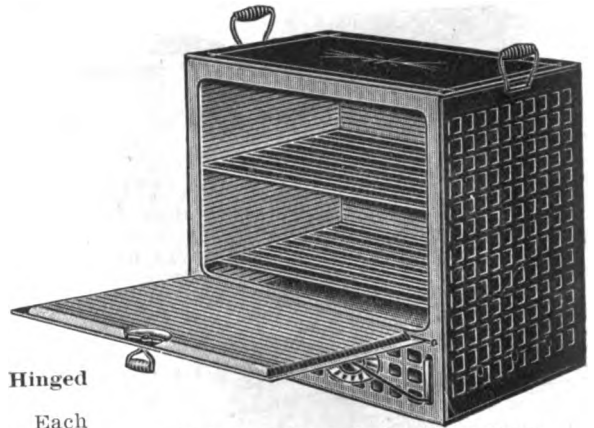

No. 2514X—Set up, 20x13x18 inches, Oval Hole in Bottom, Weight Each 23 Lbs...\$4.20

Plain sides and top, door fastens with a triple catch malleable turn buckle. Oven lined with corrugated tin, full asbestos lined. Two wire racks, wire handles.

Nos. 354 and 654.

The large, full size glass door enables one to put in the bake, close the door, watch the progress of baking, with the article visible at all times. It does away with guessing and therefore prevents mistakes. Makes good baking and successful roasting easy to the most inexperienced. Perfect ventilating insured by circulating flue system.

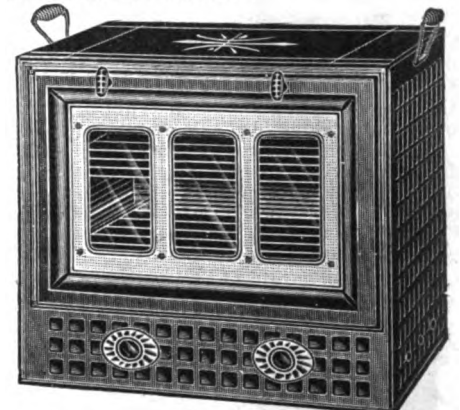

Polished Steel Body, Drop Door. Each

No. 35—Set up, 14 $\frac{1}{2}$ x13 $\frac{1}{2}$ x18 $\frac{1}{2}$ inches, Round Hole in Bottom, Weight Each 20 Lbs...\$3.40

No. 65—Set up, 21x13 $\frac{1}{2}$ x18 $\frac{1}{2}$ inches, Oval Hole in Bottom, Weight Each 25 Lbs... 3.00

Japanned and ornamented steel top, corrugated tin linings, full asbestos lined, two mica peep holes, two wire racks, Alaska handles.

Polished Steel Body, Three Panel Glass Drop Door. Each

No. 357—Set up, 14 $\frac{1}{2}$ x13 $\frac{1}{2}$ x18 $\frac{1}{2}$ inches, Round Hole in Bottom, Wt. Each 24 Lbs...\$4.50

No. 657—Set up, 21x13 $\frac{1}{2}$ x18 $\frac{1}{2}$ inches, Oval Hole in Bottom, Weight Each 26 Lbs... 5.00

Japanned and nicely decorated top, blue japanned door frame, corrugated tin linings, full asbestos lined, two mica peep holes, two heavy wire racks and Alaska handles. An exceptionally fine baking oven. Perfect ventilation insured by circulating flue system.

Polished Steel Body, Glass Drop Door. Each

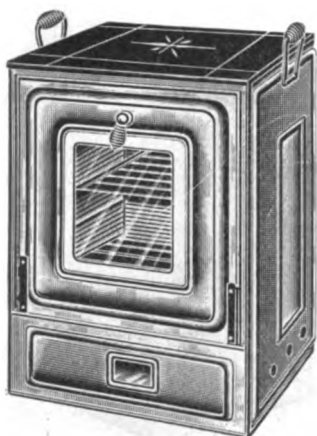

No. 354—Set up, 14 $\frac{1}{2}$ x13 $\frac{1}{2}$ x18 $\frac{1}{2}$ inches, Round Hole in Bottom, Wt. Each 21 Lbs...\$4.20

No. 654—Set up, 21x13 $\frac{1}{2}$ x18 $\frac{1}{2}$ inches, Oval Hole in Bottom, Weight Each 25 Lbs... 4.80

Black enameled gilt striped top, corrugated tin linings, full asbestos lined, two mica peep holes, two heavy wire racks, Alaska handles.

BON AMI PORTABLE OVENS

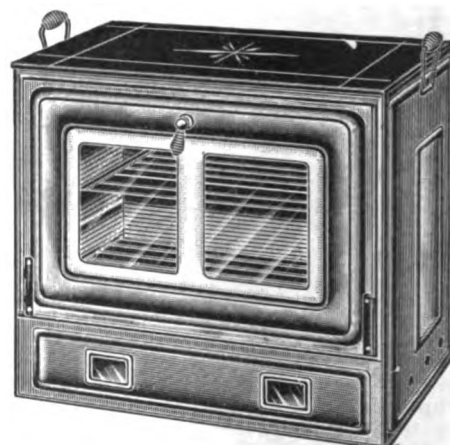

FOR OIL, GAS AND GASOLINE STOVES

Cut Shows Sanitary Oven Bottom.

The combined sanitary Removable Oven Bottom and Heat Spreader are the biggest features of these Ovens. All spilled foods can easily and quickly be removed by taking Bottom out. This cleanable tray can be lifted out through the oven door, cleaned and replaced. An exclusive feature of the Bon Ami Oven which no other oven possesses.

Steel Ebony Finished Body, Blue Porcelain Enameled Door Frame, Glass Drop Door.

No. 17—Set up, $14\frac{1}{2} \times 3\frac{3}{4} \times 18\frac{1}{2}$ inches, One Light Glass Door, Round Hole in Bottom, Weight Each 22 Lbs. .**\$4.70** Each

No. 27—Set up, $21\frac{3}{4} \times 13\frac{3}{4} \times 18\frac{1}{2}$ inches, Two Light Glass Doors, Oval Hole in Bottom, Weight Each 24 Lbs. .**\$5.20** Each

The sides and front of these Ovens are bulged to give strength and stiffness. The doors are locked and fastened at three points, the corners and centers, so that it will always close tight.

The inside of the door is smooth and has no obstructions. Door easily removed, glass is more easily replaced if broken than the glass on any other oven door.

OIL HEATERS

ALUMINO

Provided with Safety Founts and Burners, which are so scientifically constructed that two spaces separate the Burning Wick from the Oil Fount, which, together with a large Air Chamber through the Burner, guarantees not only the most perfect combustion, but also absolute safety.

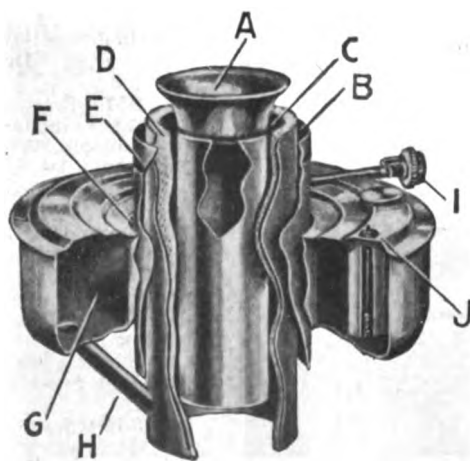

There is a deflector or partition in the drum which prevents the heat escaping directly to the ceiling, as it does with all other oil heaters. The construction of the Alumino Oil Heaters is such that it radiates the heat like a base burner, from the bottom and sides, as well as the top.

The top ring is constructed with numerous openings, admitting of the heating or baking in a very short space of time of anything which may be placed upon it.

The flame spreader is stamped from one solid piece of steel, leaving absolutely no perforations about the burner which can be clogged up with oily substances, and in consequence of which these Heaters are always free from smoke and odor.

The wicking device is not so complicated as to require an expert from the factory to re-wick the stove. It is so simple a child can operate it.

The trimmings are all highly nickeled and have a deep, beautiful luster. The steel from which the body of the stove is made has a polished finish, making the Heater not only a necessary article of practical utility, but an ornament as well.

A—Flame Spreader perfectly free from perforations.

B—Air Space outside of Wick Tube.

C—Air Space inside of Wick Tube.

D—Wick.

E—Outside Casing to Burner.

F—Air Space between Fount and Outer Casing.

G—Fount or Receptacle for Oil, entirely separate from Burner.

H—Feed Pipe conducting Oil from Fount to Burner.

I—Wick Control; prevents turning flame too high.

J—Cork Float Indicator.

Sheet Steel Body, Nickel Plated Trimmings, Removable Heavy Steel Fount and Burner Heavily Coated with Lead, Cork Float Indicator, Circular Wick, Coiled Wire Handle.

Black Japanned Finish.

Full Polished and Nickeled.

No. 21X—Height (Ball Down) 23 inches, 8 inch Diameter Drum, 8 inch Wick, Fount Holds $\frac{3}{4}$ Gallon, Burns 1 Gallon 16 to 20 Hours, Weight Each Crated 19 Lbs. .**\$5.50** Each

No. 31X—Height (Ball Down) 27 inches, 10 inch Diameter Drum, 15 inch Wick, Fount Holds $1\frac{1}{4}$ Gallons, Burns 1 Gallon 9 to 12 Hours, Weight Each Crated 28 Lbs. .**9.40** Each

One in a Crate.

No. 210—Height (Ball Down) 23 inches, 8 inch Diameter Drum, 8 inch Wick, Fount Holds $\frac{3}{4}$ Gallon, Burns 1 Gallon 16 to 20 Hours, Weight Each Crated 19 Lbs. .**\$6.50** Each

No. 310—Height (Ball Down) 27 inches, 10 inch Diameter Drum, 15 inch Wick, Fount Holds $1\frac{1}{4}$ Gallons, Burns 1 Gallon 9 to 12 Hours, Weight Each Crated 28 Lbs. .**10.50** Each

One in a Crate.

AIR TIGHT HEATERS

For Wood, Chips, Cobs, or Anything Combustible Except Coal.
Smooth Steel Body, Fancy Stamped Steel Top with Nickel Plated Urn, Handsome Large Stamped Steel Legs Bolted to Side of Stove, Draught is Admitted Through Holes in the Nozzle Collar by Turning Nozzle to Suit, Strong and Rigid Construction.

Without Lining.			
Nos.	18	21	25

Weight Each, Lbs.	20	29	31	39
Each	\$2.90	3.70	4.20	5.30

A very popular Heater for thoroughly heating a small room. Nozzle Locks on to avoid falling off, securely retaining the fire, but is easily removed to take out ashes, Check Draft Slide in top of Stove near pipe collar provides positive means for checking the draught. Collars arranged for setting up with pipe inverted, so that any creosote droppings return to stove.

Nos. 205 to 305.

AIR TIGHT HEATERS

CALORIC

The "Caloric" is a new, exceedingly attractive, strictly first-class Airtight Heater. It has large lift feed door surmounted by nickel swing cover fitted with a urn. The legs, base strips and ash door elbow are heavily made of cast iron. The ash door when raised to proper height catches and remains open, proving a great convenience when removing ashes.

The top of the "Carbon" Heater has a cast iron swing cover which can be used for feeding wood to the fire and has also a very ornamental nickel swing urn cover. The ample proportions of the end feed door permit the feeding of unusual size wood for this style stove, and feed opening is provided with smoke curtain. The screw draft under feed door and front draft give perfect control of fire. Has check slide in pipe collar.

CARBON

For Wood, Chips, Cobs, or Anything Combustible, Except Coal.

Polished Steel Body Protected by Heavy Steel Linings, Cast Iron Top Handsomely Modeled and Shaped Like a Dome, Nickel Plated Urn, Swing Cover, Name Plate, Top Rim, Ash Door, Draft Register and Foot Rails.

Nos.	★618	621	625	628

Each	\$13.75	16.00	18.00	21.00

★Nos. 16H and 160H have Reversible Pipe Collar.

The airtight construction is made possible by a specially constructed flange, where the body meets the heavy ribbed cast iron bottom, which is a feature which particularly characterizes the superiority of the Hunter as a wood heater. This flange is so made that the body must be wedged into position and with the manner of Bolting, a joint is obtained which is positively airtight. Has spark guard to prevent sparks from coming through the airtight screw draft in front.

AIR TIGHT HEATERS

CUBA

For Coal or Wood.

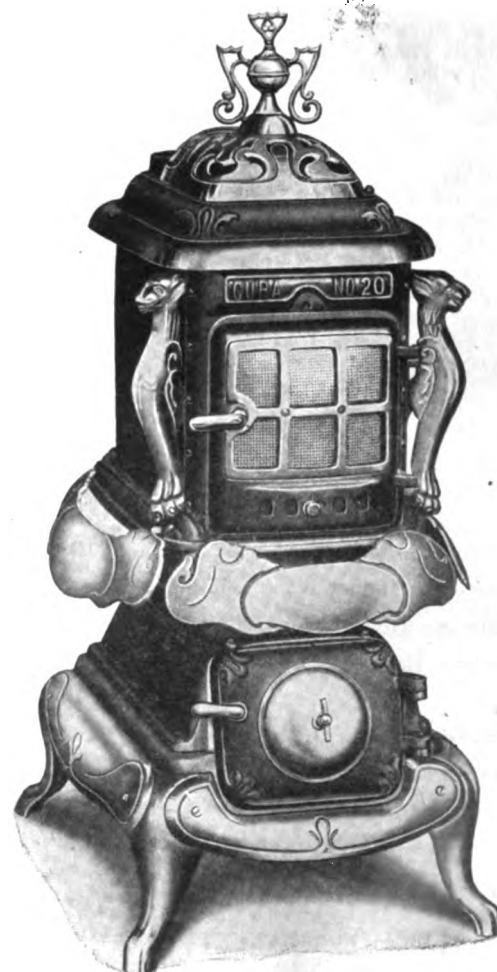

Heavy Cold Rolled Polished Blue Steel Body, Ventilated Cast Lining Above Fire Pot, Cast Top and Bottom, One Piece Fire Pot with Hot Blast Lining on Inside, Heavy Duplex Grate, Deep Ash Pit, Large Ash Pan, Extra Large Mica Feed Door, Nickel Plated Swing Top, Cooking Lid in Top, Handsome Urn, Lift-off Nickel Plated Trimmings.

Nos.	20CU	22CU
Fire Pot, Inches.....	18x11	20x11
Extreme Height, Inches.....	44	48
Size of Feed Door Opening, Inches.....	8 ½ x 9 ½	9 ½ x 11
Weight Each, Lbs.....	170	210
Each	\$27.50	31.00

The Double Hot Blast feature makes this an unusually effective and economical Heater. Special Hot Blast Fire Pot creates a draft of heated air over the fire from both sides, which is met by a Hot Blast from tube hanging from top of stove. This creates a whirling movement of the fresh, heated oxygen from both sides of heater and mingling with the carbon arising from the fire, prevents the escape of the combustible smoke and gases of the fuel into the chimney until practically every heat unit has been consumed.

The oblong shape offers a great advantage in the long fire pot as greater radiating surface is thereby obtained. It also makes this an ideal parlor heater for burning long sticks of wood. The rounded corners permit airtight fittings of all parts.

The Ash Pit Door contains Screw Draft Damper which, with Check Draft Slide in Feed Door and Hot Blast Draft in Top, gives absolute control of fire and makes it possible to easily keep a soft coal fire over night.

Nos. 20 and 22.

HOT BLAST HEATERS

PERFECT

For Hard Coal, Soft Coal or Wood.

Heavy Cold Rolled Steel Body, Cast Iron Top, Base and Legs, Nickel Plated Screw Draft Registers, Draw Center Shaking Grate, Handsome Swing Cover, with Nickel Plated Urn, Nickel Plated Off-Lift Trimmings.

Nos. 10B to 20B.

STOVE PIPE DRUM OVENS

For Attaching to the Pipe of Any Stove.

Each

No. 20—19½x14½ inches, Oven 18x11x11 inches,
Handsomely Carved Cast Iron Ends, Swinging
Door on Front End, Heavy Steel Rack, Cast Iron
Collars Taking 6 inch Pipe.....\$5.80

In operation the drum is placed between two joints of pipe just above the stove and the draft from the stove, which carries a great amount of heat, passes all around the oven between the inner or oven jacket proper and the outer body, and up through the pipe. For perfect regulation a damper should be placed in the pipe just above the oven. The great amount of surface in the oven makes it a help toward increasing the amount of heat obtained from the stove.

Weight Each 40 Pounds.

RADIATORS

Nos. 60 and 66.

Nos. 01 to 1.

METEOR

CHIMNEY THIMBLES

HOLD-TITE

The diamond-shaped indentations wedge the stove pipe securely from either end of the thimble, thus easily form a secure wedge for the pipe.

It cannot pull out of the chimney, owing to the fact that the mortar settles into the diamond-shaped recesses on the outside.

COAL OR WOOD CHUTES

HOLLAND

Open.

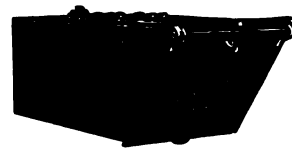

Closed.

Cast Iron Frame and Hopper with Continuous Heavy Sheet Steel Plate. Each

- No. B—Wall Opening 18 inches Wide, 22½ inches High, for One Light 14x16 inches, without Lights, Weight Each 120 Lbs.....\$14.00
- No. E—Wall Opening 24 inches Wide, 22½ inches High, for Two Lights 10x16 inches, without Lights, Weight Each 145 Lbs..... 17.50

A perfect Coal Chute when open, a fine unobstructed basement window when locked. It is burglar proof, there is no place to get in a "jimmy," no bolts on the outside to unscrew, no hinges to pry off, you can't open this chute with a wire or knife. It locks itself automatically when it is closed up, yet unlocks easily from the inside by merely raising the plate from the notches which hold it at the sides. When open the heavy sheet completely covers and absolutely protects the glass.

THE "BEST"

Closed.

Open.

Cast Iron Frame and Door, Sets Flush in Wall. Each

- No. 1—18x18 inches Outside, 32 inches Long on Top, Heavy Steel Tube, Weight Each 70 Lbs.....\$10.00
- No. 2—18x24 inches Outside, 32 inches Long on Top, Heavy Steel Tube, Weight Each 85 Lbs..... 14.00
- No. 3—20x36 inches Outside, 16 inches Long on Top, All Cast Iron, Very Heavy, Designed Specially for Soft Coal, Weight Each 230 Lbs..... 19.50

When not in use, draw the chain tight and attach the hook at bottom of tube, which securely locks the door, making it burglar proof.

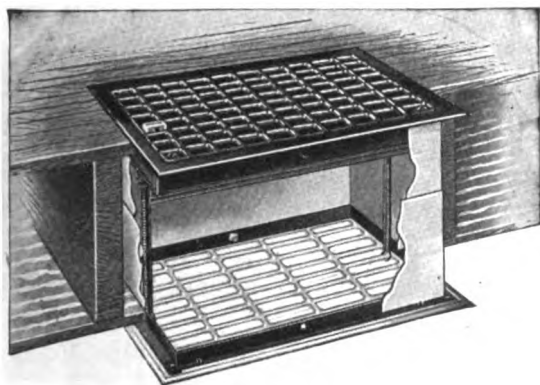

To open the door attach the last link to hook and when door is opened, it holds chain to top of tube out of the way. The cover is held open by the hook on the door engaging with the cover on top of frame. The door opening up protects the siding of the house. Has a flange overlapping the top of door, preventing the rain from running down the chute and rusting it out.

ADJUSTABLE VENTILATORS

H. & C.

INDEPENDENT

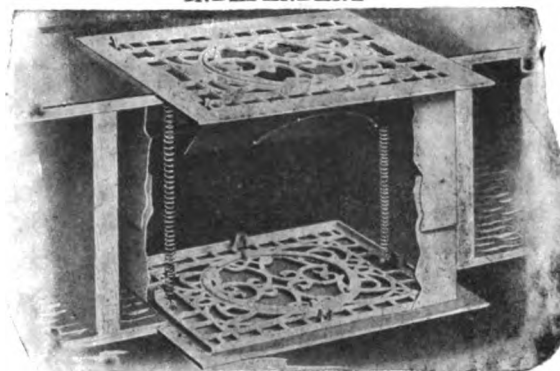

Regular Pattern.

No. 2250—Wrought Steel, Adjustable from 7 to 12 inches in Depth.

Consists of one Black Japanned Floor Register with Valve and one White Japanned Ceiling Plate Attached to a Tin Box.

Size, Inches.....	8x10	9x12	10x12	10x14
Weight Each, Lbs.....	9 ½	12	12 ½	15
Each	\$4.40	5.40	6.40	7.60

Designed to carry surplus heat from a lower to an upper floor room, or ventilating between two rooms on the same floor. One in a Box.

Combination Pattern.

Black Floor Register with Valves, White Ceiling Plate, 6 inch Removable Center Piece, Sheet Metal Box.

Nos.	108	1210
Inches	8x10	10x12
Weight Each, Lbs.....	9	12 ½
Each	\$6.60	9.60

The metal box connects the floor register and ceiling plate and is adjustable from 7 to 12 inches in depth. Will fit any ordinary ceiling. This style of Ventilator is just the thing in cases where it is desirable to run a stove pipe through the floor or partition and at the same time allow surplus heat to pass from one room to another.

One in a Pasteboard Box; Three Boxes in a Crate.

BASE BOARD REGISTERS

T. & B. CAST

Style 22—Cast.

A one-piece cast iron Register, Body size made standard to fit standard stack heads.

Provided with Iron Frame, which fits into the stack head and to which the Register is attached with one screw.

Price includes the Frame.

No. 5½—Depth of Stack Head Throat (Single Header)
5½ inches.

	Japanned Black Each	Oxidized Copper Each	Plated Brass or Nickel Each
8x10 inch	\$2.00	3.50	3.85
9x12 inch	2.50	4.00	4.40

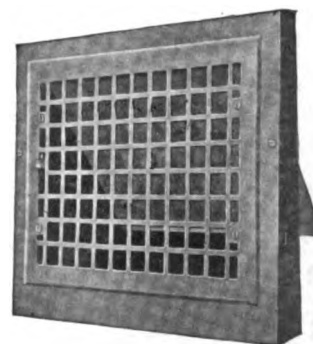

No. 6½—Depth of Stack Head Throat (Single Header)
6½ inches.

	Japanned Black Each	Oxidized Copper Each	Plated Brass or Nickel Each
10x12 inch	\$3.65	5.40	6.00
12x13 inch	4.20	6.20	7.00

No. 7½—Depth of Stack Head Throat (Single Header)
7½ inches.

	Japanned Black Each	Oxidized Copper Each	Plated Brass or Nickel Each
12x14 inch	\$5.85	8.00	9.00

T. & B. STEEL

Style 99—Steel.

A new one-piece all wrought steel Register, with patent air-tight Fastener for quick installation, to hold the Register in place and to prevent the wall from being discolored by the heat.

The Face has a large free air opening and the Register is designed with the proper proportion between depth, size and capacity.

No. 15½—Depth of Stack Head Throat (Single Header)
5½ inches.

	Japanned Black Each	Oxidized Copper Each	Plated Brass or Nickel Each
8x10 inch	\$2.00	3.50	3.85
9x12 inch	2.50	4.00	4.40

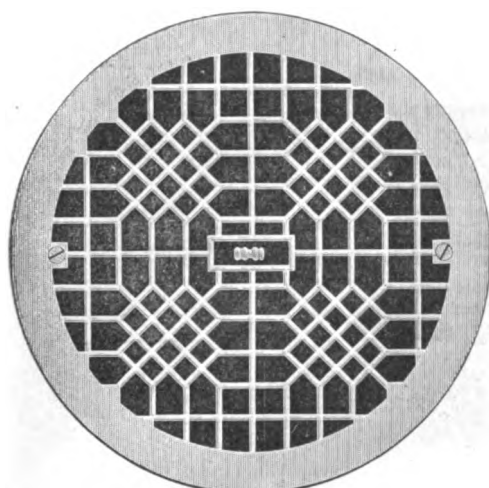

No. 16½—Depth of Stack Head Throat (Single Header)
6½ inches.

	Japanned Black Each	Oxidized Copper Each	Plated Brass or Nickel Each
10x12 inch	\$3.65	5.40	6.00
10x13 inch	4.20	6.20	7.00

WASTE PAPER BALERS

SAFETY

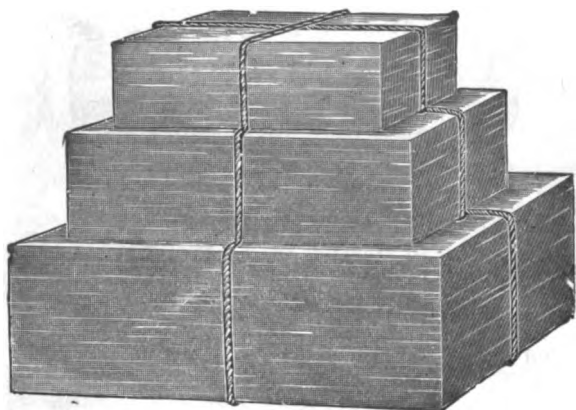

Nos.	1	2	3
Floor Space, Inches..	22x30	20x28	19x26
Size of Bale, Inches..	18x24	16x22	15x21
Height of Bale, Inches.	up to 36	up to 32	up to 27
Wt. Per Bale, Lbs....	120 to 160	100 to 125	75 to 90
Height Over All In...	52	44 ½	40
Weight Each, Lbs....	175	150	125
Each	\$40.00	\$36.00	\$30.00

The Safety Baler is equipped with a swing door and is securely fastened by two latches that work in unison, thus making it unnecessary to remove the door when bale is made. The plunger is merely pushed backward, making an exceptionally large feed opening.

It will save time, labor and floor space and provides a ready receptacle to take care of waste paper as fast as it accumulates.

STEEL WOOL

For Rubbing and Polishing, in Place of Sand Paper.

Nos.	0	1	2	3
Equal to Sand Paper..	00	1	½ or 1	1 ½ or 2
Per Pound	\$0.75	.60	.55	.50

Per Dozen Packages

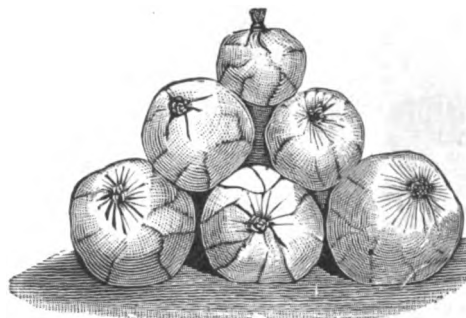

Steel Wool—Family Size.....\$2.00

Steel Wool does not scratch, clog or gum up, adapts itself to all shapes and reaches every spot and crevice. It does the work in ½ the time.

Steel Wool is a mass of fine fibres of steel, resembling curled hair, which, while sharp, does not scratch, but will cut as smoothly as the finest abrasive material heretofore used. It is the best article for rubbing varnish, shellac, etc.

One Pound in a Package.

PUTTY

PREPARED ROOFING

BLACK DIAMOND

Black Diamond, the old reliable two and three-ply, is the pioneer of ready roofing. It is a simple combination of Tarred Felt and Coal Tar Pitch, the best materials known for roofing and waterproofing. The sectional diagrams clearly indicate of what **Black Diamond** is made and illustrate the only difference between the two and three-ply, the quality of materials used being the same in both.

Two-ply consists of two sheets (aa) of the best quality of Tarred Felt, with a layer of waterproof Composition (b).

Three-ply consists of three sheets (aaa) of the best quality of Tarred Felt, with two layers of waterproof Composition (bb).

Put up in Rolls of 108 Square Feet, Will Cover 100 Square Feet.

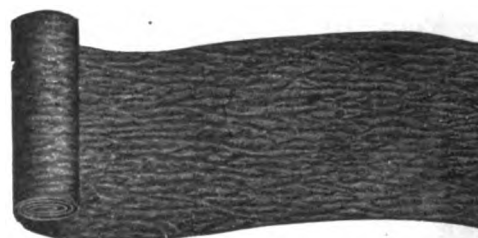

Two-Ply—32 inches Wide, Weight Per Roll 45 Lbs. Per Roll \$.....
Three-Ply—32 inches Wide, Weight Per Roll 70 Lbs. Per Roll \$.....
 Note—Nails, Caps and Coating are not included. Will be charged extra if ordered. For one square roofing 1 lb. of nails 1½ lbs. tin caps and 2 gallons roof coating is required. Black Diamond Roofing should be coated.

BADGER RUBBER ROOFING

Best Ready Roofing on the Market, Guaranteed 5, 10 and 15 Years.

Cut Showing Badger Rubber Roofing in Roll.
Put up in Rolls Ready to Lay.

Cut Showing Badger Rubber Roofing Unrolled.

Put up, Ready to Lay, in Rolls of 108 Square Feet, Will Cover 100 Square Feet.
 Complete with Large Head Nails, Cement and Directions for Laying Inside of Roll, 8 Square Feet Allowed for Laps Per Roll.
One-Ply —32 inches Wide, Guaranteed for 5 Years, Weight Per Roll 34 Lbs. Complete.....\$.....
Two-Ply —32 inches Wide, Guaranteed for 10 Years, Weight Per Roll 44 Lbs. Complete.....\$.....
Three-Ply—32 inches Wide, Guaranteed for 15 Years, Weight Per Roll 54 Lbs. Complete.....\$.....
 The Badger Rubber Roofing is adapted for use on all classes of buildings, flat or steep roofs, such as Farm Residences, Houses, Cottages, Farm buildings and Factory and Store Buildings.

This Roofing is not affected by heat or cold, it does not injure rainwater, it is easily applied, it does not absorb moisture, and therefore cannot be affected by action of frost and therefore preserves an even surface. It is made from finest grade of wool felt and guaranteed to contain no coal tar, weather-proof, rot-proof, fire resisting, requires no annual painting. It is the best for all buildings where economy and durability is desired. Ready for use to meet the various demands for a good roof.

CERTAIN-TEED ROOFING

Guaranteed 5, 10 and 15 Years.

Carries Abundant Saturation of Certain-teed Blend Asphalts, the slowest drying saturant known to science.

No Coal Tar or Quick Drying Saturants Used in this Roofing.

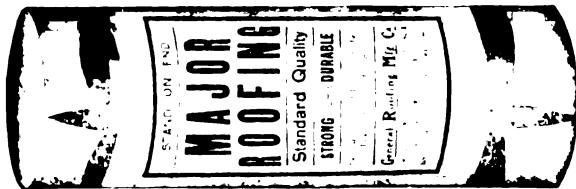

Put up, Ready to Lay, in Rolls of 108 Square Feet, Will Cover 100 Square Feet

Complete with Large Head Nails, Cement and Directions for Laying Inside of Roll, 8 Square Feet Allowed for Laps Per Square.
One-Ply —32 inches Wide, Guaranteed for 5 Years, Weight Per Roll 35 Lbs. Complete.....\$.....
Two-Ply —32 inches Wide, Guaranteed for 10 Years, Weight Per Roll 45 Lbs. Complete.....\$.....
Three-Ply—32 inches Wide, Guaranteed for 15 Years, Weight Per Roll 55 Lbs. Complete.....\$.....

Certain-Teed is a permanent and durable Roofing suitable for any building. The body of this Roofing is of the best quality fibrous wood felts, which are given a double saturation of weather, water and acid proof rubber composition. This saturation is slowly and thoroughly driven in by heavy pressure, the felts going through extra sets of rollers and by this process get more composition in the felts. This makes Roofing wear longer and gives better results generally. After the felts are thoroughly seasoned it is carefully coated with highest grade asphalt coating. It is not possible to make a better or more durable Roofing as it contains every essential quality that a good Roofing should and lacks nothing to make it the best. Certain-Teed Roofing is suitable for either steep or flat roofs. Requires no jointing when laid and is unaffected by extreme changes of weather and is fire-proof.

MAJOR ROOFING

Guaranteed 3, 7 and 10 Years.

Put up, Ready to Lay, in Rolls of 108 Square Feet, Will Cover 100 Square Feet.

Complete with Large Head Nails, Cement and Directions for Laying Inside of Roll, 8 Square Feet Allowed for Laps Per Square.

Per Roll

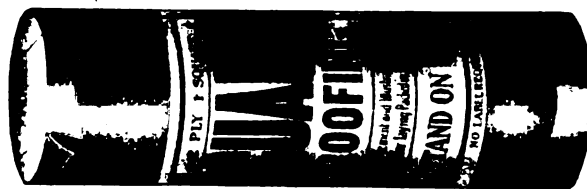

One-Ply—32 inches Wide, Guaranteed for 3 Years, Weight Per Roll About 35 Lbs., Complete.....\$.....**Two-Ply**—32 inches Wide, Guaranteed for 7 years, Weight Per Roll About 45 Lbs., Complete.....**Three-Ply**—32 inches Wide, Guaranteed for 10 Years, Weight Per Roll About 55 Lbs., Complete.....

Major Roofing is finished on the outside with a coating of powdered soapstone or talc, giving it an appearance of rubber belting.

This Roofing is made from good material and equal to any high priced roofing.

GUARD ROOFING

A Good Roofing for Ordinary Purposes.

Put up, Ready to Lay, in Rolls of 108 Square Feet, Will Cover 100 Square Feet.

Complete with Large Head Nails, Cement and Directions for Laying Inside of Roll, 8 Square Feet Allowed for Laps Per Square.

Per Roll

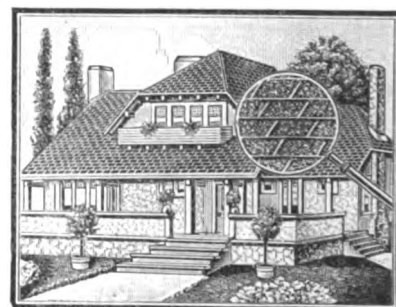

One-Ply—32 inches Wide, Weight Per Roll About 35 Lbs., Complete.....\$.....**Two-Ply**—32 inches Wide, Weight Per Roll About 45 Lbs., Complete.....**Three-Ply**—32 inches Wide, Weight Per Roll About 55 Lbs., Complete.....

Guard Roofing is made of good material, carefully compounded and saturated, and makes a waterproof and entirely satisfactory roof for temporary purposes.

SLATE SURFACED SHINGLES**CERTAIN-TEED**

Combines Permanent Color, Beauty, Fire Protection, Great Durability and Low Cost.

The beautiful colors of the crushed slate are natural and consequently cannot fade.

Certain-Teed Shingles are especially adapted for residences and bungalows for the fact that they produce the most beautiful effect besides making the most durable roof.

Per Square

No. R—Red Slate Surface, Size of Shingle 8x12 3/4 inches, 424 Shingles to a Square...\$.....**No. G**—Green Slate Surface, Size of Shingle 8x12 3/4 inches, 424 Shingles to a Square.

These Shingles are made of thick felt thoroughly saturated in blended asphalt and heavily coated with a harder surfacing of like material in which red or green crushed slate is imbedded. The slate on the surface is absolutely fireproof and the outer covering of asphalt in which the slate is imbedded is fire-resisting and very slow to burn. These Shingles are laid the same as ordinary wood shingles, and when laid they form a treble thickness, insuring long service and a perfect weather-proof roof. They cannot rot, crack or warp and require no painting as red or green coloring of slate is natural and cannot fade.

Laid 1/2 inch apart and 4 inches to the weather, 424 Shingles to the square of 100 square feet.

Packed 4 Cartons to a Square, Weight Per Square 230 Pounds.

SLATE SURFACED CERTAINTIED ROOFING

Same Material as Certain-Teed Shingles, but Put up in Rolls, Suitable for Flashings, Etc., to Use with Certain-Teed Shingles and for Roofing. Put up, Ready to Lay, in Rolls of 108 Square Feet, Will Cover 100 Square Feet. Complete with Large Head Nails, Cement and Directions for Laying Inside of Roll. 8 Square Feet Allowed for Lap Per Square.

Per Roll

No. RR—Red Slate Surface, 32 inches Wide, Weight Per Roll 80 Lbs., Complete.....\$.....**No. GR**—Green Slate Surface, 32 inches Wide, Weight Per Roll 80 Lbs., Complete.....**STOP-A-LEKE STYCK**

In Barrels of About Three Hundred to Five Hundred Pounds.	

PECORA WEATHERTITE

Elastic, Rubbery Roofing Cement.

Possesses every feature which makes a cement perfect for general repair or new work.

Weathertite will make a new roof out of a rusty or leaky old one. A thin coating spread over with a trowel will make it tight and it will stay tight.

This applies to slate, tile, wood roofs, etc., and when the work is done you won't have to go back on the job again.

If chimneys need repairing, use Weathertite—it's fine for this work.

Weathertite "stays put", it never shrinks or cracks away, drying just hard enough, yet not so hard as to become brittle.

While it is a so-called repair cement, it's use really makes a permanent job which is equally as good as new.

	Per Pound
In 100 Pound Metal Kegs	\$0.14
In 25 Pound Cans16
In 10 Pound Cans20
In 5 Pound Cans20

Never hardens in package, opened or closed.

 Fifty Feet in a Box.

DENNIS "CLINCHER" FELT

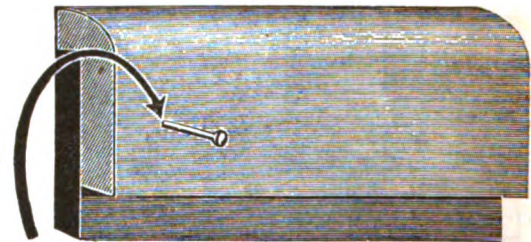

The "Dennis Clincher" Felt Weather Strip is the most practical and durable strip made. The felt used is extra heavy and is glued to the bottom of the moulding and the nail used to apply the strip passes through both moulding and felt. This feature assures complete satisfaction and makes the strip much easier to apply, also makes doors and windows dust, cold and wind proof.

- No. 70— $\frac{1}{2}$ inch Moulding, for the Upper Sash of Windows **\$3.00**
 Weight Per 1000 Feet 35 Pounds.
 Five Hundred Feet in a Bundle.

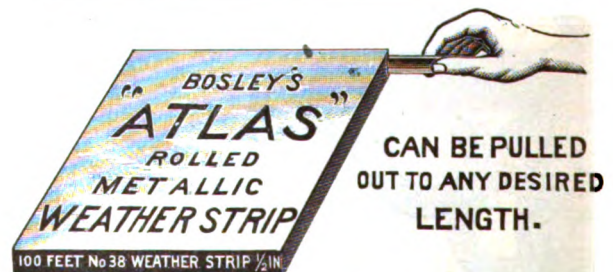

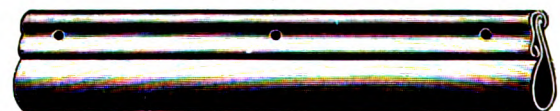

- No. 71— $\frac{5}{8}$ inch Moulding, for Lower Sash of Window, Weight Per 1000 feet 50 Lbs. **\$3.00**
 No. 71 $\frac{1}{2}$ — $\frac{3}{4}$ inch Moulding, for Sides and Tops of Doors, Weight Per 1000 feet 65 Lbs. **4.50**
 Five Hundred Feet in a Bundle.

NOTE - NAIL PASSES THROUGH BOTH MOULDING AND FELT.

Each	\$4.00	4.00	4.00

Each wire is swedged into the crossbars at intervals of about 4 1/2 inches, the fingers of the crossbar being bent or swedged over the wire, holding it securely in place. The screening surface is smooth and therefore fast. Will handle 50 per cent more sand and gravel than any other screen on the market.

Weight Each 22 Pounds.

TACKLE HOISTS

MILWAUKEE

No. 20.

No. 30.

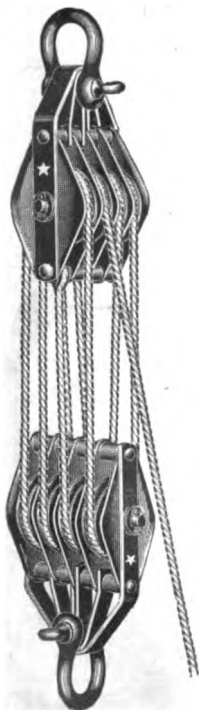

Best Malleable Iron, without Rope.

- Each
 No. 20—For $\frac{1}{2}$ inch Rope, Capacity 600 to 1500 Lbs.,
 One Man Can Lift 600 Lbs., Weight Each 7 Lbs. . . . \$3.00
 No. 30—For $\frac{3}{4}$ inch Rope, Capacity 600 to 2000 Lbs.,
 One Man Can Lift 600 Lbs., Weight Each 16 Lbs. . . . 5.00

Will hold load at any point without fastening the rope. It is quick lifting, quick lowering and light.

Made of Malleable Iron. Easy to operate, locks and unlocks with one rope. Can lift or lower the load at will.

AUTO BLOCKS

LITTLE GIANT

Forged Steel Blocks, Roller Bearing, without Rope.

All automobilists should have a set of Little Giant Auto Blocks included in their repair kits.

- Per Set
 No. 501—Little Giant Auto Blocks
 Consists of 2 Four Sheave
 Blocks with Iron Sheaves
 Equipped with Hardened Steel
 Roller Bearings, which Reduces
 Friction to a Minimum,
 Steel, Forged Steel Shackle At-
 tachment, for $\frac{1}{2}$ inch Rope,
 without Rope \$6.00

Weight Per Set 8 Pounds.

One pound pull on the rope of this set of blocks means about eight pounds pull on the object to be moved or lifted.

These Blocks are light and compact and not only handy for road emergencies, but are useful for lifting purposes in and around garages.

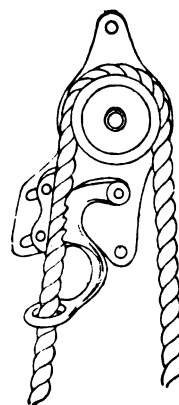

SAFETY HOISTS

HALL

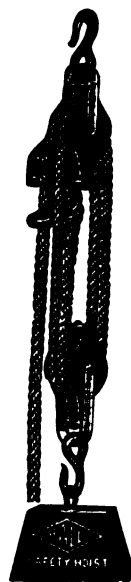

HALL CENTER-PULL

No. 5.

Sectional view illustrating Lock Shoe and Dog. Note the adjustment for different sized rope.

No. 6.

Steel Body Plates, Double Steel Straps, Forged Steel Hooks, Steel Pins, without Rope.

- Each
 No. 5—For $\frac{3}{8}$ inch Rope, Capacity 2500 Lbs., 2 Sheaves,
 One Man Can Hoist 600 Lbs., Weight Each 6 Lbs. . . \$3.70
 ★No. 6—For $\frac{3}{8}$ inch Rope, Capacity 4000 Lbs., 3
 Sheaves, One Man Can Hoist 650 Lbs., Weight Each
 9 Lbs. 4.00

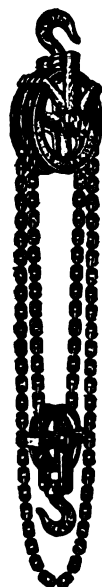

★No. 6 is adapted for heavy lifting. The center-pull equalizes the load so every sheave and rope is subject to equal strain. Reduces friction to a minimum, thereby increasing the lifting capacity one-third more.

The only hoist with an adjustable safety lock to fit various sizes of rope, new or worn. Holds the load at any point in a grip that cannot slip, even though rope is wet or greasy. A slight outward pull on the pull rope sets the lock, the load hangs suspended. An inward twitch on pull rope releases the lock. Hall Safety Hoist elevates, lowers, locks and unlocks with one rope only. There are no trip ropes to bother with.

CHAIN PULLEY BLOCKS

Allow four feet of chain for each additional foot of life.

Always Specify Direct Blocks when Ordering This Style.
 Order by Number.

The "Direct" Blocks are made to meet a demand for a low price where a high efficiency is not required. They are well made, of the best material, and the chains tested beyond their rated capacity.

CHAIN HOISTS

YALE TRIPLEX

"From Hook to Hook a Line of Steel."

The Strongest, Quickest and Easiest Hoist.

Yale Triplex Blocks are rated on a capacity basis of a long ton, 2240 lbs., and each block is tested at the factory with a 50 per cent overload of 3360 lbs. for each rated ton. Every detail in Yale Hoists is the result of careful research in the factory, laboratory and the most severe tests under service conditions. Its independent automatic load-sustaining device, operated entirely separate from its lifting mechanism, admits of 80 per cent of the power exerted by a man pulling on the hand chain being transformed into actual lifting energy.

Yale Steel Safety Hooks, Steel Suspension Members and Yale Steel Chain are some of the exclusive features of these blocks introduced to safeguard operators and loads.

The blocks are so planned that all capacities are made up of the four basic sizes, namely, $\frac{1}{2}$, 1, $1\frac{1}{2}$ and 2 ton. This simplifies the renewal of parts; for example, the 2 ton parts fit all sizes, 4 tons and larger.

$\frac{1}{2}$ to 2 Ton. 3 and 4 Ton.

5 to 10 Ton.

10	15	432.00	12	5.85	57	606	696	210	140

*Figures denote height in feet which blocks with regular lengths of chain will hoist above level on which operator stands.

†"Extra Hoist Per Foot" includes sufficient hand and load chain to increase the travel of the lower hook 1 foot.

‡On basis of 2000 lbs. to the ton.

The chains and working parts of all Triplex Blocks from 4 to 10 ton capacity are interchangeable with 2 ton size. The increased capacity and strength is obtained by multiplying sheaves with heavy yokes and hooks.

MOORE ANTI-FRICTION DIFFERENTIAL

With Automatic Brake. A Perfect Lock.

The heaviest load may be lowered by a slight pull on the hand chain, a few pounds only, and yet is held with perfect safety at every point. The brake may be readily adjusted to lower more or less freely, or to take up wear. The lifting mechanism is simple and powerful. A perpetual compound lever, the highest efficiency; the greatest durability; light, compact and strong. With the sizes up to three tons, inclusive, one man, and with the larger sizes, two men, can lift to the full capacity of the Hoist. The load is self-sustained at every point. All working parts protected from weather and dust. The Hoist always hangs plumb.

†Figures in seventh column denote approximate height which blocks, with regular lengths of chain will lift from level on which operator stands.

For every additional foot of lift desired, two feet extra of both main and hand chain will be necessary.

Order by number.

Average Weight Per Dozen 3/4 Pound.

One Dozen in a Carton.

DRIVE WELL POINTS

Made of Galvanized Wrought Iron Pipe, Covered with Brass Wire Gauze.

Nos.	90	94	98
Inside Diameter of Pipe, In.	1 1/4	1 1/4	1 1/4
Length of Point, Inches.	24	30	36
Length of Jacket, Inches.	18	24	30
Square Inches of Openings.	20	26 1/2	33
Ave. Weight Per Dozen, Lbs.	63	75	90
60 Gauge	Each, \$1.65	2.15	2.55
90 Gauge	Each, 2.75	3.45	4.15

These Points are made from the best quality pipe and are punched with elliptical-shaped holes of uniform size, equal distance apart.

RUBBER BUCKETS

VICTOR

In Use.

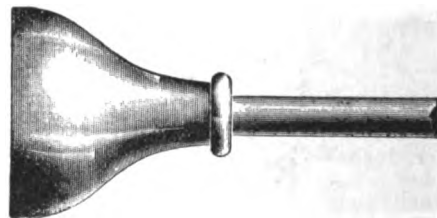

Rubber Turned Back.

For Chain Pumps.

Victor—Best Quality White Rubber, Galvanized Malleable Iron Links, Adjustable Thumb Nut. \$1.60
 Weight Per Dozen 15 Pounds.
 Open Stock.

SUCTION PUMPS

No. 10—Seamless Rubber Cup, 4 inch Diameter, 42 inch Wood Handle \$6.50

The occasional use of this Pump will keep the sink trap free from all refuse matter and will instantly clean wash bowl, urinal or water closet, without taking them apart.

Weight Per Dozen 12 Pounds.
 Open Stock.

VACUUM FORCE PUMPS

ROSE DOUBLE ACTION

Each

Rose Double Action—26 inches Long Over All, Double Brass Plunger, Double Cup Washer, 1 1/4 inch Outside Diameter, 18 Gauge Heavy Seamless Brass Cylinder, Heavy Brass Top and Base, 3/8 inch Tool Steel Plunger Rod and Handle, 16 inch Stroke, 4 1/2 inch Diameter at Base, First Grade Heavy Flexible Rubber Cup \$4.00

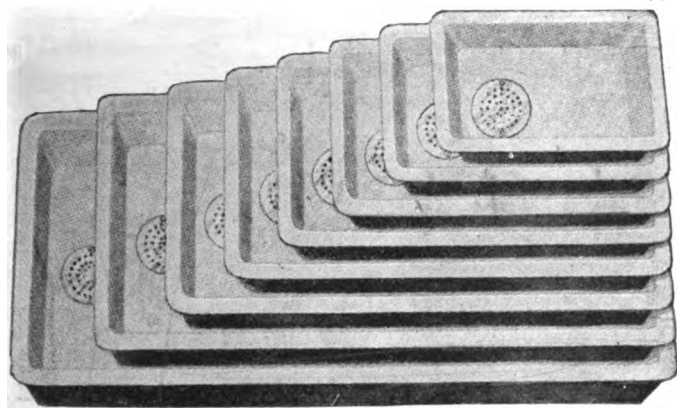

Made for heavy work and will open any stoppage in your plumbing.

Weight Each 3 1/2 Pounds.

One in a Carton.

 No. 645—4 Drawers, Drop Head, Steel Cable Automatic Lift, Panel Front, Solid Oak Case, Built-up Veneered Top or Lid, Golden Oak Finish, Complete with Set of Attachments, Weight Crated 120 Lbs. \$26.40

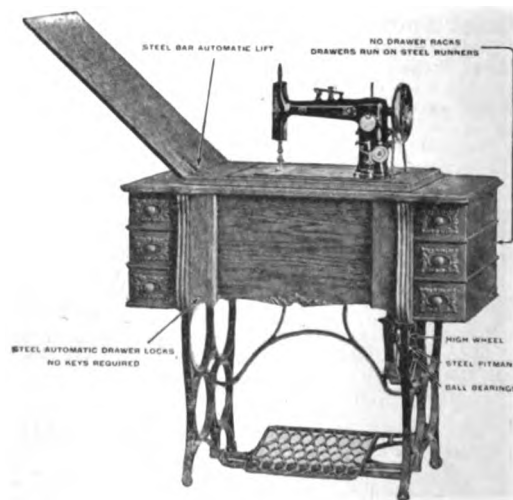

All Above, One in a Crate.

Nos. 626, 625, 736 and 645 Machines Have Automatic Lift.

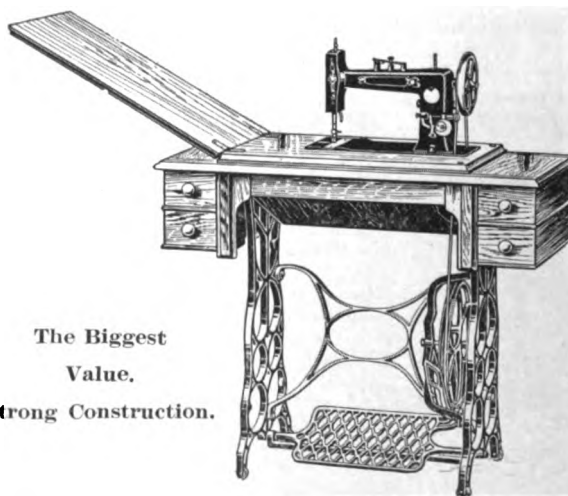

Ball Bearings, Long Steel Pitman French Leg Stand, High Balance Wheel, no Drawer Racks, Drawers Run on Steel Runners, Drawers Lock and Unlock Automatically, no Keys Required.

Our Machines are complete with best sets of Nickel Plated Steel Attachments, Accessories and Instruction Book, and are guaranteed for ten years.

No. 626—6 Drawers, Drop Head, Steel Bar Automatic Lift, Panel Front, Full Quarter Sawed Oak Case and Veneer, Hand Rubbed Mirror Like Finish, Complete with Set of Attachments, Weight Crated 120 Lbs. \$36.50

Each
 No. 736—6 Drawers, Drop Head, Steel Bar Automatic Lift, Solid Oak Case, with Veneered Lid or Cover, High Luster Gloss Polish, Artistic Design, Complete with Set of Attachments, Weight Crated 120 Lbs. \$30.00

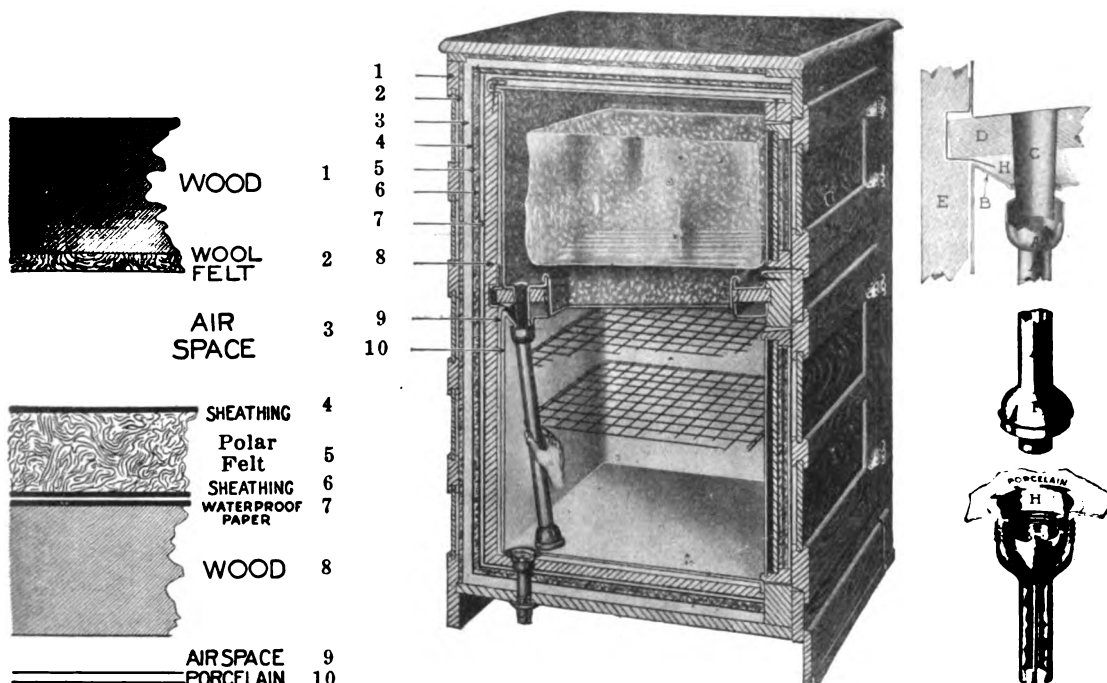

The Biggest
 Value.
 Strong Construction.

Hand Lift, Cone Bearings, High Arm, 5 1/4 inch Under Arm. Each

No. 538—4 Drawers, Drop Head, Drawers Lock Automatically, no Keys Required, Drawers Slide on Steel Runners, Improved Sewing Head, Pretty and Attractive Case, Brass Knobs, Finely Finished, Complete with Set of Attachments, Weight Crated 120 Lbs. \$23.20

LEONARD CLEANABLE REFRIGERATORS

THE LEONARD SYSTEM OF REFRIGERATION

Equipped with these great improvements:

First—Leonard's patent device for returning water to the waste pipe in case of accidental leakage.

Second—Leonard's Patent trap specially designed for porcelain lined refrigerators as per lower illustration.

Third—Leonard's patent for keeping the cold water from contact with the lower waste pipe as shown by the letter "I" in the lower illustration.

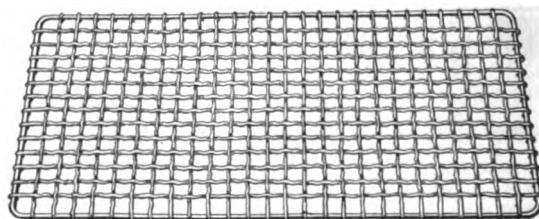

The upper part of the cut shows in detail the arrangement for returning water from accidental leakage to the waste pipe. You will notice the top of the provision chamber is depressed at "B."

Above Illustrations Showing Case Construction and Insulation.

The Polar Felt Insulation is odorless and indestructible and will not settle from the handling of the Refrigerators as is the case with Mineral Wool and Charcoal.

The Leonard Ice Rack is made entirely of heavy galvanized iron and will not mold or decay, will carry off the condensed water to the waste pipe.

The Leonard Shelves are made in the Leonard factory, specially designed and coated with pure tin.

Illustration Shows Circulation of Air in Side Icing Refrigerators.

This system consists of such an arrangement of air passages, flues and ice rack as to expose the largest possible cooling surface to the air in the ice chamber, causing it to condense and settle down on provisions below, as cold air is heavier than warm air. The warmest air in the provision chamber is forced upward to the top, where it is drawn into the ice chamber by suction through the flues or openings made for that purpose to fill the vacuum left by the descending cold air.

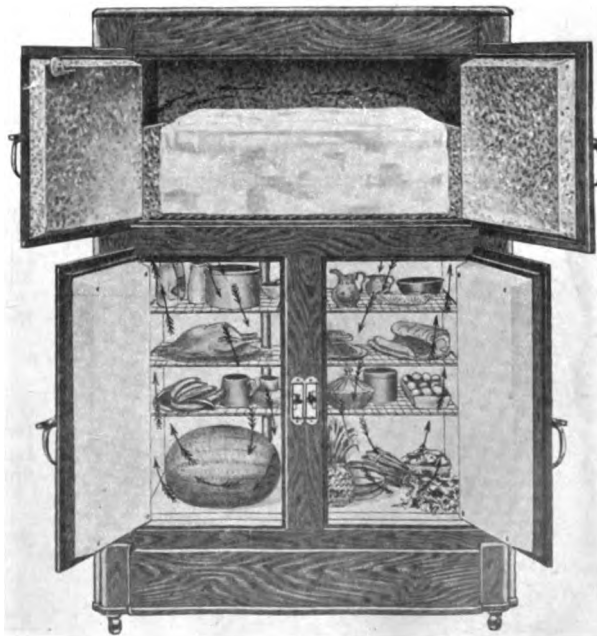

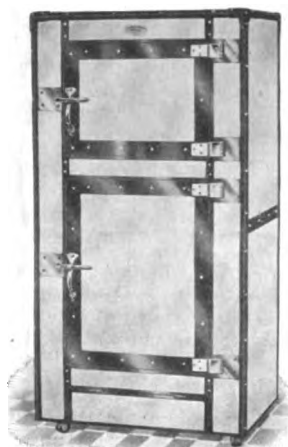

Illustration Shows Circulation of Air in Top Icing Refrigerators.

LEONARD CLEANABLE REFRIGERATORS

All Porcelain Inside and Outside, One-Piece Porcelain Lined Provision Chamber.

Made Complete in Wood with Ten Walls for Insulation, One-Piece Porcelain Lining Before the Ornamental Porcelain and Aluminum is Put on the Outside, Sheets are Held in Place with Heavy Brass Strips, Nickel Plated, Insulated with Polar Felt and Water Proof Paper, Pure Tin Coated Wire Shelves, Nickel Plated Trimmings.

Two Door Apartment, Front Icing.

No. 1101.

No. 1101—Ice Capacity 95 Lbs., Weight 417 Lbs. . . . \$150.00 Each

The Two Covers Slide on Rollers, One Over the Other.

WATER COOLERS

TWENTIETH CENTURY

Construction—(See Sectional View): A—Indurated Fibre Container, with ice. B—Vitreous-Porcelain Jar, glazed both inside and out. C—Automatic "C. & H." Faucet, connected direct to jar. D—Drip Faucet for waste water from melting ice. E—Demijohn partly filled with water (not furnished with Cooler unless specially ordered). F—Rubber Gasket supporting demijohn and protecting jar. G—Removable portion of container cover. H—Fibre Tray under Cooler. J—Opening in drip tray which allows any sweat from the Cooler to drip into waste bucket of stand.

The Ice Chamber, being made of Indurated Fibre, is a non-conductor and reduces ice consumption to a minimum. The water passes direct from the bottle to the jar and thence directly through the faucet to the glass.

Indurated Fibre Ice Container, White Glazed Porcelain Water Jar, Nickel Plated Faucet, Indurated Fibre Tray and Waste Bucket.

No. 560—Ice Capacity 15 to 20 Lbs., Height without Bottle 39 inches, for 5 Gallon Demijohn, Steel Stand with Glass Ball Feet, Mahogany Finish, without Demijohn, Weight About 35 Lbs. \$13.00

Green Glass Demijohn—Capacity 5 Gallons, for No. 570 Cooler. 1.50

Cooler and Stand Packed in Carton; Bottle in a Crate.

The above cut shows the construction and position of the mechanism of the White Mountain Freezer. The can moves from right to left, the outside beater moves from left to right, scrapes with its wooden bars the frozen cream from the can and throws it toward the center, where it is met by the floats of the inside beater moving in an opposite direction, and returned to the inside surface of the can to be refrozen. The triple motion thus induced keeps the cream constantly moving and insures every particle being smoothly and evenly frozen.

SELF-MEASURING FAUCETS

ENTERPRISE

Improved Patent Suction and Force Measuring Faucet.

No. 61—Tinned, for Molasses, Thick Oil, Varnish, Etc., Weight Each 10 Lbs.	Each	\$4.00
---	------	--------

Warranted to measure correctly and draw a gallon of molasses in winter in one minute.

Each Faucet is warranted to measure according to U. S. Standard.

It saves time as it draws molasses directly into a jug or bottle without the use of a funnel.

It is cleaner, as it dispenses with the use of measures and consequently free from flies and dirt.

SELF-PRIMING AND MEASURING PUMPS

Fit Chopper with coarse knife and thumb screw and over these screw Attachment to the end of cylinder. The New Patented Corrugated Spout prevents air entering the casing, thus assuring the preservation of sausage.

POWER PULLEYS

PLANK'S

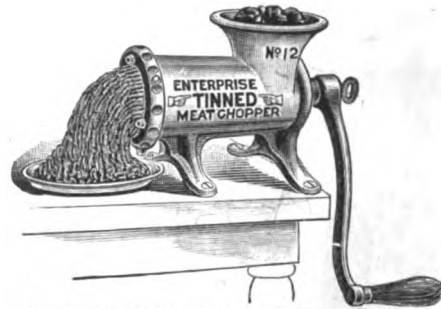

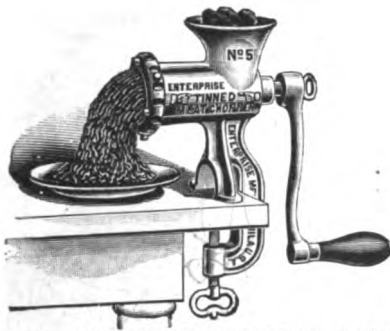

For Enterprise Meat Choppers, Cast Iron, Bright Red Enamelled.

Easily attached, remove handle of machine, slip on the Pulley, tap Pulley lightly with hammer when placed on shaft, and replace thumb screw. These Pulleys will stand all necessary strain to run their respective machine. The face of the Pulley is brought away from the hopper of the machine, which prevents accidents.

Per Dozen	\$8.00	9.25

The spout being corrugated, prevents air entering casing, thus preserving the sausage.

SAUSAGE STUFFERS, LARD AND FRUIT PRESSES

INDEPENDENT QUICK ACTION

Screw Movement.

Heavy Cast Iron and Steel, Black Enameled, Heavy Tin Plate Colander and Outside Cylinder.

Nos.	2	4	6	8
Capacity, Quarts	2	4	6	8
Weight Each, Lbs.	15	17	18	20
Each	\$3.75	4.00	4.80	5.50
Sausage Stuff. Attachm't. Each,	1.00	1.10	1.25	

The pressure is regulated by a bar which revolves on a rod in which is cut a special thread of extra strength. By means of a "Quick Action" device the pressure bar may be attached or released from the rod at any point. A few turns of the bar is all that is required to secure the necessary pressure.

The Sausage Stuffing Attachment is a heavy tin cylinder with suitable bottom and stuffing tube, which is substituted for the two cylinders used in pressing fruits.

Each Press and Attachment in a Separate Corrugated Case.

ENTERPRISE

Screw Movement.

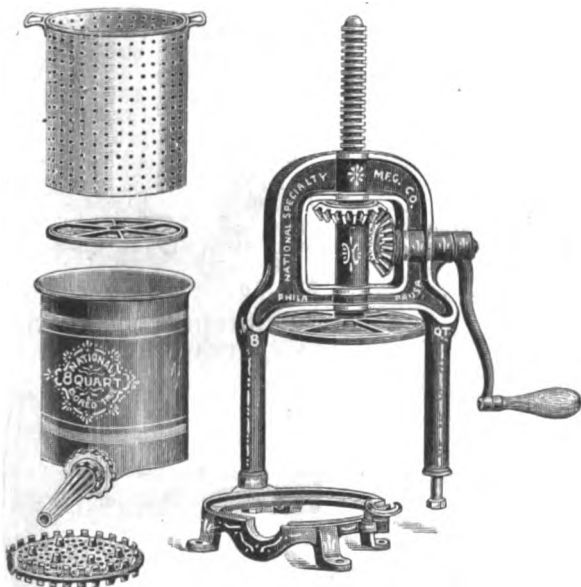

Corrugated Spout, Cast Iron, Japanned and Striped.

Nos.	15	25	31	35
Capacity, Quarts	2	4	6	8
Weight Each, Lbs.	25	45	53	60
Each	\$5.50	7.00	8.00	9.00

Has true bored Iron Cylinder. Tin Cylinder with lips to enable the operator to remove the hot cracklings with little or no inconvenience. A patent latch prevents breakage of plates.

One in a Case.

NATIONAL

Screw Movement.

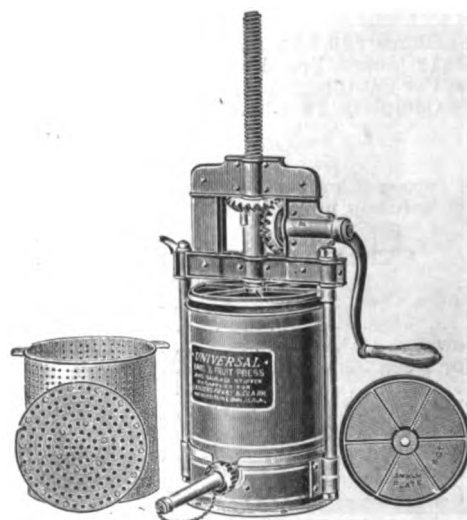

Cast Iron, Japanned and Striped.

Nos.	40	60	80
Capacity, Quarts	4	6	8
Weight Each, Lbs.	46	55	65
Each	\$7.00	8.00	9.00

Swinging arch, removable cylinder, perforated tin strainer, two removable plunger plates. All parts are interchangeable.

One in a Crate.

UNIVERSAL

Screw Movement, Ball Bearing.

All Steel, Japanned and Striped, One-Piece Sheet Steel Bowl.

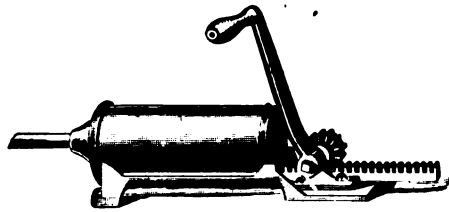

Nos.	44	66	88
Capacity, Quarts	4	6	8
Weight Each, Lbs.	43	53	56
Each	\$7.50	8.50	9.50

For pressing Fruit or Lard, use perforated Cylinder and Bottom Plate and small Plunger Plate. A cloth or bag should be used when pressing fruit, to prevent the pulp or seeds passing through holes in cylinder. For stuffing sausage, remove perforated Cylinder and Bottom Plate, and use large Plunger Plate.

One in a Crate.

The Reliance is a High Grade Scale at a Moderate Price, combining to the greatest degree quality and accuracy. Beam is equipped with new style Balance Ball, stamped with capacity. Graduations are made with great care and precision and markings are very plain and distinct. Counter Poises numbered to correspond with Beam. Each Scale sealed and tested from its smallest graduation to its full capacity. Each Scale assembled and fitted by experts. A Scale that can be relied upon to give long and accurate service.

STANDARD AMERICAN WEIGHTLESS

Will Pass All State Inspections.

With Weightless Beam no Weights to Handle or to Lose.

With wheels, painted blue and striped, black japanned iron parts, hardwood pillar and cap.

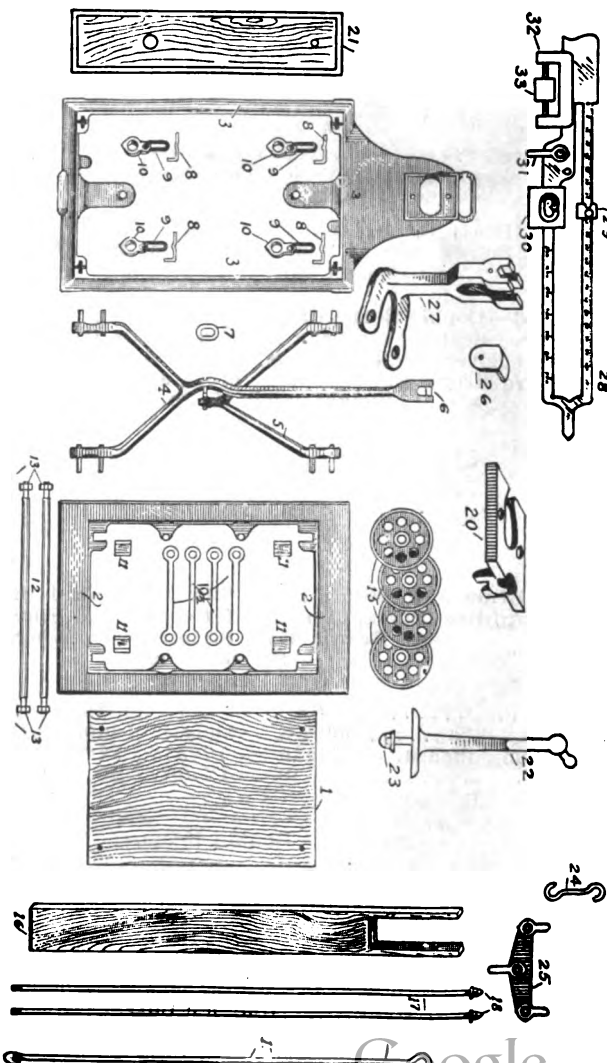

A portable platform scale graduated to pass inspection in any state, of good appearance, of absolute accuracy and with a novelty in the way of a new beam. This beam shows the full capacity of the scale without the use of any loose weights. It is made of a metal sufficiently hard to withstand the wear and tear of the steel tooth or dog which usually accompanies the poise of a full capacity beam.

DROP LEVER PORTABLE PLATFORM

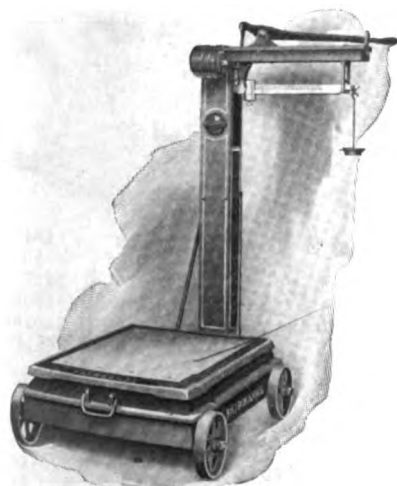

These Scales are adapted for weighing heavy boxes, cases and bulky loads. The Drop Lever when released from the Hook on Cap lowers the Scale Levers so that the Platform is brought to rest on lugs at the corners, in which position the Scale may be loaded or unloaded without jarring the mechanism. In weighing, the Drop Lever is brought down under the hook.

Arrow Tip Single Brass Beam, with Brass Sliding Poise and Set Screw, Wood Pillar Braced with Iron Rod, Drop Lever, Finished in Blue and Gold, Well Varnished.

Without Lever and Wheels.

WAGON SCALES

STEEL PITLESS

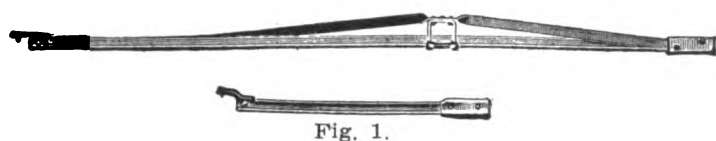

Fig. 1.

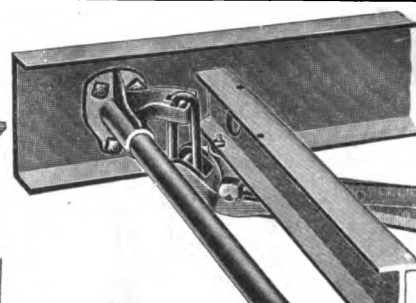

Fig. 2.

Figure 1 shows the corner construction in detail and how the tubular steel cross pieces pass through heavy gray iron corner brackets securely bolted to steel channel end beams. These cross pieces pass through both bracket and channel and are secured by lock nuts on back side of channel beam.

Figure 2 shows the long and short levers that are beneath and support the platform, same being made from a single piece of heavy "T"-shaped rolled steel. The long levers are trussed with heavy steel bars, making them perfectly rigid under any strain.

Direct Steel Lever Construction, Combination Three-Bar Solid Brass Beam, Graduated to Full Capacity, Brass Faced Sliding Poises, Finely Polished.

Double Beam.			Triple Beam.

Each	\$155.00	159.00	Each	\$161.00	165.00

Beam—The upper bar is graduated by 10 pound marks to 2000 pounds capacity and has brass faced sliding poise provided with set screw so that it can be fastened at any point. The lower bar is graduated to 500 pounds by 2½ pound marks and has brass sliding poise. The middle bar is graduated to balance of capacity of scale by 500 pound notches and is provided with brass-faced sliding poise, fitted with steel pin which drops in notches. This poise is sealed on each notch, thus making any variation in weight impossible.

Beam Pivots are of best tool steel drawn to a knife edge and carefully tempered; each one being secured in beam by hard friction steels which pass through beam, preventing the loop from chafing or binding against beam. The beam pivot loops are carefully tempered. The beam is equipped with a balance ball to balance off the weight of the platform as it may vary from accumulation of ice, snow, etc., and also has a counter poise for greater variations in weight.

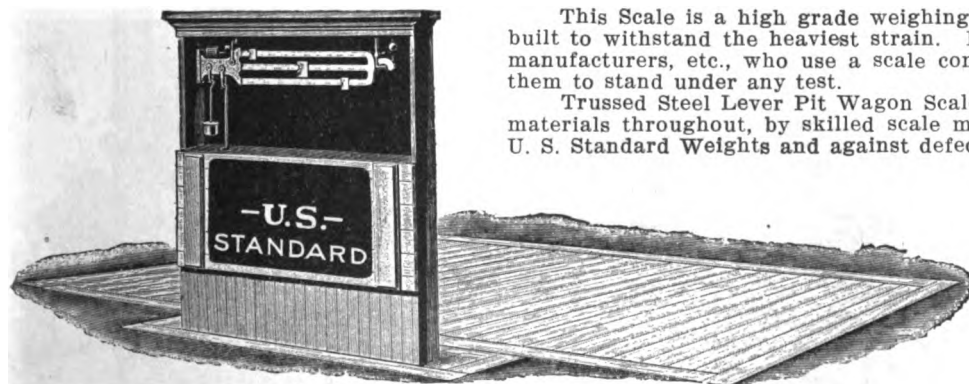

This celebrated Steel Pitless Scale is guaranteed to be sealed to U. S. Standard Weights, and against defective material and workmanship, and is carefully crated and boxed for shipment with complete printed directions for setting up and installing. Purchaser is required to furnish only the platform planks.

★Note—Not Carried in Stock; Shipped Direct from Factory.

TRUSSED STEEL LEVER PIT

This Scale is a high grade weighing machine, is accurate in weighing and is built to withstand the heaviest strain. It is intended for coal and grain dealers, manufacturers, etc., who use a scale constantly under all conditions and require them to stand under any test.

Trussed Steel Lever Pit Wagon Scales are made upon honor from high grade materials throughout, by skilled scale mechanics and guaranteed to be sealed to U. S. Standard Weights and against defective workmanship and material.

T Shaped Rolled Steel Lever, Combination Three-Bar Solid Brass Beam, Graduated to Full Capacity, Brass Faced Sliding Poises, Best Tool Steel Bearings Carefully Tempered and Ground to a Knife Edge.

GLASS PUSH PINS

MOORE

No. 1

No. 2

Glass Head, Steel Point. Per Dozen Boxes
No. 1—Six in a Box \$1.80
No. 2—Six in a Box 1.80

They consist of fine, round, tapered steel points which are firmly embedded in handles of polished glass.

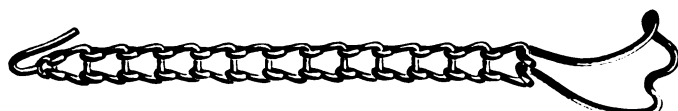

Moore Push Pins enable one to fasten up the innumerable little things on plaster walls and painted wood work without driving a tack or nail.

The handles are so shaped as to allow of a firm hold with the fingers, and the Pins can readily be inserted into wood or plaster with a slight awl-like motion of the hand.

They are strong and ornamental, and can be easily withdrawn, leaving a scarcely perceptible mark in the wood or plaster.

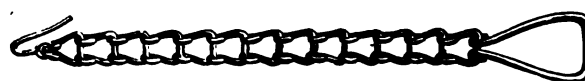

In hotels, boarding schools, and other places where the use of tacks and nails in the walls is prohibited, Moore Push Pins are allowed. 24 Boxes in a Carton.

ELECTRIC SAD IRONS

DOVER

Cut Shows Iron Complete.

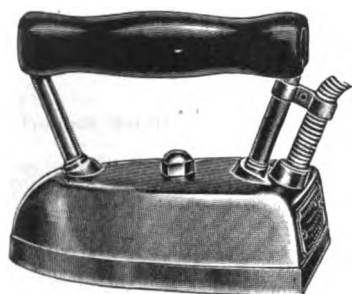

Cut Shows Waxer and Cleaner.

Complete with 6 foot Feed Cord with Two Plugs, Stand, Waxer and Cleaner.

- No. 6D-100— $3\frac{1}{2} \times 6\frac{1}{4}$ inch Ironing Face, Full Nickel Plated and Polished, Blued Base, Ebonized Handle, Detachable Plug at Iron, Pull-Apart Attachment Plug at Socket, Rigid Heavy Contact Posts, Complete with Three-Section Electro-Welded Steel Safety Stand, Waxer and Cleaner, Weight Each 6 Lbs., for 110 Volts.....\$5.60

The cord is protected at the iron by spiral steel spring. The heating element of the Dover is constructed by a secret process of imbedding the resistance wire in a special cement. Weight Per Dozen 108 Pounds. One-quarter Dozen in a Box.

DOVER CONSUMERS'

Complete with 6 foot Feed Cord and Stand.

- No. 2— $3\frac{1}{2} \times 6\frac{1}{4}$ inch Ironing Face, Full Nickel Plated and Polished, Blued Steel Base, Rubberoid Finish Black Enamelled Wood Handle, Best Designed Attachment Plug, Two-Section Electro-Welded Steel Safety Stand, Wt. Each 6 Lbs., for 110 Volts....\$4.00

The heating element consists of special resistance wire embedded in a composition which is a perfect insulator and readily conducts heat, prevents overheating of resistance wire, protects wire from oxidation, saves current.

The top section consists of heavy sheet steel hood formed to prevent radiation of heat from interior of iron, to which are attached the round steel handle supports. A heat reservoir of solid iron is bolted to the heating element and extends into the space formed by the hood.

Weight Per Dozen 100 Pounds. One-quarter Dozen in a Box.

PRINCESS DE LUXE

Cut Shows Iron Complete.

Stamped Steel Stand Furnished with Each Princess Iron.

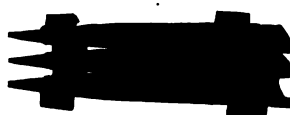

Complete with Stand, Plug and Detachable Cord.

- Princess—Heavy Sheet Steel Top or Shell, Smooth Sole Plate, Highly Polished De Luxe Finish, Large Dull Ebonized Handle Shaped to Fit the Hand, Nickel Plated Stamped Steel Handle Strap, Heavy Asbestos Lining, Casting Pressure Plate with Double Deck Safety Type Steel Stand, Weight Each $6\frac{1}{2}$ Lbs., for 110 Volts.....\$5.00

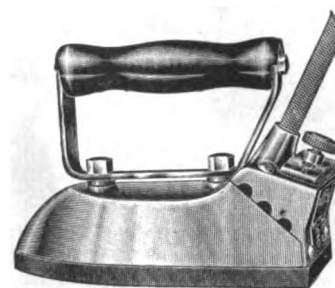

The Princess is compact, simple in construction and beautiful in appearance. The heating element is made of Ni-Chrome Ribbon Wire wound on mica and sealed between sheets of the same material, absolute insulation, wiring is arranged to develop more heat at the point where the wet garments are first engaged.

Weight Per Dozen 110 Pounds. One in a Carton; Six in a Case.

A-BEST-O AUTOMATIC

Cut Shows Electro-Welded Stand.

Complete with 6 foot Feed Cord, Stand, Waxer and Cleaner. Each

- No. 6 $\frac{1}{4}$ -100—Household, 4×7 inch Ironing Face, Full Nickel Plated and Polished, Blued Base, Ebonized Handles, Pull-Apart Attachment Plug at Socket, Complete with Three-Section Electro-Welded Steel Safety Stand, Waxer and Cleaner, Weight Each 7 Lbs., for 110 Volts.....\$9.00

The cord is protected at the iron by spiral steel spring. The iron with self-control, a Thermostat does the work. It is regulated by the means of a key at the back of the iron and can be set so that the iron will maintain any temperature between 200 and 600 degrees F. The A-Best-O uses enough current to render the required heat, but not a spark more.

Weight Per Dozen 116 Pounds. One-quarter Dozen in a Box.

UNIVERSAL ELECTRIC THERMO-CELL

A special feature of this iron is the method of heat distribution through a ribbed iron plate, which conducts the heat to the point and edges, the place where it is most needed. The Thermo-Cell stores the heat and prevents radiation except through the ironing surface.

Complete with 8 foot Cord, Spring Reversible Stand.

- No. E901N—Heavily Nickel Plated, Ebonized Wood Handle, Complete with 8 foot Mercerized Silk Finish Flexible Cord, Indestructible Plug and Hubbel Separable Attachment Plug, Spring Reversible Stand, Weight Each 6 Lbs., 580 Watts.....\$5.00

Weight Each Boxed $8\frac{1}{4}$ Pounds.

One in a Box.

SAD IRONS

E-Z GAS

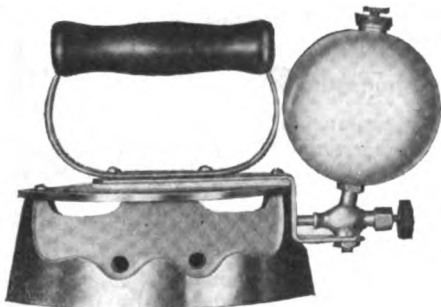

Complete with 6 feet High Grade Braided Covered Hose and Asbestos Stand.

Each

E-Z—High Grade Iron, Carefully Ground, Flat Smooth Bottom, Highly Polished and Nickel Plated, Spring Cushion Handle which Eliminates Constant Jars, Weight Each 6 Lbs. \$4.50
The E-Z Gas Iron has all the latest improvements, can be attached to any gas fixture, has regulating valve to produce any desired heat. The burner forms a perfect combustion of air and gas, will not flash back, is safe and odorless. Hose connection is above the valve which prevents heat from affecting the rubber ends of hose.

Weight Each Boxed 7 Pounds.
One in a Box.

COMFORT GASOLINE

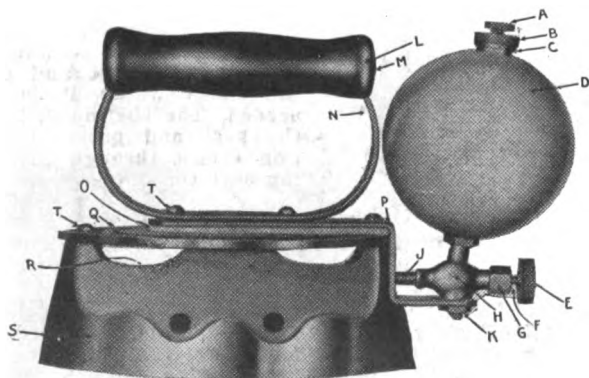

Best Grade Iron, Nickel Plated and Polished, Heavy Seamless Brass Reservoir, Nickel Plated, Capacity $\frac{3}{4}$ Pint.

Each

Comfort—Double Pointed, Ebonized Cool Handle, Operates Five Hours on One Filling, 18 $\frac{1}{2}$ Square inches Ironing Surface, Complete with Small Pump, Weight Each 6 $\frac{1}{2}$ Lbs. \$4.80
The Comfort is two-point style, can be operated forward and backward, is quick lighting, self-cleaning generator, positive shut-off against pressure, perfect regulation, all parts are interchangeable, takes less alcohol to light this iron than any other gasoline iron.

Weight Each Boxed 8 Pounds.
One in a Box.

The No. 82 Polishing Iron has rounded edges and is adapted to laundry and general purposes. The No. 90 is intended for ironing and polishing small articles, silk hats, etc.

Weight Per Set 22 Pounds.

SAD IRONS

UNIVERSAL THERMO-CELL LAUNDRY

Heavily Nickel Plated.

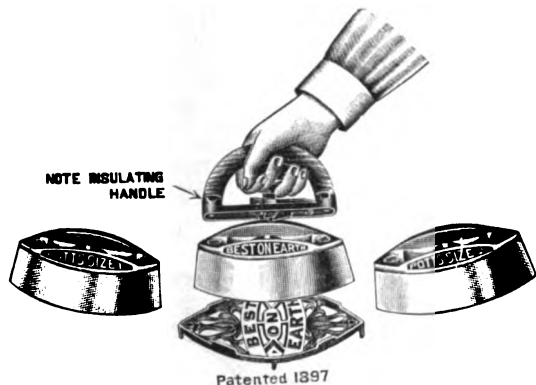

Per Set

No. 123—Set, Consists of One Each 4½, 5 and 6 Lb. Double Pointed Irons, One Gravity Lock Handle and One Stand\$4.00

The Thermo-Cell is a dead air chamber surrounding top surface of iron, is insulated to prevent the radiation of its heat. The locking device of the handle contains no springs.

Weight Per Dozen Sets 210 Pounds.
One Set in a Box; Six Sets in a Case.

B. O. E.

Nickel Plated, Alaska Malleable Handle.

Per Set

B. O. E.—Extra Heavy, Nickel Plated Base, Top and Handle Bar, Alaska Wood Grip, Malleable Iron Stretcher, Set Consists of Three Double Pointed Irons, One Handle and Stand.....\$2.80

The Alaska Handle furnished with this iron is one of the principal features, because it has a malleable stretcher bar which is non-breakable and it has an insulating space between the wood handle bar which keeps the wood part cool and prevents the screws from burning out.

Weight Per Dozen Sets 220 Pounds.
Six Sets in a Case.

WILLIAMS

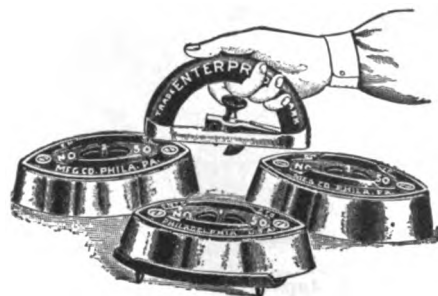

Nickel Plated, Cold Handle.

Per Set

No. 50—Cold Handle, Aluminum Bronzed Cap and Stretcher, Set Consists of Three Double Pointed Irons, One Handle and One Stand, Weight Per Set 15 Lbs.\$1.50

SAD IRON HANDLES

OBER'S PATENT

"HOLD FAST"
PATENTED 1912

Per Dozen
 No. 22 — Hardwood Handle, Stamped Steel Stretcher, Japanned\$1.50

From its peculiar shape it will not cramp the hand. No wooden knob on the catch to break off. Screw fastening handle will not get hot and become loose. Corrects all the weak points of the old style Handle and looks much better on the Iron. Fits all Potts' Irons.
 Weight Per Dozen 8 Pounds.
 One Dozen in a Package.

UNIVERSAL

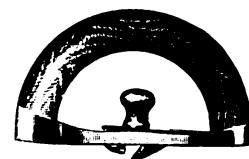

Per Dozen
 Universal—Enameled Hardwood Handle, Steel Base, Coiled Wire Spring, Patented Locking Device\$1.80

By lowering the rear end of handle slightly we have obtained an angle which makes ironing a pleasure, as it relieves the strain on the wrist of the operator.

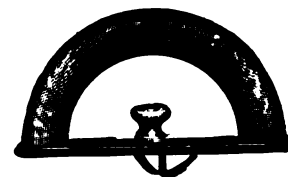

Weight Per Dozen 7 Pounds.
 One-half Dozen in a Package; Six Dozen in a Case.

WASHING MACHINES

TYPHOON, BALL BEARING

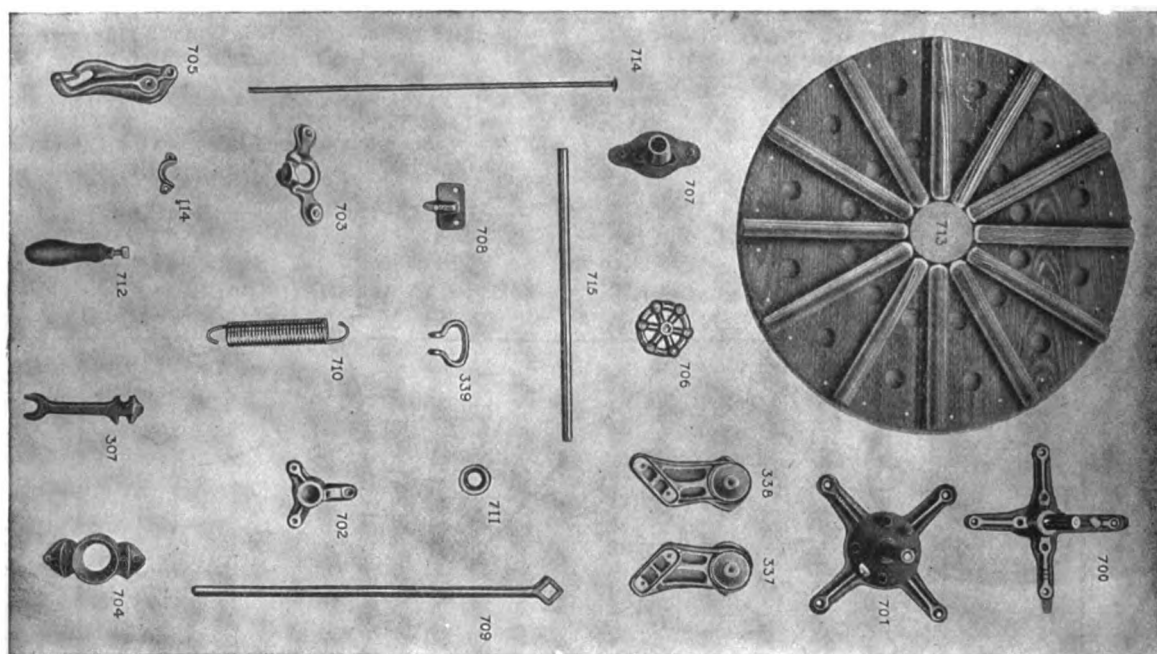

Each
Typhoon—Family Size, Ball Bearing, Virginia White Cedar Tub, Corrugated Sides and Bottom, Electric Welded Wire Hoops, Nicely Finished with Two Coats of Varnish, Patented Tilting Wringer Board, Well Braced Hardwood Frame, Runs by Motor Springs. **\$12.00**

To wash with the Typhoon just swing the tub on its ball bearings. The tub is so evenly balanced on hardened steel balls running in steel cones, that it revolves as easily as a bicycle wheel. It is equipped with two powerful oil tempered springs extending from the center in opposite directions. These furnish the motor power and do almost all the work. The wringer need never be taken off, as it can be tilted back out of the way while operating the washer.

Weight Each Crated 80 Pounds.

WASHING MACHINES

PEACEMAKER

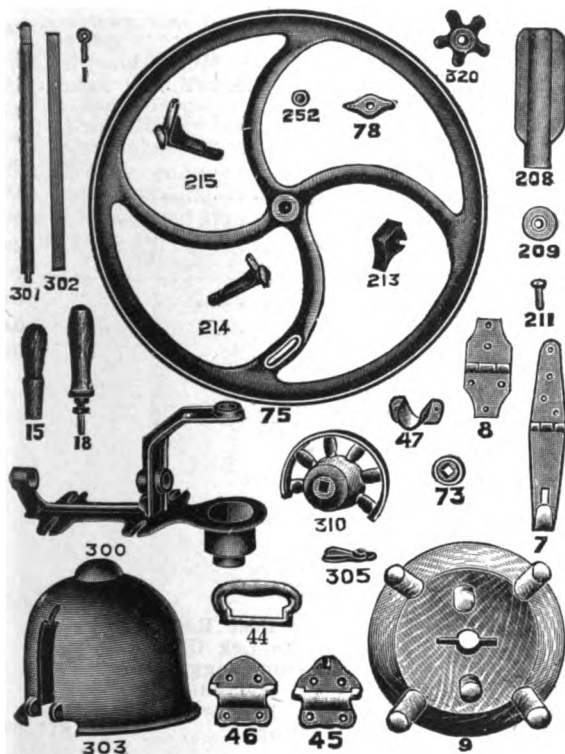

Each
Peacemaker—Family Size, Best Kiln Dried Louisiana Red Cypress Tub, Corrugated Sides and Bottom, Strong Cypress Wringer Box, Solid Stave Legs, Handsomely Finished in the Natural Color of the Wood, Aluminum Bronzed Gearing and Hoops, Blue Enameled Fly Wheel and Hood.....\$11.00

This machine allows no escape of steam, thus keeping the water hot for a much greater length of time. The dasher paddle is made of heavily galvanized cast iron, preventing the fabrics from becoming rust-stained. The dasher is made of 2 inch hardwood. The lid is of double thickness, held together by screws imbedded in the wood. The hood completely covers the gearing, preventing thereby any possible accidents.

Weight Each Crated 80 Pounds.

WISCONSIN VACUUM

Wisconsin Vacuum—Family Size, Galvanized Metal Tub, Best Red Cypress Cover, Varnished, Hardwood Legs, Bolted from Leg to Leg Under Body of Tub, Holding Frame Solid and Prevents Bottom from Sagging, Hardwood Wringer Board, All Gears Cut on Automatic Machines, Making them Quiet and Noiseless, Galvanized Dasher, Hollow Dasher Shaft Permits Dasher to Take in Air at Top, Gold Bronzed Castings..... **\$17.00**

The Dasher, with four spouts, is the heart of the machine. It has a valve at lower end of dasher shaft, which permits of taking in air at upward stroke, then valve closes on downward stroke, forcing suds through the cloth. The dasher also has a rotary motion which turns cloth at each stroke, no boring holes into cloth with pegs.

The Lever to operate Washer is at right of operator. It can be detached to permit Washer to be run by power from fly wheel. You can raise and close lid with lever. A child can operate Washer with ease. Stop Washer before raising lid. To start Washer give fly wheel a turn by hand.

Cover can be raised without disturbing fly wheel. Cover is faced with a catch with a thumb screw so it can be fastened down and prevent cogs from slipping.

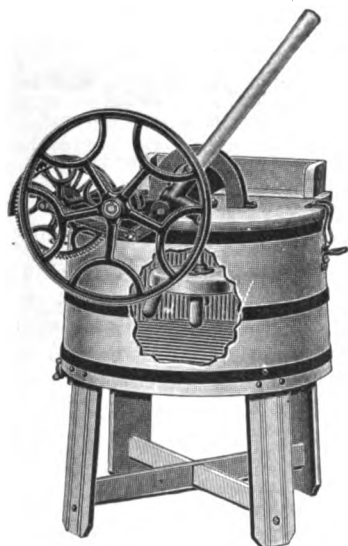

This Machine will wash the most delicate fabrics, lace curtains, shirt waists, etc., without possibility of injury.

It will wash blankets, carpets and heavy clothing equally as well because the water is forced clear through the cloth, carrying the dirt with it.

Weight Each 70 Pounds.

WASHING MACHINES

QUALITY, BALL BEARING

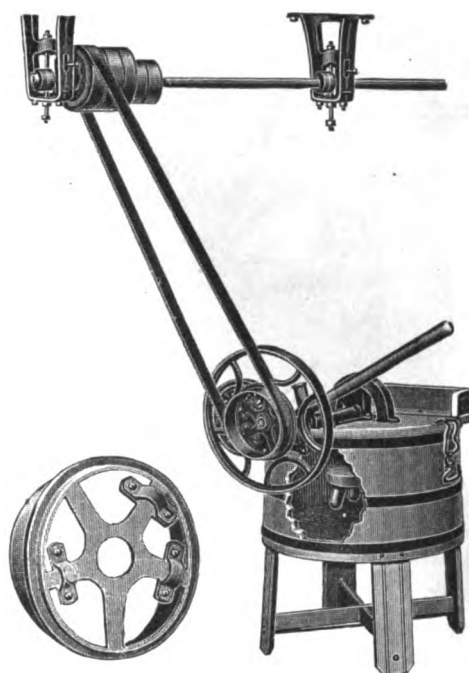

Quality—Large Family Size, Selected Louisiana Cypress Tub, the Best Known Wood for Washing Machines, Handsomely Finished in Moss Green Color, Fully Corrugated on the Inside, Hardwood Legs Firmly Bolted and Braced, Heavy 2-Ply Over Lapping Lid, Non-Tearing Dasher, Protected and Cut Gears, Double Socket for Operating Handle, 3 Extra Heavy Steel Hoops Finished in Gold Bronze, Galvanized Tub Trimmings, Gold Bronzed Fly Wheel **\$17.00**

Quality Washer is a trade winner. A class by itself. Beating price competition with quality. Runs easier and with less noise than any other washing machine.

Weight Each, Crated, About 95 Pounds.

Each

Cut Shows Quality Washing Machine Attached to Line Shaft.

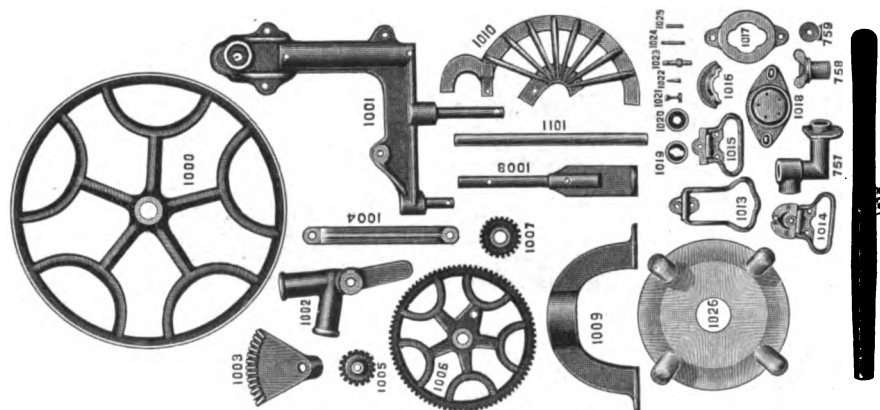

Pulleys—8 inch Diameter, 2 inch Face, Attached to Fly Wheel by Iron Clamps..... **\$1.50**

With this Pulley the Quality Washer can easily be attached to line shaft and operated by a gasoline or steam engine.

The Fly Wheel on Washer should make about 325 revolutions per minute in order to obtain the best results.

Weight Each 5 1/2 Pounds.

WASHING MACHINES

MAGIC MOTOR

Magic Motor—Family Size, Carefully Selected Louisiana Cypress Tub, Varnished, Corrugated Sides and Bottom, Brass Motor, Black Enameled Gear Guard, Bolted Hardwood Legs, Two-Ply Overlapping Lid, Galvanized Tub Trimmings, Three Extra Heavy Steel Hoops, Complete with Two Lengths of Wire Wound Hose. **\$23.00** Each

Magic Motors Only—With Post, Pin Wheel and Hose. **18.00**

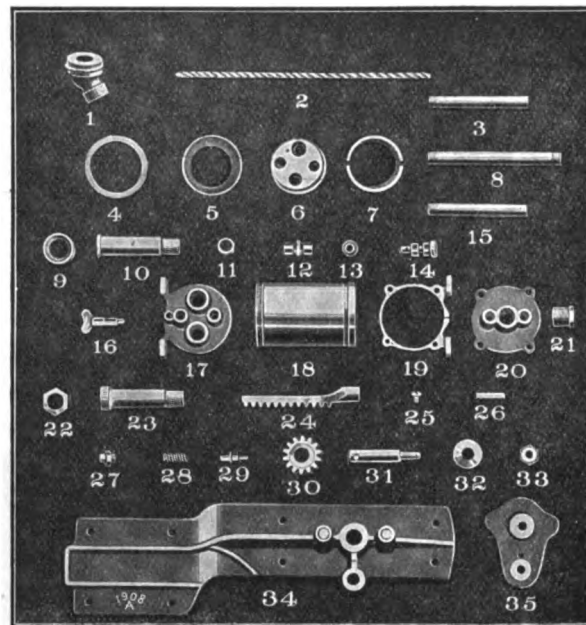

Will operate successfully under a pressure of 30 pounds or over.

The Motor is made of brass and is perfectly machined. There is no small parts to get out of order and all parts are easily accessible. A large roller keeps the rack bar, which operates the agitator shaft, firmly in line. The top of this roller is concaved slightly in order to retain a small quantity of oil, thus keeping the shaft upon which it turns constantly lubricated. There is but three places that require oiling on this Motor.

All working parts are carefully guarded so that there is not the least danger of the operator coming into contact with them.

Weight Each Crated 76 Pounds.

WASHING MACHINES

BRIGHT SPOT MOTOR

Bright Spot—Family Size, Selected Louisiana Red Cypress Tub, Moss Green Finish, Corrugated Sides and Bottom, Brass Motor, Fully Protected Gear Rack and Gear, Bolted Stave Legs which can be Removed when Necessary, Complete with Two 4 foot Lengths of Wire Wound Hose.....\$22.00

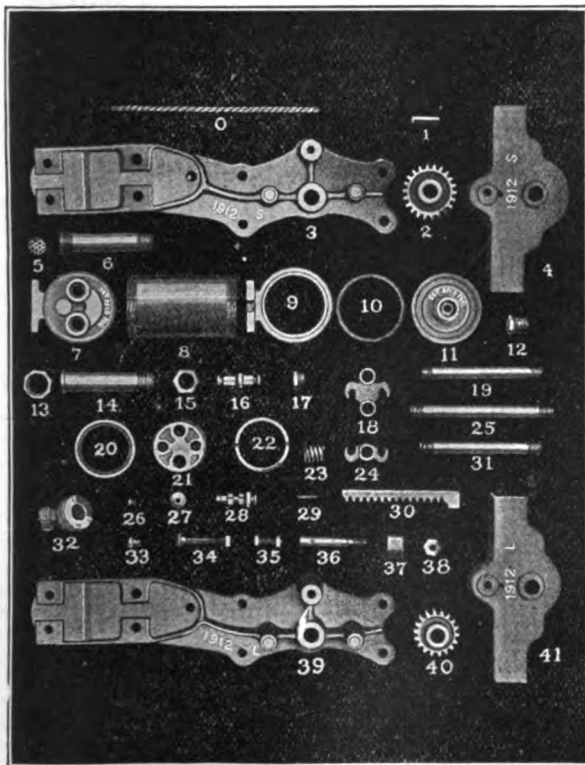

Bright Spot Motors Only—With Post, Pin Wheel and Hose.... 17.00

Will operate successfully under a pressure of 20 pounds or more. The motor is made of brass, thereby making it rust proof. Every part is carefully machined and tested.

It has top and bottom bearings for agitator shaft, with large roller at back of bar which is concaved on top to hold oil. This eliminates all friction and causes the motor to work easily and quickly.

An important feature of this machine is the safety dasher which prevents the tearing of clothes, allowing the finest fabrics to be washed without injury.

GENEVA

Cut Shows Table Folded.

Geneva—Large Top, 5 feet Long, 15 inches Wide, Well Machined Birch Legs, Extra Strong Black Enamelled Steel Braces. . . \$31.50
The top is well shaped, built up from narrow pieces, taper dovetailed and glued together, much stronger than solid board, will not warp or twist.

Per Dozen

The legs are set at correct angle to afford greatest rigidity and freedom from spring and give and creep.

It has ample room at the end to iron a shirt and it will not tip from weight at small end. The legs fold toward each other and when the table is folded they do not project to invite injury or cause annoyance in handling. The table folded is only 3 inches thick and the sub-structure is entirely under and within the area of the top.

Weight Per Dozen 204 Pounds.

One-sixth Dozen in a Box.

Per Foot	\$0.30	.30	.30	.30	

Bottom section is constructed with spread, commencing five feet from lower end and having a spread of 5 inches, preventing ladder from tipping over.

Each rung is let into the rail 1 inch with tenon, and secured with 8D casing nails driven edgewise into the rail and rung cannot separate. This prevents twisting tendencies.

Standard Long.

Extension.

VEGETABLE CUTTERS

CHURNS

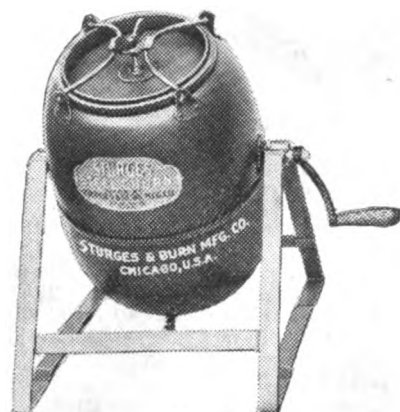

STURGES ALL STEEL

All Steel, not a Piece of Wood About it, Churn is Finished with Blue Enamel Paint on Outside, Heavily Tinned Inside, Cork Lined Cover, Malleable Iron Trunnions, Steel Welded Frame Furnished with Red Enamel Paint. No Bolts or Rivets Used.

Nos.	1	2	3
Size, Gallons	5	7	10
Churning Capacity, Gals. .	$\frac{1}{2}$ to $2\frac{1}{2}$	1 to $3\frac{1}{2}$	1 to 5
Height to Trunnion, In. .	11	24	24
Shipping Wt. Each, Lbs. .	18	30	36
Each	\$5.00	6.50	7.25

The making of these Steel Churns is an achievement never before accomplished, and promises to result in supplanting the wooden churn, just as steel cars and buildings have taken the place of wooden. A Steel Churn is sanitary; milk cannot soak into steel; there is no place for microbes to lodge; no seams to open up, or hoops to drop off in the sun. Steel makes it long-lived, for with care it will last a life-time.

One in a Crate.

No. 1.

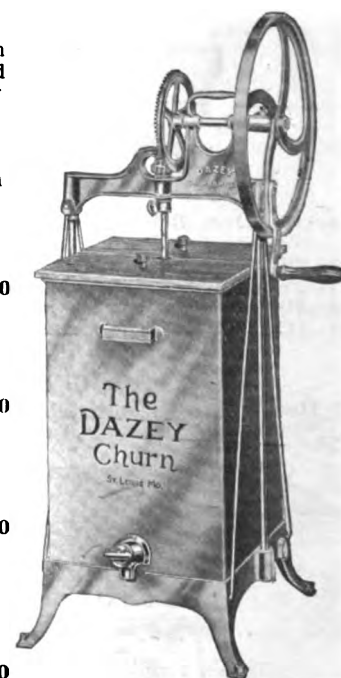

Nos. 2 and 3.

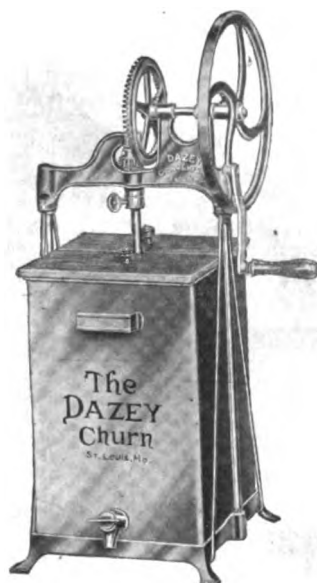

DAZEY

Triple Plated Charcoal Tin Receptacle, Finished Outside in Blue Enamel and Aluminum Lettering, Seasoned White Hard Maple Cover and Dasher, Cast Iron Gears, Nickeled Sanitary Faucet, Receptacle Free from Frame, Dasher Adjustable Up or Down, Steel Frame, Steel and Cast Parts Finished with Two Coats of Aluminum Bronze.

Nos. 1000 and 1600.

Nos. 400 and 600.

The powerful dasher, aided by the square corners of receptacle, produces a scientific agitation, making it possible to separate the butter-making properties in from three to ten minutes.

The dasher is adjustable, therefore when drawn to top of cream (point of least resistance) the Dazeley runs as light as a small churn.

Working of butter is practically eliminated by the Dazeley, because the globules in building up in their natural condition have squeezed out all the milk and are formed into hard, uniform size grains. To wash off outside of grains is all that is necessary.

One in a Crate.

DAZEY GLASS

Double Spring, with Chain.

	Per Dozen		
No. 2—For Fox, Raccoon, Fisher, Wildcat, Opossum, Etc.	\$10.08		
No. 3—For Otter, Lynx, Coyote, Fisher, Wildcat, Beaver, Badger, Etc.....	13.44		
No. 4—For Wolf, Otter, Lynx, Cougar, Beaver, Wolverine, Etc.	15.84		
Specifications.			
Nos.	2	3	4
Spread of Jaws, Inches.....	4½	5½	6½
Length of Trap, Inches.....	14½	17	19
Weight Per Dozen, Lbs.....	18	28½	38¼
Dozen in Barrel	15	10	7

Double Spring, with Offset Jaws and Teeth.

	Per Dozen		
No. 14—For Beaver, Otter, Etc., Spread of Jaws 6½ Inches, Length of Trap 19 Inches, Weight Per Dozen 40 Lbs., 7 Dozen in a Barrel.....	\$16.80		

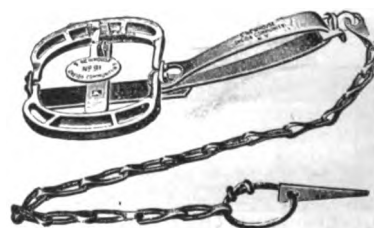

Heavy and stiff springs, offset jaws allow the springs to rise higher when the animal's leg is in the trap. The teeth are close enough to prevent the animal from pulling its foot out.

Single Spring, with Teeth and Chain.

	Per Dozen		
No. 2½—For Otter, Beaver, Etc., Spread of Jaws 5½ Inches, Length of Trap 11 Inches, Weight Per Dozen 26 Lbs., 12 Dozen in a Barrel.....	\$15.84		

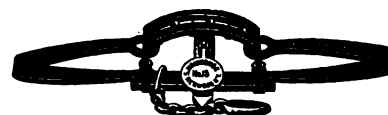

Especially adapted for catching "Otters" on their slides. For this purpose a thin raised plate of steel is adjusted to the pan so when the trap is set the plate will be a trifle higher than the teeth on the jaws. The points of the teeth are very sharp.

Double Jaws, Single Spring, with Chain.

	Per Dozen		
No. 91 —For Muskrat, Skunk, Mink, Etc.....	\$5.76		
No. 91½—For Fox, Skunk, Mink, Raccoon, Woodchuck, Etc.	8.64		
Specifications.			
Nos.	91	91½	
Spread of Jaws, Inches.....	5½	6¼	
Length of Trap, Inches.....	8	9½	
Weight Per Dozen, Lbs.....	10½	16¼	
Dozen in Barrel	30	20	

The double jaws take an easy and firm grip so high up on a muskrat that it cannot twist off.

Double Spring, with Offset Jaws and Teeth.

	Per Dozen		
No. 15—For Bears, Etc., Spread of Jaws 11¾ Inches, Length of Trap 34½ Inches, Weight Per Dozen 234 Lbs., One Dozen in a Barrel.....	\$115.20		

The jaws have an offset of ¼ inch which allows the springs to come up higher on the jaws when the animal's leg is in the trap. This gives the spring a better grip and there is less chance of bone breaking and so allow the animal to amputate its leg.

STEEL GAME TRAPS

ONEIDA JUMP

Preferred by Many Hunters on Account of Being Lighter than the Regular Traps. All are Provided with Single Springs and Niagara Wire Chain.

Small, Single Spring, with Chain.

	Per Dozen

LIQUID VENEER

Liquid Veneer makes refinishing entirely unnecessary. It is a surface food and cleaner that builds up the original finish and makes it brighter than ever. It is not a varnish and no brush is needed for applying—nothing but a piece of cheese cloth; it leaves no streaks but removes all scratches, stains, dirt and dullness and imparts a beautiful gloss. It is a disinfectant, purifying every thing it touches. It will entirely remove that smoky look from the piano and other mahogany and will improve the most beautiful furniture.

L-V FLOOR POLISHER

The L-V Floor Polisher is a wonderful device that enables the housekeeper to care for her floors with the old reliable standby, Liquid Veneer, instead of applying oils and greases.

The mop has two sides, one to apply Liquid Veneer, and the other to wipe dry and polish; it is flat and will go under any piece of furniture and around rugs. It not only cleans the floor, but imparts a beautiful, lasting lustre. It enables you to stand erect in cleaning the floor in half the time and half the labor needed the old way. Easily washed with soap and water.

Per Outfit
L-V Floor Polishing Outfit—Consists of One L-V
Floor Polisher with Handle and Pad, One L-V Dust
Cloth, and One Quart Bottle Liquid Veneer, List \$2.00
Packed in an Attractive Carton.

PRESERVATIVE

Floor Plank Treated with "Preservatine."

Laid in Spring of 1896; Removed Fall 1909. After 13 Years as Good as New and Tough as Hardwood. Although it is Pine.

Result When Not Treated.

Laid in Spring 1896; Removed Fall 1909.

Preserves Wood Against Rot and Decay. A Penetrating, Disinfecting Paint-Stain Applied with a Brush or by Dipping, which Gives the Wood a Nut Brown Color.

Wood decay is caused by fungus, a vegetable growth, sometimes so small that it can be seen only with a microscope. Its roots or branches force their way into the tissue of the wood and absorb or eat away the solid parts and decay results.

Preservatine penetrates deeply into the pores of the wood, and killing the germs of decay, doubles or trebles the life of the wood.

Preservatine has been manufactured over 30 years, and millions of dollars are annually being saved by preservatine treatment.

"Preservatine" has been imported since 1893 and in the comparatively short time that it has been before the American public, it has made fast and lasting friends, by far surpassing the most sanguine expectations.

Guaranteed to preserve woodwork above or below ground or water against rot and decay, for at least three times its natural lifetime, and to exterminate chicken lice and mites, hog lice, etc., permanently.

Ropes, Nets, Tarpaulins, etc., treated with "Preservatine" become waterproof and remain soft and pliable even in the coldest weather.

Plank Painted with "Preservatine" and Laid 13 Years in a Basement.

Plank Not Painted with "Preservatine" and Laid 13 Years in a Basement.

"Preservatine" kills chicken lice and mites; keeps chickens healthy, destroying the pests which annoy the fowls.
 "Preservatine" is also the best and cheapest Fly-Chase. One gallon of Preservatine diluted with one gallon of kerosene, sprayed on cattle, horses and in barns will keep the flies away.
 Those who have once tried Preservatine are convinced of its merits and buy more of it. Preservatine has been on the market for over 30 years and is in great demand all over the United States.

COVERING CAPACITY, APPLIED WITH BRUSH

On Dressed Lumber, 1 Gallon will cover 350 Square Feet. On Rough Lumber, 2 Gallons will cover 250 Square Feet. 1 Gallon will cover 100 Square Feet of Shingle Roof, Second Coat requires One-fourth of Above Quantity. Dipping requires about 30 per cent more.

How Put Up.....	$\frac{1}{2}$ Gal. Cans	1 Gal. Cans	5 Gal. Cans	10 Gal. Cans	1 Barrel (About 58 Gal.)
Per Gallon	\$1.80	1.50	1.40	1.40	1.20

One-half Gallon Cans, Twelve in a Case; One Gallon Cans, Six in a Case.

VACUUM SWEEPERS

BISSELL'S SUPERBA

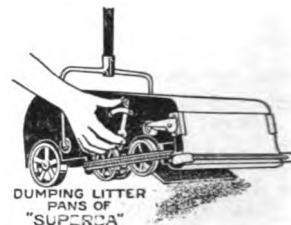

Elegant Curved Case of Crotch Mahogany or Golden Quartered Oak Veneer, Nickel Plated Trimmings, "No-Mar" Rubber Corner Cushions.

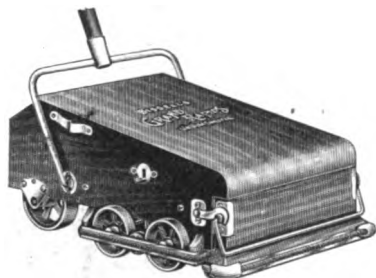

Superba—17 1/4 Inches Long, 12 Inches Wide, 7 1/2 Inches High \$11.34 Each

Features—The Rear-Opening Dust Bag is attached to the nozzle as one piece. Has "free-air" bellows boards which eliminates back-pressure and overcomes operating resistance. Efficient and simple acting nozzle-locks. "No-Mar" rubber corner cushion furniture protectors. Four-Wheel Brush Drive. Big steel frame dust receptacle. Triple bellows of best material and construction. Substantial malleable iron bail. Fibre main bearings.

Weight Per Dozen 210 Pounds.
One-twelfth Dozen in a Carton.

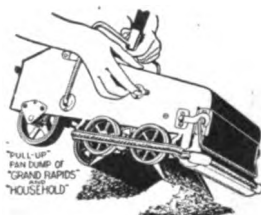

BISSELL'S GRAND RAPIDS

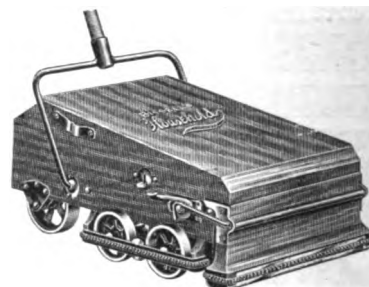

Mahoganized Sycamore Case, Nickered Fittings, "No-Mar" Rubber Corner Cushions. Each
Grand Rapids—16 1/2 Inches Long, 12 Inches Wide, 7 1/2 Inches High \$9.34

Features—The Rear-Opening Dust Bag is attached to the nozzle as one piece; free-air passage eliminates back pressure and overcomes operating resistance; extra convenient nozzle-locks; "No-Mar" rubber corner cushion furniture protectors; four-wheel brush drive; roomy rigid box bag; large triple bellows; solid malleable iron ball; automatic adjustment; fibre main bearings.

Weight Per Dozen 195 Pounds.
One-twelfth Dozen in a Carton.

BISSELL'S HOUSEHOLD

Sycamore Case, Mahogany Finish, Japanned Fittings. Each
Household—16 1/2 Inches Long, 11 1/2 Inches Wide, 7 1/4 Inches High \$7.50

The "Household" will amply meet the demand for a good vacuum cleaner at a very low price. It embodies Bissell efficiency and convenience, but is housed in a plainer although neat and strong built case. It does not have the "No-Mar" rubber corner cushions.

The nozzle locks are different, but the bag emptying and pan dumping features are same as in the "Grand Rapids."
Weight Per Dozen 186 Pounds.
One-twelfth Dozen in a Carton.

CARPET SWEEPERS

UNIVERSAL, "CYCO" BEARING

Per Dozen
No. 15N—Nickel Plated Trimmings, Nut Brown Fumed Oak, Golden Fumed or Mahoganized Sycamore Finished Case \$54.00
No. 10J—Japanned Trimmings, Otherwise Same as No. 15N 48.00
Has the original "Cyco" Bearings instead of the improved "Cyco" Ball Bearings. The brush is of the best quality and both pans dump at one operation.
Shipping Weight Per Dozen 95 Pounds.

GRAND RAPIDS, BALL BEARING

Per Dozen
No. 30N—Nickel Plated Trimmings, Nut Brown Fumed Oak, Golden Fumed or Mahoganized Sycamore Finished Case, "No-Mar" Rubber Corner Cushions \$58.00

Has all the Bissell improvements and best quality brush. Pans dump at one operation.
Shipping Weight Per Dozen 100 Pounds.

AMERICAN QUEEN, BALL BEARING

Per Dozen
No. 25N—Heavily Nickel Plated Trimmings, Plain Mahogany Veneer Case, Hand Polished, "No-Mar" Rubber Corner Cushions \$64.00
A very fine machine. The end plates and fittings are attractive in design. Has all the Bissell improvements and best quality brush. Each pan dumps separately.
Shipping Weight Per Dozen 110 Pounds.

BISSELL FEATURES

"Cyco" Ball Bearings, Dust Proof Axle Tubes, "No-Mar" Rubber Corner Cushions, Reversible Bail and Anti-Tipping Device, Anti-Ravelers, Metal Ferruled Handle, Black Japanned Pressed Steel Pans, Pressed Steel Wheels, High Grade Brushes.

ELECTRIC VACUUM CLEANERS

MODEL 16 CADILLAC

A Health and Labor Saver in the Home.

Always ready for use. Attach plug to any electric light socket. Simple to operate. Rollers allow machine to run easy over Carpets, Rugs and all floor coverings. Costs less than one cent per hour to operate.

It is simplicity itself, having but two mechanical parts, a motor and fan. The total weight of machine is but nine pounds.

The men behind the Cadillac Electric Vacuum Cleaner have made it their business and have been connected with this industry for the past fourteen years. We have many imitators, but there is only one Cadillac.

We want to save every woman's back, her health and beauty, and this can only be done by eliminating the necessity of cleaning in the old-fashioned way. Throw away the broom, carpet sweeper and beater and adopt the "Cadillac Way" and your home will be clean every day instead of twice a year. Be progressive and adopt the Twentieth Century method of cleaning.

Highest Grade Polished Cast Aluminum.

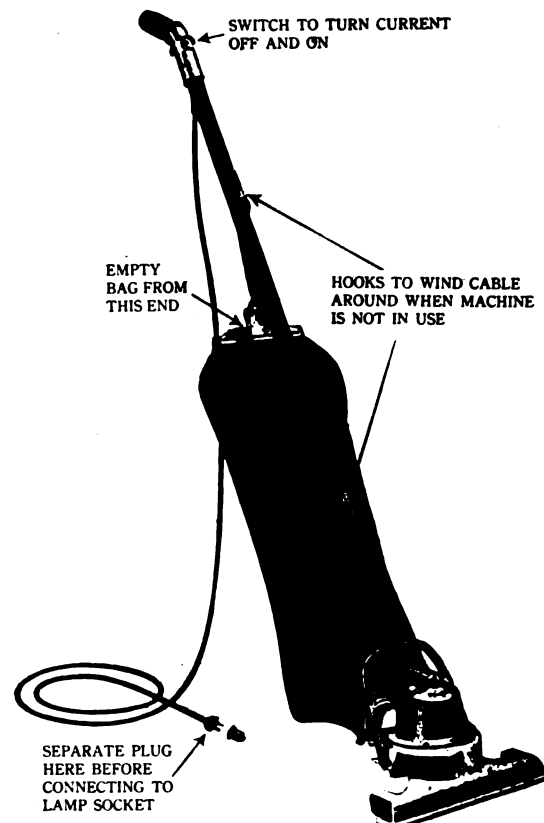

No. 16—Motor Housing 8 inches High, Total Height 52 inches, Nozzle 12 inches, Weight 9 Lbs., Complete with Cord and Plug, for 110 Volts \$30.00

Extra Attachments—Complete Set as Shown Below 7.50

Weight Complete 11 Pounds.

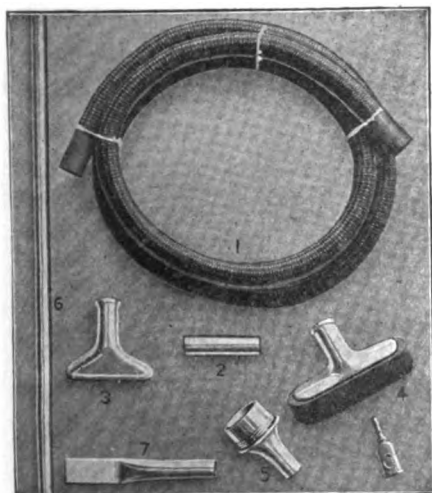

Save Your Back with a Cadillac.

The Complete Outfit.

EXTRA ATTACHMENTS FOR CLEANING EVERYTHING

For Both Cadillac and Reliable.

- No. 1—Nine feet of Best Covered Hose.
- No. 2—Nipple for Hose to Connect Attachment No. 3 or 4.
- No. 3—Nozzle for Furniture, Draperies, Mattresses, etc.
- No. 4—Brush for Clothes, Woodwork, etc.
- No. 5—Hose Connection, Used to Connect Hose to Machine.
- No. 6—Extension Handle to Reach High Places.
- No. 7—Tool for Cleaning Books and Radiators.

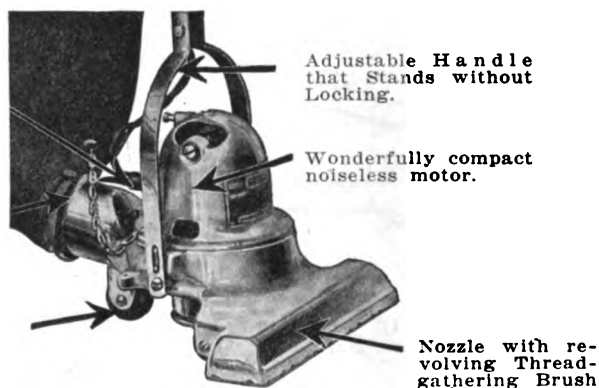

In the unreachable places—wherever dirt gathers—the "Cadillac" and "Reliable" will get it.

RELIABLE

High Grade Wire Connection behind motor. Never in the way.

Bag connection slips on and off without effort.

Caster with curved edges that can't injure floor.

High Grade Polished Cast Aluminum.

No. 21—Motor Housing 7 inches High, Total Height 54 inches, Wide Nozzle, Complete with Cord and Plug, Weight 8 Lbs., for 110 Volts.....\$22.50

Extra Attachments—Complete Set as Shown..... 7.50

Weight Complete 10 Pounds.

Here, at last, is your electric cleaner at a price you can really afford. Look at the "Reliable." A staunch and sturdy little dust and dirt gatherer that weighs but 8 pounds; that can be carried all over the house in one hand; that picks up those tantalizing threads, lint and hair with ease.

And the "Reliable" cleans everywhere—in the corners, under furniture, pictures and draperies, bedding—everything that gathers dust.

It has features of excellence that are unique in electric cleaner design. The wide nozzle with corrugations along the bottom to admit surface dirt, an exclusive feature; the revolving brush that gathers threads and other aggravating surface litter; the simple little bag-clamp that requires no juggling, that makes dirt-stained fingers impossible; the adjustable handle with convenient wood grip and push button switch; the patented hose connection that automatically shuts off air through the nozzle when attachments are used.

Only the best grade of highly polished aluminum castings are used, all parts are machined with a care and attention to detail that eliminates noise and rattle. Every machine is subjected to a thorough test, and passes through a rigid system of inspection in the making, that insures perfection in the finished product.

ASH SIFTERS

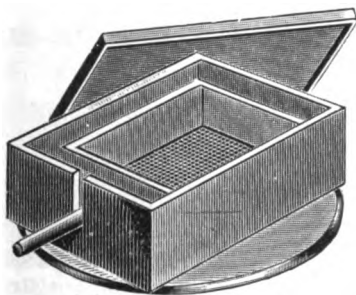

SAVEKOLE

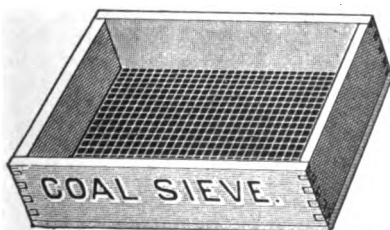

With Can.

- No. 18—17x23 Inches, Galvanized Corrugated Can, Cover Over Outside, Drop Side Handle, Removable Rotary Ash Sifter Suspended Inside of Can, a Rotary Ash Sifter and Can in One, Strong and Substantial. . . \$4.50
Each
Weight Each 14 Pounds.

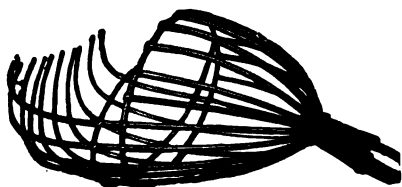

BARREL

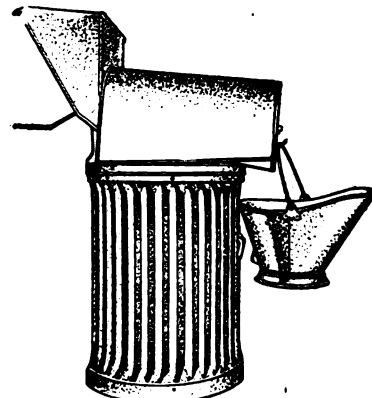

- No. 3—Barrel, Fits Over a Sugar or Flour Barrel and no Dust Can Escape . . . \$8.00
Per Dozen
Weight Per Dozen 100 Pounds.
One-half Dozen in a Crate.

- No. 1—14x15 1/4 Inches, Stained Red, Black Wire Cloth, without Handle . . . \$4.00
Per Dozen
Weight Per Dozen 23 Pounds.
One Dozen in a Crate.

FRANKO

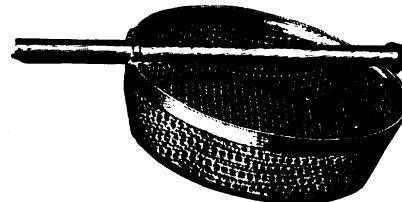

Without Can.

- Franko—Galvanized Iron, Heavy Galvanized Wire Rotary Screen, Galvanized Steel Bands at Each End, Large Hopper Riveted to Body, the Body is Lock Seamed to Heavy Stamped Cover to Fit 18 Inch Can, Weight Each 20 Lbs. \$5.00
Each

This Sifter is substantially built, lock seamed or riveted, to prevent hot ashes from damaging the sifter. The cross bars and bearings are heavy stamped steel, galvanized. Heavy galvanized stays from cover to hopper at back, making a strong support for hopper and substantial bearing for revolving shaft. Sifts ashes thoroughly and quickly. Easy to operate.
Two in a Crate.

METALLIC

- No. 4—Round, 14x4 Inches, Iron Bands on Top and Bottom, Black Wire Cloth, Stained Wood Handle. . . \$5.50
Per Dozen
Weight Per Dozen About 24 Pounds.
One Dozen in a Bundle.

Extra Glass Tops—For Above Percolators

Extra Stove Plates—For Above Percolators

Digitized by Google

NICKEL PLATED WARE

ROME COFFEE PERCOLATORS

1. Retainer Ring. This is a ring made of copper, nickel plated, which fits tightly into the top of the pot and holds the pump firmly in place. There is no rattling of loose parts. It also prevents the pump from falling out when pouring the coffee, a fault common to most percolators.

TAPER PATTERN

2. The coffee receptacle is strongly held by braces inside and outside. It will not get loose or break at this point.
 3. The pumping valve sets down on the bottom of the pot. The bottom is corrugated in order to give more heating surface and hasten the action of the pot.
 4. Aroma Trap. A tube closed at the top conducts the liquid to the spout. This feature effectually prevents the aroma from escaping.
 5. End of spout is wired to prevent jamming.
 6. The heavy brass hinge is neatly and firmly soldered to the pot.

7. "Rome" patent handle fastening. It is entirely of metal and is the best handle fastening yet devised.

A steel ring plate is furnished with every "Rome" Percolator. This plate aids to concentrate the heat under the pump valve and also prevents injury to the pot when used on a gas stove.

Heavy Copper, Nickel Plated, and Beautifully Finished, Pot Tinned Inside, Glass Top, Swaged Body, Aluminum Pump and Basket, Always Cold Ebonized Wood Handles.

Nos.	1224
Capacity, Cups	6
Weight Each, Lbs.	3

NICKEL PLATED AND COPPER WARE

HOT WATER BOTTLES

CELLO

The Cello All Metal Water Bottle stays hot from bedtime till morning, easy to fill, just hold it under any faucet or tea kettle with the special filling handle.

The neck is always sufficiently cool to handle because of the patent air chamber. A stout, strong spring on the inside takes care of all expansion, contraction and vacuum due to heating and cooling. The shape is comfortably curved to fit any part of the body like a thin round pillow. Will not crack, leak or burst.

One-twelfth Dozen in a Package.

CAST ALUMINUM WARE

RICE BOILERS

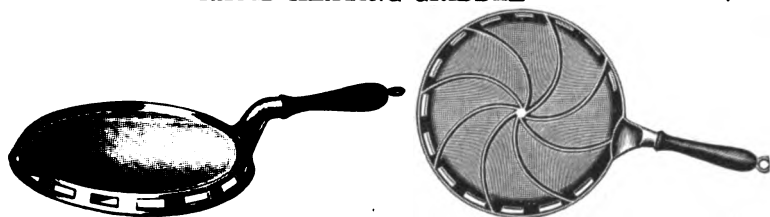

Flat Bottom, Enameled Wood Handle.

Quarts	1	2	3
Each	\$2.75	3.50	4.40

The cover to the top pan of this Rice Boiler will fit the cast aluminum boiler, thereby enabling either top or bottom pan to be used as a sauce pan for general cooking.

RAPID HEATING GRIDDLE

Bottom of Griddle.

Enameled Wood Handle.

Nos.	10R	11R
Diameter, Inches	10	11
Each	\$2.75	3.00

This Rapid Heating Griddle is so constructed that the heat is equalized to every part of the surface, thereby requiring less fuel than any other style.

BAILED GRIDDLES

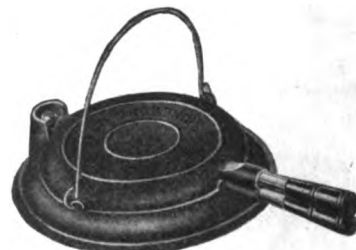

Nos.	10	12	14
Diameter, Inches.	10 1/2	12	14
Each	\$2.10	2.50	3.20

High Frame, Square, for Vapor and Gas Stove.

No.	10
Size, Inches	9x9
Each	\$3.25

WAFFLE MOULDS

Aluminum Pans, Iron Rings, Satin Finish.

STAMPED ALUMINUM WARE

COFFEE PERCOLATORS

UNIVERSAL

The "Universal" owes its acknowledged superiority to its patented valve and pumping process which circulates from six to ten times more water than any other percolator.

Its patented filter cup cover evenly distributes the water over all the coffee and extracts a greater amount of coffee essence or strength from each grain.

Percolation is complete before the boiling point is reached, thus eliminating the evil effects and unpleasant taste of boiled coffee.

LUNCH BOXES

UNIVERSAL

The Universal Vacuum Bottle has a capacity of 1 pint and warranted to keep the contents hot for 24 hours or cold for 72 hours. The bottle is made of highly silvered glass and is held in place inside of a heavy tin guard case by a metal spring container.

The food drawer, when closed, is held securely in place by an automatic spring catch. There is no need of strap or other additional locking device. The automatic spring catch is thoroughly dependable.

Free circulation of air throughout the box when closed is made possible by a number of vent holes in the top and sides, which keeps the box sweet and the food within it fresh, appetizing and wholesome.

	Each

JAPANNED WARE

FLOUR BINS AND SIFTERS

The Sifter proper is protected from the pressure of the flour in the bin by our New Shield, which enables the reels to work easily and smoothly and obviates all grinding through of foreign substances. A round tin tube protects the flour from coming in contact with the iron crank. Instead of scattering all over the bottom of the bin, the flour is directed into the proper receptacle by a Tin Skirt below the sifter. The sifter rests on a Strong Ring, extended all around the inside of the bin, holding sifter securely in place but still allowing it to be easily removed for cleaning.

PIECED TINWARE

ICE CREAM PACKING CANS

CREAM CITY

Made from Cold Rolled Steel and Smoothly Covered Both Inside and Outside with a Heavy Coating of Pure Tin.

The top edge has no crevice as it is folded over, making a double rim with a strong bead. The body is riveted. Seams and rivets are carefully covered with pure solder, making a perfectly smooth surface inside. The sides are straight and the bottom is set inside so that the can may be easily drawn out of the ice.

The bottom is riveted. The stamped cover is smoothly tinned and fits well. The handles are double riveted.

CAKE MAKERS

UNIVERSAL

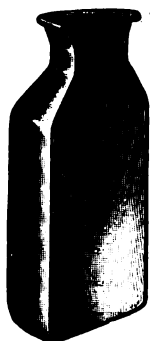

Wrought Steel Bowl, Tinned, Heavily Tinned Working Parts,
Complete with Mixing Flier, Kneading Rod and Table
Clamp on Bottom.

No. 10—Capacity 4 Quarts, Bowl 4 3/4 inches Deep,
Weight Per Dozen 100 Lbs. \$36.00
Per Dozen
Open Stock.

Mixes the batter for all kinds of cake, easier, more uniform,
and a great deal quicker than by hand. For every revolution of
the crank, the beaters revolve five times, insuring rapid, uni-
form, and thorough mixing of the materials. The mixing fliers
are used for beating eggs, whipping cream, and mixing all
kinds of soft batter. The kneading rod is used for mixing or
kneading dough or batter too heavy for the mixing fliers.

RAILROAD MILK CANS

NESCO WONPIECE

One Piece Drawn Steel Bottom, Body, Breast, Neck and Bowl, Tinned After Made Up, Wrought Steel Handles.

One step after another each single piece of steel is drawn and spun, shaped first into a very shallow and wide bowl, then deeper and deeper until it comes into the form of a deep cylinder with straight sides. Then the sides are formed into shape of the neck and bowl. The formation of the cylinder and then the later formation of the neck and bowl is done by the tools in such a uniform manner that the capacity of every can is fully actual capacity absolute and uniform. The breast hoop and the outside bottom hoop are both shrunk onto the body securely, giving the necessary protection at those points where the can is likely to receive the severest knocks. The wrought steel handles are attached at the breast hoop.

RAILROAD MILK CANS

CREAM CITY

Cream City Milk Cans are made throughout from the finest grade extra heavy milk can stock, all side body seams are riveted.

The breast is drawn to a cone shape which shape offers more resistance and strength than any other style.

The breast hoops on the Western Pattern have electrically welded joints and are shrunk onto the cans. In all other patterns the hoops are concealed between the body and the breast. The joints of the bottom hoops are electrically welded.

All parts are double tinned after being made up. Every seam and crevice is thoroughly flooded with solder leaving a smooth surface and making them perfectly sanitary and durable.

Dimensions of Cream City Milk Cans.

5 Gallons	8 Gallons	10 Gallon
10 1/2 x 19 1/2	13 x 20 3/4	13 x 24

WESTERN PATTERN

The breast hoops have welded joints and are shrunk onto the breast, and the breast and hoop are then shrunk onto the the body. The strong bottom hoops are electrically welded and securely riveted and soldered to the outside of the body, and are so constructed that both the body and bottom of the can rest on the shoulder of the bottom hoops.

MILK COOLERS AND AERATORS

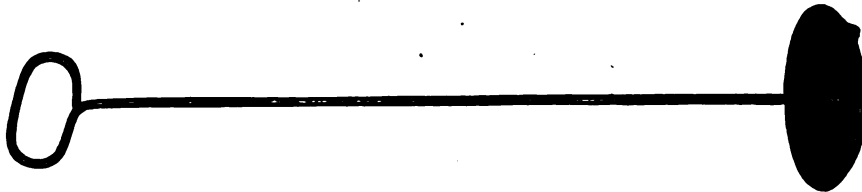

Saves Ice, Time and Labor, Causes the Complete Removal of Animal Heat, Thus Insuring Milk that Will not Sour.

No. 10—5 1/2 inches Diameter at Bottom, 24 inches High, Retinned, Weight Per Dozen 25 Lbs. Each \$1.00

DIRECTIONS

Push the Aerator into the milk to the bottom of the can, which action causes the pure air contained in the bowl of the Aerator to be forced through its flues into the milk, thus causing a perfect aeration and removal of animal heat. When the bubbling in the milk stops, immediately raise the Aerator entirely out of the milk so that a new charge of air is received and then force it back to the bottom of the can again. Each time you force the Aerator down, fresh air is forced through the milk. Repeat this operation several times, and you will have clean, pure and wholesome milk.

MILK STIRRERS

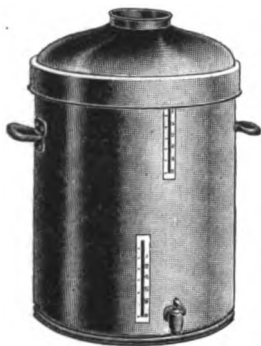

Tinned Steel Saucer Shaped Disc, with Pouring Lip, Wrought Steel Handle, Heavily Tinned, with Loop at End.

No. MS—5 1/4 inch Diameter Disc, 25 inch Handle, Weight Per Dozen 14 Lbs. Per Dozen \$5.20
This is a Sampler as well as a Stirrer, and is a perfect device for taking samples for testing or other purposes.

Inches Less Cover. 13 1/4 x 20	16x20	16x26	
Each	\$7.60	8.20	9.40

Improved, retinned, stamped reversible cover, 4 1/4 inch strainer with brass strainer cloth; heavy retinned steel hoops on bottom and top of body afford extra strength and give durability, deep pitch bottom throws all the milk down to the faucet.

DOTY

Nos.	10	20	30	40
Gallons	10	15	23	29
Each	\$5.00	6.00	7.00	8.00

Has patent ventilating and aerating cover, which strains the milk and aerates it by striking on a disk and spreading out very thin; reverse the cover and it gives scientifically perfect ventilation, drawing foul air from the milk, and not towards it. This prevents cream from drying. Has anti-whirlpool bottom which prevents cream from being drawn before milk has all run off. All cream is separated from the milk in an hour.

CROWN

The inner can has an upright tube connected with the water in the outer tank, thereby affording a complete circulation of water, both inside and outside the inner can.

A larger area of cooling surface is thus obtained.

A hose may be attached to the opening of the tube and a current of water allowed to run through the Creamer.

The milk, as it is strained into the Creamer, falls on the inner tube, and is thoroughly aerated as it passes into the Creamer, thus cooling the milk rapidly.

Fitted with Removable Gauge and large flow-water and Polished Nickel Plated Brass Lever Handle Milk Faucets.

The Milk Can is made of 4-A Bright Charcoal Tin, Round, with Center Tube, has a deep grooved Bottom. The outside of can is coated with aluminum.

The water tank is made of heavy galvanized steel, double seamed bottom, joints well soldered, outside coated with aluminum, trimmed with deep blue bands and gilt stripes in swedges and an attractive gold leaf transfer.

The cover on the Crown Creamer is also used as a strainer, and has removable cone wire strainer, painted on outside with orange lacquer.

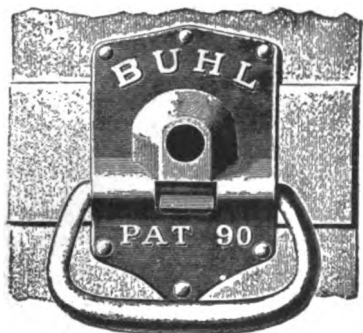

Removing the cone wire from the strainer and placing the perforated tin disk in the cover allows perfect ventilation for the milk at all times.

The water capacity of the water tank is the largest on the market. This is the most important point on these goods, as the milk must at all times be kept cool, and that is possible only with large water tanks.

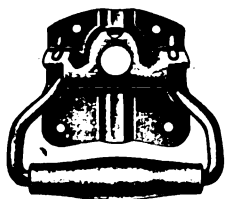

The inner can is easily removed for cleaning by unscrewing faucet.

WOOD'S REFINED SMOOTH FINISH

This Iron is all Open Rolled, of good dark uniform color, without buckle, true to gauge, and when stored or manufactured and exposed, will not rust like the cold rolled iron and steel, requiring no special lacquering or varnishing, and will blacken in stoves and pipes far better than the other iron and steel, which are rolled and finished by different methods. A good and regular soft, easy working Sheet Iron is assured.

This "Special" 1 1/4-Inch Corrugated Sheets represent the best material for Corrugated Sheet Roofing.

Cut Shows Extra 1/2 Corrugation to Prevent Leaks.

The Extra Half Corrugation curves upward to meet the Second Corrugation of the Lapping Sheet, thereby overcoming capillary attraction.

CORRUGATED ELEVATOR SIDING

Sheets are laid with 2 inch end lap and nails driven 2 inches above upper edge of lower sheets, thus allowing the sheets to slip 2 inches in length of each sheet without buckling the nails as the sides of the elevator settle.

500 in a Box.	

Metal Corners are being extensively used and are very popular with the carpenter. They take the place of Corner-boards to finish the corner of the building when weather-board or lap siding is used.

Time and expense is saved because it is not necessary to mitre the weather board siding. The mitre effect is perfect and the appearance superior to wood corner-board.

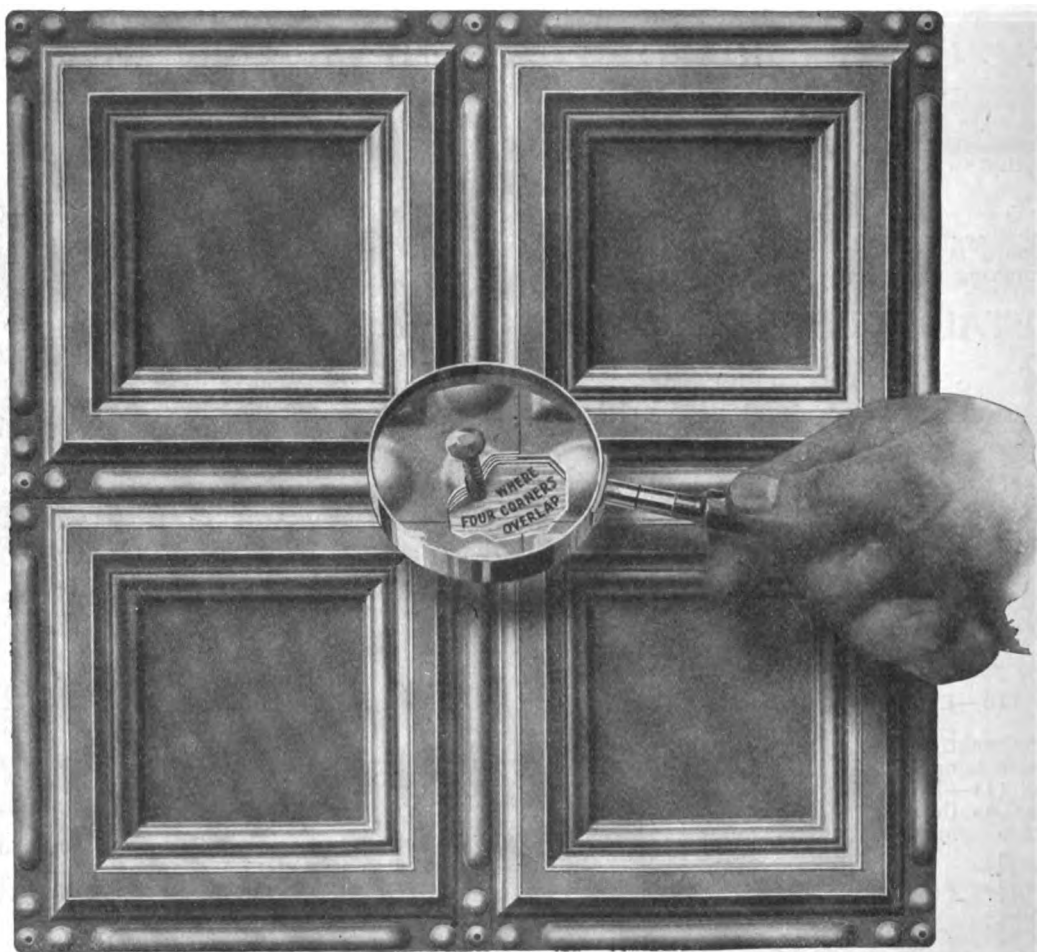

STEEL CEILINGS AND SIDE WALLS

"Invisible Joint"
TRADE MARK

Send for Our Large Steel Ceiling Catalog "O".

We carry a large, well assorted stock of this material in the different classes of designs, which enables the dealer to meet the demands of the most exacting purchasers. All the designs embody the best thought and skill of the most experienced designers and artisans in Ornamental Metal.

"Invisible Joint" Steel Ceiling Plates are absolutely perfect in fit and most easily erected because—all lapping beads are repressed, insuring perfect fit thereat—the nail holes are die cut, therefore eliminating the necessity of driving through four thicknesses of steel at the corners. This provides a perfect fit—the joints or seams will not show—and the erection cost is reduced at least one-third.

WHERE FOUR CORNERS OVERLAP.

To drive a nail through four thicknesses of sheet steel is not easily accomplished. Besides the trouble and delay in doing it the beads not only get mashed, but sometimes the fingers as well—hitting the wrong nail. The Die Cut Nail Holes Save Time, Trouble and Temper.

STEEL CEILINGS

"Invisible Joint"

TRADE MARK

STUCCO No. 2276.

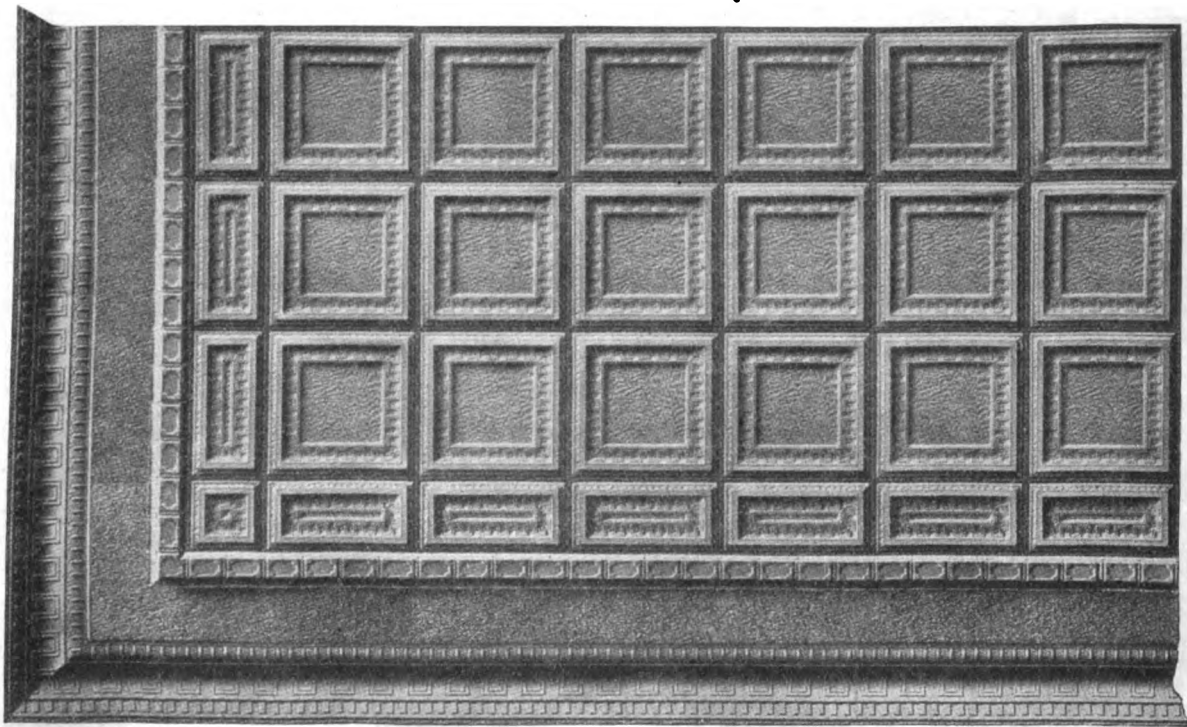

Cornice, 9 inches Deep, 2231; Filler, 1743; Moulding, 1925; Field, 2208.

Size of Room, Inches.....	20x60	18x25	15x20	12x15
Per Square	\$9.75	10.50	11.25	12.00

This plain panel, which may be erected without the use of furring strips, fills a long felt want in the metal ceiling field. The narrow band of stipple around plate 2208 eliminates any possibility of buckling. Can be applied directly to wood sheathing.

GREEK No. 2460.

Cornice, 12 inches Deep, 2431; Filler, 1743; Moulding, 1924; Field Plate, 2402.

Size of Room, Inches.....	20x60	18x25	15x20	12x15
Per Square	\$9.50	10.00	10.50	11.25

This design is adapted for store ceilings of almost any size. Furnished with either slip or lap joint. Can be applied directly to wood sheathing.

 TRADE MARK

FRENCH RENAISSANCE
 No. 1866.

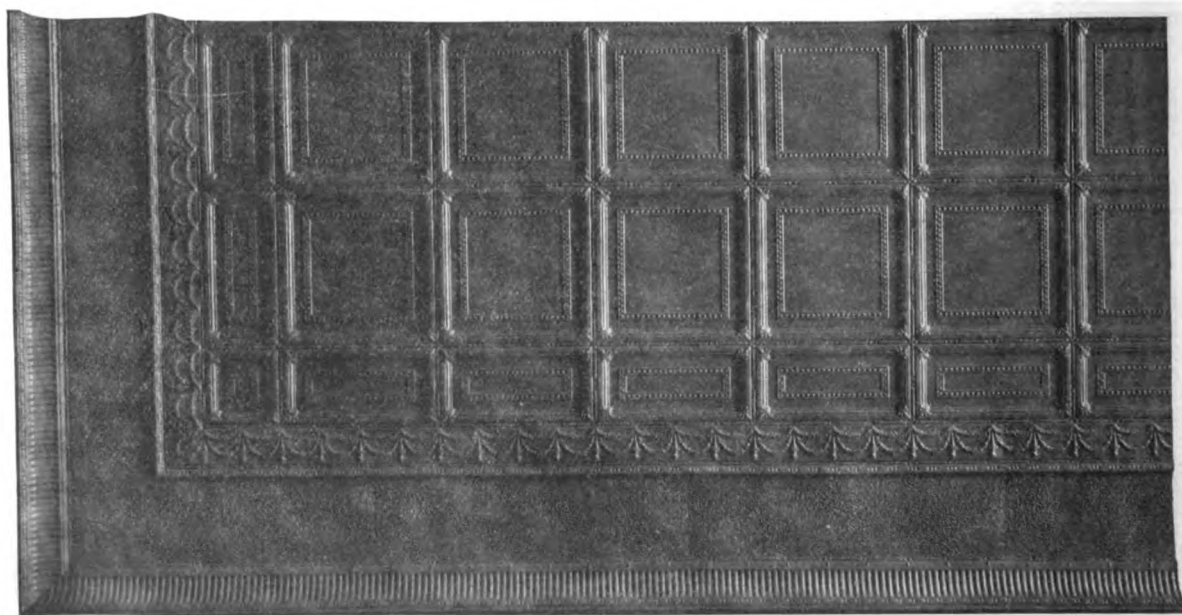

Cornice, 6 1/2 inches, 1832; Filler, 1840; Moulding, 1821; Plate, 1806.

Size of Room, Inches.....	20x60	18x25	15x20	12x15
Per Square	\$9.00	9.50	10.00	10.50

Suitable for rooms of any size or height, though a deeper cornice and the addition of an elaborate border would enhance its decorative value in large rooms at a slight increase in cost. Can be applied directly to wood sheathing.

COLONIAL
 No. 1978.

Cornice, 6 inches, 1932; Filler, 1941; Panels, 1908.

Size of Room, Inches.....	20x60	18x25	15x20	12x15
Per Square	\$8.75	9.50	10.00	10.50

This is an excellent ceiling design at an extremely low cost. Panels 1908 and 1909 can be applied only on furring strips.

TINNERS' MACHINES

STOW'S ENCASED BURRING

For No. 24 Iron and Lighter.
Small.

1½ inch Diameter Rolls with Extra Upper Roll, Adjustable Boxes and Duplicate Parts.

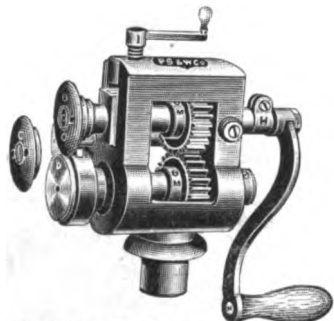

Each
No. 579 (579)—With Standard, Weight Each 21 Lbs. \$25.65
No. 579½ (579½) — Without Standard, Weight Each 10 Lbs. 23.85

Large.

2½ inch Diameter Rolls, with Extra Upper Roll, Adjustable Boxes and Duplicate Parts.

Each
No. 580 (580)—With Standard, Weight Each 23 Lbs. \$26.55
No. 580½ (580½) — Without Standard, Weight Each 12 Lbs. 24.75

COLUMBIAN BURRING

For No. 22 Iron and Lighter.
Small.

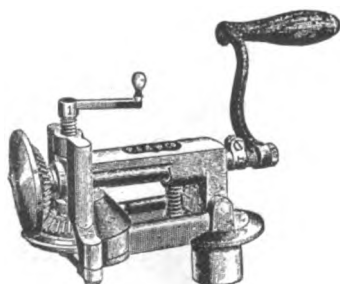

1½ inch Diameter Rolls, with Extra Upper Roll.

Each
No. 576 (576)—With Standard, Weight Each 21 Lbs. \$20.25
Large.

2½ inch Diameter Rolls, with Extra Upper Roll.

Each
No. 577 (577)—With Standard, Weight Each 25 Lbs. \$21.15

COLUMBIAN SETTING DOWN

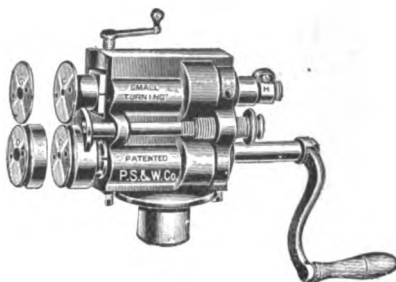

For No. 24 Iron and Lighter.

For Seams up to ⅜ inch.

Each
No. 555 (555)—With Standard, Weight Each 21 Lbs. \$22.95

STOW'S ENCASED TURNING

For No. 24 Iron and Lighter.
Small.

2½ inch Diameter Rolls with Extra Rolls, Adjustable Boxes and Duplicate Parts.

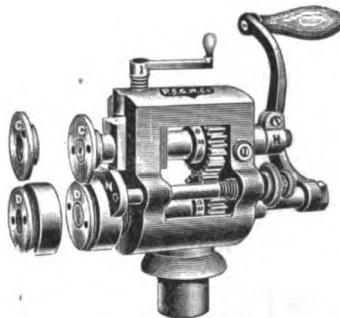

Each
No. 545 (545)—With Standard, Weight Each 23 Lbs. \$28.35
No. 545½ (545½) — Without Standard, Weight Each 12 Lbs. 26.55

Large.

3 inch Diameter Rolls, with Extra Rolls, Adjustable Boxes and Duplicate Parts.

Each
No. 546 (546)—With Standard, Weight Each 28 Lbs. \$29.70
No. 546½ (546½) — Without Standard, Weight Each 17 Lbs. 27.90

COLUMBIAN TURNING

For No. 22 Iron and Lighter.
Small.

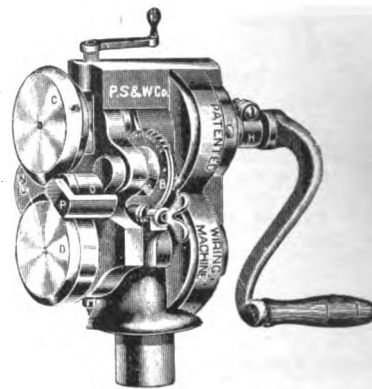

2½ inch Diameter Rolls, with Extra Upper and Lower Roll.

Each
No. 541 (541)—With Standard, Weight Each 25 Lbs. \$22.95
Large.

3 inch Diameter Rolls, with Extra Upper and Lower Roll.

No. 542 (542)—With Standard, Weight Each 31 Lbs. \$23.85

STOW'S ENCASED WIRING

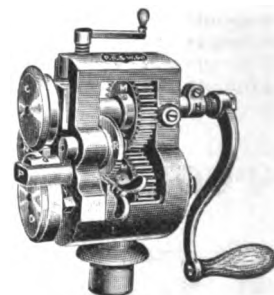

For No. 24 Iron and Lighter.

3 inch Diameter Rolls, with Adjustable Boxes and Duplicate Parts.

Each
No. 526 (526)—With Standard, Weight Each 28 Lbs. \$32.40

No. 526½ (526½) — Without Standard, Weight Each 17 Lbs. 30.64

COLUMBIAN WIRING

For No. 22 Iron and Lighter.

3 inch Diameter Faces.

Each
No. 525 (525)—With Standard, Weight Each 31 Lbs. \$26.55

SETTING DOWN

For No. 24 Iron and Lighter.
For Seams up to ⅜ inch.

Each
No. 561 (86) — With Standard, Weight Each 50 Lbs. \$23.35

The inclined position of both upper and lower faces allows work to be held up or down and seams to be started inward while setting down, thereby facilitating the operation of double seaming. Adjustable gauges with idler rollers are fitted.

TINNERS' MACHINES

COLUMBIAN ELBOW EDGING MACHINE

For No. 24 Iron and Lighter.

 $2\frac{1}{8}$ inch Diameter Rolls.

Each
 No. 551 (551)—With Standard and One Pair of Rolls, Weight Each 25 Lbs. \$22.95
 Per Pair
 Extra Elbow Edging Rolls Nos. 3 and 4 \$5.85

The faces on these machines make a sharp crease, and are preferred to the ordinary round-edged turning faces.

Faces can be used with and readily adapted to either Columbian or Encased Small Turning Machine.

In using this machine, one-third of the time spent in putting elbows together can be saved by the operator.

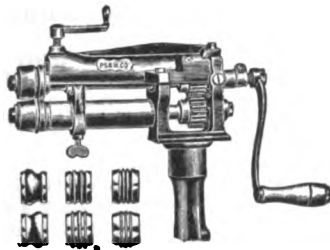

The above cut shows the position of an elbow in turning the edge; also the form of crease made by the machine to enter the corresponding section in completing the elbow.

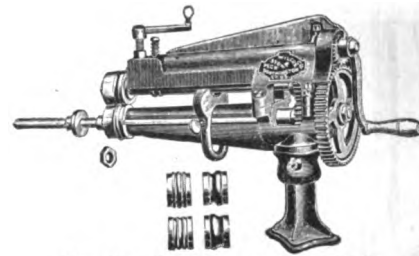

The above cut shows the position of the pipe or elbow, in forming the bead to receive the creased section, as shown in the illustration at the left.

BEADING MACHINES

For No. 26 Iron and Lighter.

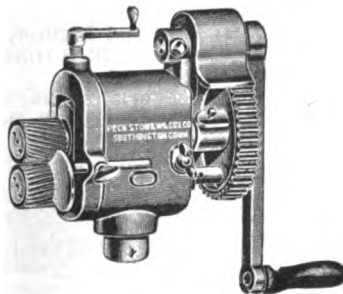

Each
 No. 620 (4) Stow's—6 $\frac{1}{4}$ inch Depth of Throat, with Four Pair 1 $\frac{1}{8}$ inch Rolls and Standard, Size of Beads $\frac{3}{8}$ inch Ogee, $\frac{5}{8}$ inch Triple, $\frac{1}{2}$ inch Triple Coffee Pot, and $\frac{1}{8}$ inch Single, Weight Each 50 Lbs. \$38.25
 No. 621 (5) Stow's—4 $\frac{3}{4}$ inch Depth of Throat, with Five Pair 1 $\frac{1}{2}$ inch Rolls and Standard, Size of Beads $\frac{1}{8}$ inch Ogee, $\frac{3}{8}$ inch Triple Coffee Pot, $\frac{1}{2}$ inch Double, $\frac{1}{8}$ inch Astragal, and $\frac{1}{8}$ inch Single, Weight Each 40 Lbs. 34.20
 Per Pair
 Extra Beading Rolls—For No. 620 \$4.95
 Extra Beading Rolls—For No. 621 2.88
 Each
 Extra Standard—For Nos. 620 and 621 \$2.45

For No. 20 Iron and Lighter.

Each
 No. 617 (1A)—13 inch Depth of Throat, with Three Pair 2 $\frac{3}{4}$ inch Rolls and Standard, Size of Beads 1 inch Ogee, 1 inch Triple, and $\frac{3}{8}$ inch Single, Weight Each 140 Lbs. \$32.25
 No. 619 (3A)—7 $\frac{1}{2}$ inch Depth of Throat, with Three Pair 2 $\frac{3}{4}$ inch Rolls and Standard, Size of Beads $\frac{3}{8}$ inch Ogee, $\frac{3}{8}$ inch Triple, and $\frac{1}{8}$ inch Single, Weight Each 85 Lbs. 53.10
 Per Pair
 Extra Beading Rolls—For No. 617 \$6.75
 Extra Beading Rolls—For No. 619 6.75
 Each
 Beader Cranks or Beader Crank Screws—For No. 617 .. \$1.50
 Beader Cranks or Beader Crank Screws—For No. 619 .. 1.50
 Extra Standard—For Nos. 617 and 619 2.45

CORNICE MAKERS' CRIMPER

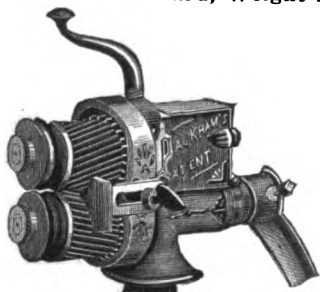

1 $\frac{1}{8}$ inch Diameter Crimping Rolls, for No. 20 Iron and Lighter. Each
 No. 592 (017A)—Encased, Straight Crimping Rolls, with Standard, Weight Each 63 Lbs. \$26.55

PACKHAM'S CRIMPER AND BEADER

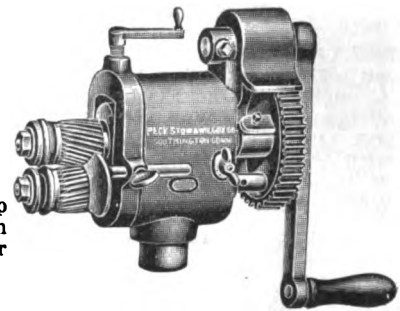

For Stove and Conductor Pipe.

Each
 No. 500—Packham's, with Standard, Weight Each 24 Lbs. \$14.00

Noiseless in operation, solid steel crimping rolls cut spirally, and machine cut gears. The spiral crimping rolls eliminate all danger of rupturing the grain of the metal while crimping.

Cut Shows Crimp and Bead as Made on Crimper and Beader No. 585.

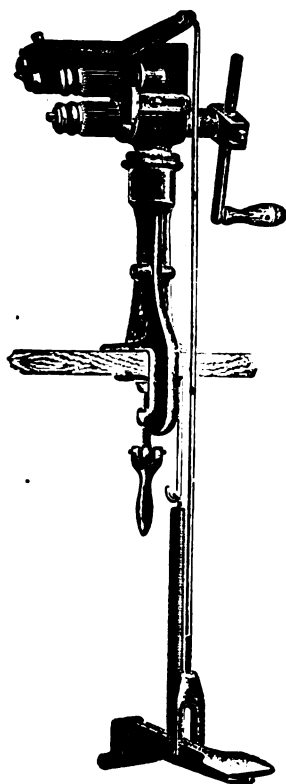

1 $\frac{1}{8}$ inch Diameter Beading Rolls, 1 $\frac{1}{8}$ inch Diameter Crimping Rolls, for No. 20 Iron and Lighter. Each
 No. 585 (7A)—Encased Spiral Crimping and Beading Rolls, with Standard, Weight Each 65 Lbs. \$26.55

Cut Shows Crimp and Bead as Made on Packham's Crimper and Beader.

TINNERS' MACHINES.

CRIMPING AND BEADING MACHINE

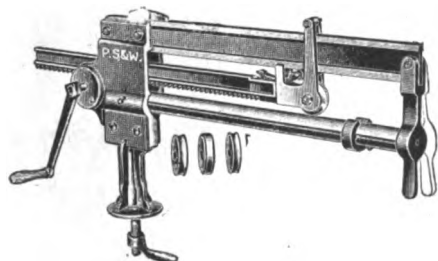

For No. 24 Iron and Lighter.

Each
No. 602 (602)—With Stand-
ard, Weight Each About
38 Lbs. \$24.75

The construction throughout of
of this machine is exceedingly
strong and rigid, and permits of
easy and rapid adjustment.

The depression of rolls is accom-
plished by a foot treadle. The con-
tact of the upper bearing roll is ad-
justed by a lever, and this lever also
gives an independent adjustment
for raising upper beading roll, tak-
ing same out of contact with lower
roll, in case crimping only is de-
sired. The adjustment of this lever
is effected by means of an eccentric
device, and is instantaneous in ac-
tion. This greatly increases the
simplicity of this machine, as crimp-
ing alone can be done without sub-
stituting blank collars for beading
rolls. The crank is adjustable for
light or heavy work.

IMPROVED

For No. 22 Iron and Lighter.
Reversible Lower Bar or Horn.

Each
No. 504 (110)—Will Groove Work 22 ½ inches Long,
with Three Grooving Rolls, One Each, ½, ⅓ and
¼ inch, and One Flattening Roll, with Standard,
Weight Each About 133 Lbs. \$38.25
No. 505 (120)—Will Groove Work 32 inches Long,
with Three Grooving Rolls, One Each, ⅓, ¼ and
⅝ inch and One Flattening Roll, with Standard,
Weight Each About 153 Lbs. 47.70

MACHINE STANDARDS

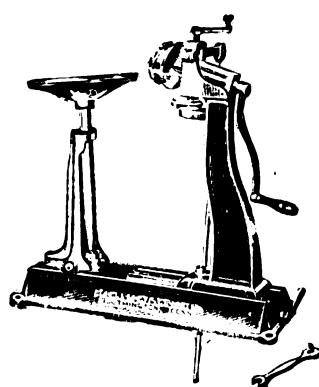

No. 975.
For Any Bench from 1 to 3 ½ inches Thick.

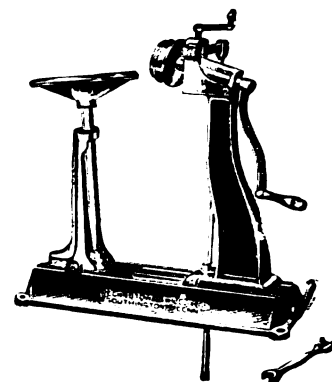

No. 976.

Each
No. 975—Small Machine Standard, Weight Each 10 ½
Lbs. \$2.45
No. 976—Wiring Machine Standard, Weight Each 11
Lbs. 2.45
Encased and Columbian Machines are all packed with these
Standards.

OLMSTED'S PATENT DOUBLE SEAMING MACHINE

No. 655.

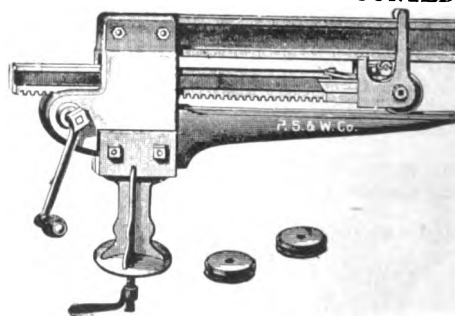

No. 656.

For No. 26 Iron and Lighter.
With Setting Down Attachment.

Each
No. 655 (655)—Depth to Receive Work 15 inches,
One Seaming Head with Deflector, and 8 Discs, as
Follows: Straight Discs, 4, 5 ¼ and 8 ½ inches;
Flaring Discs, 4 ½, 6 ¼, 7 ¼, 8 ¾ and 11 inches,
Weight Each About 120 Lbs. \$60.75
Extra Discs 3.00
Without Setting Down Attachment.
Each
No. 656 (656)—Depth to Receive Work 15 inches, One
Seaming Head with Deflector and 8 Discs, as Fol-
lows: Straight Discs, 4, 5 ¼ and 8 ½ inches;
Flaring Discs, 4 ½, 6 ¼, 7 ¼, 1 ¾ and 11 inches,
Weight Each About 115 Lbs. \$47.70
Extra Discs 3.00

GROOVING MACHINES

STOW'S PATENT BRASS MOUNTED

For No. 24 Iron and Lighter.
With Steel Bar and Milled Horn.

Each
No. 502 (01)—Will Groove Work 20 inches Long,
with Three Grooving Rolls, One Each, ½, ⅓ and
¼ inch, with Standard, Weight Each About 102
Lbs. \$30.60
Extra Rolls—For No. 50275
Extra Standard—For No. 502 2.45

EAVES TROUGH END CLOSING FORMS

The Tool.

Nos. 3 ½ 4
Inches 3 ½ 4
Each \$0.50 .60

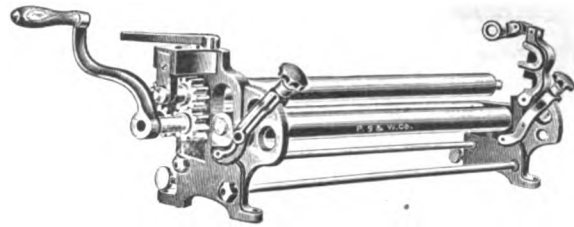

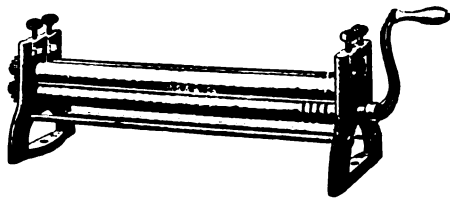

The Work.

Nos. 4 ½ 5 5 ½
Inches 4 ½ 5 5 ½
Each65 .75 1.00

With the use of these forms, the ends of the eaves trough
can be closed much neater and quicker than with any other
method. The form is placed in gutter and the iron worked
into grooves with a hammer, producing a corrugated closed
end. Frost will not burst the end out.

TINNERS' MACHINES

PIPE FORMERS

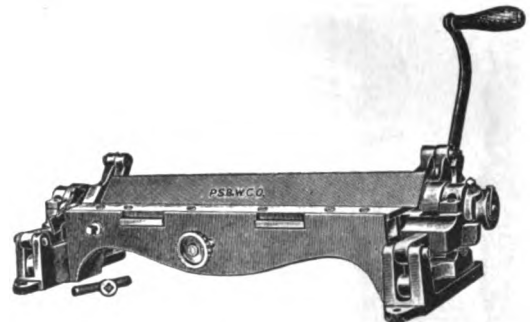

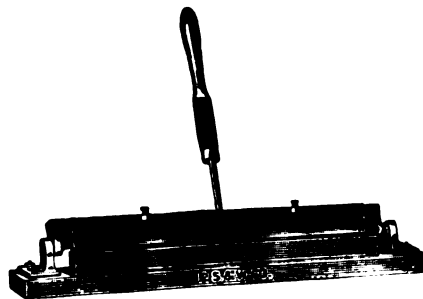

For Stove Pipe, Special Rolled Hard Steel Rolls.

Each	\$75.00	80.00	65.00	65.00	55.00

These Brakes are made principally of Bessemer Steel. The hinges and jaw connecting links are of crucible steel castings. Balance weights on levers guard the jaw from closing from its own weight, while the workman is free to handle material. These machines are adapted to a large variety of work. They are very suitable for rapid and accurate bending. Sheets can be formed of the gauge rated full length with ordinary flange. Narrow edges can be bent on lighter material in proportion. In shorter lengths heavier material can be bent.

The apron or bending leaf is 1/2 inch normally. By the addition of angle steel it is reinforced for heavy work. The removal of the steel bar reduces it to 1/4 inch, which allows close reverse members being formed. This advantage is only possible with the steel edge. It is of great importance where this class of work arises.

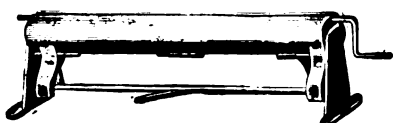

A wrench fitting all the adjustable parts is furnished with these machines.

Five moulding forms suitable for making cornice ridge roll and other moulding work are supplied with the Cornice Brakes.

★ Note—Not Carried in Stock, Shipped Direct from Factory.

TINNERS' MACHINES

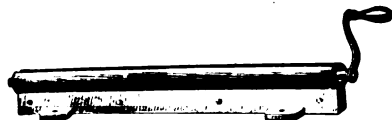

STOW'S PATENT GUTTER BEADER

Nos.	702(0)	703(1)
Length, Inches...	30	20

Nos. 179 and 180.

COMBINED SHEARS AND PUNCHES

These Machines are Suitable for Both Cutting and Punching Metal, Will Cut $\frac{1}{8}$ inch Iron and $\frac{1}{16}$ and $\frac{1}{4}$ inch Narrow Bars.

Each

No. 678 (1)— $4\frac{1}{4}$ inch Cut, with One Combination Die and Four Punches, One Each, $\frac{1}{8}$, $\frac{1}{16}$, $\frac{1}{4}$ and $\frac{3}{8}$ inch, Suitable for $\frac{1}{8}$ inch Iron and Lighter, Will Punch the Center of a Circle $5\frac{1}{4}$ inches in Diameter, Weight Each About 100 Lbs.....	\$32.40
No. 679 (2)— $4\frac{1}{4}$ inch Cut, with One Combination Die and Five Punches, One Each, $\frac{1}{8}$, $\frac{1}{16}$, $\frac{1}{4}$, $\frac{3}{8}$ and $\frac{5}{8}$ inch, Suitable for $\frac{3}{8}$ inch Iron and Lighter, Will Punch the Center of a Circle $5\frac{1}{2}$ inches in Diameter, Weight Each About 120 Lbs.....	40.50
Extra Punches—For Nos. 678 and 679.....	.90
Extra Dies—For Nos. 678 and 679.....	1.00

TINNERS' MACHINES

SLITTING SHEARS

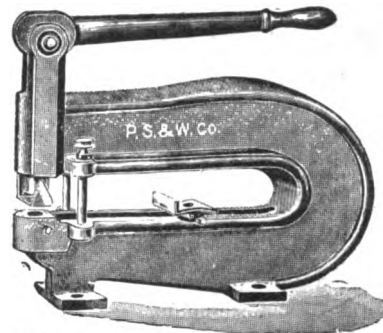

Eccentric Lever.

For Iron or Steel $\frac{3}{8}$ inch and lighter.

No. 253—18 inches Long Over All Including Lever,
 $3\frac{1}{2}$ inch Blade, $10\frac{1}{2}$ inch Bed, $6\frac{1}{2}$ inches High,
 Weight Each 17 Lbs. \$21.60

So constructed as to cut sheet stock with the greatest of ease. Its eccentric cutting device requires very little effort to cut sheet metal up to the full rated capacity. A handy machine for the shop and light enough to be easily carried to the job to be done outside.

IMPROVED SAMSON PUNCHES

Bolt Fastened, Wrought Iron Links, with Adjustable Gauge.

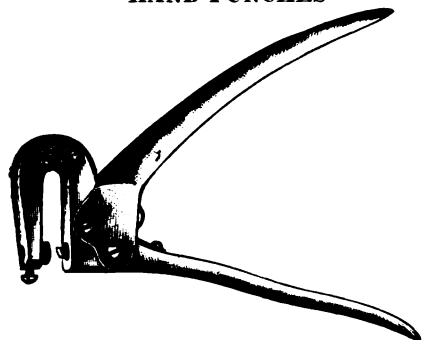

Each

No. 675 (5)—With Three Sets of Dies and Punches,
 Viz., $\frac{1}{8}$, $\frac{3}{8}$ and $\frac{1}{4}$ inch, Depth of Throat 15 inches,
 Will Punch No. 9 Iron with Stay Bolts and No. 12
 Iron without Stay Bolts, Will Center on 7 inch
 Sheets with Stay Bolts and 30 inch Sheets without
 Stay Bolts, Weight Each 140 Lbs. \$45.00
 Extra Punches—For No. 675. 1.00
 Extra Dies—For No. 675. 2.00

HAND PUNCHES

 Steel, Case Hardened
 Screws, All Parts Inter-
 changeable, Depth of Throat
 $1\frac{3}{8}$ inches, Polished and
 Copper Nickel Plated. \$30.00

Per Set

Extra Punch and Dies—For
 No. 1 \$4.00

This Punch is made to punch a hole
 from $\frac{1}{8}$ to $\frac{1}{4}$ inch through $\frac{1}{8}$ inch thick
 brass, steel, galvanized iron and metal
 of every description, to 17 gauge in di-
 ameter. A valuable tool for machinists,
 roofers, tool makers, etc.

In ordering, mention sizes of punches
 required.

Per Dozen

No. 17—Elm City, 9 inches Long,
 Drop Forged Steel Head,
 Black Sheet Steel Handles,
 Compound Leverage, Inter-
 changeable Dies, One Male
 and One Female, Weight
 Each $1\frac{1}{8}$ Lbs. \$40.00

One in a Box.

$\frac{1}{8}$, $\frac{3}{8}$, $\frac{1}{2}$ inch dies punch No. 14
 gauge sheet iron, $\frac{3}{8}$, $\frac{1}{2}$ inch dies punch
 No. 15 gauge sheet iron, $\frac{3}{8}$, $\frac{1}{4}$ inch
 dies punch No. 16 gauge sheet iron.
 The dies open $\frac{1}{8}$ inch and reach 1 inch
 from edge of metal.

In ordering specify sizes of dies
 wanted.

Each

No. 08—Cast Iron Block with
 Flanges, Wrought Iron and
 Steel Parts, Weight Each
 50 Lbs. \$24.00
 With three sets of dies and punches,
 viz., $\frac{1}{8}$, $\frac{3}{8}$ and $\frac{1}{4}$ inch. Will punch $\frac{3}{4}$
 inch hole in $\frac{1}{4}$ inch iron, and $\frac{3}{8}$ inch
 hole in $\frac{1}{2}$ inch iron.

Each	\$3.34

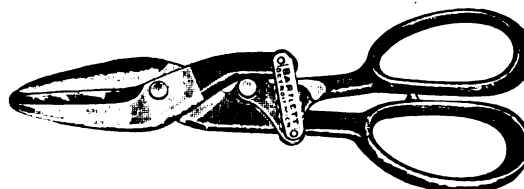

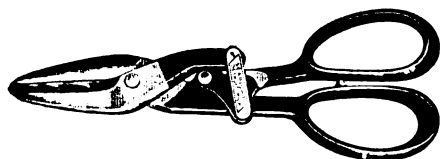

The Frankfurth Tinners' Snip Handles are properly proportioned and the Bows shaped to fit the hand; the leverage obtained by being well balanced, increases the cutting power, and takes all strain from the wrist, allowing constant use without fatigue.

Note—We can furnish Nos. 8 and 9 Snips made for left-handed men at an extra cost of 50 cents each, net.

FRANKFURTH'S SNIPS ON DISPLAY BOARDS

Frankfurth's Display Board—Consists of One Each Nos. 9F, 10F, 11F, 12F and 110F Snips, Complete with Board.....**\$9.40** Each

BARTLETT'S COMPOUND LEVER.

Drop Forged High Grade Crucible Tool Steel, Tempered Throughout, Polished Blades, Japanned Handles.

No.	10B	Nos.	12B	14B
Length, Inches	10 1/2	Length, Inches	12	14
Cut, Inches	2 1/2	Cut, Inches	3	3 1/2
Weight Each	1 Lb. 2 1/2 Oz.	Weight Each	1 Lb. 14 Oz.	2 Lbs. 9 Oz.
Each	\$3.60	Each	\$4.80	5.60

The compound lever action gives an evenly distributed cutting strain from a close throat start to the finish at the point of the blade. On all sizes there are two straps or links connecting the handle and blade, one on either side, firmly riveted together, making a solid frame, giving perfect control of the blades; with them notching becomes an easy task.

HOUSEHOLD

Drop Forged Steel, Steel Laid, Japanned Handles.

No. 111—10 inches Long, 2 1/2 inch Cut, Weight Each 14 Ozs. Each \$1.20
Cuts tin, poultry netting and silk equally well, and retains a sharp cutting edge.

BERRIDGE DOUBLE CUTTING SHEARS

With Pipe Crimper.

Forged from High Grade Steel, Carefully Tempered and Hardened, Polished Head, Black Finish Handles.

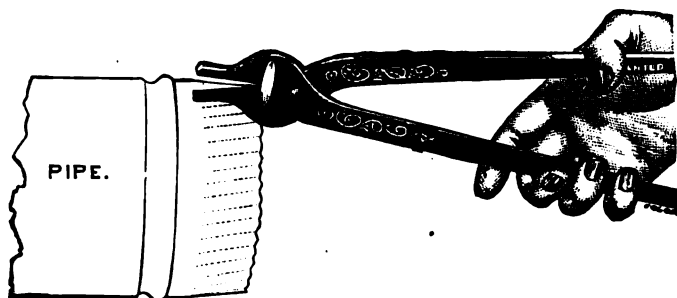

No. 2—13 1/2 inches Long, Weight Each 2 1/4 Lbs. Each \$5.50

They are adapted to cutting off the bottoms of pails, cans, etc., and suitable for cutting round or square work. The crimping attachment is designed for crimping any kind of sheet metal, pipe, round or square. The parts are interchangeable and the crimping jaws are of steel.

STEEL CIRCUMFERENCE RULES

No. 95—1 $\frac{1}{4}$ inch x 16 Gauge, 3 feet, One Side Circumference Rule, Opposite Side Table of Measurements, Nickel Plated. . \$5.00
Very useful for obtaining circumferences of circles by simply measuring the diameter. As shown in cut the top edge is graduated with 16ths of inches. The bottom edge with what, for convenience, is called "circumference inches," into 8ths. The divisions of this edge, compared with the opposite edge, bears the same ratio inversely to each other as the diameter of a circle to its circumference. Therefore, opposite the first inch on top edge is read on the lower edge 3 and the fraction representing 0.1416 inches.

IDEAL HOUSEHOLD

SOLDERING SETS

GEM

Per Dozen Sets

No. 56 Set—Consists of 1 Octagon Soldering Copper, 1 Box of Powdered Rosin, 1 Stick of Triangular Solder, 1 Scraper and Tin for Tinning Copper, Put up in a Heavy Pasteboard Box with Full Directions, Weight Per Dozen 10 Lbs. \$6.00

Larger than 3 inches to 3 $\frac{1}{2}$ inches 2.34

PLUMBERS' SCRAPERS

Steel Blade, Wood Handle.

No. 11—5 inches Long, Weight Per Dozen 2 Lbs. \$5.00
One Dozen in a Package.

Per Dozen

Each

No. 1 Set—Consists of 1 Bar of Solder, 1 Box of Rosin, 1 Scraper and a Soldering Copper of Sufficient Size to Retain the Heat, Put up in a Wooden Box, Weight Per Dozen Sets 12 $\frac{1}{2}$ Lbs. \$15.00
The Soldering Copper may be used as an ordinary copper or when attached to a gas burner, the gas passes through a hollow tube within the length of the handle, and is ignited at emission holes immediately beneath the copper.

Per Dozen Sets

No. 1 Set—Consists of 1 Bar of Solder, 1 Box of Rosin, 1 Scraper and a Soldering Copper of Sufficient Size to Retain the Heat, Put up in a Wooden Box, Weight Per Dozen Sets 12 $\frac{1}{2}$ Lbs. \$15.00
The Soldering Copper may be used as an ordinary copper or when attached to a gas burner, the gas passes through a hollow tube within the length of the handle, and is ignited at emission holes immediately beneath the copper.

SOLDERING SALTS

The Original Yager's Twice Improved.

A chemically pure flux in the form of a dry salt, made of the purest raw materials which makes the best flux for soldering tin, copper, brass, iron or steel, one to the other. It makes the joints stronger than the metal. Can be used in any climate or weather.

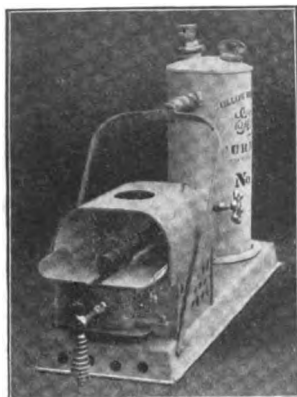

Each
 $\frac{1}{2}$ Lb. Bottle \$0.80
1 Lb. Bottle 1.20
5 Lb. Bottle 5.30

$\frac{1}{2}$ and 1 Pound, One-half Dozen Bottles in a Box; 5 Pound Bottles, Open Stock.

SOLDERING FURNACES

FOR GASOLINE

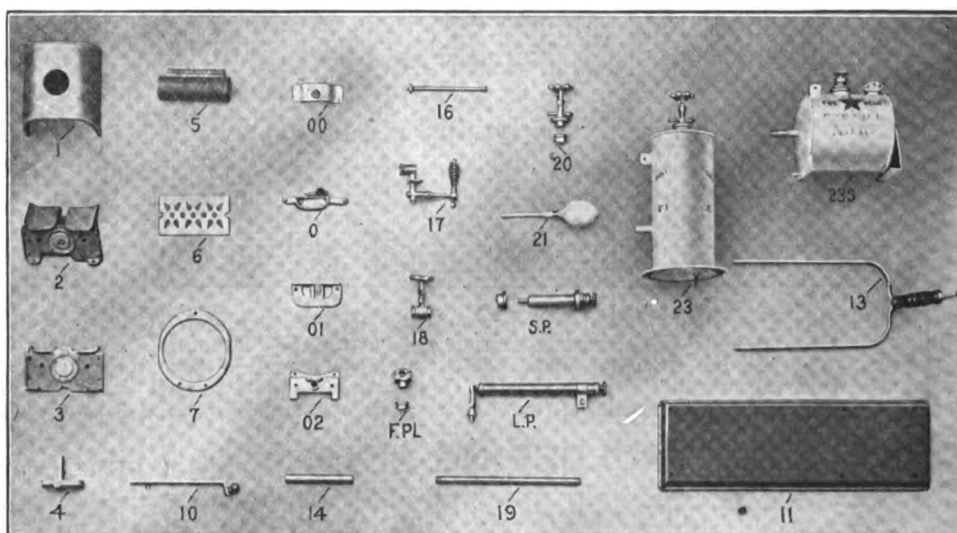

GEM

Equipped with Leakless Brass Pump which is soldered into top of heavy reservoir, and which will give all the pressure desired. This reservoir has an arched bottom, heavily reinforced. Has Cylindrical Slotted Cast Iron Burner, Cast Iron Hood with improved self-balancing handle, Generator and Drip Cup. The Cylindrical Slotted Cast Iron Burner is recessed in front and back, thoroughly bolted which insures strength. The heat is distributed full length of the Coppers. Noiseless and odorless in operation.

	Each
No. 3-GP—Galvanized Steel Reservoir, with Pump, Capacity 3 Quarts, Size 20 ½ x 7x15 inches High, Hood 7x5 ½ x3 inches High, Burner 4 ¼ x1 ¾ inches, Pump ¾ x4 ½ inches Long, Length Over All 6 inches, Weight Each 22 ½ Lbs.....	\$12.60
No. 3-BP—Brass Reservoir, with Pump, Otherwise Same as No. 3-G.....	14.75

GASOLINE FIRE POTS

Seamless Drawn Steel Tank, Swiveled Burner, Welded Fittings, Removable Top. Each

No. 5—Capacity 5 Pints, 12 1/2 inches High, 8 1/4 inches Diameter at Base, 6 inches Diameter at Top, Heats a Pair of 8 Lb. Soldering Coppers and a 5 inch Pot of Lead or Solder at the Same Time, Shipping Weight Each 10 1/4 Lbs. \$10.40

The swiveled burner permits of moving the flame up or down. Fitted with cleanout plugs, thus being easily kept clean. By removing the top section, the base may be used as a torch or brazing fire, enabling the user to accomplish any work any torch will do.

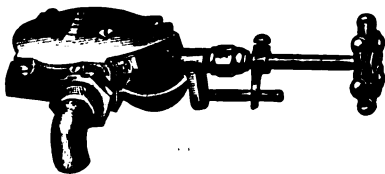

REPAIR PARTS FOR No. 5 GASOLINE FIRE POT

Seamless Drawn Steel Tank, Large Funnel and Filler, Automatic Brass Pump. Each

No. 71—Capacity 7 Pints, 12 1/2 inches High, 9 3/4 inches Diameter at Base, 6 1/2 inches Diameter at Top, Will Heat a Pair of 12 Lb. Soldering Coppers and a Pot of Lead or Solder at the Same Time, Shipping Weight Each 14 1/4 Lbs. \$13.60

The burner has two heating surfaces. The gas is superheated before it is burned, producing intensely hot blue flames burning from each side to the center. A sub-flame for the generator allows the heating flame to be turned low, and the maximum heat can be had at a moment's notice.

BLOW TORCHES

GASOLINE

No. 47—Capacity 1 Pint, Polished Brass, Shipping Weight Each 3 $\frac{3}{4}$ Lbs.\$10.56
Oblong in shape, 1 $\frac{7}{8}$ inches thick, 5 inches long and 8 inches high over all. Especially adapted to the requirements of automobile users, electricians and repair men, as it can be easily carried in any tool kit. Hinged supports at the base prevent tipping over. Can be used in small space and for close work where a round tank torch could not be used to advantage.

No. 31—Capacity 1 Quart, Polished Brass, Shipping Weight Each 4 $\frac{1}{4}$ Lbs.\$9.12
Has no equal where intense heat is desired. Produces a perfect fire, whether used indoors or out, in windy or zero weather. Fitted with automatic brass pump in tank, the check valve of which insures abundant air pressure at all times. Uses but little gasoline. Every desired adjustment is quickly made.

No. 32—Capacity 1 Quart, Polished Brass, Shipping Weight Each 4 $\frac{1}{4}$ Lbs.\$9.60
Exactly like No. 31, except that it has hook and support to hold a soldering copper, a great convenience to repair men. The burner, which is made of special generator metal, retains the heat longer, and greatly aids in producing an intensely hot blue flame.

No. 37—Capacity 1 Pint, Polished Brass, Shipping Weight Each 2 $\frac{3}{4}$ Lbs.\$8.16
Fitted with improved burner which protects the gas or vapor from the wind or cold, as the orifice through which the gas passes is shielded by the burner tube, thus making it possible to keep the flame blue. Has patent automatic air pump with check valve.

No. 107—Capacity 1 Quart, Polished brass, Shipping Weight Each 4 Lbs.\$7.68
Light and well balanced. The burner is made of bronze metal and fitted with wood handle, produces a steady blue flame of intense heat. Fitted with patent automatic brass pump having double springs, forming the handle.

No. 108—Capacity 1 Quart, Polished Brass, Shipping Weight Each 4 Lbs.\$8.16
Exactly like No. 107, except that it has hook and support to hold a soldering copper, a great convenience to repair men. The burner produces a steady blue flame of intense heat. A patented automatic brass pump with double springs forms the handle.

GASOLINE

No. 112—Capacity 1 Quart, Polished Brass, with Detachable Soldering Copper Attachment, Shipping Weight Each 4 $\frac{1}{4}$ Lbs.\$7.68

No. 114—Capacity 1 Pint, Polished Brass, with Detachable Soldering Copper Attachment, Shipping Weight Each 3 Lbs.\$7.20

These are good torches for medium and ordinary work. The burner is made of bronze metal, with metal wheel handle and heavy stuffing box on needle, which prevents leakage. The tank is made of heavy brass and will give the user good results.

KEROSENE

No. 96—Capacity 1 Quart, Polished Brass, Complete with Cleaning Needle, Shipping Weight Each 3 $\frac{3}{4}$ Lbs.\$10.56
The burner produces an intensely hot, clear blue flame, about 6 inches long, generating sufficient heat to quickly melt a $\frac{1}{4}$ inch copper rod. Fitted with automatic brass pump, by means of which ample air pressure is secured.

SAFETY RAZOR STROPPERS

TWINPLEX DE LUXE

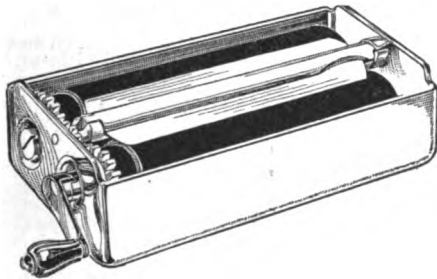

Cut Shows Soft Leather Case. Each

No. G1—For Gillette Blades and Blades that Will Fit Gillette Razors, Mechanism is Enclosed in a Highly Polished Nickel Dust Proof Case, $2\frac{3}{4} \times 2\frac{3}{4} \times 1\frac{1}{2}$ inches, Two Receding Rollers Covered with the Finest Quality Leather, Sliding Blade Holder, Disappearing Handle, Removable Lid, Enclosed in a Handsome Soft Leather Case\$5.50

The handle can be turned in either direction. The two rollers revolve in opposite directions, each stropping a different edge. At each complete revolution of the rollers the blade turns over and the rollers strop the other side.

TWINPLEX, DURHAM DUPLEX MODEL

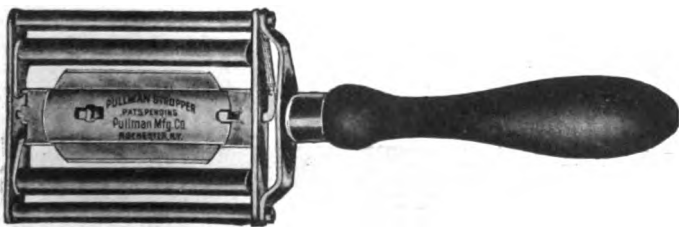

Each

No. 1DD—For Durham Duplex Razor Blades, Constructed on the Same Principle as the Twinplex De Luxe, a Beautiful Little Machine as Perfectly Adjustable as a Fine Watch, with a Dovetailed Wooden Case Covered with Handsome Leather Grained Cloth, Lined with Purple Velvet\$5.50

The Durham Duplex Blade is narrower and larger than a Gillette and is rigid, where a Gillette is flexible, therefore they require a different model strop.

PULLMAN AUTOMATIC

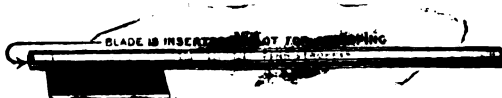

Nickel Plated Steel Frame, Ebonized Wood Handle.

Per Dozen

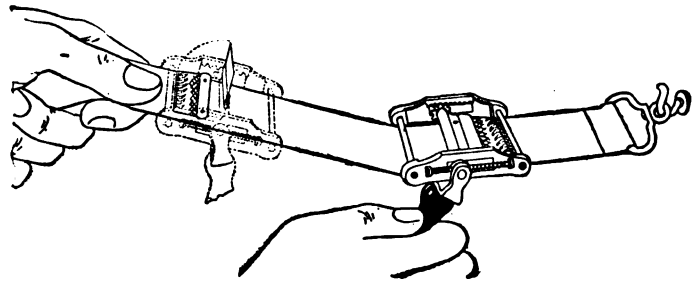

No. 1—For Gillette Blades\$17.00
No. 2—For Ever-Ready and Gem Blades 17.00

The blade is clamped fast on a holder, on each side are two rollers bearing on the strop. Strops all edges without removing blade from holder. Perfectly made and finished.

THE PENN

One-half Dozen in a Box.

RAZOR STROPS

CARBORUNDUM

The Carborundum Razor Stropps are cut from the choicest leather, especially tanned and prepared. One side of the strop is corrugated, and into these corrugations the finest of Carborundum Powder is rolled. A few strokes of the razor on the corrugated side will bring the blade to a keen edge; a few more strokes on the finishing side and the razor has that smooth, non-pulling edge. These stropps are fitted with novel and practical trimmings. One great advantage in using the Carborundum Razor Strop is that it always remains soft and pliable.

Cut Shows Corrugations and Carborundum Powder Under Magnifying Glass.

No. 436—26x2 1/4 inches, Selected Quality Medium Weight Genuine Horsehide, One Side Corrugated and Filled with Carborundum Powder, Nickel Plated Single Swivel Ring, Russet Embossed Leather Handle \$15.00
One-half Dozen in a Box.

One-half Dozen in a Box.

Bailey Sharpener and Strop means shaving comfort. A keen, smooth shave every day in the year.

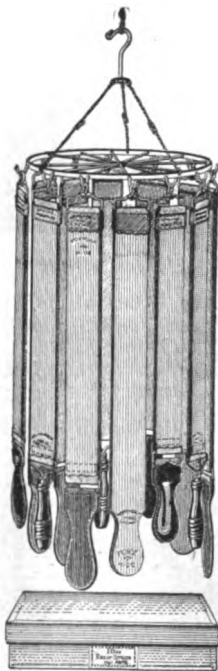

Shaving comfort lies in the keen edge of the blade. The barber proves it by stropping his razor every shave.

- Bailey—Combined Sharpener and Strop, for All Kinds of Regular and Safety Razors**\$16.00** Per Dozen

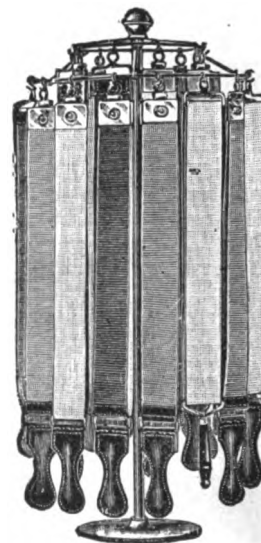

The sharpening and stropping surface are mounted on a cushion back. The flexible surface hugs the blade and slides across at the right angle—that delicate cross-grain motion—never so abrupt as to tear or bend the delicate edge. The sharpening surface is treated with a delicate abrasive on a soft surface. The surface is of the finest oil treated calfskin, a few strokes will put your blade in a good condition.

SHEARS

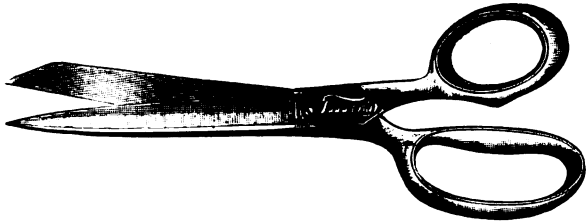

The "Frankfurth" line of Shears and Scissors are guaranteed without hesitation to remain sharp longer, cut easier and outwear any other make. Experienced, skilled labor being employed in their manufacture.

Innumerable tests are made of all material before it is put to work for the different operations.

The method that is employed in their manufacture makes it necessary that every shear blade is hardened one at a time in cold water. This insures a practical cutting edge.

The nickel plating is heavy, even and pliable. The Japanning consists of three coats of special black enamel making an elegant hard jet black finish that will resist wear.

- No. 403—3 inch Special Steel Blade, Polished Beechwood Handle, Brass Rivets and Burrs. \$3.50
One-half Dozen in a Box.

HOUSEHOLD KNIFE ASSORTMENT

- No. 1375—Contains 12 Knives, 4 Each Ebony, Cocobolo and Boxwood Handles, 7 and 8 inch Special Quality Steel Blades, Extra Finish, Brass Rivets and Burrs, with Display Tray as Shown. \$8.00

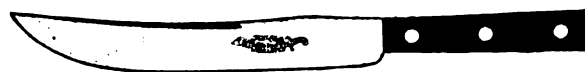

These Knives are ground thin to give an elastic action similar to a spatula. For general kitchen and household use they afford marked advantages, being a combination of slicing knife, butcher knife, cake knife and spatula. Because they are ground thin they take an edge easily and hold it well. They should not be used where a heavy, stiff knife is needed.

SLICERS

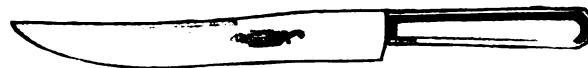

- No. 171-S—8 inch Swaged Steel Blade, Scale Tang, Cocobolo Handle, Iron Bolster, Three Rivets, a Competition Grade Knife. \$3.50
One Dozen in a Box.

 One-half Dozen in a Box.

- No. 10—Empire, Finest Cutlery Steel Blade, Double Edge, Hardened and Tempered with Great Care, Ground Sharp, Black Rubberoid Handle, Steel Ferrule\$8.00

This Knife in having a double edge in reality is two knives, in one, and is absolutely perfect in preparing the fruit. Blades are ground keen and sharp and so adapted for removing the center and cutting clean and quickly around the edges and dividing the fruit into segments. The round end prevents cutting through the outer skin, thereby saving the juices.

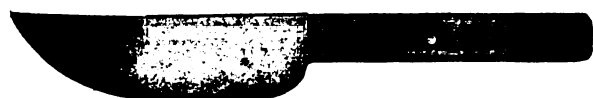

One-half Dozen in Display Box.

BANANA KNIVES

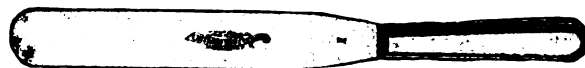

- No. R60—Curved Steel Blade, Beechwood Handle, Brass Tubular Rivets\$6.00

Indispensable for use in the home, bakery, candy shop, restaurants, hotels, ice cream parlors, etc.
One in a Box, One Dozen in a Case.

NUT CRACKS

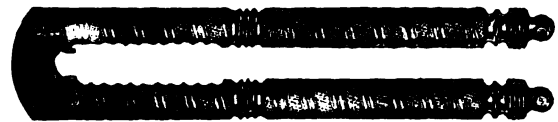

Per Dozen

- No. 1H—Harper's, Nickel Plated Steel, Extra Wide Jaws, Keeps the Hulls from Falling on the Floor.....\$4.00

The jaws of this Cracker are much wider than any other, and the nut resting against the plate brings it on a line with the jaws, hence the nut is cracked all over evenly.

Place the nut between the jaws from the under side, press handles together and crack the nut, letting kernels and hulls drop in the hand or receptacle.

One-half Dozen in a Box.

Per Dozen

- No. 0—Solid Steel, Handles are Knurled Full Length, Sharp Corrugations, Finely Nickel Plated.....\$2.25

FACTORY LIGHT FIXTURES

ADJUSTABLE BENCH BRACKET

**Black Finish Only.**

Especially adapted for use on power sewing machines. By use of this fixture the light can be so adjusted as to fully light the work and at the same time entirely shield the eyes of the operator. Exceptionally good lighting results are obtained by use of our No. 15 Special Shade on this fixture.

Note—In ordering specify clearly size desired.

Height of Standard 12, 15 or 18 inches. Length of Arm 12, 15 or 18 inches.

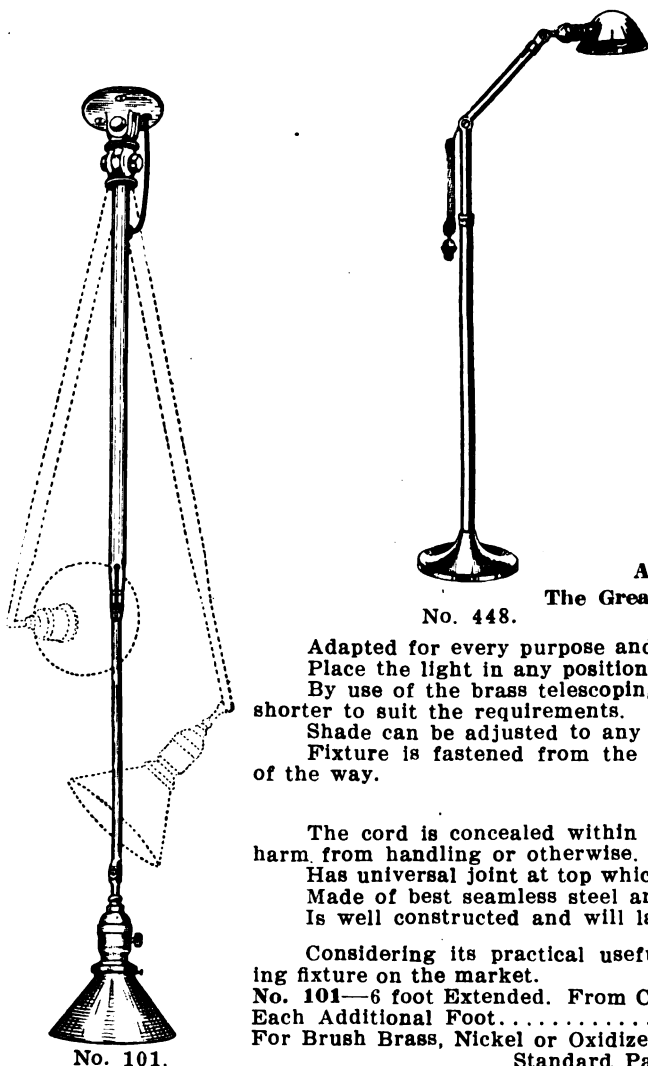

No. 250—Bracket Only, without Socket or Shade..... Each \$2.20
Standard Package 12, Discount ...

No. 15—SPECIAL SHADE

Frosted Aluminum Inside, Green Enamel Outside.

The principal feature of this Shade is that it concentrates the rays to a smaller area, producing a stronger light with a smaller lamp, thereby greatly reducing the consumption of current and producing a better light.

No. 15—Diameter 4 inches, Height 4½ inches, 36 in Standard Package Each \$0.30

No. 101.

No. 448.

ADJUSTABLE CEILING FIXTURE

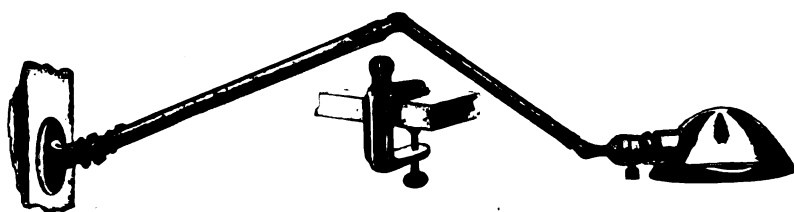

The Greatest Utility Light Fixture on the Market.

USE
Adapted for every purpose and in every place where a direct light is required. Place the light in any position or at any angle and it will adjust itself to that particular position. By use of the brass telescoping tube which is 20 inches long the fixture can be made longer or shorter to suit the requirements. Shade can be adjusted to any desired angle. Fixture is fastened from the ceiling and when not in use can instantly be pushed entirely out of the way.

CONSTRUCTION
The cord is concealed within the tube by an invention of our own and is protected against all harm from handling or otherwise. Has universal joint at top which permits free action in any direction. Made of best seamless steel and brass tubing in various lengths to suit height of ceiling. Is well constructed and will last indefinitely.

Considering its practical usefulness and convenience it is the cheapest as well as the best lighting fixture on the market. Each
No. 101—6 foot Extended. From Ceiling to Socket, Black Finish, Complete as Shown..... \$4.50

ADJUSTABLE FACTORY FLOOR PORTABLE**Black Finish Only.**

These Fixtures are practical for shops with extremely high ceilings, where ceiling fixtures cannot be used.

Their many adjustable features overcome the difficulties of ordinary lighting devices, as they enable the operator to concentrate the light on exactly the spot where it is needed.

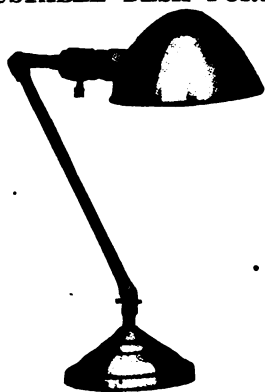

Particularly adapted where stationary fixtures cannot be used to advantage.

ADJUSTABLE ELECTRIC LAMPS

Showing
Lamp
Collapsed.

WALLACE

The First and the Best, Stays Put Anywhere.

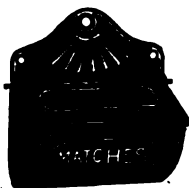

The Wallace Patented Adjustable Electric Lamp is the Handiest Lamp in the World and the Only Lamp which can be Collapsed and carried in a grip. Concealed in the base of lamp is an automatic Spiral Clamp Spring by means of which you can hang lamp on the wall or clamp it instantly to bed rod, dressing table, desk or chair; iron grip rubber suction cup, for sticking lamp to mirror, window pane or any other non-porous surface. You can stand the Wallace anywhere; hang or stick it any place; tilt lamp and shade up or down or sideways. No matter where you want light, the Wallace will Concentrate the Light Just There.

ESANBE LOOSE LEAF LEDGER OUTFITS

Round Steel Back, Metal Hinges.

The Esanbe Ledger is designed to meet the demand for a durable Low Priced Loose Leaf Ledger, in sizes suitable to the requirements of various lines of business.

Construction—The mechanism is made entirely of steel. The frame consists of three pieces of pressed steel. The back is formed round with peculiar ends which form housings for the sliding side members, thus making a frame of great rigidity with minimum weight.

The Mechanism is simple, a center screw shaft securely anchored to the back and operated from the end by a detachable key, controls the expansion thereby tightening or loosening the sheets.

Capacity—1½ inch back, will hold from 250 to 400 sheets, with index.

Posts—Four Alternating Telescope Posts ⅜ inch diameter, Standard Centers.

Binding—The Covers are made of double boards, round corners with metal hinges and bound in Corduroy with Red cowhide back and corners gold tooled.

Indexes—The Indexes are of a good grade of Buff Linen Ledger Paper with Leathered Tabs.

Sheets—The Sheets are made of a good grade of Linen Ledger Paper, Two Styles of Ruling, Form A and Form B. (Order by Form Number.)

*No. 99—12 Gauge, 28 inch Barrel, Full Choke, Chambered for $2\frac{3}{4}$ inch Shells, Weight About 7 $\frac{3}{4}$ Lbs.\$80.00

Standard Stock Dimensions: Length 13 $\frac{3}{4}$ inches, Drop at Heel 2 $\frac{3}{8}$ inches, at Comb 1 $\frac{1}{2}$ inches.

The Winchester Self-Loading Shotgun is a recoil operated, hammerless, take down repeater. The recoil developed by the discharge of the gun cocks the hammer, ejects the fired shell, feeds a loaded shell from the magazine into the chamber and leaves the gun ready to be shot again.

The barrel, receiver, magazine and all working parts of this gun throughout are made of Nickel steel, which has a far greater tensile strength and elastic limit than the steel used by other makers.

MARLIN REPEATING SHOT GUNS

Solid Steel Breech, Solid Top, Side Ejection, Automatic Recoil Hang Fire Safety Device, Double Extractors, Press Button Cartridge Release, Trigger and Hammer Safety are Up-to-Date Features.

MODEL 28, HAMMERLESS, TAKE DOWN

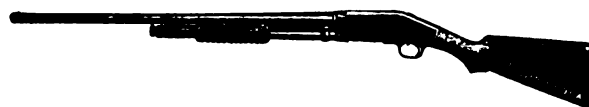

Special Rolled Steel Barrel, Matted on Top Entire Length, Fine Straight Grained American Black Walnut Stock, Pistol Grip, Rubber Butt Plate, 6 Shots.

Each
No. 28A—12 Gauge, 30 or 32 inch Barrel, Full Choke, Weight About 8 Lbs.\$25.75

Standard Stock Dimensions: Length 13 $\frac{1}{2}$ inches, Drop at Heel 2 $\frac{1}{2}$ inches, at Comb 1 $\frac{1}{2}$ inches.

The barrel is Special Rolled Steel, heavy at breech, tapering nicely toward muzzle; this clean, perfect tube with an even thickness of metal on all sides, gives uniform expansion and even distribution of the shot, secures extreme range and pattern; the single barrel shoots exactly where you hold, and is guaranteed to place more than 325 pellets in a 30 inch circle at 40 yards, using 1 $\frac{1}{4}$ ounces No. 8 chilled shot.

MODEL 31, 20 GAUGE, HAMMERLESS, TAKE DOWN

This Model is similar to the Model 28, but built smaller neater and trimmer throughout, has the same up-to-date features, a light weight gun of beautiful proportion, finely balanced.

Special Rolled Steel Barrel, Handsomely Matted, Fine Straight Grained American Black Walnut Stock and Fore-End, Pistol Grip, Rubber Butt Plate, 5 Shots, Chambered for $2\frac{1}{2}$ or $2\frac{3}{4}$ inch Shells.

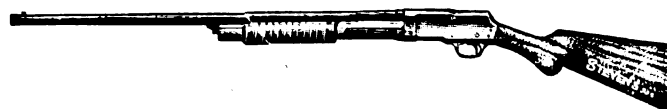

Each
No. 31A—20 Gauge, 25 inch Barrel, Full Choke, Weight About 5 $\frac{1}{2}$ Lbs.\$27.75

Standard Stock Dimensions: Length 13 $\frac{1}{2}$ inches, Drop at Heel 2 $\frac{1}{4}$ inches, at Comb 1 $\frac{1}{4}$ inches.

The finest little repeater for woodcock, snipe, bob white or quail, for grouse, partridge or prairie chickens, rabbits and squirrels, has ample range and power.

STEVENS REPEATING SHOT GUNS

REPEATING RIFLES

REMINGTON-U. M. C.

MODEL 12, .22 CALIBER, HAMMERLESS, TAKE DOWN

The Remington-U. M. C. Solid Breech Hammerless Take-Down .22 Caliber Repeating Rifle is modeled after the lines of the Remington-U. M. C. Pump Gun, which has established the reputation of having the most graceful lines of any repeating arm on the market. The action is strong and simple. The positive extraction and feeding of cartridges and the absolute locking of the action when cocked, together with other excellent features, places this rifle far in the lead.

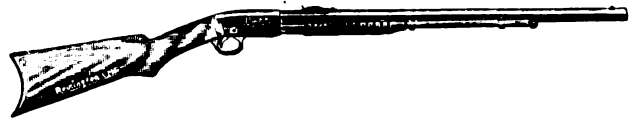

STANDARD GRADE

Solid Breech, Side Ejection, Straight Grip Walnut Stock and Fore-End, Rubber Butt Plate.

MODEL 1903 AUTOMATIC

For .22 Winchester Automatic Rim Fire Cartridges. Hammerless, Take Down.

Plain Trigger, Plain Walnut Straight Grip Stock and Fore-End, Blued Trimmings, with Safety Attachment, Open Front and Rear Sights, Chambered for .22 Winchester Automatic R. F. Cartridges Only.

Each

- No. 01903—.22 Caliber, 20 inch Round Steel Barrel, 10 Shots, Weight 5 1/4 Lbs. \$27.00

The Winchester Model 1903 is a ten-shot, automatic, hammerless, take-down rifle, using a new, inexpensive Rim Fire Cartridge, known as the .22 Caliber Winchester Automatic, loaded with Smokeless Powder and Winchester Greaseless Bullet. No other size of .22 Caliber Cartridge should be used in this rifle. It is simple in construction and operation.

MARLIN REPEATING RIFLES

NEW MODEL 27

Take Down, Trombone Action.

Solid Top, Side Ejection, Blued Frame, Black Walnut Stock and Fore-End, Blued Steel Rifle Butt Plate, Adjustable Rocky Mountain Rear and Ivory Bead Front Sights.

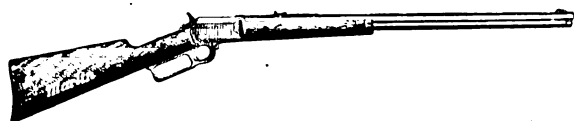

Each

No. 2725—.25-20 Caliber C. F., 24 inch Special Smokeless Steel Octagon Barrel, 7 Shots, Weight 5 3/4 Lbs.\$18.60

No. 2732—.32-20 Caliber C. F., 24 inch Special Smokeless Steel Octagon Barrel, 7 Shots, Weight 5 3/4 Lbs. 18.60

Shoots Black Powder, Low Pressure Smokeless and High Velocity Smokeless Cartridges.

MODEL 1892, 22 AND 32 CALIBERS

Solid Top, Side Ejection, Black Walnut Stock and Fore-End, Rocky Mountain Rear and Front Sights.
.22 Caliber, Rubber Butt Plate.

Each

No. 334—.22 Caliber, 24 inch Octagon Steel Barrel, Full Magazine, Chambered for .22 Short, Long and Long Rifle R. F. Cartridges, without Any Change of Adjustment, Weight 5 3/4 Lbs.\$16.60

Capacity of Magazine: 25 Short, 20 Long or 18 Long Rifle Cartridges.

.32 Caliber, Rifle Butt Plate.

Each

No. 335—.32 Caliber R. F., 24 inch Octagon Steel Barrel, Full Magazine, Weight 6 Lbs.\$16.60

Capacity of Magazine: 17 Short, 14 Long or Long Rifle Rim or Center Fire Cartridges.

It handles without change in adjustment the .32 short, .32 long and .32 long rifle rim fire cartridges, and by substituting the extra firing pin (sent free with the rifle) it handles the .32 short, .32 long and .32 long rifle center fire cartridges. It is especially recommended for rabbits, woodchucks, foxes, and all small game, up to 200 yards.

MODEL 1893

Solid Frame.

Solid Top, Side Ejection, Case Hardened Receiver, Full Magazine, Black Walnut Stock and Fore-End, Blued Steel Rifle Butt Plate, Rocky Mountain Front and Rear Sights.

No. 3030FW—.30-30 Caliber, 20 inch Tapered Round Barrel, 6 Shots, Weight 6 Lbs. 25.00

SAVAGE REPEATING RIFLES

MODEL 1899, 250-3000 CALIBER

Velocity 3000 Feet Per Second.

Take Down, Hammerless.

Hi-Pressure Steel Barrel with Integral Front Sight Base, Genuine American Walnut Shot Gun Butt Stock and Fore-End, Capped Extra Full Pistol Grip, Checkered, Corrugated Steel Butt Plate, German Silver Bead Front Sight, Sporting Wind Gauge Rear Sight, Action as Regular Model 1899.

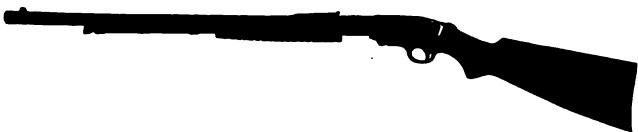

Each
No. 300—.250-3000 Caliber, 22 inch Tapered Round Steel Barrel, 6 Shots, Weight 7 Lbs.....\$32.50

Cartridges used are the No. 1 full Metal Case, and No. 2 Soft Nose Expanding.

This Rifle has a higher velocity, flatter trajectory and greater accuracy than any other Rifle made in this country. The velocity is 3000 feet per second. The energy is 1739 foot pounds and the trajectory (mid-range height for 300 yards 5/7 inches) is so flat that sight need not be raised for the largest sporting ranges.

The Cartridge is rimless and in spite of its tremendous velocity and great accuracy is wonderfully easy on the rifle. It is easy to clean. The Rifle in standard form is fully equal in details and finish to the expensive European Rifles, which it out-classes in accuracy, convenience and efficiency.

NEW MODEL 1914, HAMMERLESS

Take Down.

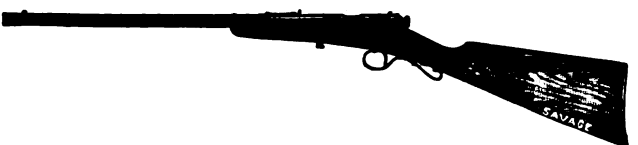

Hi-Pressure Steel Barrel, Solid Breech Top, Side Ejection, Trombone Action, Tube Magazine, American Walnut Shot Gun Butt Stock, Pistol Grip, Steel Butt Plate, Bead Front and Adjustable Wind Gauge Rear Sight.

MARBLE'S RIFLE SIGHTS

FLEXIBLE REAR.

For All Standard American Rifles.

The rear sight does not lock up, but is held by a double acting spring. Sight yields when struck and automatically flies back to correct place. Cannot be injured by blows or shocks and is always ready for accurate shooting. Can be locked down at will and instantly raised when wanted. Jamb nut at bottom securely holds elevation sleeve and keeps disc stem rigid and in alignment.

SIMPLEX REAR SIGHT.

For .22 Caliber Rifles Only.

The stem can be set very quickly in any position by raising the lock to a horizontal position and moving the stem up or down with the fingers.

The lock holds stem rigid at any elevation.

The sight is held quite firmly by an inside spring in the proper position for shooting, but can be easily folded down.

No. R7 and R8 for Rem. Model 12 and 14.

With No. 5 Disc.

Each

Flexible Rear Sight—With Extra No. 1 Disc and Screw for Attaching Sight to Rifle. (Order by Number).....\$3.00

MARBLE'S FLEXIBLE REAR SIGHT.

Important Features and Advantages.

1st.—Automatic Joint. Whenever the sight is struck on front or back the coiled spring in the hinge brings it instantly into position for shooting. It can be locked down at will by the sliding button at back of hinge.

2nd.—Advantage Over Receiver Sights. Can be used on rifles with long firing bolts, and to better advantage than Receiver Sights on account of being closer to the eye.

3rd.—Elevation Lock. By simple construction the lower sleeve, when turned up against the elevating sleeve, prevents it from being turned and holds disc stem true and rigid at any elevation.

4th.—Interchangeable Discs. All Regular, Target and Side-light Discs fit any Marble Flexible or Simplex Rear Sight.

5th.—Point Blank Adjustment. The screw in bottom of disc stem permits a quick change of point blank range without tools.

(Packed one in a paper box with envelope containing extra disc (No. 1) and proper screws for attaching sight to rifle).

DRILLS AND TAPS.

Drills—For all Rear Sight Tang Holes.....	Each \$0.25
Taps—For all Rear Sight Tang Holes.....	Each .25

Read This Before Buying Sights.

Carbines and "Extra Light Weight" models of various makes, models and calibers take the same Marble Rear Sight which is made for its respective model of rifle.

Do not accept sights made for rifles other than the one you wish to sight.

Concerning Sights for Model 1895 and 1903 Winchester and Hopkins and Allen Rifles.

The model 1895 and 1903 Winchester tangs are not drilled and tapped for the screws which hold the sight base to the tang. Hopkins & Allen Rifles have no screw holes in tang.

Note—This sight will suit all American Rifles, but when ordering state whether or not rifle has pistol-grip stock and be careful to give correct number in list on this page.

DISCS FOR MARBLE'S FLEXIBLE AND SIMPLEX REAR SIGHTS

Nos. 5 and 6 Target.

No. 1.

No. 2.

Disc Cuts are Actual Size.

Nos. 3 and 4 Side Light.

Nos. 7 and 8 Snap Shooters.

No. 1 or No. 2.....	Each \$0.25
No. 3—Sidelight, Aperture Size No. 1.....	.50
No. 4—Sidelight, Aperture Size No. 2.....	.50
No. 5—Target, Aperture Size No. 1.....	.50
No. 6—Target, Aperture Size No. 2.....	.50
No. 7—Snap Shooters, Aperture Size No. 2.....	.50
No. 8—Snap Shooters, Aperture ½ inch.....	.50

Target and Sidelight Discs screw into stem of sight. Interchanging with the two regular discs, Nos. 1 and 2. In dim light and for failing eyesight a Marble Sidelight Disc is invaluable. They combine all the advantages of the optical principle of the regular discs with the added advantage of an outer rim which enables one to more readily locate the center aperture.

We make a charge of 50 cents for fitting and lining up Front and Rear Sights to a Rifle.

MARBLE'S HUNTING OR TARGET SIGHTS

SPECIFICATIONS AND DIRECTIONS.

Note—Nos. 2, 2s and 6 are made in 3/32 inch beads. They are made for all American Rifles in 3/32 inch Ivory (white or red) or Pope's Island Gold Beads. **Order by number in list for Model and Caliber wanted.**

The lustrous convex surface of the Pope's Island Gold Bead instantly reflects the faintest ray of light and is clearly discernible in the early dawn or evening twilight—adding valuable moments to both ends of the day and at the most favorable time for securing shots at big game.

MARBLE'S STANDARD.

Handsome and well made. See specifications above.

Ivory or Gold Bead. Order by Number. Each \$1.00

MARBLE'S IMPROVED.

We may justly describe this sight as a "long look ahead." It enables one to make accurate shots at any range without stopping to adjust the rear sight.

On a range somewhat longer than the gun is sighted for one can see the object aimed at under the center of the head as well as over.

It is an exceptionally valuable sight for running shots and is used for shooting at objects in the air by the most famous professional riflemen. See specifications above.

Ivory or Gold Bead. Order by Number. Each \$1.00

MARBLE'S REVERSIBLE.

Both beads are the same size and are furnished in 1/6, 3/32 or 1/2 inch sizes.

This combination can be relied upon to meet every possible condition of light, background, etc.

This sight can be instantly reversed. Simply pull up the bead carrier against the pressure of the spring until it clears the groove—then turn it around.

A dowel near each end of groove engages with holes in the bottom of bead carrier. These would take up the shock of a blow on either end. See specifications above.

Ivory and Gold Bead. Order by Number. Each \$1.50

KING'S TRIPLE BEAD FRONT SIGHT.

King's—With 1/16 in. Ivory, Gold or Black Bead. Each \$1.50

This sight can be changed instantly to suit all conditions of weather, light and background. It has three separate and distinct sights—all on the rifle at one time.

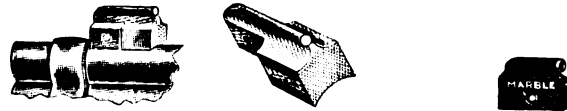

MARBLE'S V-M FRONT.

V-M—Made from Best Tool Steel, Face and Lining of Aperture are made from Lustrous Pope's Island Gold, Aperture is 5/32 in. Inside Diameter, 1/4 in. Outside Diameter, 1/4 in. Deep. Each \$1.50

Embodies an optical principal new to many shooters, as the eye quickly and surely finds the center of the peep sight, so it finds the center of their front sight.

MARBLE'S CARBINE AND SPECIAL RIFLE SIGHT.

No. 94C—Ivory Bead 3/32 in. Diameter, made only for Winchester Carbine, Model 1894, having High Pressure Steel Barrels. It is Especially Constructed to Withstand the Hard Usage Often Given This Rifle in the Saddle and Woods. Each \$0.75

No. 894—Ivory Bead 3/32 inch Diameter, for Winchester Carbine, Model 1894. For Use Only on High Pressure Steel Barrels. Each \$0.50

SHEARD'S "GOLD" HUNTING OR TARGET SIGHT.

(Made under Contract by M. A. & M. Co.)

This sight is guaranteed to show up well in the darkest timber, under any and all circumstances, and not to "blur". Will show the same color on different colored objects; will stand rough work and improve the shooting greatly.

Made to fit all sporting and military rifles.

Each \$1.50

SHEARD'S "GOLD" CARBINE AND SPECIAL SIGHTS.

When Ordering State Name, Model and Caliber of Arm.

No. 894—For Winchester Model 1894 Carbine with High Pressure Barrels. Each \$1.50

No. 94B—For Winchester Model 1894 Carbine, Using Black Powder. 1.50

No. "894" & "94B"

INSTRUCTIONS FOR ORDERING SIGHTS

Order Improved, Standard, Reversible, King and Sheard (except Carbine), Front Sights by these numbers. Be sure to state size and color of bead desired, and Name of Sight. Each Sight fits all Rifles listed under the same number.

-----------	---	--	-------

The .32 Special uses a .32 S. & W., S. & W. Long, or .32 Colt's New Police Cartridge.

Target Shooters, Sportsmen, Police Officers and Night Watchmen will find this grip very much to their taste.

The advantage of making the grip of one piece of wood are that it can be made of fancy knurled walnut, which could not be used on an ordinary two piece stock, as the grain would not match. The grip has a beautiful hand rubbed finish which brings out the grain of the wood to perfection.

IVER JOHNSON SPECIAL, SAFETY HAMMERLESS

Double Action, Automatic Ejector, Rubber Stock.
.32 Caliber Special, Center Fire, 6 Shots.

Nickel Plated.

No. 1932N	— .32 Caliber Special, 4 inch Barrel, Weight 20 Oz.	Each	\$8.50
-----------	---	------	--------

Blued Finish.

No. 1932B	— .32 Caliber Special, 4 inch Barrel, Weight 20 Oz.	Each	\$9.50
-----------	---	------	--------

This Revolver uses .32 Colt New Police, and .32 S. & W. Long, also the .32 S. & W. Regular Cartridges.

A heavy Revolver that shoots a small cartridge.

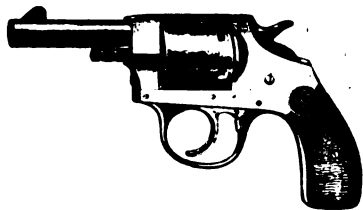

This Special has a heavy barrel, cylinder and frame, which permits six chambers in the cylinder instead of five. A magnificent target weapon.

For Component Parts, See Page 1355.

*Not Carried in Stock, Sold Only for Direct Factory Shipment.

Extra Magazines 1.50

GOVERNMENT MODEL

Full Metal Patched Bullet.

Adopted by the U. S. Government.

.45 Caliber, Rimless, Smokeless. Each

No. 45—.45 Caliber, Full Blued, 7 Shot, 5 inch Barrel, Checkered Walnut Stock, with Grip Safety and Safety Lock, Length Over All 8½ inches, Weight 39 Oz. \$37.00
Extra Magazines 1.50

In Military and Government Models the slide remains open after firing the last cartridge. When reloading the arm in this position, insert the magazine, then press downward the slide stop. The slide goes forward, inserting a cartridge without any movement of the slide by hand. The slide stop is operated by the thumb of the hand holding the pistol.

The action of Colt's Pistols is automatic except that the trigger must be pulled to fire each shot (continued discharge will not result from one pull of the trigger). The arm can be discharged at the rate of five to eight shots per second, the cartridges being automatically supplied from a detachable magazine inserted in the handle of the pistol.

PISTOLS

SAVAGE AUTOMATIC

1915 MODEL, HAMMERLESS

Rimless, Smokeless.

Enclosed Breech Plug, Independent and Grip Safety, Rubber Grip Plates.

Each

- No. 32SA—.32 Caliber, 3 1/4 inch Barrel, Blued, 10 Shots, Length Over All 6 1/2 inches, Weight 20 1/2 Oz. \$15.00
- No. 380SA—.380 Caliber, 4 1/4 inch Barrel, Blued, 9 Shots, Length Over All 7 inches, Weight 22 Oz. 16.00

Adapted to .32 and .380 Rimless Savage and Colt's Smokeless Cartridges.

The Savage is a powerful, accurate and rapid fire pistol. The mechanism is semi-automatic or self-loading, in which the recoil of firing the cartridge extracts and ejects the empty shell, cocks the pistol and reloads it in readiness for the next shot. The trigger must be pulled to fire each shot.

SMITH & WESSON AUTOMATIC

Rimless, Smokeless.

With Hand Operated and Automatic Safety Devices, Wood Stock with Steel Plate Backing.

Each

- No. 35SA—.35 Caliber, 3 1/4 inch Barrel, Blued, 7 Shots, Length Over All 7 1/4 inches, Weight 24 Oz. \$28.00

Adapted to .35 Caliber S. & W. Automatic Cartridges, designed especially for this arm. The shell is rimless and the head instead of being folded is made solid.

TARGET PISTOLS

STEVENS TIP UP

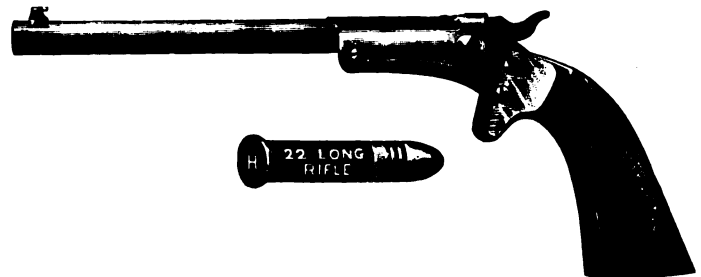

Plain Walnut Grip, Single Trigger, Open Sights.

Each

- No. 41—.22 Caliber, 3 1/4 inch Round Barrel, Octagon Breech, Blued, Nickel Plated Frame, Chambered for .22 Short Rim Fire Cartridges, Weight 8 Oz. \$3.00

A Handy Pocket Pistol, convenient to carry, when desired to shoot at a mark at short range, say up to 15 or 20 yards, it cannot be excelled.

STEVENS DIAMOND MODEL

Long Plain Walnut Grip, Single Trigger, Open Sights.

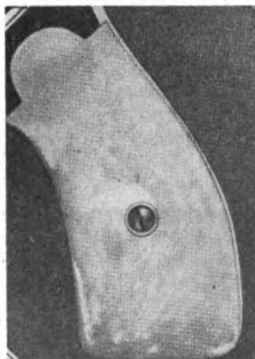

Each

- No. 43—.22 Caliber, 6 inch Round Barrel, Octagon Breech, Nickel Plated Frame, Chambered for .22 Long Rifle Rim Fire Cartridges, Weight 9 Oz. \$5.00

Note—Will also shoot .22 short and long cartridges, but they are not recommended for accuracy.

APPROXIMATE NET PRICES FOR GUN REPAIRING

WE HAVE A FULLY EQUIPPED GUN REPAIR SHOP

These prices are approximate. We cannot state the exact amount without seeing the job.

Checking, engraving and fancy work adds largely to the expense. As a rule the cost of repairs will be in proportion to the cost of the gun.

	Each		Each
Barrels—		Soldering Loops	\$0.75
Taking Dents out of Barrel.....	\$1.00 to \$4.00	Springs—	
Taking Barrels Apart and Resoldering..	6.00 to 10.00	Main	1.00 to 3.00

Levers—Top or Side	1.50 to 6.00		
Plungers30 to 1.00		
Sears50 to 1.50		

Note—When Sending Gun to have Stock Attached, Always Send the Complete Gun.

*The Price for a Plain Stock is \$10.00, Fancy and better Stocks will be made according to Material and time required, ranging in price up to \$25.00.

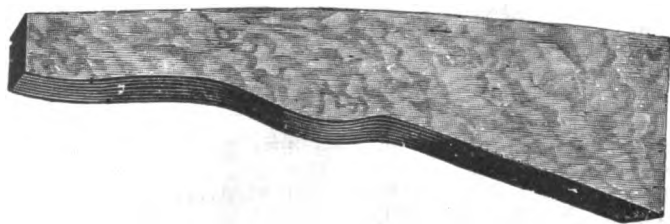

Gun Stocks are Hand Carved out of a block of Walnut to fit the Mechanism of the Gun Lock, these are made by our Expert Gunsmith and as it is very accurate work it requires from two to three days to complete the order.

If you will send complete description of the parts you want, giving make of Arm, Model and Gauge or Caliber, as the case may be, we can promise prompt shipment.

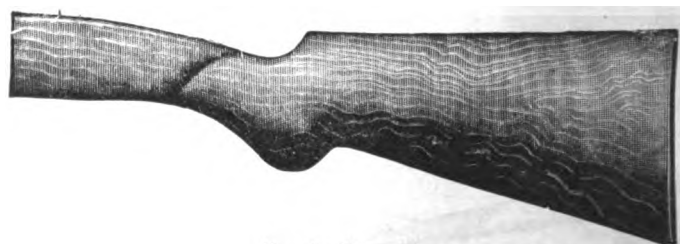

In any case where there is doubt as to the part wanted or the make and model of the gun for which the part is intended, we ask you to send us a sample or at least an outlined drawing.

This will in all instances assure promptness and exactness in the filling of your order.

GUN STOCKS

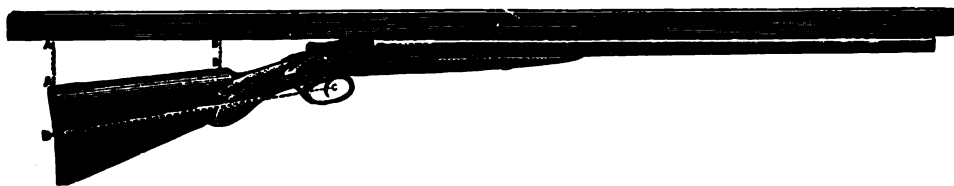

Nos. 2 to 4, Block Form.

No. 5, Turned.

	Each
No. 2—Plain American Walnut, in Block Form.....	\$1.00
No. 3—Good American Walnut, in Block Form.....	1.50
No. 4—Good Quality English Walnut, in Block Form.....	2.00
No. 5—Good Quality English Walnut, Turned	2.50

GUN DIMENSIONS

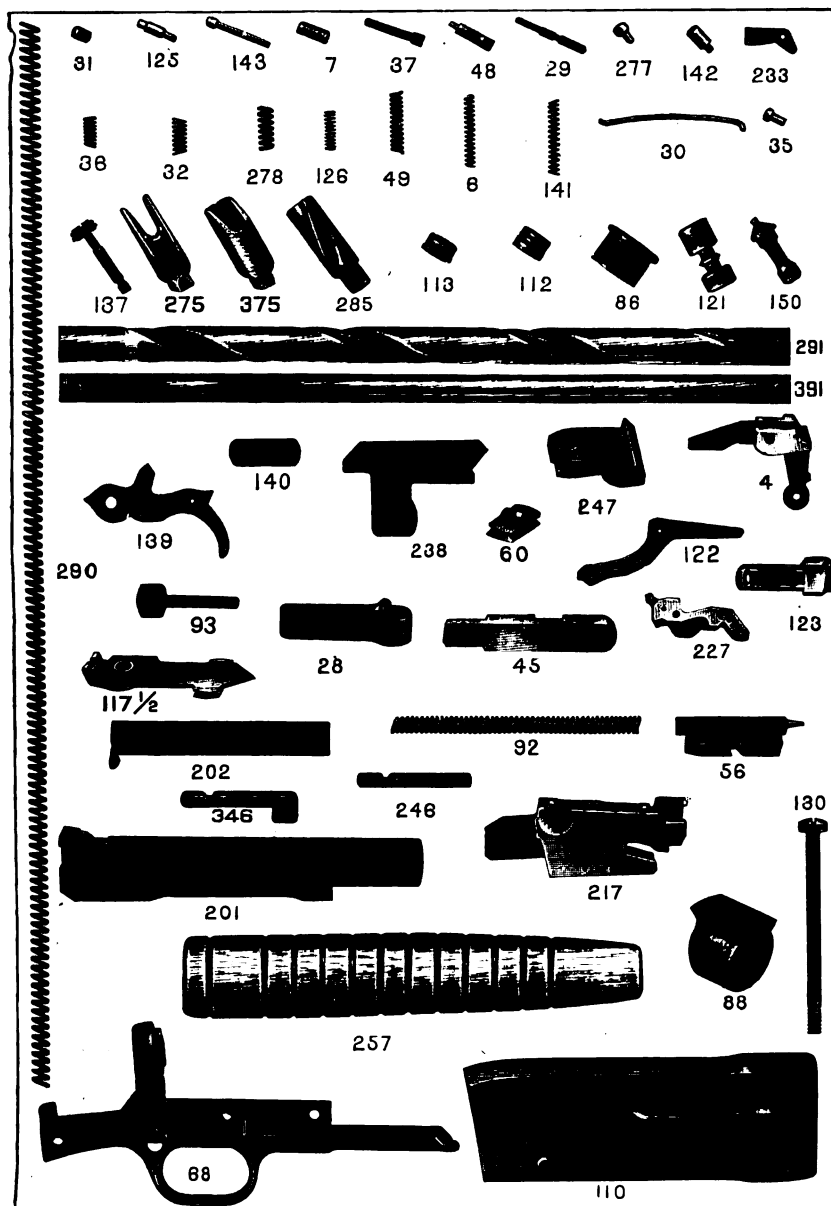

Stock Dimensions—Lay a "straight edge" on the rib of gun from muzzle to end of butt, then give distance from B to B, and A to A. This comb and heel drop will insure the exact bend suitable to the needs of the sportsman. The length required must be taken from the center of the front trigger (C) to the center of butt plate (D), or from C to D. The size of the grip can be given by using a tape measure. The usual grip is four and one-half inches in circumference.

The Drop—We always furnish the comb drop in good proportion if the heel drop only is ordered. One and three-fourths inches for comb calls for a heel drop two and three-fourths to three inches; one and one-half inches comb drop calls for two and one-half inches heel drop.

All Parts Listed at 10 Cents are Sold Net.

"FAVORITE" RIFLE BARRELS

In ordering new barrels for "Favorite" Rifles, it will be necessary to specify what style extractor is wanted. The illustrations feature the different extractors we have used on our "Favorite" Rifles.

Cut No. 1 shows the first extractor we used on this Rifle and this is called a SIDE EXTRACTOR.

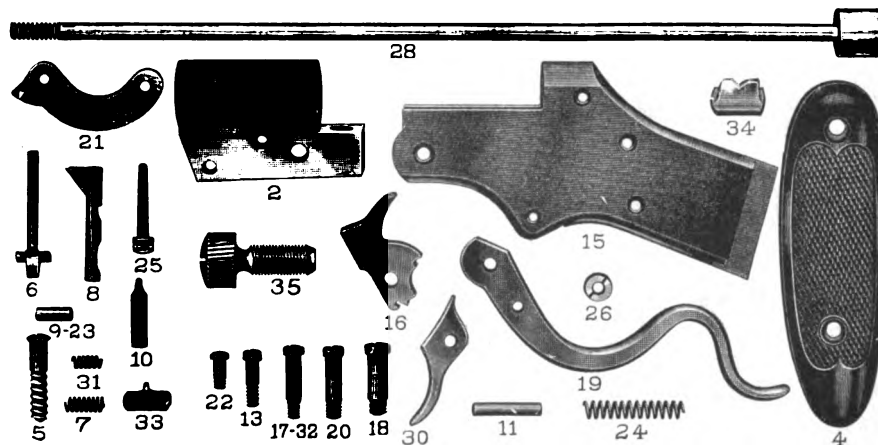

Cut No. 2 shows what is called a CENTRAL EXTRACTOR.

Cut No. 3 shows the extractor as we are now making it.

In ordering Extractor or Barrels, be sure to state whether No. 1, No. 2 or No. 3 is desired.

Adapted to U. S. Springfield, Sharps, Remington and other Military and Sporting Rifles.
Fifty in a Box, One Thousand in a Case.

WINCHESTER SUPPLEMENTAL CHAMBERS

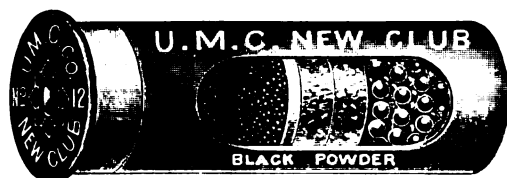

This handy and simple device permits the use of popular pistol cartridges in high power rifles chambered for .30 Winchester, .30 Army, .303 Savage, .303 British, .32-40, .32 Winchester Special, .35 and .405 Winchester Cartridges without change or readjustment of the rifle, except the sights. The Winchester Supplemental Chamber is inserted in the rifle, the same as a cartridge, and, as it is extracted from the gun in the same manner as an empty shell, it does not interfere with the instant use of regular ammunition.

	Each
.30 Winchester Caliber, for Use with .32 Smith & Wesson Cartridges	\$0.60
.30 Army Caliber, for Use with .32 Smith & Wesson Cartridges	.60
.30 Gov't, Model 1906, Caliber, for Use with .32 Smith & Wesson Cartridges	.60
.303 Savage Caliber, for Use with .32 Smith & Wesson Cartridges	.60
.303 British Caliber, for Use with .32 Smith & Wesson Cartridges	.60
.32 Winchester Special Caliber, for Use with .32 Short Colt and .32 Long Colt Cartridges	.60
.32-40 Caliber, for Use with .32 Short Colt and .32 Long Colt Cartridges	.60
.35 Winchester Caliber, for Use with .38 Smith & Wesson and .38 Colt New Police Cartridges	.60
.405 Winchester Caliber, for Use with .41 Short Colt Cartridges	.60

Smokeless Powder Cartridges are recommended for use with the Winchester Supplemental Chamber, as black powder cartridges soon foul barrels having such quick twists as the above.

THE STEEL LINING MEANS STEEL-STRENGTH.

The powder charge in Nitro Club Shells is surrounded by the Steel Lining—a tough band of steel. The powder rests entirely against this steel—not against the paper. No other American shell manufactured supplies this added protection of steel.

Tatham's Air Rifle Shot is the recognized standard of the world. It is of uniform size and absolutely round.

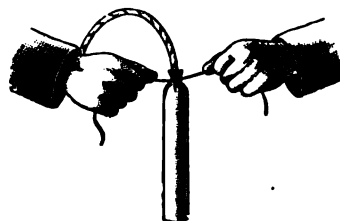

It has been used for many years and its volume of sale throughout the world is probably larger than the combined sales of all other so-called makes of Air Rifle Shot.

The new tube in which it is marketed is specially designed for Tatham Air Rifle Shot.

The unique opening band is intended to prevent waste of the shot, and is a feature which must appeal to every user of an Air Rifle.

Removes Rust, Lead, Cakings, Etc.

Per Dozen
No. 508—Twisted Galvanized Wire, Pure Bristle Brush, Ring Handle, for .22, .32 and .38 Caliber. \$1.20

ANTI-RUST ROPES

Per Dozen
No. 600—Marble's, for Shot Guns and Rifles (When Ordering State Caliber or Gauge) \$6.00

When saturated with oil these "ropes" exclude all air and moisture and make it impossible for the barrels to rust or become pitted. They are longer than the barrel and larger than the bore. This insures a constant pressure of oil against the entire circumference of the bore. One oiling will last for years.

One in a Carton; One Dozen Cartons in a Box.

CLEANING IMPLEMENTS

RIFLE CLEANERS

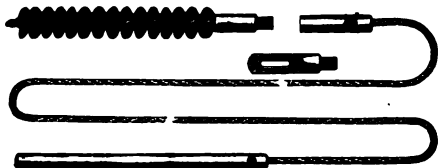

THE SPRING TEMPERED SPIRAL STEEL CORE OF MARBLE'S CLEANERS

Marble's, Made to Fit Any Standard Rod.

Nos.	100	104	108	110	116
Caliber22	.25	.30	.32	.38
Per Dozen	\$6.00	6.00	6.00	6.00	6.00

Consists of sections of softest brass gauze washers on a spirally bent spring tempered steel wire. The brushes are a little smaller than bore of rifle or revolver. This allows the spiral spring to force but one side of each brush against the bore. Will remove rapidly all lead, copper rust or powder residue.

U. S. GOVERNMENT CLEANER

No. 8—For .22, .25, .30, .32, .38, .40 and .44 Caliber	Per Dozen \$5.00

$1\frac{1}{8}$ inch Diameter Box, Waterproof Screw Case, Agate Bearing.

No. 182.

Made with waterproof screw case. The bracket is made like a double safety pin and fastens securely to coat, vest or belt. It is in plain view at all times, and you can't lose it or leave it in camp. You don't have to fumble around in your pockets for your compass and then wait for it to settle, therefore is especially convenient in zero weather.

No. 082—Revolving Dial, with Bracket.....\$1.50
 No. 182—Stationary Dial, with Bracket.....1.25
 No. 186—Same as No. 082, without Bracket.....1.25

TARGET TRAPS

WHITE FLYER PRACTICE

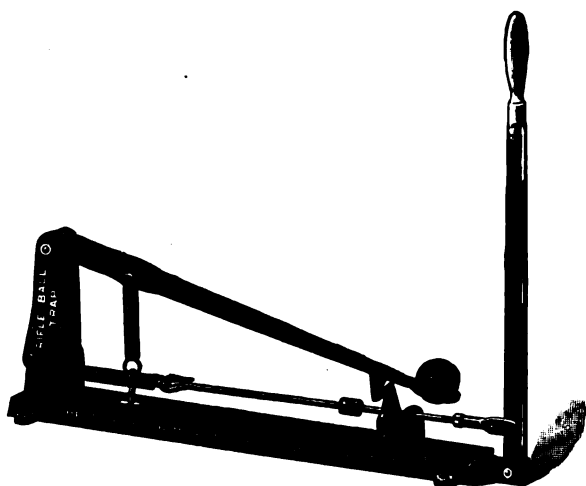

Each

White Flyer—Heavy and Compact, Working Parts are Large and Strong, the Well Fitted Bearings Assure Positive Action.....**\$6.00**

The Central Trigger Pull allows the Trap to be changed to any desired angle without interfering with the pulling device.

RIFLE BALL

Each

Rifle Ball Trap—Weight 12 Lbs.....**\$4.00**

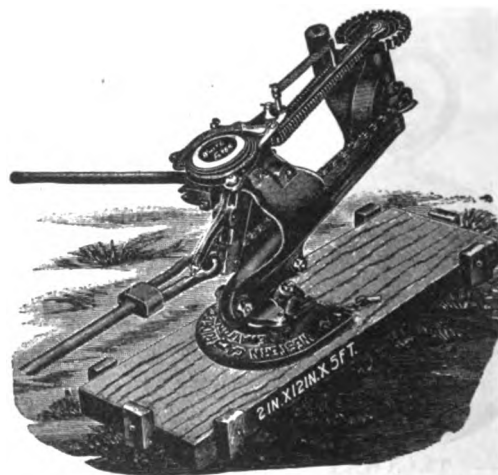

The Trap should be firmly fastened and backed with a bullet-proof screen large enough to protect the trapper, who loads and releases the target, or ball, on a signal from the shooter. The trap can be adjusted to throw target straight up in the air from 10 to 18 feet. The firing point should be 15 feet from the trap.

RIFLE BALLS

Per 1000
Composition Rifle Balls—
1 1/4 inches Diameter,
for Use in Rifle Ball
Traps**\$6.50**
Fifteen Hundred in a Barrel.
Made of same material as Blue
Rock Targets.

Badger Skis are the very latest Norwegian Models, modified for the use of American trade. They are smooth finish and varnished, strap holders are mortised. Skis 6 foot and over are of 1¼ inch material.

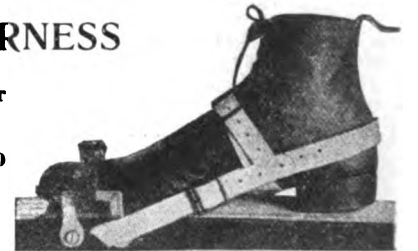

How Long a Ski Shall I Use?

Here is a general rule which will be found applicable in nearly every instance:

Put the Ski on the ground in a vertical position, then stretch your arm up at full length and choose a Ski that you can barely reach the point of with the tip of your long finger.

SKI HARNESS

	Per Pair
No. 2—Leather Bindings, with Metal Side Plates.....	\$1.50

COASTER WAGONS

BOY SCOUT

Removable Box, with Brake.

Roller Bearing, Natural Finish, Varnished, with Red and Black Striping, Wheels Painted Red, with Black Striping, Pressed Steel Hand Hold.

Nos.	11	22	33
Body, Inches	14x32	16x36	18x40
Wheels, Inches	10	10	10
Each	\$6.00	6.50	7.50

No. 1—Extra Wheels, 10 inch Diameter, for Nos. 11, 22 and 33 Wagons\$0.80

The roller bearing consists of 8 pieces of $\frac{5}{16}$ inch cold rolled steel shafting held in a malleable iron hub by means of a steel washer at each end. Washers are forced into hub by a heavy press and wheel can be removed without losing rollers.

Wheels are held on a $\frac{1}{2}$ inch steel axle by washers and cotter pins. Eight $\frac{5}{16}$ inch spokes in each wheel, $\frac{1}{2}$ x $\frac{3}{4}$ inch hardwood felloes with $\frac{3}{4}$ x $\frac{1}{2}$ inch electric welded tire. Tires are set by hydraulic press requiring 5 ton pressure.

One-sixth Dozen in a Crate.

COASTER WAGONS

BADGER

Well Seasoned Hardwood Body, Gear is of Selected Stock Securely Braced to Body with $\frac{1}{2}$ x $\frac{3}{4}$ inch Round Edge Iron, Heavy Wrought Iron and Hardwood Steering Gear, Body and Gear Varnished on the Natural Wood, Decorated in Red and Black, Wheels Painted Bright Red.

Removable Box, with Brake.

Extra Heavy Wheels with Iron Hubs, $\frac{3}{4}$ x $\frac{1}{2}$ inch Bent Rock Elm Rims, $\frac{3}{4}$ x $\frac{1}{2}$ inch Wrought Steel Tires, Welded and Shrunk on, $\frac{1}{8}$ inch Round Steel Axle.

Nos.	303	304	305
Body, Inches	14x32	16x36	18x40
Wheels, Inches	10	10	10
Weight Per Dozen, Lbs.....	390	420	450
Each	\$5.50	6.00	7.00

The iron hubs keep the spokes solid, no more split or checked hubs, and eliminates trouble from shrinking of felloes and loose tires.

Note—Nos. 304 and 305 have Steel Loop Grip on Handles.

Nos. 303 and 304, Two, and No. 305, One in a Crate.

HIGH GRADE ELECTRIC MOTORS

Furnished Free with Sets Nos. 3½, 4, 5, 6, 7, 11, 12 and 13 Outfits.

No. 150—Stands 3½ inches High, 2½ inches Over Shaft, Has Three-Pole Armature, Spring Tension Brushes, Form Wound Coils, Start, Stop and Reverse Switch Mounted in Base of Motor, Weight Each 1 Lb. \$2.00

Style of Nos. 200 and 250.

Especially Designed for Operating Models of American Model Builder Sets, Can be Operated from One or Two Cells or from City Alternating Current Through Our No. 1 or 7 Toy Transformer and are Capable of Lifting 50 Pounds.

No. 200—Stands 3½ inches High, 3½ inches Over Shaft, Black Enameled, All Steel Parts Nickel Plated, Two-Pole Field Cast Solid, with Form Wound Coils, Three-Pole Laminated Armature Gauze Wire Brushes, Mounted on a Cast Iron Base with Start, Stop and Reverse Switch, All Wiring Concealed in Bottom of Base, Will Stand up to 12 Volts, but Best Results are Obtained from 6 Volts, Weight Each 2 Lbs. \$2.68

No. 250—Stands 4¼ inches High, 4 inches Over Shaft, Six-Pole Laminated Armature Gauze Wire Brushes, Will Stand up to 14 Volts, but Best Results are Obtained from 6 to 8 Volts, Otherwise Same as No. 200, Weight Each 3 Lbs. 3.34

TOY TRANSFORMERS

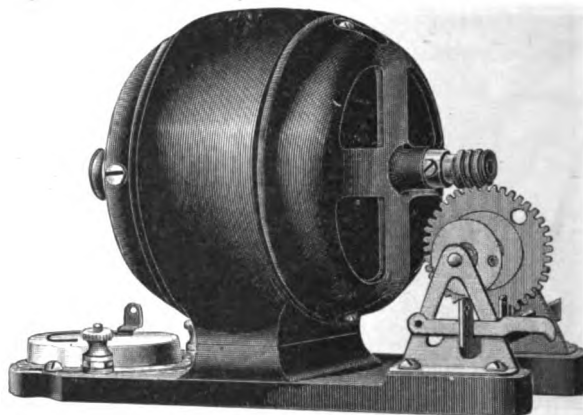

JEFFERSON FLEXIBLE

Will Operate on 100 to 180 Volt A. C., 60 to 133 Cycle.

No. 1—10 Voltage, 2 to 20 Volts in 2 Volt Steps, Capacity 50 Watts, Size 4¼ x 3¾ x 3¼ inches, Weight 5 Lbs. \$4.10

The Jefferson Flexible Toy Transformers embody all the latest improvements in Toy Transformer construction. A practical miniature electric power plant.

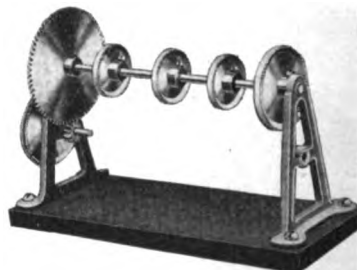

Style of Nos. 225 and 300.

Especially Designed for Operating Models of American Model Builder Sets, Can be Operated from One or Two Cells or from City Alternating Current Through Our No. 1 or 7 Toy Transformer and are Capable of Lifting 50 Pounds.

No. 225—Stands 3½ inches High, 3½ inches Over Shaft, Black Enameled All Steel Parts, Nickel Plated, Two-Speed, Equipped with Worm Drive and Reducing Gear and Start, Stop and Reverse Switch, Windlass Mounted on Shaft for Operating Mechanical Devices, Shift Lever Provided for Throwing Gear in and Out of Mesh, Will Stand up to 12 Volts, but Best Results are Obtained from 6 Volts, Weight Each 2½ Lbs. \$3.34

No. 300—Stands 4¼ inches High, 4 inches Over Shaft, Will Stand up to 14 Volts, but Best Results are Obtained from 6 to 8 Volts, Otherwise Same as No. 225, Weight Each 3½ Lbs. 4.00

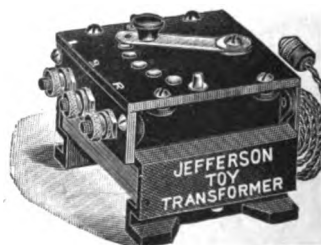

COUNTERSHAFTS

Especially Designed for Operating American Model Builder Models.

No. 350—Cast Iron Shaft Hanger, ½ inch Axle, which is Supplied with Three 1 inch Adjustable Pulleys and One 1½ inch Adjustable Pulley, Mounted on a Black Enameled Steel Base, Enables the Owner of a Small Motor to Operate Two or More Models at the Same Time, it Increases the Power of the Motor 70 Times \$0.68

TOY TRANSFORMERS

LITTLE JEFF

Will Operate Small or Large Toys.

No. 7—4x3½x3 inches High, it Generates 8 Different Secondary Voltages, Ranging from 3 up to 24 Volts in 3 Volt Steps, Complete with Cord and Plug, Weight Each 2½ Lbs. \$4.00

This Transformer is a little wonder. Nothing on the market to compare with it. Flexible construction and master connection post.

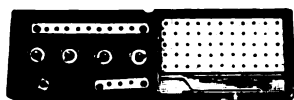

Transformer is clamped between heavy gray iron castings. The switch and voltage buttons are mounted on the heavy black fibre top.

Primary leads are brought out to two rubber covered binding posts on one side of the transformer, and on the opposite side the secondary leads are brought out to the three brass binding posts.

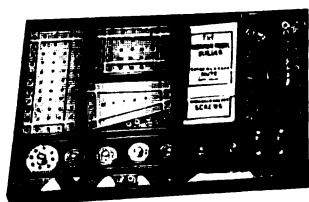

One in a Box.

ERECTOR SETS

The Toy whose Girders Resembles Structural Steel—The Only Actual Structural Steel Toy.

You Build Big Models with Erector Quickly and Easily.

Erector parts are not only the largest, but they are the quickest and easiest to build with. It takes only a few nuts and bolts, and if you follow instructions in the manual which goes with each set, you can build models in quick time. Then when you want to wreck the models you can do it in about one-tenth the time that it took to build them.

The lapped interlocking edges of Erector girders enables you to build four-sided or square columns.

Each is stamped accurately out of steel.

Set No. 1.

No. 1 Set—Comes in a Board Box, Contains 140 Parts, Makes 88 Models Besides Others in Part III Manual, Wrapped for Parcel Post 3 Lbs. \$1.00

36 Sets in a Carton.

Set No. 2.

No. 2 Set—Comes in a Board Box, Contains 205 Parts, Makes 120 Models Besides Others in Part III Manual, Wrapped for Parcel Post 4 Lbs. \$2.00

24 Sets in a Carton.

Set No. 3.

No. 3 Set—Comes in a Board Box, Contains 345 Parts, Makes 176 Models Besides Others in Part III Manual, Wrapped for Parcel Post 7 Lbs. \$3.00

Six Sets in a Carton.

Erector is Just Like Real Structural Steel.

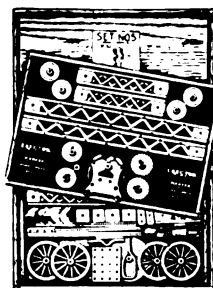

Erector is exactly like the steel out of which they build the big bridges, sky scrapers and elevated railroads. The only difference is in the size—that's all. The girders are the real thing, with lapped edges and rivet heads. And when you build a model out of Erector you've got something that will please you, because it is correct in design and proportion.

Be Sure to See this Outfit—the Most Popular Construction Set of All. Per Set

No. 4 Set—Comes in a Handsome Wood Cabinet, Contains 571 Parts and a Sturdy Electric Motor, Makes 207 Models Besides Others in Part III Manual, Wrapped for Parcel Post 9 Lbs. \$5.00
Six Sets in a Carton.

This is the "Famous Four"—the most popular set made, with which you can build thousands of models. We illustrate 276 exceptional models in our manuals which have been built with this particular set. Contains every essential engineering part. Anything mechanical can be duplicated with Erector. Packed in handsome hardwood cabinet with big illustrated manual No. 1 and the great electric motor—all for \$5.00.

Set No. 5.

No. 5 Set—Comes in an Oak Cabinet, Contains an Electric Motor, Contains 679 Parts, Makes 229 Models and Others in Part III Manual, Wrapped for Parcel Post 14 Lbs. \$7.50

No. 6 Set—Comes in an Oak Cabinet has Reversible Motor with Separate Base, this Motor can be Operated in Both Directions, Contains 1,000 Parts, Makes 264 Models and Others in Part III Manual, Wrapped for Parcel Post 19 Lbs. \$10.00

A WORD ABOUT ACCESSORY SETS

If you already own an Erector outfit you can build it into the next largest size by purchasing an Accessory outfit. For example: Accessory outfit No. 2A added to Erector outfit No. 2 equals Erector outfit No. 3. All Accessory outfits cost just the difference between the lower and the next highest set.

Erector Electrical Set—Complete, in Substantial Four-Color Box Per Set \$5.00

Erector Electrical Set contains every part for building Electric Motor and other apparatus; also material which enables a boy to do more than 100 electrical experiments. With it he can build his own motor, wire a small lighting plant, install electric bells, construct a lifting electro magnet, generate electricity, operate electric trains and Erector models, also run other mechanical toys and build a powerful gear box which will lift 200 pounds, etc.

Three Volumes, fully illustrated, containing an elementary course in electricity are included in this set. Just the thing for the boy who hopes to be an Electrical Engineer some day!

In the Erector Electrical Set of Experimental Apparatus together with the three-volume course of Electrical Engineering, we offer the most fascinating plaything for teaching, demonstrating and applying the secrets and principles of electricity that has ever been gotten out.

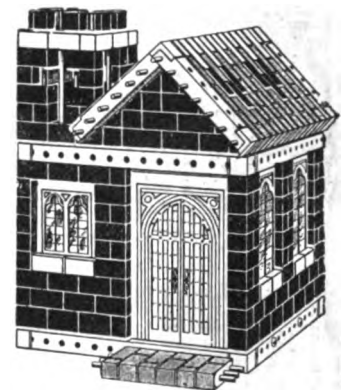

The Complete Set No. C in substantial and beautifully decorated box.

Brik-tor

THE ARCHITECTURAL TOY

Brik-tor is a remarkable toy. With it a child can construct interesting and attractive models of buildings of every description. Brik-tor is to Architecture what Erector is to Mechanical Engineering. Each set is complete with illustrated book of instructions showing how to complete model structures from foundation to roof. Brik-tor can be used in connection not only with Erector but any other construction toy. Each set contains a generous quantity of steel bricks in many colors, together with fundaments, rods, doors, windows, frames, strips, plates, etc., in fact everything necessary to build with, including the illustrated manual of instruction.

Another Brik-tor Model.

TINKERTOY

A Thousand Different Mechanical Models in Motion
can be made with

THE WONDER BUILDER

The toy that holds the world's record for sales and popularity. Made of smooth, round hardwood rods and connecting spools, 73 pieces, that can be put together in different combinations to form a thousand marvelous motion figures, such as airships, autos, windmills, gyros, semaphores, engines, giant swings, merry-go-rounds, bridges, turbines, walking beams, wind tops, derricks, doll furniture, letters, numbers, and everything architectural and mechanical that one can think of. Constructive features founded on exact principles of mathematical ratio.

Tinkertoy is already in a million homes that will enjoy adding another set to make larger and more wonderful models. If there is no Tinkertoy in your home you are missing a barrel of fun. Tinkertoy is an educator and an entertainer, and is appreciated by all. No tools needed to put the models together. Simple and complete instructions with each set.

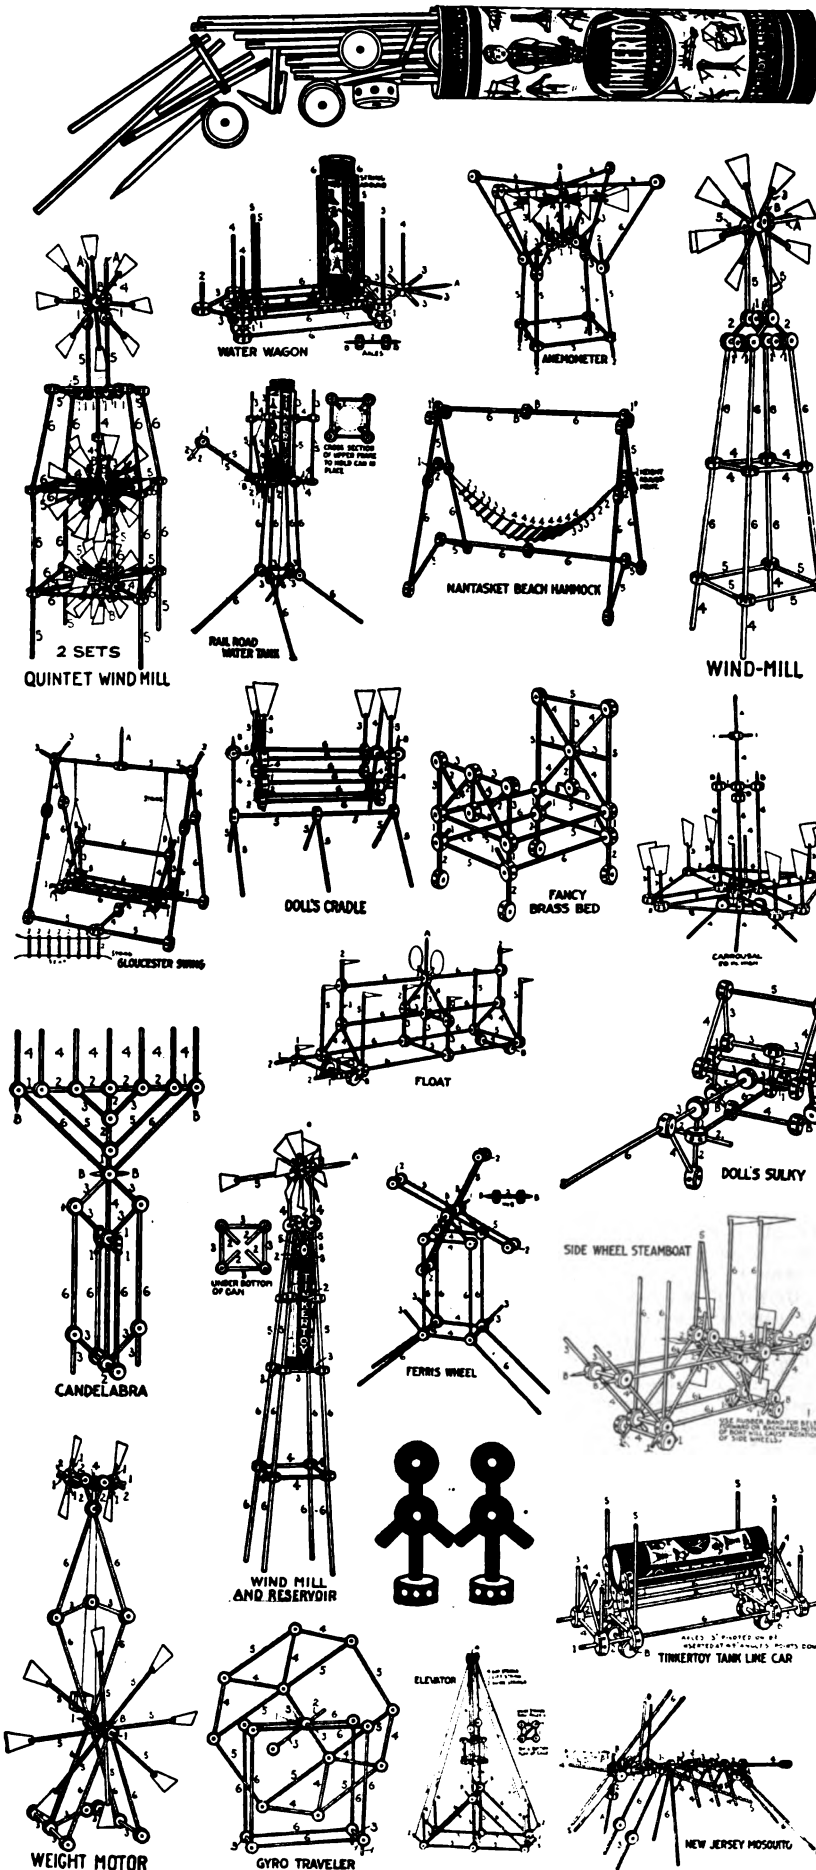

Per Dozen Sets

Tinkertoy—Consists of 73 Smooth Round Rods and Spools, All Hardwood, Clean and a Toy without Paint or Varnish, that can be Taken Apart and Put Together to Form a Thousand Different Marvelous Motion Figures, Complete with Easy Instructions **\$8.00**

30 INCHES WIDE
MADE WITH ONE SET OF TINKERTOY

AUTOMATIC SAND CRANE

Truly a Marvelous Toy.

Per Dozen

No. 103—Automatic Sand Crane, 14 1/4 inches High, Tray 15 1/2 x 22 3/4 x 3 inches, Carton 6 x 5 7/8 x 15 1/4 inches, Crane and Accessories with Full Instruction for Setting Up and Operating\$19.60

Its operation is so mysterious and magical that nearly everyone exclaims: "How wonderful! How does it do it?" The little manikin engineer seems almost human as he appears to operate and control the mechanism. On this account and also because it is a construction toy of a very durable kind, it is doubtless the most instructive and entertaining toy ever placed on the market.

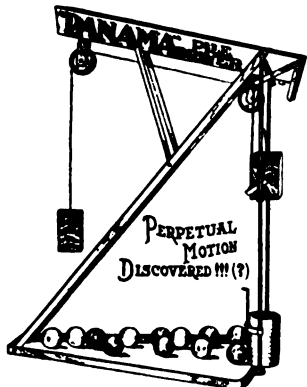

Pour sand in the hopper, and immediately the "Crane" sets industriously to work to transfer the sand through a semi-circle, dump it opposite the loading point, and then return for another load, very much after the manner of a steam dredging crane or steam shovel. The operation can be continued indefinitely. Each filling of the hopper operates the toy for nearly eight minutes.

Each toy is tested in our factory, and like all our "Automatics", the parts are attached and secured by the famous Wolverine Lock Joints.

The containing carton which is made in bright colors splendidly serves the purpose of a Sand Tray.

Metal binding strips to stiffen the edges as shown, accompany each toy. A good supply of nice white clean sand in a friction-top can and sand scoops in bright colors are also included.

PANAMA PILE DRIVER

The sharp tap, tap, tap of this clever Automatic Pile Driver is a source of wonder and delight to every child.

It is a most interesting construction toy, that does something automatically when set up.

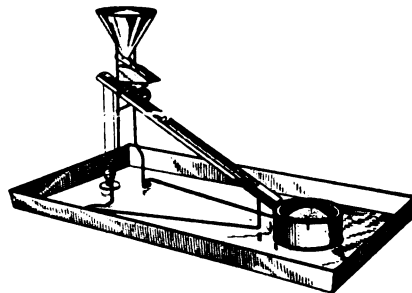

The operation is extremely simple:

Placing the marble in the chute at the top and giving the hammer a start downward, puts the Panama into rapid action.

Per Dozen

Panama Pile Driver—16 3/4 inches High, Size of Carton 20 5/8 x 3 1/2 x 3 1/4 inches, Driver is Collapsible, Packed in Neat Attractive Carton Including 12 Bright Color Marbles, Weight Per Gross 348 Lbs.....\$17.00
Extra Marbles, for Above30
One Dozen in a Box.

SANDY ANDY

Per Dozen

No. 50—13 1/2 inches High, Carton 14 3/8 x 4 3/4 x 4 1/4 inches, Weight Per Gross 372 Lbs..\$ 8.50
No. 75—Same as No. 50, but with Tray 12.20
No. 100—17 1/4 inches High, Carton 20 5/8 x 5 5/8 x 5 5/8 inches, with 30x12x2 inch Taper Tray, Weight Per Gross 630 Lbs. 17.00
No. 150—Metal Trays, 31 1/2 x 15 1/2 x 2 inches, Weight Per Gross 392 Lbs..... 10.50

Pour sand in the hopper and Sandy Andy does the rest. The car is drawn up the track by the weight until it opens a swinging shutter on the bottom end of the hopper allowing the sand to run into the car. When the car is nearly full the added weight of the sand causes the car to run down the track and automatically dump the sand. The weight then again pulls the car up for another load and this operation is automatically continued as long as there is sand in the hopper.

Sandy Andy is made collapsible and in two sizes in bright colors of the very best materials. It will stand the hard knocks and bumps of rough play. Each toy is packed in a strong carton on which is printed full directions for setting up and operating.

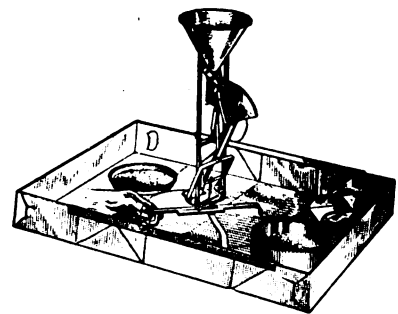

One Dozen in a Case.

SAND IN BAGS

Per Dozen

No. 1—2 1/2 Lbs.
in Bag....\$1.60
No. 2—5 Lbs.
in Bag.... 2.20

DUMPING SANDY

Per Dozen

Dumping Sandy—12 1/2 inches High, Tray 14x18x2 1/4 inches, Carton 4 1/2 x 4 1/2 x 14 inches, Weight Per Gross 300 Lbs..\$10.00
Full directions for setting up in box.

An automatic Sand Toy that keeps the youngster busy and happy day in and day out, because the toy not only works automatically but because it can also be guided by the will of the child to perform various functions.

The child likes to watch the motions of "The Wolverine Automatics," but he likes better still to manipulate them. Dumping Sandy certainly gives him free scope in this particular. Pouring sand in the hopper starts the bucket dumping sand automatically as long as any remains in the hopper, but the sand can also be dumped in any direction by means of the rack and pinion device at the bottom of the toy.

The containing carton which is made in bright colors splendidly serves the purpose of a Sand Tray.

Metal binding strips to stiffen the edges as shown, accompany each toy. A good supply of nice white clean sand in a friction-top can and a sand scoops in bright colors are also included.

One Dozen in a Case.

SKI SCRAPER ELEVATOR

ELECTRIC

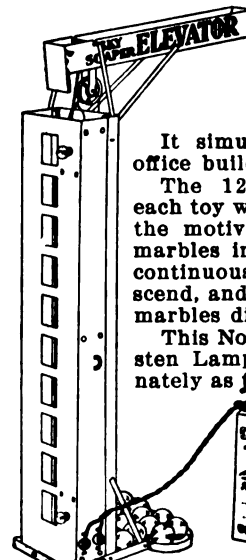

One of the Most Attractive of the "Wolverine Automatics."

It simulates as nearly as possible a detached office building elevator.

The 12 bright colored marbles accompanying each toy when placed in the chute at the top furnish the motive power for the toy. By replacing the marbles in the chute the car travels up and down continuously. One marble causes the car to descend, and the counterweight makes it ascend. The marbles discharge at the bottom as shown.

This Novel Toy is equipped with Miniature Tungsten Lamps in Red and White, which flash alternately as the car runs down and up. The lamps can be operated by any standard one-cell battery—to be furnished by customer.

This toy with its splendid automatic movement, the wiring, electrical switches, lamps, etc., is intensely interesting and instructive to any child.

The Toy is artistically lithographed in colors, the car showing the Elevator Operator in front and the Passengers at the rear.

The Most Attractive Automatic. Per Dozen
No. 151—Electric Elevator, 24 inches High, Carton 22x4 3/8 x 2 3/4 inches, Every Toy Carefully Tested Before Leaving Factory, the Toy is Collapsible and Packed in an Individual Carton with Full Directions, Weight Per Dozen 40 Lbs.....\$28.50

Per Dozen Pairs

Extra Tungsten Lamps or Bulbs, for Above.....\$4.00
One Dozen in a Box.

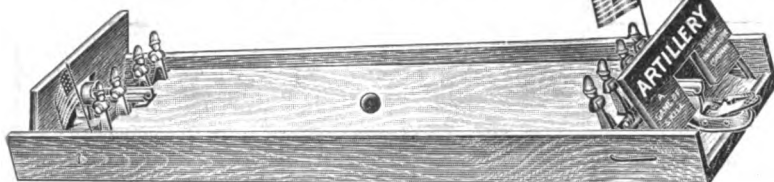

BOWLING ALLEYS

Bowling Alley—40 inches Long, 7 1/2 inches Wide, Varnished in a Very Attractive Manner, Complete with Pins and Balls... **\$17.00**
Each player shoots two balls from the gun at the end of the board. Spares and strikes are counted in the same manner as the real game. At the pin end of the board is an iron curtain pivoted at the top in a manner that holds the balls after they have been shot.

One Dozen in a Crate, Weight Per Crate 85 Pounds.
One in a Box.

ARTILLERY

Artillery—Board Beautifully Made of Finely Finished Hardwood... **\$17.00**

Skill and entertainment are combined in this new game of Artillery. The guns may be aimed to strike any figure desired. The figures are reset by operating a small lever at the side of the board. Each player shoots four shells. The one knocking down most figures wins.

This is a strong and durable game that will give many years of amusement to both young and old.
One in a Box.

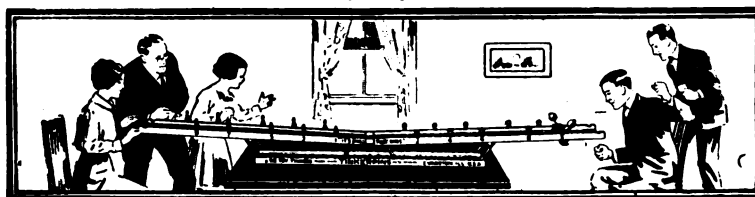

PITCH 'EM

The Game of Indoor Horse Shoe.

Pitch 'Em—Complete Outfit... **\$18.00**
One Set in a Box.

TINKER PINS

Tinkerpins—4 feet 8 inches Long, 6 inches High, Wood Frame, Grooved Parallel Rails Contain 10 Pins at Each End, Centrifugal Traveler with Automatic Retard Spins Forward and Backward, Automatic Register of Count and Automatic Set Up of Pins for Opponent, Can be Assembled in Two minutes, Packed Away Flat in One-half a Minute, Size of Box Packed, 2 1/4 inches Square, 27 inches Long, Weight Each 2 Lbs... **\$8.00**

The new game Tinkerpins—"its skill that wins." Count as in bowling, but you won't have to set up the pins. The Spinner having been started down the rails automatically sets up ten pins for the next player and automatically counts the pins knocked down over at the far end. The object being to knock down as many of the far ten pins as possible without going into the gutter, as a gutter shot cancels the count. The opponent then plays in opposite direction.

The Spinner has a governor control, enabling the player to attain wonderful accuracy, thus giving intense interest and suspense to every shot.

Weight Per Dozen 26 Pounds.
One Dozen in a Fibre Carton.

O'SHAUGHNESSY WEEDLESS HOOKS

BING'S

No. 850—Not Leaded.

NEPTUNE PERFECT

No. 861—Leaded.

Genuine Hand Forged, Imported O'Shaughnessy Square-Wrought Hooks, Equipped with the Most Practical of All Weed Guards.

O'Shaughnessy Weedless Hooks excel in the two essentials of a good fish hook—strength and hooking quality. Will go through the thickest weeds without trouble and at the same time the weed guard will not interfere with the lightest strike.

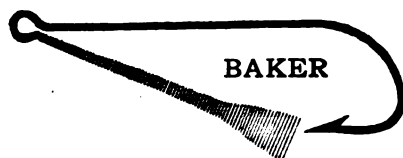

Sizes	1-0	3-0	5-0	Sizes	1-0	3-0	5-0
No. 850—Not Leaded...Per Dozen, \$1.60	1.60	1.60	1.60	No. 860—Not Leaded...Per Dozen, \$1.70	1.70	1.70	1.70
No. 851—Leaded.....Per Dozen, 2.20	2.20	2.20	2.20	No. 861—Leaded.....Per Dozen, 2.30	2.30	2.30	2.30

One-sixth Dozen on a Card; One Dozen in a Box.

The points of the weed guard on the Neptune Perfect Hook are turned under so they will not catch or stick in the fish's throat when it swallows the hook. This is a big advantage this hook has over the regular style O'Shaughnessy Weedless Hooks.

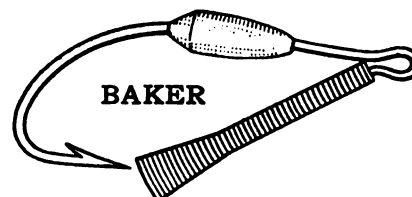

One Hook on a Card; One Dozen in a Box.

BAKER SPROAT

Not Leaded.

You can bend the weed guard any direction and it will spring back in place again. The best Weedless Hook on the market today.

Leaded.

Best Spring Steel, Spear Point, Bronzed.

SOUTH BEND TANDEM

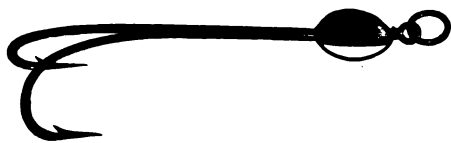

For Frog, Minnow or Pork Rind.

Just the thing for casting a Frog or Pork Rind. Hooks are Bronzed Finish Hollow Point Sproat.

No. 495—Weedless Tandem, Size 4-0 Hook \$2.30

Per Dozen

NEPTUNE SHORT BITE HOOK

For Frog or Pork Rind.

Something every angler should have—no tackle box is complete without them.

The head of the frog is attached to the snap and the legs will then cover the point of the hooks, thus making it practically a weedless hook. When using pork rind cut it in shape of a frog.

No. 150—Size 5-0 Bronzed Hollow Point Hooks \$3.00
No. 200—Same as No. 150, but with Wire Weed Guard. 4.00

Per Dozen

TANDEM TROLLING GANG

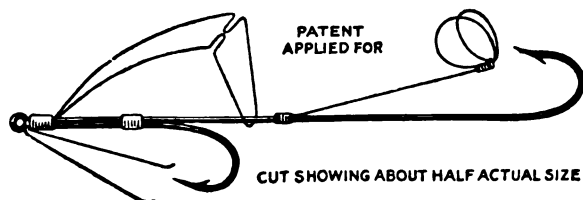

Hand Forged O'Shaughnessy Tandem Hooks Tied to 4 Ply Twisted Gut Loops. Can be Attached to Any Spoon or Spinner.

No. 7—Size 2-0 Hooks \$1.70

Per Dozen

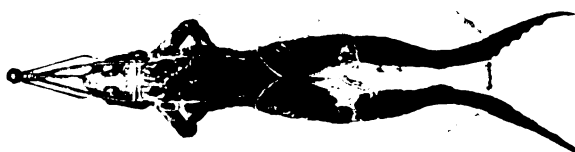

Can be used for Trolling or Casting.
Packed in a Transparent Envelope; One Dozen in a Box.

THE U-B. LIVE FROG HARNESS

PATENT
APPLIED FOR

CUT SHOWING ABOUT HALF ACTUAL SIZE

Cut Shows Frog Secured to Tandem.

Extra Quality Filed Point, 4-0 Sproat Hook in Front, and 6-0 Carlisle Hook in Rear, Best Music Wire Looped Clamp, Nickel Plated on Copper, with Weedless Hooks.

No. 1—For Medium or Large Size Frogs \$6.00
No. 2—For Small Size Frogs 6.00

The U-B Live Frog Harness holds the frog perfectly, and keeps it absolutely alive. The frog is so held without hooking, that it has free use of every part of its body, and it is always in natural position. An unlimited number of casts may be made with the U-B Live Frog Harness without injury to the frog.

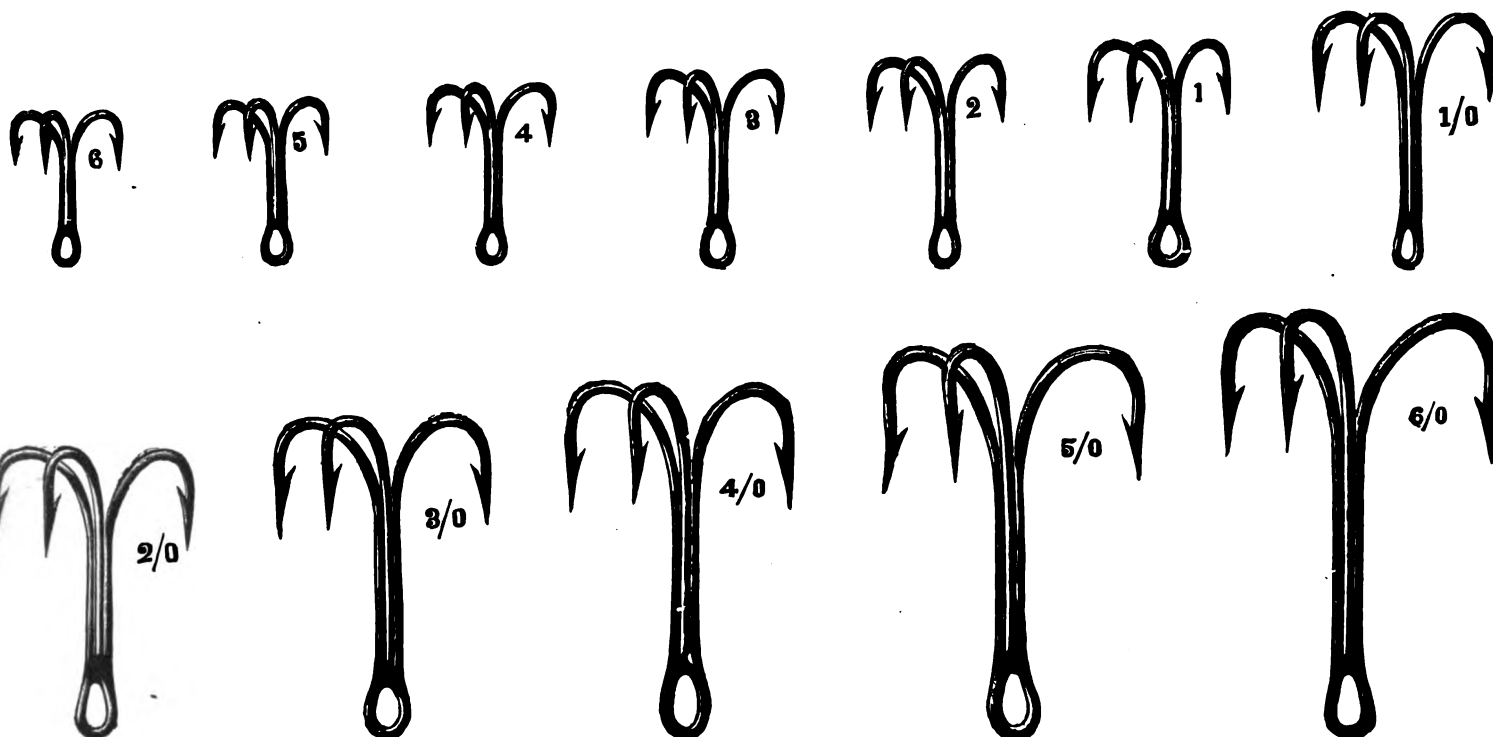

One on a Card; One Dozen in a Box.

WEEDLESS SPINNER HOOKS

SOUTH BEND

No. 555W.

Nos. 565W and 565R.

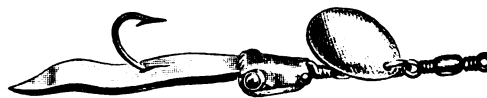

This Weedless Spinner Hook offers a combination for use with pork-rind or frog which the exacting angler has long sought. The Hook and Spinner is positively weedless so that it can be used successfully in the thickest weeds or rushes without any danger of hook getting caught. Weed Guards are of light piano wire and will not hinder landing strikes. The Spinner is nickel plated, highly polished and of proper gauge brass metal to retain its shape, durability and perfect spinning. Hook is Carlisle hollow point, 5-0 size.

Per Dozen

No. 555W—Weighted \$6.00
 No. 565R—Weighted with Red Color Bucktail..... 7.50
 No. 565W—Weighted with White Color Bucktail..... 7.50

PORK RIND MINNOWS

"Little Egypt Wiggler," for General Casting or Trolling.

Can be cast as easily as a Wooden Minnow or Plug. They are more Weedless than the so-called "Weedless Baits as the hook rides upright passing over weeds and other obstructions. They have that irresistible wiggle that makes fish strike on general principles.

Per Dozen

CASTING AND TROLLING SPOONS

BUCKTAIL SPECIAL SPOON BASS FLIES

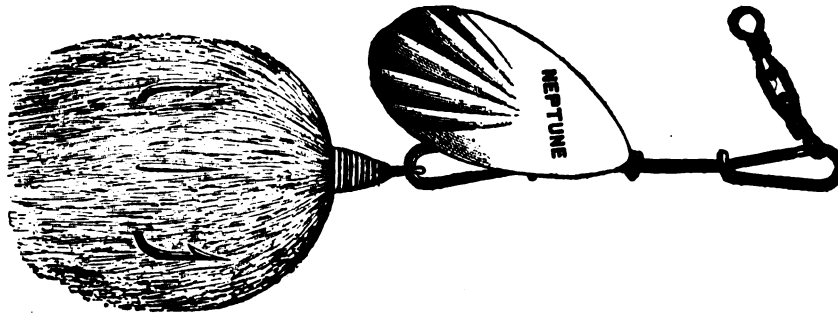

Weedless.

For right-down sportsmanlike casting they cannot be excelled. Their design meets all the requirements of the critical and expert anglers for making those accurate casts up into the pockets and among the weeds where the cautious bass generally lay. Furnished with a polished nickel spoon and extra strong, hollow point, bronzed, ringed Sproat Hook, Weighted and Weedless.

This lure is generally used with a small pork-rind chunk or strip and is very suitable for small-mouth bass.

TROLLING AND CASTING BAITS

Cuts Full Size

LORENZ SURE CATCH

No. 4 3/4—Cut Showing How to Attach Minnow.

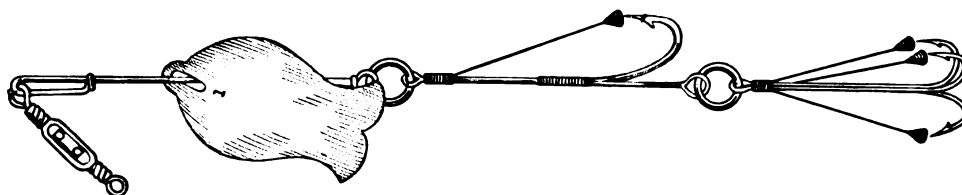

Spring Steel Nickel Plated Hollow Point Hooks, Fluted Nickel Plated Spoon, Brass Box Swivel.

	Per Dozen
No. 4 3/4—For Bass, Pickerel, etc., Sewed One on a Card.....	\$7.00
No. 7 —For Muscallonge, Sewed One on a Card.....	8.00

To obtain the best results attach to the single hook a piece of salt pork, wedge shape, about 2 1/2 inches long, having it tapering out slim, so that it will wiggle, imitating a live minnow. When using a frog or minnow, place a rubber band around bait. There are days when fish bite short, causing the minnow to be torn in the tail, but escaping the hook.

Use the Lorenz Sure Catch and you are bound to catch the short biter.

WEEDLESS LORENZ SURE CATCH

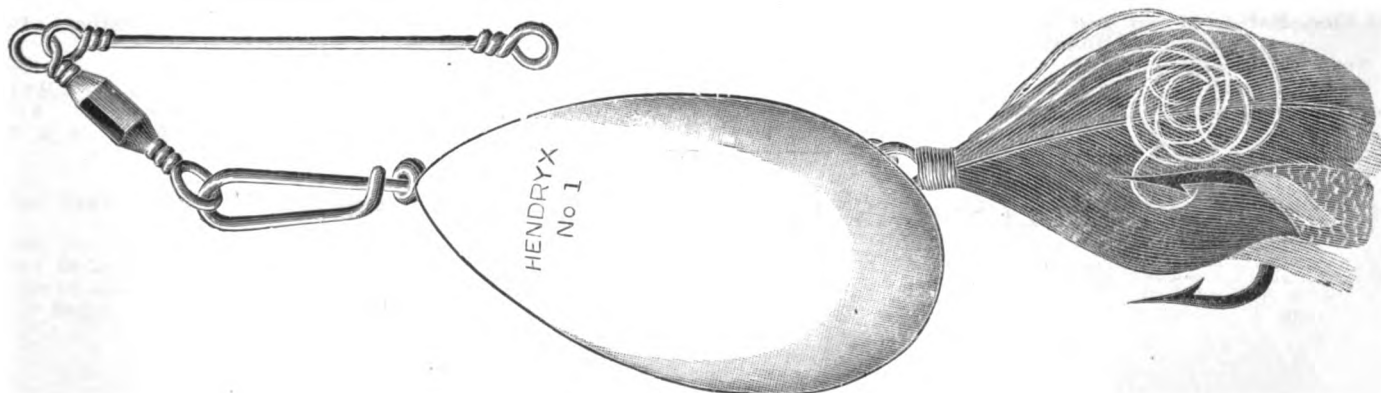

With Weedless Treble Trail Hook.

	Per Dozen
No. 3—Hollow Point Treble and Single Hook, Split Steel Rings, No. 3 Delavan Nickel Plated Spoon, Spring Brass Snap, Brass Box Swivel for Bass, Pickerel, etc.....	\$8.00

Use the above Baits and you are bound to catch all fish that strike at the bait, even the short biter. These Sure Catch Baits can be used either with Frog, Minnow or a piece of Pork Rind.

NEPTUNE MUSCALLONGE BAIT

WOODEN MINNOWS

NEPTUNE MINNOWS

Our Neptune Minnows are made from carefully selected cedar which is especially treated to prevent the absorption of water, in order that the waterproof porcelain enamel coating will not peel or flake off. They are furnished with a Patent Detachable Hook Device, which allows a broken hook to be replaced at an instant's notice. On account of this feature the Minnows can be constructed without boring out the enamel and will therefore not become water soaked, like most all other minnows now on the market.

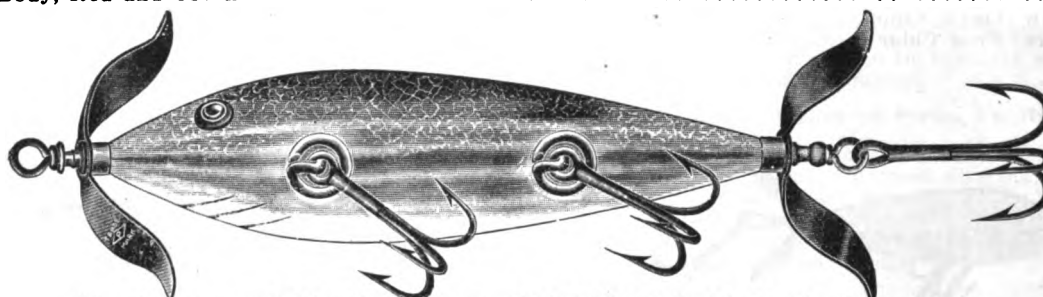

Two Spinners and Three Extra Strong Nickel
Plated Treble Hooks.

Length of Body, $2\frac{3}{4}$ Inches. Sinks Readily. Supplied in the Following Colors:

Per Dozen

HEDDON'S DOWAGIAC MINNOWS

Heddon's "Dowagiac" Minnows are the original Wooden Minnows and of recognized highest quality. They cost slightly more than numerous imitations, a difference which is more than justified by the difference in quality.

They have come into such general use for casting and trolling for Bass and other fresh water game fishes as to require no further claims for their successful killing qualities.

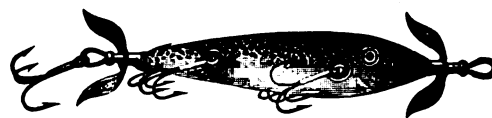

Their beautiful and durable decorations and finish and perfection of mechanical detail have given them an envied place in the affections of artistic anglers everywhere. They are the best in shape, weight and balance; have the best hook presentment; detachable hooks; perfection of spinner action with strength and durability.

No. 100 Series.

Two Spinners and Three Extra Strong "Dowagiac" Design Nickel Plated Treble Hooks. Weight, approximately, 14 Pwts.; Length of Body, 2 3/4 inches. Sinks Readily. Supplied in the Following Colors:

	16.00

HEDDON'S WIGGLER BAITS

No. 1600 Series.

No. 1700 Series.

Exclusive feature of Heddon Wigglers: Have patented variable line fastening device to regulate action of bait. All hooks are hung in patented sockets, preventing fouling of hooks and the marring of the enamel

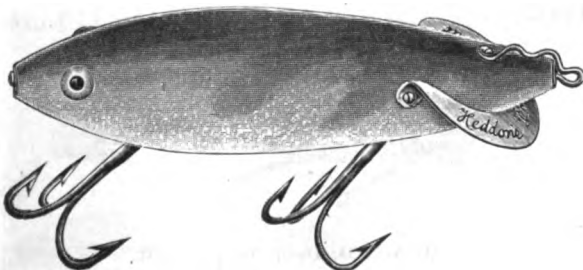

Length 4¼ Inches, Weight ¾ Oz., for Deep Fishing.

Floats when not in motion. When reeled in it dives under the water from one to three feet and has a wobbling motion closely resembling the movements of a live fish. The floating feature, while the bait is at rest, is especially valuable to beginners, as the bait will not sink into the weeds when picking out a back lash.

	Per Dozen
No. 1600 —Fancy Mottled Green Back, White Belly...	\$12.00
No. 1600S—White Body with Red and Green Spotted Effect	12.00
No. 1602 —White Body with Red Head.....	12.00
No. 1609B—Frog Coloration	12.00

Note the three attachment points for the line, regulating depth to which the "Wiggler" will dive; the last hole makes it possible to reel the bait slowly, running the bait very deep, yet with a pronounced wiggling movement—impossible with any other swimming lure.

HEDDON'S CRAB WIGGLER

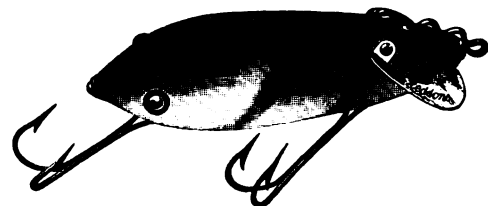

Length 4 Inches, Weight ¾ Oz., for Under Water Fishing.

This Bait is a close resemblance to a fresh water Crab or Crawfish, floats when not in motion, dives under water when retrieved, the movement being a pronounced wiggle, simulating the movement of a Crab when moving backwards, away from danger. It is irresistible to bass and other game fish. Patented variable line fastening device to regulate action of bait. Floats when not in motion.

	Per Dozen
No. 1800S—White Body with Red and Green Spotted Effect	\$13.60
No. 1802 —White Body with Red Head.....	13.60
No. 1809C—Imitation Crab Color.....	13.60

HEDDON'S BABY CRAB WIGGLER

Length 3½ inches, Weight ¾ Oz., for Under Water Fishing.

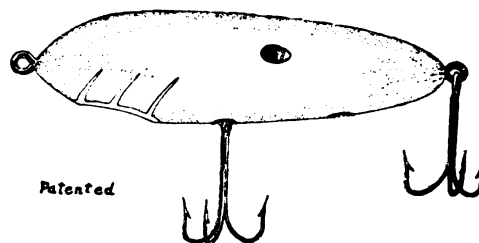

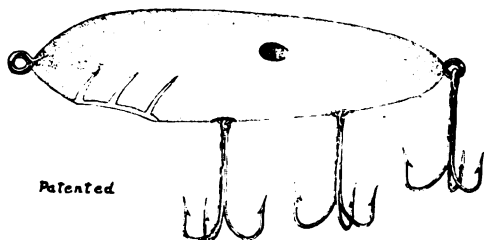

The New Baby Crab Wiggler is a smaller pattern of the famous 1800 Series. Equipped with double hooks and because of the peculiar angle at which it rides in the water, the double hooks will be found absolutely snagless, without detracting the fish-killing qualities.

	Per Dozen
No. 1900S—White Body, Red and Green Spotted Effect.....	\$14.40
No. 1902 —White Body with Red Head.....	14.40
No. 1909B—Imitation Frog Color.....	14.40
No. 1909C—Imitation Crab Color.....	14.40

Note—For Extra Hooks for Above Baits, See Page 1445.

EUREKA WIGGLERS

The wiggling motion is produced by the water being forced through the bait; the slightest movement of the line will cause the bait to move from side to side. It may be manipulated as either a surface or under-water bait by the amount of pressure applied to the reel.

4 Inch Body, Three Nickel Plated Hollow Point Treble Hooks.

Per Dozen

No. 33—White with Red Nose.....\$12.00

No. 35—Orange Back, White Body, Red Stripings.... 12.00

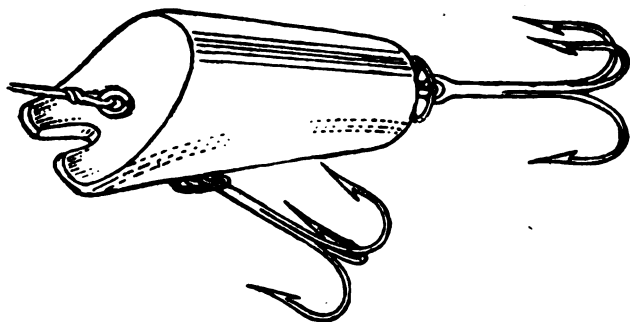

No. 31—Natural Frog Color..... 12.00

3 Inch Body with Two Hollow Point Nickel Plated Treble Hooks.

Per Dozen

No. 23—White with Red Nose.....\$12.00

"JIM DANDY WOBBLER"

Wobbles and labors through the water like a crippled minnow, and fish immediately attack it. A sure killer. 2 1/4 inches long, weight 3/4 ounce.

Per Dozen

No. 50—White with Red Face.....\$12.00

No. 51—Frog Color 12.00

WILSON'S SIX-IN-ONE WOBBLERS

This Bait is made with an adjustable diving guide which may be set at any one of six different positions. One will cause the Bait to skim on the surface, the other will cause the Bait to travel in the water at various depths. Each change in the position of the diving guide causes the Bait to travel at different depths and different wobbling movements.

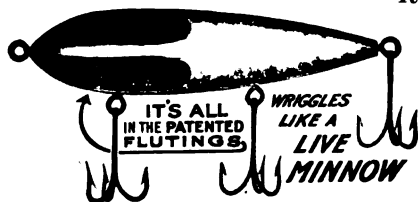

Per Dozen

No. 61—Selected Red Cedar Body, Beautifully Enam-
eled, Adjustable Metal Diving Guide, Brass Metal
Part, Nickel Plated.....\$12.00

All Above, One in a Box.

WILSON'S "GOOD LUCK" WOBBLERS

It Floats when not in Motion.

FLUTED, Semi-Surface Bait.

This Bait travels from 6 to 12 inches under the surface, at the average speed of reeling. Owing to its patented flutings it travels through the water with the exact darting motion of a live minnow.

Per Dozen

No. 1F—White with Red Flutings.....\$12.00

No. 2F—All White, Luminous (for Night Fishing)... 12.00

No. 8F—Perch Color 12.00

No. 9F—White Body, Red and Green Decorations.... 12.00

No. 11F—Green Cracked Back, White Belly..... 12.00

No. 10F—Same as No. 1F, but with Weedless Hooks.. 16.00

WINGED, Deep Water Bait.

This Bait has the same action or movements in the water as the Fluted Wobbler, but travels two to three feet deeper beneath the surface. We recommend this Bait for deep water fishing and when going after the big ones.

Per Dozen

No. 1W—White with Red Wings.....\$12.00

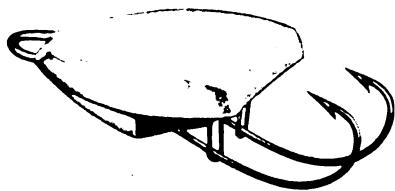

No. 2W—All White, Luminous (for Night Fishing)... 12.00

No. 20W—Same as No. 2W, but with Weedless Hooks. 16.00

Packed One in an Individual Box; One Dozen Boxes in a Nice Display Carton.

GETSEM WEEDLESS BAITS

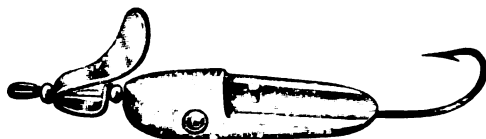

A Weedless Bait that Actually Catches the Fish.

A scientifically constructed bait, has seven special features. The real secret of "getting the big ones" is to cast right up into the lily pads, rushes and weed beds which is the home of the bass and pike. Best results are obtained by striking the fish quickly and hard as soon as the strike is received.

Selected Cedar Body, Finely Enameled.

No. 71—White with Red Spots.....**\$16.00**
No. 72—Yellow with Red Spots.....**16.00**

ORIENTAL WIGGLERS

A Pork Rind Bait. The classiest and wiggliest things that you can tie your line to. The Pork Rind strip is attached by impaling on the hook and buttoning the forward end to little button.

No. 3—2 inch Solid Celluloid Body, Length Over All 3 3/4 inches, White Color. 3/0 Hand Forged O'Shaughnessy Hook, Nickel Plated Metal Parts..**\$16.00**

For Special Pork Rind Bait, See Page 1469.

SOUTH BEND BASS ORENO BAIT

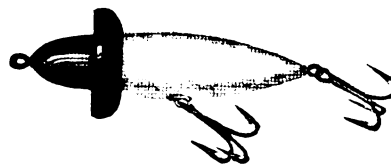

A very effective fish getter with a darting motion when reeled in. The faster it is reeled the deeper it will travel. Floats when not in motion. Equipped with three extra strong Nickel Plated Treble Hooks, 3 1/2 inch Cedar Wood Body coated with select quality enamel, guaranteed not to peel or crack.

No. 973RH—Red Head with White Body.....**\$10.50**
No. 973Y—Yellow Body with Red and Green Spotted Decorations **10.50**
No. 973F—Frog Coloration **10.50**
No. 973L—Luminous, for Night Fishing..... **14.00**

SOUTH BEND SURFACE BAITS

THE MIDGET WOODPECKER MINNOW.

Length of Body 4 1/2 Inches, Weight Approximately 9/10 Oz.

This Bait is regarded by many anglers as a most reliable and effective bait. The Collar Head is concaved and so shaped as to throw a strong rattle that draws the fish from a long distance.

No. 925RH—White Body with Red Head and Collar.....**\$8.00**

SOUTH BEND FLOATING MINNOW

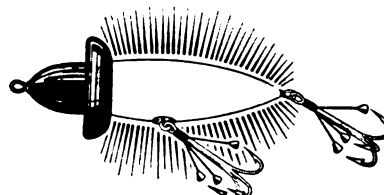

Length of Body 3 1/2 Inches, Weight Approximately 3/4 Oz.

Equipped with one Spinner and one Belly and one Tail Treble Hook.

No. 921RH—White Body, Bright Red Head.....**\$8.00**

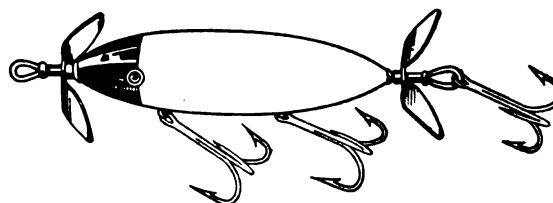

MIDGET MOONLIGHT MINNOWS

These Baits are finished with Luminous Phosphorous Enamelled Bodies. By exposing them for a couple of minutes to sunlight they will glow in the dark very effectively. Used for night fishing.

No. 926W—Same as No. 925RH, but Luminous and Weedless**\$14.00**

SOUTH BEND SURF-ORENO MINNOW

Special light wood body, 3 3/4 inches long, two extra light Nickel Plated Spinners, two belly and one tail Treble Hook. This bait is very easy to cast, rides high on the surface of the water and is a big killer.

No. 963RH—Red Head with White Body.....**\$10.50**
No. 963F—Natural Frog Color..... **10.50**
No. 963Y—Yellow Body with Red and Green Spotted Decorations **10.50**
No. 963L—Luminous, for Night Fishing..... **14.00**

All Above, One in a Box.

ARTIFICIAL BAITS

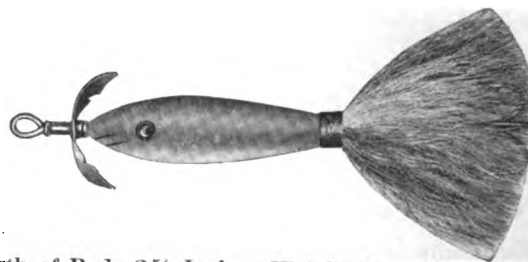

NEPTUNE MINNOW DISPLAY ASSORTMENTS

LUTZ PORK BAIT

"With the Minnow Tail Wiggle".

Showing Lutz Pork Bait Used in Connection with Casting Spoon.

Per Dozen Jars

No. 1—Lutz Pork Bait, One Dozen in Small Glass Jar, Can be Carried in Pocket\$4.00
Bait is Thoroughly Cured and Will Keep Indefinitely.

Showing How Put up One Dozen Strips in a Glass Jar; One Dozen Jars in a Carton.
Lutz Pork Bait is Packed.

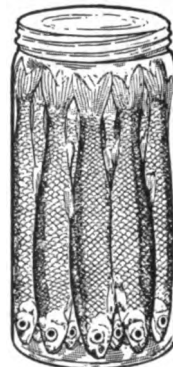

PORK RIND BAIT

Per Dozen Bottles
No. 25—Foss' Pork Rind Bait, in Small Glass Jars with Screw Cover.....\$4.00

These Pork Rind Strips are especially selected from young pigs, they are thin and flexible and cut the correct size. They will not soil the clothes as all grease has been removed. Suitable for any kind of pork rind lure. When the fish are "striking short" these strips should be shortened.

PRESERVED MINNOWS

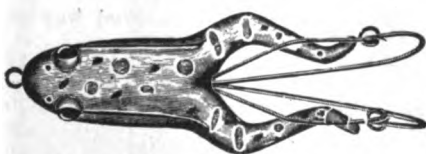

Per Dozen Bottles
No. 60—6 Oz. Assorted Sizes, 35 to 40 in a Bottle.....\$4.00

For trolling, casting and still fishing.

These minnows contain no poisonous preservatives and will keep indefinitely.

TROLLEY SINKER

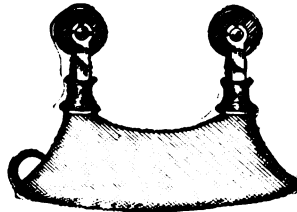

Per Dozen
No. 8—Double Trolley with Brass Forks and Brass Pulleys, Can be Opened by Pressing in Lever and then Pushing Sideways, Weight 7 Oz.....\$4.00

CLOSED

AUTOMATIC ANCHOR

Weighs about 1 pound and can be carried in pocket or tackle box. It is used for trolley fishing or anchoring small boats. Throwing out this anchor opens it automatically, and if you wish to haul in, pull line tight and let go at once, this will loosen Anchor and close it up automatically so you can land it easy.

Per Dozen
No. 11—Automatic Anchor\$4.00

Trolley Fishing is well known by all lake fishermen. It is the best fishing from pier or boat. It is done by throwing out a heavy line with an Automatic Anchor attached to the end. When Anchor has caught, pull line as tight as possible and fasten to pier or boat, then let Trolley run out on this line with a regular fishing line and as many hooks as you like. Attached to an Alarm Bell gives you a chance to use more Trolleys and a Rod.

TROUT REELS

MEISSELBACH AUTOMATIC

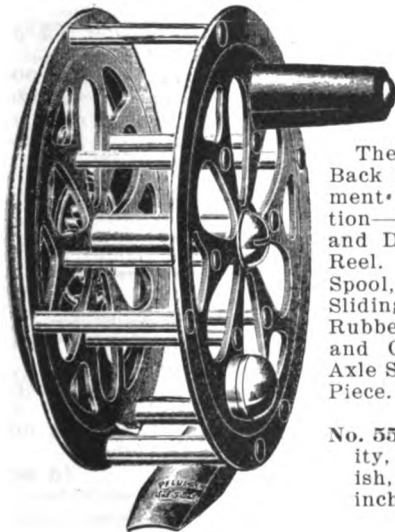

Solid German Silver Frame, Hard Brass and Tempered Steel Working Parts, Working in German Silver Bearings, Finest Tempered Steel Spring, Carbon Steel Main Shaft.

No. 14T—Capacity 100 Yards No. 5 Line, Size of Spool 3 Inches Diameter, $\frac{3}{4}$ Inch Wide, Weight Each About 11 Oz. \$54.00

This Reel has an exclusive feature in a Safety Winding Device which allows the spring to be wound up at any time when line is in or out by turning the Milled Spring Box without danger of over-winding.

Spool has Friction Release, allowing stripping of spool under all conditions. Spool is fitted with a speed governor, which so regulates the speed with which the line is recovered, as to lessen the danger to tips, caused by a too rapid recovery of the line.

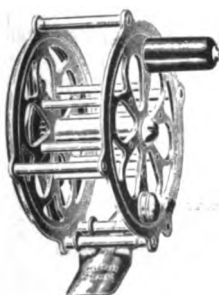

ROUND PATTERN TROUT REEL

The "One Piece" Perforated Back Plate is a Decided Improvement Over All Former Construction—Adds Greatly to the Strength and Decreases the Weight of the Reel. Perforated Removable Spool, Steel Axle, Adjustable Back Sliding Tempered Steel Click, Hard Rubber Handle. To Oil the Axle and Click Ratchet, Remove the Axle Screw with a One or Ten Cent Piece.

No. 555—100 Yards Capacity, Satin Gun Metal Finish, $1\frac{1}{4}$ inch Pillar, $3\frac{1}{2}$ inch Disc, Single Action. \$36.00

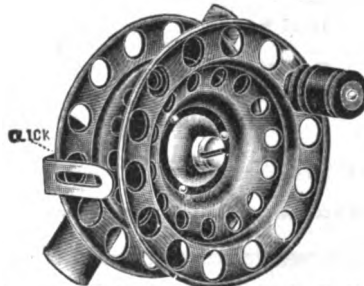

PROGRESS

Light Weight, One Piece Perforated Back Plate, Removable Spool, Steel Axle, Adjustable Back Sliding Tempered Steel Click, Hard Rubber Handle.

No. 1160—60 Yards, Satin Gun Metal Finish \$18.00
No. 1180—80 Yards, Satin Gun Metal Finish 20.40

GEM

Brass, Nickel Plated and Polished, Chased Handle, Large Open Spool, Sliding Click, Spool Can be Removed by Loosening One Screw. Adapted for Fly Casting.

No. 60M—Capacity 60 Yards. \$9.60
The Gem Reel is particularly adapted for fly casting, or whipping, its advantage being in its extreme light weight and free running qualities.

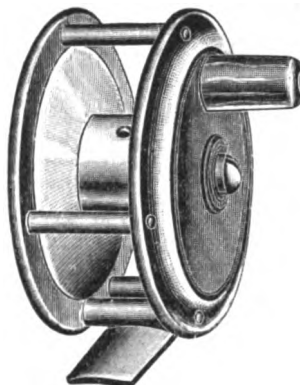

GOLDEN WEST FLY CASTING REEL

Single Action.

Made of Finest Quality German Silver, Satin Finished, Hard Rubber Discs Interleaved with Aluminum Metal. Line Shedding Oil Cup on Back Plate. Line Shedding Adjustable Back Sliding Click. Flush Crank Balanced. Pyralin Rubber Handle. Steel Pivots. Steel Ratchet. Steel Click Tongue. Steel Click Spring.

No. 1360— $2\frac{1}{2}$ Inch Disc, $\frac{3}{4}$ Inch Pillar, 60 Yards Capacity \$84.00
Packed One Reel in a Handsome Velvet Lined Jewelers' Display Case, with a Marvel Oil Can Enclosed.

GENUINE ENGLISH TROUT

Aluminum Spool and Frame with Gun Metal Discs, Click, Black Horn Handle and Solid Gun Metal Cross Plate. A Very Strong and Durable Reel, Yet Light in Weight. Put up One in a Fine Brown Leather Bag.

No. 1300—3 inch Discs, 80 Yards Capacity \$66.00

MEISSELBACH RAINBOW TROUT

Hard Alloy Aluminum Frame and Spool, Gun Metal Finish. The Spring, Tongues and Bridges are of Highest Finish, are Hardened and Tempered. Click Spring is Strong when the Fish Strikes and Line is Running Out. Very Light when Reeling. Easily Taken Apart for Cleaning and Oiling. Very Light and Strong.

No. 900—Capacity 60 Yards, $2\frac{1}{4}$ inch Discs, 1 inch Wide, for Bass and Trout Fishing \$84.00

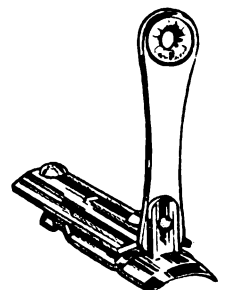

GEM SELF WINDER

Automatic Spooler for Reel, indispensable to every angler.

Winds and spools your line. Attached to any ordinary reel by drilling two holes into reel seat to correspond with the two round head screws on top piece of winder.

You cast in the ordinary way—then simply turn your reel handle; the winder does the rest. No more snarls.

How to Operate—Press the handle slightly towards the reel when winding. Keep joints oiled.
No. 10—Full Nickel Plated, Complete with Screws \$24.00

Neptune Special Casting Rods are made with a long one-piece Tip which, when put to test, has a natural, easy curve the entire length, thus equally distributing all strains. Jointed Rods do not have this elasticity and therefore invariably break where the wood joins the ferrule. Our Neptune Rods are strictly Hand Made by an expert rod man and only the best of everything is used in their construction. Made of the finest quality lancewood, wound with two colors of silk, red and black or yellow and black. Very carefully wound and varnished with two coats of special varnish, which will not chip off. All trimmings are German Silver. Reel Seat has a patent reel holding feature. Special Hand Made Grooved Maple Grip with Body Rest. With ordinary care this rod will last a lifetime. One in a velvet cover.

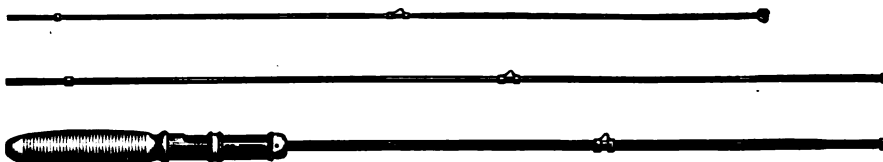

HAND MADE ENGLISH CASTING

SAMSON STEEL FISHING RODS

NOT GUARANTEED

The Samson Steel Fishing Rods are not guaranteed, and all repairs and replacements will be charged for. These Rods are carefully made, carefully inspected, carefully tested to maximum limit. Every effort will be made to keep the quality to the highest point of perfection.

These Rods are regularly made with cork handles, nickel plated trimmings on the butts, and reel seat either above or below the handle, as described. The Rod proper is finished in a dead black enamel, in order as far as possible not to reflect light, which is a recognized advantage. The trimmings of the Rods are nickel plated. The best of material is used, and great care is taken in the finish of these Rods.

No. XX—8 feet, Extra Quality and Finish, Straight Ash..... Per Dozen \$7.50

GAFF HOOKS

LION AUTOMATIC GAFF

The Only Combination Fish Gig and Gaff Hook on the Market.

No. 1—Best Quality Steel, Blued Finish, Width of Jaws when Open $8\frac{1}{2}$ inches, Length Over All when Closed 15 inches, Socket Shank.....\$24.00
The center acts as a stop when opening and closing the Gaff; also as a trigger for springing the Gaff, and by coming in contact with the object sought for, closes the jaws automatically and with lightning rapidity, so a fish can be as easily caught lying close to the bottom as well as close to the surface. Our method of construction prevents teeth in jaws from becoming dull, and will not cut or abuse the fish and frogs.

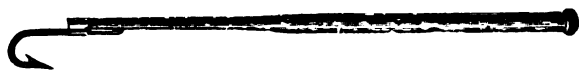

COMMON GAFF

Best Cast Steel, Properly Tempered, with Tang.

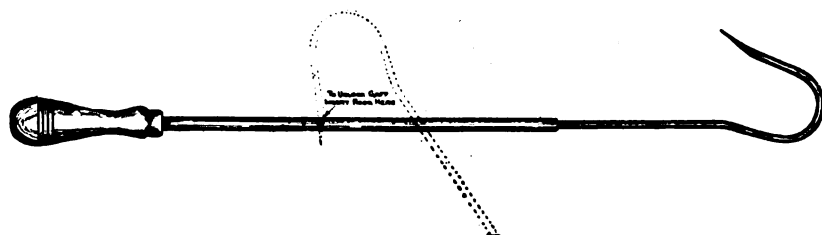

No. 10—Length $8\frac{1}{2}$ inches, Nicely Japanned.....\$2.50
No. 12—Length 7 inches, Nicely Japanned..... 1.70

No. 154—Novelty, Weighs by $\frac{1}{4}$ Lb. up to 15 Lbs., Nickel Plated\$4.00

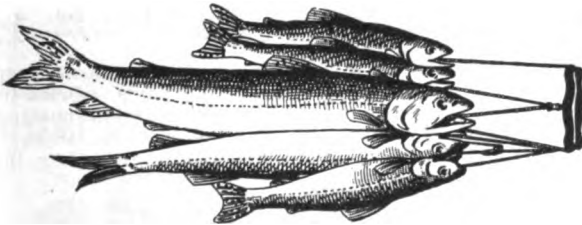

FISH STRINGERS

Per Dozen

Keepem Alive—Nickel Plated Spring Steel, 54 inches Long, 10 Patent Hooks with Safety Catch which Goes Through Both Lips of Fish, They Don't Drown, but Swim **\$8.00**
Keeps your game fish alive, absolutely weedless, weight comes on shank of hooks, not on pins, each fish on a separate hook, holds 100 lbs., yet folds compactly, can be carried in the pocket. Makes a good game stringer. Hooks are interchangeable.

Per Dozen

No. 9—Milwaukee, 46 inches Long, $\frac{1}{8}$ inch Thick, Hard Braided Cotton Line, 5 inch Steel Needle and Brass Snap, Black Enameled Wood Handle..... **\$2.00**
After fishing, the middle of the line is fastened at hook on handle, dividing the catch in two parts and making it easy to carry.

One Dozen in a Box.

Per Dozen

No. 8—6 feet Long, No. $4\frac{1}{2}$ Braided Cotton Line Securely Fastened in a Solid Brass Needle, Japanned, Iron Ring on Other End..... **\$2.00**
No. 39—9 feet Long, Same Description as No. 3..... **4.00**
One Dozen in a Box.

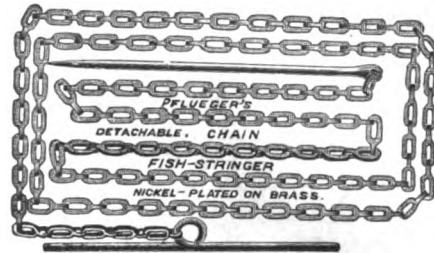

LEADER BOXES

Per Dozen

No. 200—20 inches Long, Holds About 50 Average Sized Trout, Otherwise Same as No. 180.....	21.00

F. O. B. Factory Only.

The upper or ice compartment has a large opening for receiving the ice. Cracked ice placed in this section slowly melts and the ice-cold water drips into the water shell surrounding the fish chamber on all sides. Ice nor water comes in contact with the fish to soak them, but preserves the fish with cold air. Leakage or slop-over is impossible. Convenient to carry and neat in appearance.

MINNOW BUCKETS

JONES' PATENT

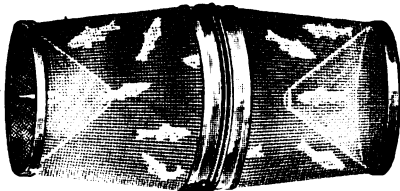

Elongated Shape, Heaviest Quality Dairy Tin.

- Each
- No. 1300—Nicely Painted and Striped, Galvanized Wire Inset, Perforated Hinged Cover, Sunk to Receive Ice, with Hasp and Wire Ball, Size 6x10x15 inches, Capacity 12 Quarts.\$4.00
- No. 1200—Same Style as No. 1300, but without Cover on Outer Receptacle, Size 6x8x15 inches, 8 Quarts. 3.50

This Pail is made with a Galvanized Wire Inset, which contains an air chamber at the top provided with a valve to receive an ordinary bicycle pump. This air chamber is fitted with a fine outlet tube which ejects a current of air into the water at the bottom of the Inset or Minnow Container, thus constantly supplying plenty of fresh air to the Minnows. One filling of the air chamber supplies an air current for six hours, so that Minnows can be carried a great distance.

MINNOW TRAPS

GEE'S IMPROVED

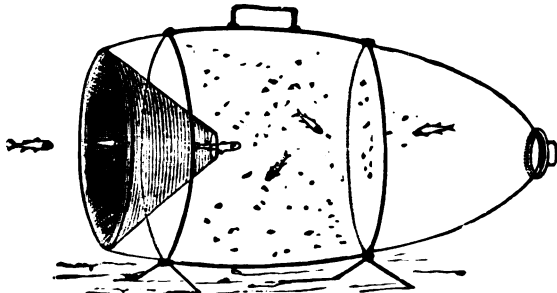

Best Quality Wire Cloth and Sheet Steel, Galvanized.

Each

- No. 200—17 1/2 inches Long, 9 inches Diameter, Funnel Ends, the Ends or Halves are Exactly Alike, Furnished with a Snap to Hold the Two Halves Together\$1.20

This Trap is the most ingenious device for catching and holding minnows, crawfish, etc. The minnows are attracted through the sense of smelling, tasting and seeing.

THE "ORVIS"

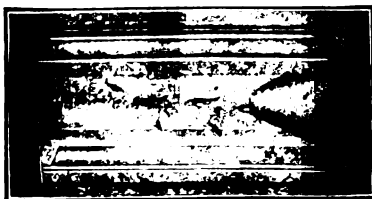

Heavy Flint Glass.

Each

- No. 250—12 inches Long, 24 inch Circumference, Galvanized Metal Handle and Legs.\$3.20

THE THOMAS KNOCK DOWN

Combined Minnow Trap and Lantern.

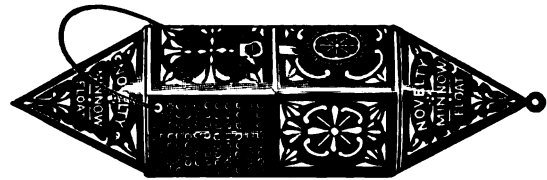

Each

- No. 150—14 inches Long, 6 inches Square, Glass Funnel, Four Glass Panels, Bound with Rust Proof Metal and Held in Position by Two Long Bolts and Wing Nuts\$2.70

This Trap can be taken down or put together in two minutes. Panels are easily replaced in case of breakage.

MINNOW FLOATS

NOVELTY

Galvanized Iron, Light Green Enameled, with Decorations.

Each

- No. 99—24 inches Long, 7 inch Diameter, Conical Ends, Cylindrical Body, Self-Locking Cover with Seamless Metal Knob, Same Capacity as a 10 Quart Minnow Bucket\$3.00

This Float is tied to the stern or side of boat and on account of its shape will pass through the water easily, admitting plenty of fresh air and protecting the minnows at all times. It will keep minnows alive the longest of any known device, easy to operate with one hand, leaving the other free to take out the minnows.

FLOATING LIVE NET

NEPTUNE

Mouth Opens Automatically, 52 Brass Rings at Top of Net, Making the Draw Strings Run Freely.

Per Dozen

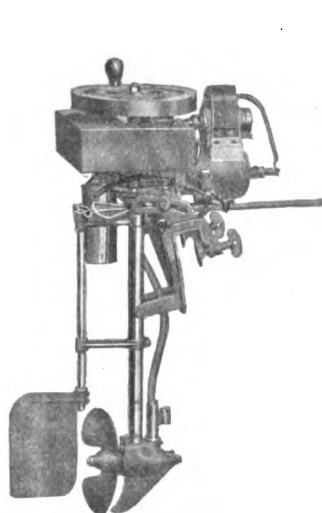

- No. 300—Metal Frame, 8 inches Square, 3/4 inch Diameter Tubes, 3/4 inch Mesh Brown Net, 30 inches Long, Size when Collapsed 3/4 x 8 x 8 inches, Can be Put in Basket or Bag, Weight Each 8 Oz.\$15.00

The frame keeps the net extended, guaranteed to float no matter how many fish may be put in.

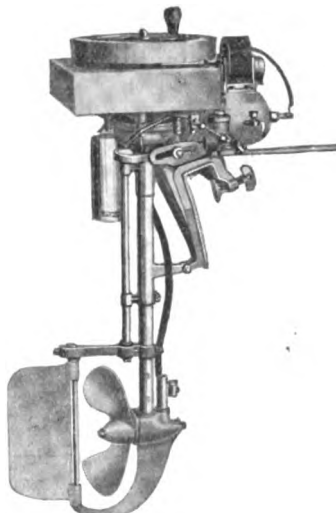

Wisconsin

Detachable
Row Boat Motor

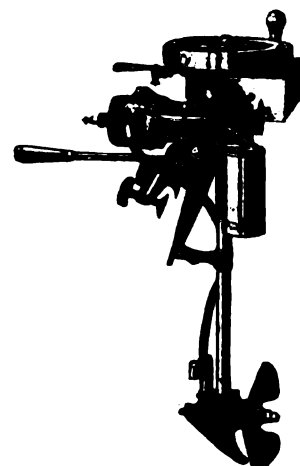

More real experience has gone into the Wisconsin than into any other Outboard Motor on the market. It never was an experiment. It was first produced in response to a big demand for a Rowboat Motor built by long experienced Motor Makers. It was a success from the start.

Model "M" 2 H. P.

Model "N" 3 1/2 H. P.

Model "J" 2 H. P.

MODELS L, M AND N

These models are equipped with our independent Rudder giving constant control over the boat even when motor is still. It is not necessary to keep the motor running until landing is made. Shut off the power and with the rudder you will make an easy landing just where you wanted to.

Average speed obtained will vary from 6 to 9 miles per hour. The gasoline tank capacity is one gallon, sufficient for four hours' steady run. These models are equipped with the water cooled noiseless Wisconsin Silencer.

MODELS J AND K

These models are not only used on rowboats but are very frequently installed in canoes. The independent rudder is replaced by a swinging propeller with self-locking tiller. A twist of the wrist locks the propeller in any desired position. No more tired arms from holding the tiller against the natural propeller thrust. Once the tiller is locked the propeller is firm same as on the higher priced motors.

Speed obtainable on rowboats, 6 to 9 miles per hour. On canoes up to 11 miles per hour.

SPECIFICATIONS:

All Wisconsin Rowboat Motors are of two-cycle type with speed ranging from 200 to 900 R. P. M. The Cylinder, Piston, Piston Rings and Crankshaft are ground to micrometer size. All motors are equipped with interchangeable white metal die cast bearings. The Drive Gears are cut of steel and run in a watertight case. The Propeller Shaft is made of Naval Bronze and provision is made to take up the side thrust and wear. All parts which come in contact with water are made of brass or bronze and all models can therefore be used in salt water. The Supporting Bracket is of malleable iron and has the patented top adjustment, making it possible to change the angle without the necessary bending overboard.

HIGH-TENSION MAGNETO

Models K, M and N are equipped with a special reversible waterproof true high tension Magneto. A system that has been tried out for many years, and which is used by all manufacturers of high grade automobiles, aeroplanes, marine and stationary engines.

DIRECT DRIVE

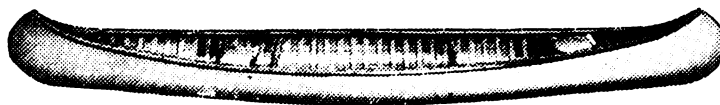

All Models have patented positive drive. Crank and Drive Shafts are milled to halves and guided by a steel tube. The motor power is thus delivered direct to the propeller shaft regardless of the up and down adjustment. No complicated keys, pins, couplings to get out of order. Simple and strong—this drive is a feature found exclusively on the Wisconsin.

MULLINS CEDAR CANOES

CAN NOT SINK

Mullins Improved Charles River Model—The King of All Canoe Models—The Easiest to Paddle.

Steady, Stable, Safe. Mullins Canoes cannot sink. In each end is a Mullins Buoyancy Pad having sufficient buoyancy to float a capsized water filled canoe and keep two people from sinking.

Brief Specifications—Ribs and planking of Cedar. Stems of Ash. Gunwales of Clear Grained Spruce. Thwarts and Seat Frames of Ash or Maple. Bang Plates—Specially designed heavy half-round polished brass. Decks—Clear Maple. Best grade one-piece heavy canvas cover. Colors—Yale Blue, Harvard Red or Coach Green.

	Each
Mullins—16 foot "Yale" (Standard Grade), Including Keel and Open Gunwales, Weight Crated 95 Lbs.	\$60.00
Mullins—16 foot "Yale" (I. X. L. Grade), Including Keel and Open Gunwales, Weight Crated 95 Lbs.	70.00
*Mullins—17 foot "Sponson" (Standard Grade), Including Keel and Open Gunwales, Sponson Sides and Brass Bound Stems, Weight Crated 130 Lbs.	79.00
*Mullins—17 foot "Sponson" (I. X. L. Grade), Including Keel and Open Gunwales, Sponson Sides and Brass Bound Stems, Weight Crated 130 Lbs.	87.00

The I. X. L. Grade is made from hand selected timber, matched to secure uniformity of color, and has a slightly higher grade finish than the Standard grade.

*A Sponson Canoe is far safer than the Yale Canoe because in the Sponsons on sides not only possesses as much buoyancy as air tanks, but prevent the canoe from tipping over. The best canoe for rough water.

MULLINS PRESSED STEEL ROW BOATS

The "Prince" is a very fine family and pleasure resort boat. Rows easily, it is a first-class fishing boat.

The "Sultan" is an admirable boat for family use where a good capacity is required. The best boat for children as it is roomy and steady.

Finished in Aluminum Outside, Light Blue Inside, Natural Wood Trimmings, Large Air Chambers Under Decks Like a Lifeboat.

	Each
Prince Row Boat—Furnished with Bottom Boards, Rowing Braces, Two Pairs Oar Locks, Tying Rings at Bow and Stern, Air-Tight Compartments and One Pair 7½ foot Straight Ash Oars, Length 14 feet, Beam 44 inches, Height at Bow 22 inches, Stern 21½ inches, Amidship 13½ inches; Weight about 235 Lbs., Crated.	\$60.00
Sultan Row Boat—Same as Prince, but Length 16 feet, Beam 50 inches, Height of Bow 25 inches, Stern 23½ inches, Amidship 15 inches, Weight about 275 Lbs., Crated.	69.00

Advantages of a Pressed Steel Row Boat—Constructed of strong galvanized steel plates, pressed to perfect and rigid form. The hull is thoroughly braced and strengthened by a frame of the best oak keel and steam-bent oak ribs. It does not absorb water. It will not warp or rot. Will not leak because the joints are made by countersinking, riveting and soldering. It cannot sink as it is equipped with tested air chambers. Give it a coat of paint in the spring and you have a dry boat each season. It is Lighter, More Durable and Easier to Row than a Wooden Boat.

Note—All the above Canoes and Boats are shipped from Factory only, F. O. B. Salem, Ohio. Freight rate from Salem to Milwaukee is \$1.80 per 100 Pounds.

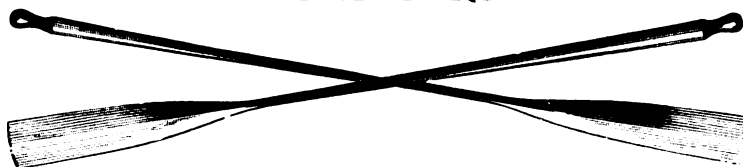

LIFE PRESERVER PILLOWS

Made of Best Artificial Leather, Filled with Kapok, a Light, Downy, Non-Absorbent Fibre which is Capable of Sustaining a 200 Pound Person Afloat in Water for Forty-eight Hours.

LANDING NETS

TAN LINEN, HAND MADE, SQUARE BOTTOM
 $\frac{3}{4}$ inch Mesh, Extra Fine Quality, Waterproof Finish.

No.	Per Dozen
No. 320—20 inches	\$4.00
No. 324—24 inches, for No. 1 $\frac{1}{2}$ Leader Landing Net Frame	5.00
No. 330—30 inches, for No. 1 Neptune Landing Net Frame	7.50
No. 336—36 inches	9.00

COMMON SENSE MINNOW SEINES

Complete with Floats and Sinkers.

Size, Feet	8x4	10x4	12x4	15x4	20x4	25x4	30x4
Each	\$1.20	1.50	1.80	2.20	2.90	4.80	5.00

The Common Sense Minnow Seine is made of strong woven netting of mesh of about $\frac{1}{4}$ inch. While this Seine is not offered as equal to the regular Knit Seine of $\frac{1}{4}$ inch, it is offered as a substitute, in a measure, as a much cheaper article, and will answer the purpose, when parties only wish to use a Seine a few times and not make a large investment. Give these Seines a trial and we will guarantee they will give satisfaction. This Seine, in size of mesh, overcomes the objection, when parties want to take a smaller minnow than can be caught in the $\frac{1}{4}$ inch mesh at bar.

NEPTUNE SLIPLESS MINNOW SEINES

 $\frac{1}{4}$ inch Mesh, Complete with Floats and Sinkers.

Size, Feet	8x4	10x4	12x4	15x4	20x4	25x4	30x4
Each	\$1.50	1.90	2.80	2.80	3.70	4.50	5.50

Slipless Minnow Seines are woven in a manner entirely new to minnow seine construction. This weave prevents the threads from slipping and enlarging the mesh.

NEPTUNE MINNOW SEINES COMPLETE

MINNOW SEINES COMPLETE

Made of superior quality No. 20-6 cord patent cable laid seine twine, mounted on lines with never-sink white cedar floats and our improved cast lead sinkers complete, ready for use, except extra hauling lines. Floats are spaced 2 feet apart and sinkers 8 inches apart.

When ordering Nets, be careful to mention correct Length, Depth, Size of Mesh and Size of Twine, as all Nets are made to order and cannot be exchanged. Shipped only from Chicago factory.

Examine carefully all Nets before using, as they cannot be returned after having been in the water.

NETS

"NEPTUNE" GILL OR SET

The above picture represents the way in which Gill Nets are commonly set in the great lake fisheries. These Nets are made for taking whitefish, ciscoes, trout, pickerel, bass, mullet, suckers, perch, etc. If you are not certain of the exact size of mesh and twine you need, write us what kind of fish you intend to catch, give weight, also in what kind of water, viz.: lake, river, bayou, etc. A Gill Net is made of the best quality imported linen twine. It is a single net hung on a single top and a single bottom line mounted with floats and sinkers complete, ready for use.

LINEN GILL NETS, OR SET NETS COMPLETE

2 inch Square Mesh.....	Per Running Yard,	.07 1/2	.08 1/4	.09	.10 1/4	.11

Cotton Gill Netting only. one-third less per yard than Complete Nets.

Note—Above Nets not carried in stock. Shipped direct from our factory in Chicago.

Note—When ordering give full description of the Net you order, stating Length, Depth, Size of Mesh and Size of Twine. We measure the size of mesh on square measurement, namely, a mesh is diamond shape and a 1 inch Square Mesh measures 1 inch on each of the four sides, or 1 inch from knot to knot. This is also called 1 inch Bar. Should you intend to order the size of mesh stretched measure, be sure and specify same clearly on your order, as nets cannot be exchanged. Examine all nets before using, as they cannot be returned after having been in the water.

BROOK NETS (NO WINGS) FIRST HOOP "D" SHAPE

NETS

"NEPTUNE" TRAMMEL

All Nets with 8 inch outside mesh
No. 16 cotton twine, except $\frac{3}{4}$ inch in-
side mesh in $3\frac{1}{2}$ and 4 foot depth,
which is fitted with 6 inch outside mesh
No. 16 cotton twine.

Our Trammel Nets are hung on a Single Bottom Line, made of very best cotton obtainable, well stretched before net is hung on them. They have three nets; the two outside or walling have large mesh; the inside net is made in small mesh of best Linen Thread, and is about one-half deeper than outside net. When fish strike they draw it through large mesh of outside net, thus forming a bag from either side, from which they are unable to escape. Great care is taken in hanging these nets to lines, so they will catch every fish that strikes them. Nets made by unskilled hands will never do this.

CAMP STOVES

FOLDABLE AUTO CAMP STOVE

Cut Showing Stove Set Up Ready for Use.

THE KLONDYKE CAMP COOKER

The Klondyke Kamp Kooker is made of 22 gauge smooth steel, well riveted and reinforced by heavy band iron rim. The body of the stove is built in the form of a cylinder with one side flattened to form the top and cooking surface which measures 14x30 inches, with 5 inch pipe collar. The oven is in the smoke pipe, 6 inches above the top of the stove, so that the entire cooking surface is free. It takes large wood, 28 inches long, making it possible to keep a fire ten or twelve hours. The legs are so attached that they will bear any weight liable to be put on them and will stand on soft dirt or sand.

Each
Klondyke Camp Stove, with Five 14 inch Joint Pipe, without Oven\$11.00

Net can be carried in pocket, space $1\frac{1}{2}$ x $7\frac{1}{2}$ inches. Just the thing for trout fishing or prairie chicken shooting.

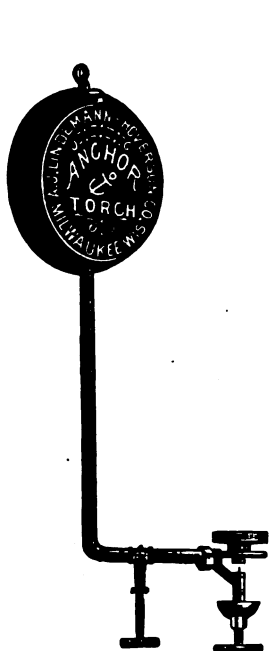

FOLD FOR POCKET $1\frac{1}{2}$ x $7\frac{1}{2}$

GASOLINE WALL TORCHES

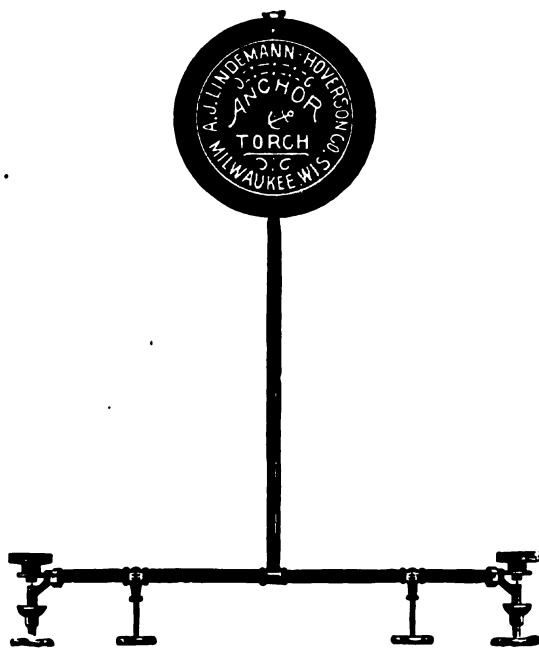

SINGLE

DOUBLE

BAKER SINGLE

No. 20.

No. 25

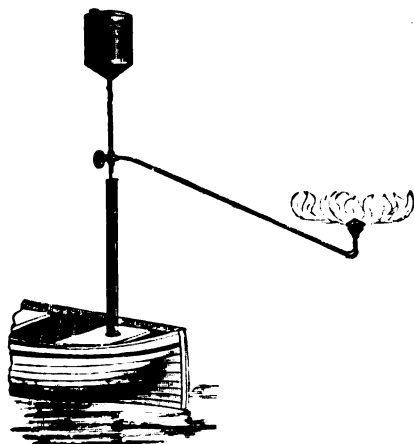

No. 17B

No. 20—Single Burner, Japanned, Capacity of Tank 1 Gallon, for Outdoor Use.....	Per Dozen
No. 25—Double Burner, Japanned, Capacity of Tank 1 Gallon, for Outdoor Use.....	
	\$19.00
	36.00
No. 17B—Baker Single, Heavy Galvanized Sheet Steel Tank, Heavy Pipe and Valve, Capacity 10 Quarts, with Baker Burner, Having 9 Large Jets, for Outdoor Use.....	Each
	\$4.00

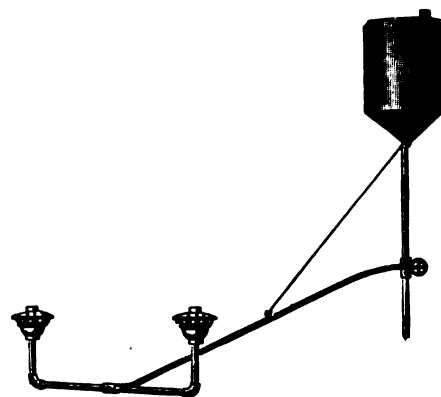

The Baker Torch will light a radius of 100 feet. One gallon of gasoline will operate a Baker Burner from 3½ to 5 hours. The Burner produces a flame about 18 inches across, composed of 9 strong, brilliant jets, which the wind cannot blow out. When Burners are wanted more especially for indoor use, the Burner is made to burn 18 jets of smaller size, reducing the diameter of the flame to about 10 inches. The Jets are formed in the cap of the burner, thus a burner may be changed any time by simply ordering another cap to produce the other size flame.

FISHING TORCHES

BAKER

Cut Showing Burner
Furnished with Baker
Wall and Fishing
Torches.

No. 1B—Single Burner, Capacity of Tank 5 Quarts.....	Each	No. 2B—Double Burner, Capacity of Tank 6 Quarts.....	Each
	\$4.00		\$6.00

Extra Baker Burners—For Nos. 17B, 1B and 2B Baker Torches.....	Each
Extra Baker Burner Caps—For Nos. 17B, 1B and 2B Baker Torches.....	\$1.50
Extra Baker Valves—For Nos. 17B, 1B and 2B Baker Torches.....	.60
	.80

The Baker Fishing Torches burn naphtha or gasoline. The oil, as it flows into the burner, is converted into gas, which escapes through a number of small grooves, near the top, thus forming brilliant jets of flame, about 10 inches in length, free from smoke and soot, and which the wind cannot blow out. One gallon of oil will burn about 3½ hours. The flow of oil is governed by a valve made especially for these lamps, and which allows the light to be regulated with great exactness.

CAMP FURNITURE

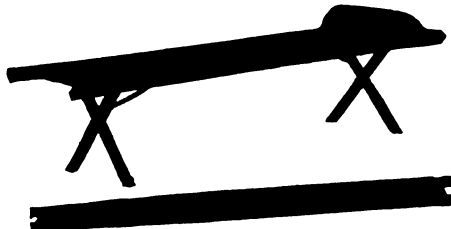

FOLDING COTS

Rock Elm Frame, Air Dried, Brown Mission Stained, 12 Oz. Olive Green Double Filled Canvas, Metal Joint Braces. Each

BASE BALL UNIFORMS

If you consider style, appearance and comfort, as essential to the base ball uniform, you will recognize and appreciate our qualities; base ball uniforms that are actually cut and tailored to your individual measurements in the same manner as high class custom clothing, made from genuine Athletic Flannel in sanitary factories under careful supervision.

Not merely an "assembled uniform", but each article, the Cap, the Belt and the Stockings have the same particular attention, making a perfect base ball uniform.

SHIRTS

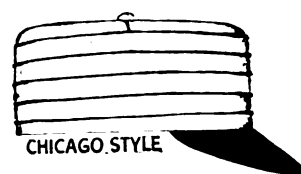

Button Front Shirt with Negligee Collar, detachable sleeves, silk piping on collar and pleat to match trimmings. Script lettering.

V-Neck Collar, Button Front Shirt, elbow sleeves, pleat and band around collar, with two rows of braid on sleeves to match. Lettered down pleat.

CAPS

Silk Piping and Visor to Match.

Silk Piping and Visor to Match.

Uniforms are made to order only, and it takes from 7 to 10 DAYS to make delivery.

CATCHERS' MITTS

Padded with best asbestos felt, hand formed and sewed pad, special reinforced back and hand protector, patented lacing device, full laced, laced thumb, deep pocket, double stiffening on edge and back to protect fingers. All parts double stitched, strap and buckle at wrist.

Cut Shows King Patent Adjustable Padding.

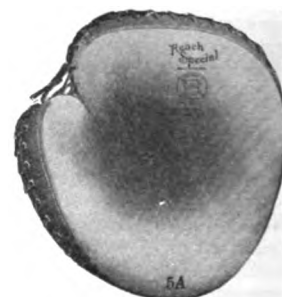

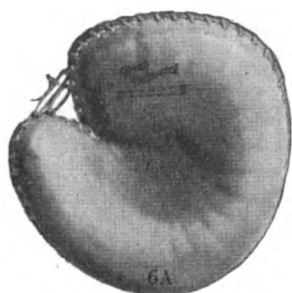

Nos. 8A, S, 6A, 5A, 4C, 3A, AS and 500 Mitts have faces moulded into shape from one piece of choicest leather, making the wearing surface extra strong and preventing the possibility of tearing or ripping. Not a stitch in the entire face, nothing to tear or break loose. The pocket is moulded in the face and held in shape by a special patented hand formed asbestos felt pad, made in such a manner as to prevent the padding shifting or becoming soft and flimsy.

Nos. 8A and 4C are made with new "Hold-Fast" feature back. It is so constructed that when adjusted to the user's hand it will hold fast. It does away with the constant buckling of straps and fits the hand better.

Per Dozen

HAND BALL GLOVES

REACH

No. B2.

No. B3.

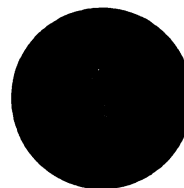

Per Dozen Pair

No. B2—Soft Tan Leather, Stitched Palm and Fingers, Ventilated Between Each Finger... \$24.00

No. B3—Soft Tan Leather, Fingerless Feature Makes it the Best Ventilated Glove on the Market..... 12.00

HAND BALLS

REACH PARAMOUNT

No. AA—Dark Color, Size 1 7/8, Weight 2 Oz., Medium Speed, for General Use..... \$4.20

No. AAA—Dark Color, Size 1 7/8, Weight 2 Oz., Very Fast Speed, for Open or Outdoor Courts..... 4.20

The durability of our Hand Balls is nothing short of marvelous, retaining their speed to the very last.

The construction throughout renders these balls absolutely accurate; they will respond to the player's scientific shots admirably, which feature becomes impossible with the ball carrying the plug and heavy seams on the interior.

EXERCISERS

SAMSON SPRING

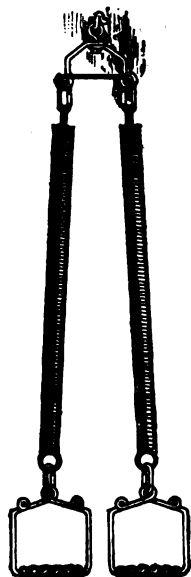

It is built from the very best of steel and is exceptionally durable. It is never in the way, because, when not in use it can be lifted from its hook and placed in a small drawer or box.

Two Exercisers in One. An extra handle is furnished with each machine. This extra handle makes it possible to convert the Samson Exerciser into a Chest Expander for use in developing the chest and healthy lungs and the muscles surrounding the heart and vital organs. This gives a perfect chest and lung expander and adds 100 per cent to the effectiveness of the Samson Exerciser. No charge is made for the extra handle.

Per Dozen

No. 10—Samson Steel Spring Exerciser..... \$20.00

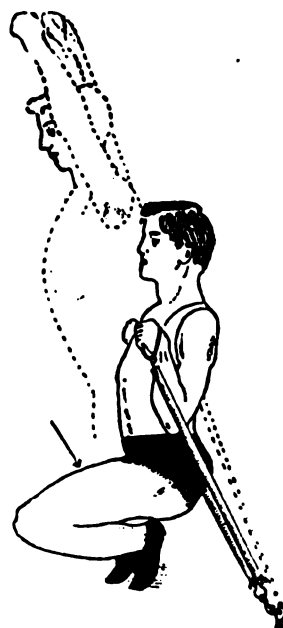

(Suitable for Men, Women and Children.)

HERCULES STEEL SPRING

Per Dozen

No. 20 — Constructed on the Same Lines as No. 10 Samson, but without Extra Handle and Not so Highly Finished..... \$12.00

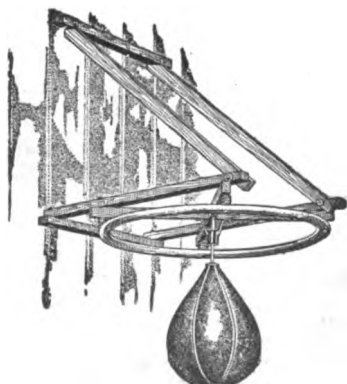

The real muscle maker—a complete gymnasium in itself. A few minutes of daily exercise will develop all muscles of the body.

Endorsed by ball players, athletes and strong men of the world.

STRIKING BAG PLATFORMS

RACINE SPRING

Selected hardwood, Neatly Finished, and Securely Bolted Together, the Rim is of Maple, Oil Finished, and Has Four Crucible Steel Compression Springs Between the Rim and Frame.

Without Bag.

Each

No. 600—Mahogany or Mission Finish, All Metal Parts Nickeled..... \$8.00

No. 450—Nickel Plated Swivel and Springs, All Metal Parts Nickeled..... 6.00

No. 350—Japanned Swivel and Springs..... 5.50

The springs act as a cushion and absorb all vibration, besides making the action of the bag extremely lively. The swivel is of new design, and is noiseless. The bag rope is easily adjusted and will not wear as readily as in most swivels. The platform is easily adjusted to a wall or ceiling, and is very rigid when in position for use. Weight of platform about 7 Pounds.

- No. 2X—Special, Selected Pebble Grain Sheepskin Leather, Eight Sections, Complete with Rubber Bladder and Lace. **48.00**

The desire to play basket ball in the open air has created a demand for a ball that would stand hard usage. The ball made regularly for the indoor game was first tried but found unsuitable, as the rough surfaces, such as brick, cement, rough-coated walls, etc., wore the balls through at the seams and cut the threads. This made it necessary to produce a specially designed ball for the outdoor game, and we have invented a ball which we know will give satisfaction.

 Sizes 5 to 11. Per Pair

League.

- No. 475**—Durable, Light Weight Shoe, Special Arabian Horsehide Leather, Hand Riveted Carbon Steel Cleats. A Shoe of Exceptional Quality. . . \$4.70
 Sizes 5 to 11. Per Pair

League Special.

- No. 1473**—Good Quality Kangaroo Calf Leather, Oak Soles, Hardened Blued Steel Cleats, Sizes 5 to 11. . . \$4.00
No. 1573—Same as No. 1473, but Boys' Sizes, 2 ½ to 5 ½. 3.90 Per Pair

Amateur League.

- No. 1477**—Good Quality Buffalo Calf Leather, White Finish, Oak Soles, Hardened Blued Steel Cleats, Sizes 5 to 11. . . \$3.20
No. 1577—Same as No. 1477, but Boys' Sizes, 2 ½ to 5 ½. 3.00 Per Pair

TENNIS SHOES

Sanded Chrome Soles.

- No. 411**—Bal Style, White Canvas, Laced to Toe, Pearl Elk Leather Tip and Back Strap, Goodyear Stitched, Sizes 5 to 11. . . \$2.70
No. 411B—Same as No. 411, but Boys' Sizes, 2 to 5 ½. 2.60 Per Pair

TENNIS SHOES

Black Rubber Soles.

- Champion Bal**—White Duck, Black Rubber Soles and Edge, Well Made, Light and Flexible, with Non-Slip Soles, Sizes 5 to 11. . . \$1.50 Per Pair

Note—Can be furnished in White or Brown Duck with Gray Rubber Soles for 10 cents per pair extra.

Black Corrugated Rubber Soles.

- No. 1424**—White Canvas Calf-Pearl Tips and Lace Stay, Goodyear Stitched, Sizes 5 to 11. . . \$2.50
No. 1424B—Same as No. 1424, but Boys' Sizes, 2 to 5 ½. 2.40 Per Pair

GYMNASIUM SHOES

Soft Soles.

- No. 501**—Pearl or Black Chrome Elk Leather, Soft, Heavy Flexible Chrome Elk Sole, Lock Stitched, Antiseptic Insole, Sizes 5 to 11. . . \$2.10
No. 503—Same as Above, but with Patented Spring Heel, Sizes 5 to 11. . . 2.90
No. 512—Same as No. 503, but "Laced to Toe". 3.00 Per Pair

RUNNING SHOES

Per Pair

- No. 1401—Fine Selected Light Kangaroo Calf Leather, Six Carbon Steel Spikes Firmly Riveted and Reinforced by Double Rows of Sole Stitching, so Spikes Cannot Loosen or Break Off, Sizes 3 to 11.....\$4.40
- No. 1801—Same as No. 1401, but Hand Turned, Kangaroo Leather 4.60

JUMPING SHOES

Per Pair

- No. 1403—Special Quality Kangaroo Leather, Oak Soles and Heels, Flexible Shank, Six Carbon Steel Spikes in Sole and Two in Heel, Re-enforced so Spikes Cannot Break Off or Loosen, Sizes 3 to 11.....\$5.00

Brown Buckskin "Sure Grip" Soles.

Per Pair

- No. 1892—Flexible Turn Welt Shoe, Fine Pearl Elk or Black Kangaroo Calf Uppers.....\$4.00
- Sizes 5 to 11.

BOWLING SHOES

Sanded Chrome Soles.

Per Pair

- No. 1451—Lace to Toe Style, Black Kangaroo or Pearl Elk Uppers\$3.90
- Sizes 5 to 11.

FOOT BALL SHOES

Brown Style Cleats.

Per Pair

- No. 490—Tough Black Chrome Leather Uppers, Solid Reinforced Sole Leather Box Toe, Brown Style Cleats, Sizes 5 to 11.....\$4.80
- No. 496—Light Weight Sprinting Shoes, Genuine Kangaroo Uppers, Single Oak Sole, with New Steel Protection Plate, Flexible Shank, Sizes 5 to 11..... 6.70

RACING SKATE SHOES

Single Oak Sole, No Heel.

Per Pair

- No. 1467—Genuine Kangaroo Uppers, Reinforced with 4 Wide Webbing Stays, Long Solid Counter Supporting Foot, to be Used with Tubular Speed Racing Skates and all Skates which are Made to be Riveted to the Shoe, Sizes 5 to 11.....\$5.20

FEDERAL AUTOMOBILE TIRES

GUARANTEE

All Federal Pneumatic Automobile Tires, bearing the Federal Rubber Mfg. Co.'s name and serial number, are guaranteed to be free from imperfections in material and workmanship. Under this guarantee tires returned to the Factory for replacement will be accepted by Factory only when all transportation charges are prepaid. If, upon examination, it is concluded that tires are defective, Factory will repair or replace them at their option.

For tires replaced by Factory, charges will be made to owners at the time new tires are delivered, for such amounts as in the Factory's judgment will compensate the service rendered by such replaced tires.

Tires worn out in usual or unusual service, abused knowingly or unknowingly, misused, used on rims not bearing these stamps, injured through accident or design, are not covered by this guarantee.

Federal Pneumatic Automobile Tires are not guaranteed to give any specific miles of service, and any and all guarantees are expressly waived by any purchaser of these tires who uses therein any substitute for air; or who uses them under weight in excess of those for which the various tires are recommended, or who does not keep tires inflated to the pressures recommended by Factory.

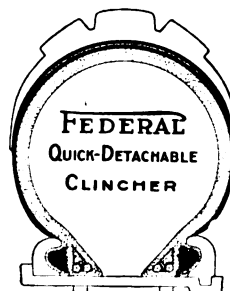

NOTE—All Adjustments on Federal Tires and Tubes are made by the Federal Rubber Mfg. Co., Milwaukee, and not by the Wm. Frankfurth Hardware Co.

When ordering Tires and Auto Sundries from us, you can include same with your Hardware Shipment and Save Express Charges.

FEDERAL TIRE TYPES

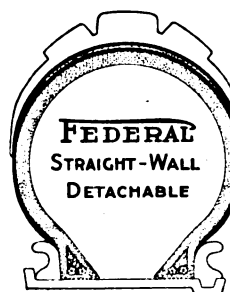

Federal Tires, Both Rugged and Round Tread, are Made in the Types Named Below.

QUICK-DETACHABLE CLINCHER TIRES

This type of tire is designed to fit any standard quick detachable rim having reversible side rings or any quick detachable rim on which the clincher or inward curve of the side rings is used next to the casing. See illustration. All Federal Quick Detachable Casings have non-extensible beads of the famous **Double-Cable-Base** construction.

STRAIGHT-WALL DETACHABLE TIRES

This type of Tire is designed to fit any standard quick detachable rim having reversible side rings or any quick detachable rim on which the straight side of the detachable side rings is used next to the casing. See illustration. All Federal Straight-Wall casings have non-extensible beads of the famous **Double-Cable-Base** construction.

REGULAR CLINCHER TIRES

This type of Tire is designed to fit any standard one-piece clincher rim. See illustration. All Federal Regular Clincher Casings have extensible beads to permit stretching over the rim flange in applying or removing the tire.

When ordering, care should be taken in specifying type of tire desired. The lettering on your old tire is a safe guide.

FEDERAL AUTOMOBILE TIRES

FEDERAL DOUBLE-CABLE-BASE CONSTRUCTION

Cut shows Cross Section of Federal Double-Cable-Base Type—Quick Detachable Clincher Type. Embodying precisely the same construction as the Federal Straight-Wall, but having an Extra Bead-Filler to conform to the inside curve of the side ring.

The two chief features embodied in this improved construction and which so completely overcome side-wall breaks and other tire troubles, are Double-Cable-Base and Flexible Bead-Filler.

Federal Double-Cable-Base Tires were designed to meet the universal demand for a tire which would remove the chief cause of the most serious tire troubles. Many thousands of these tires are in service today without a single complaint. This indicates how well the problem has been solved. Federal Double-Cable-Base features mark a wonderful advance in pneumatic tire building.

Because of their superior construction the life of these tires is exceptional. By their use the most serious forms of tire trouble are positively eliminated. The absence of side-wall breaks and rim-cutting reduces tire upkeep very materially, and the impossibility of this type of tire blowing off the rim insures safety under all conditions of service.

INTERCHANGEABLE SIZES.

The following table shows the several sizes of Federal Tires which may be used on rims of slightly smaller size when desired. In such cases, however, an inner tube of corresponding size with casing should be used.

31x3 1/2 Tire Will Fit Rim.....	30x3	37x4 1/2 Tire Will Fit Rim.....	36x4

FEDERAL BLACK TREAD AUTOMOBILE TIRES

In Federal Black Tread Tires will be found the same high quality material and workmanship as built into the well known "Rugged" and "Plain" White Tread Tires.

All except the Regular Clincher Type are constructed with the Federal exclusive Double-Cable-Base feature—the greatest improvement ever made in Automobile Tires.

The Federal Black "Trafik" Tread is dependable as a non-skid tire of highest efficiency.

Casing Only, without Inner Tube.

FEDERAL RUGGED TREAD TIRES

This is one of the most successful non-skid tires that has ever been brought out. It is a scientifically made tire, constructed of the choicest Sea Island cotton fabric, the finest grade Para rubber, and built on absolute mathematical lines to prevent skidding.

Note the big round studs forming parallel rows across the tread and flaring broadly at the base. This is the only type of construction offering the same resistance against skidding in any direction.

The strong purchase obtained on road or pavement by the big round studs, utilizes every unit of engine power transmitted to the wheels and gives maximum mileage under all conditions of service.

Federal Rugged Tread Tires are made in Clincher, Quick Detachable Clincher and Straight Wall (oversize and non-rim cut) Types to fit Standard Rims.

FEDERAL ROUND TREAD TIRES

Made of the best materials throughout. It is exceedingly durable, resilient and dependable. Like the Rugged Tread, it is vulcanized in open steam, by what is technically known as the "single cure" process—the tread and carcass being cured and united at one operation. The result is, a tire that has won the recognition of motorists everywhere.

Federal Round Tread Tires are made in Clincher, Quick Detachable Clincher and Straight Wall (oversize and non-rim cut) Types to fit Standard Rims.

FEDERAL WHITE TREAD AUTOMOBILE TIRES

AUTOMOBILE INNER TUBES

CONGO GREY

The long service and lasting satisfaction of Congo Pure Gum Grey Tubes are simply the result of the correct combination of the best material (Up-River Para), liberal size, splice and valve base reinforcement, and skilled workmen specializing solely on tube construction.

Congo Grey Tubes are wrapped in tissue paper and packed one in a box complete with dust cap and a package of talcum powder.

Congo Grey Tubes are made of nothing but the newest and toughest rubber; rubber that is live and that will keep its life indefinitely.

Congo Grey Tubes are made under a rigid system of inspection and test, a system so thorough that you can be sure that the Tube you purchase is in perfect condition.

Congo Grey Tubes are thick, strong, lively and can be patched repeatedly.

Size, inches	28x3	30x3	30x3 1/2	31x3 1/2	32x3 1/2	34x3 1/2	31x4	32x4

Each	\$4.25	4.45	4.75	4.75	5.60	5.90	6.10	7.20

FEDERAL GREY

Federal Grey Tubes are made of the best quality, extra heavy gauge Para rubber and embody all of the essential elements of strength, durability and elasticity necessary to long life and satisfactory service.

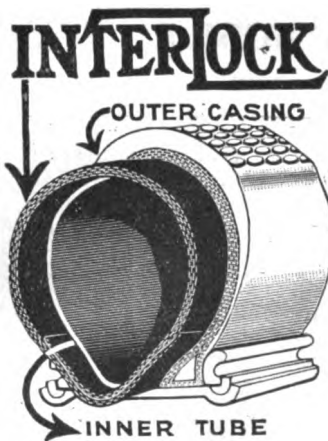

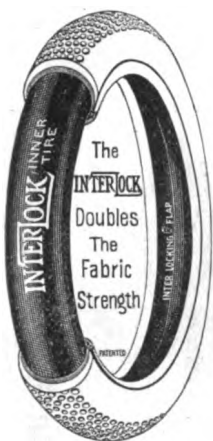

Federal Redskin Tubes are heavy, seamless and flawless. They are built up layer by layer, eliminating any danger of porosity or weak spots. They do not stretch out of shape.

INTERLOCK INNER CASINGS

EXTRA HEAVY RED

Prevent Blowouts, Reflect Punctures, Double the Fabric Strength.

This is by far the best tire reinforcement made. It is a complete self-locking inner fabric tire—fully 2½ times stronger than an ordinary reliner—and holds rim cuts as well as blow-outs. Can be installed easily and quickly, and will get results from old tires that no other reinforcement can possibly get.

With tires usually guaranteed for 3500 miles, and Interlock cost only one-fourth as much—it follows, that an Interlock needs to give only 900 miles extra service to pay for itself. Shipped in the full round, like a tire.

Size, Inches	28x3	30x3	32x3	30x3½	32x3½	34x3½
Each	\$5.00	5.00	5.00	5.50	5.50	5.50
Size, Inches	32x4	33x4	34x4	36x4	36x4½	36x5
Each	\$8.50	8.50	8.50	8.50	10.00	

CONGO RELINERS OR INSIDE PROTECTORS

CONGO

Made of exceptionally high grade stock, and extra wide for full protection of side walls of casing.

A very pliant but strong and durable Reliner acting as a safeguard against blow-outs, and adding materially to the life of weak tires.

CONGO INSIDE TIRE SLEEVES OR CASING PATCHES

	With Flaps.					
Nos.	1	2	3	4	5	6
For Tires, Inches...	3	3½	4	4½	5	5½
Each	\$0.50	.60	.70	.80	1.00	1.20

These Patches are built up of several plies of strong cotton fabric, reinforced at points of greatest strain, and vulcanized together into one substantial piece. It is a thorough and dependable emergency repair for casing blow-outs. Constructed with side flaps to attach to side walls of casing, thus preventing patch from shifting or creeping while in service.

OUTSIDE TIRE SLEEVES

CONGO

A full moulded product—thick and heavy and made of a superior quality of tire fabric and tread stock. Fitted with reinforced eyelets and extra heavy rawhide lacing. A thoroughly dependable shoe built for emergency cuts or blow-outs to withstand temporary hard service.

Nos.	1	2	3
For Tires, Inches...	2½, 3	3½, 4	4½, 5
Each	\$0.90	1.20	1.50

FEDERAL HOOK-ON

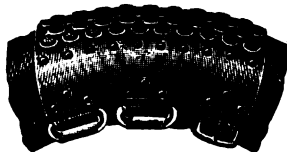

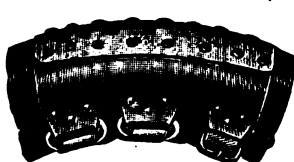

Made from strong high grade fabric with a wear resisting rubber cover. Furnished in both clincher and straight wall types. When ordering state type of casing for which sleeve is required together with the size of casing.

For Tires, Inches...	3	3½	4	4½	5
Each	\$1.00	1.10	1.20	1.40	1.60

LEATHER TIRE BOOTS

WOODWORTH STRAP BOOTS

Cut Shows Light Strap Boot. Cut Shows Heavy Strap Boot.

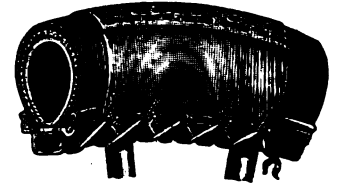

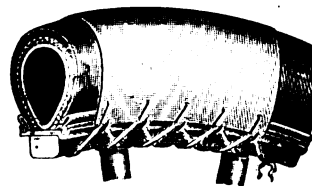

The Light Strap Boots have one ply of leather on the sides and two ply on the middle, studded with thin-headed rivets.

The Heavy Strap Boots are made of two ply chrome leather reinforced on the middle and studded with thick-head rivets.

7 in. Long, Complete with 1 in. Chrome Strap.

FEDERAL MOTORCYCLE TIRES

STUDDED TREAD

A Cross Sectional View of the Studded Tread Tire.

Federal is the tire for all riders—at all times and under all conditions.

This new Federal Motorcycle Tire establishes a new standard, both as to efficiency and value. It is built to give the motorcyclist the greatest possible service and the greatest possible security. The tread has four plies of high grade fabric—carefully built up ply-by-ply, combining exceptional strength with great flexibility.

The tread is built with extra large studs—thickest in the middle where the greatest wear comes.

CORRUGATED TREAD

A Cross Sectional View of the Corrugated Tread Tire.

Federal Tires have won their way to the highest pinnacle of public popularity through sheer merit.

The Corrugated Tread for motorcycles offers many advantages for both pavement and cross country riding. The corrugations running laterally present a continuous wearing surface to the road.

Federal Corrugated Tread Tires have an extra heavy tread, and while presenting the familiar appearance of the popular corrugated tread, have been built to keep pace with the demand for extra service.

PUNCTURE PLUGS

SAMPSON FEATHEREDGE

For Automobile Inner Tubes.

Put Up in Sampson Trial Kits.

The Sampson Puncture Plug is a perfect mechanical device which absolutely eliminates all the objectionable and uncertain features of present methods of repairing inner tubes. Consists of two small perforated metal discs imbedded in a covering of soft velvety

rubber and drawn together by a threaded wire which is easily broken off when the plug is tight. The principle of operation is essentially the same as in fastening the valve stem in the tube. Sampson Plugs will not leak and there is no exposed metal to chafe or injure the tube or shoe.

Per Kit

Sampson Trial Kit—Consists of One Pair Forged Steel Combination Cutting and Inserting Pliers, and One Each Sampson Plugs No. 5 Small, No. 6 Medium, and No. 7 Large, Put up in a Strong Telescoping Container with Instructions for Use.....**\$0.50**

TIRE TAPE

The rubber compound is thoroughly worked into the cloth. The friction is strong, adhesive, and as nearly moisture proof as possible. It will hold fast wherever applied.

TIRE-DOH

The Easy, Permanent Repair for Punctures and Blowouts.

- | | |
|--|----------------------|
| No. 10—Tire-Doh Outfit, Contains One 3½ Oz. Can Tire-Doh and One 2 Oz. Can Tire-Doh Cement, Put up in a Large Can..... | Per Outfit
\$1.55 |
| No. 11—Tire-Doh Outfit, Contains One 1½ Oz. Can Tire-Doh and One 1 Oz. Can Tire-Doh Cement, Put up in a Large Can..... | .70 |

You don't know how easy it is to put an end to your puncture and blowout troubles until you buy a Tire-Doh Outfit.

Works every time and is the simplest thing in the world to use—mends inner tubes permanently.

Just clean the rubber around puncture or blowout, put on a little Tire-Doh cement and then apply the Tire-Doh. After the Tire-Doh sets, as it will in five or ten minutes, it becomes a part of the rubber itself, possessing all the elasticity and strength of the best Para rubber.

Tire-Doh has been used successfully to mend tears 37 in. long in inner tubes.

Patches are uncertain, vulcanizing costs money if you have it done for you—often burns your tubes if you try to do it yourself. Tire-Doh is better than all three and costs only one-tenth as much.

Used on cuts and sand blisters in casings Tire-Doh will prevent water and oil from entering and rotting the fabric. Tire-Doh will mend any article of rubber, water bags, rubber gloves, boots, etc.

MICHELIN MASTIC CEMENT

FOR REPAIRING CASING CUTS

This is a rubber gum to fill in casing cuts after first applying cement. Can also be used for patching inner tubes by putting over breaks the same as a rubber patch.

Not a liquid but a plastic cement.

Cuts properly repaired with Michelin Mastic Cement will not reopen with wear and hard service, but are permanently and properly sealed.

- | | |
|---|---------------------|
| No. 7—2 Oz. Wide-Mouth Sealed Top Cans..... | Per Dozen
\$6.00 |
|---|---------------------|

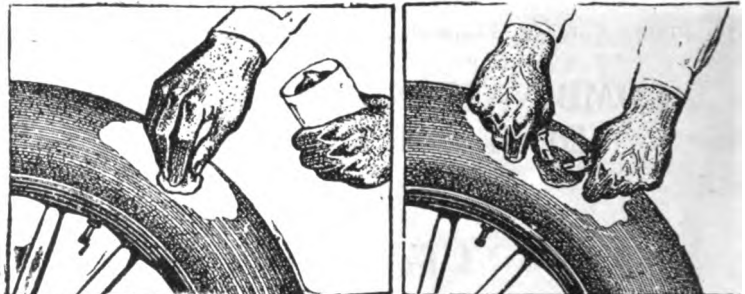

MICHELIN CEMENT

Pure dissolved Para gum, undiluted. The best and strongest it is possible to make. Unequaled for repairing punctured tubes and envelopes, and for other purposes requiring the use of the strongest and most satisfactory adhesive.

- | | |
|----------------------------|----------------------|
| No. 9—In ¼ Pint Cans..... | Per Dozen

| No. 93—In 1 Pint Cans..... | 12.00 |

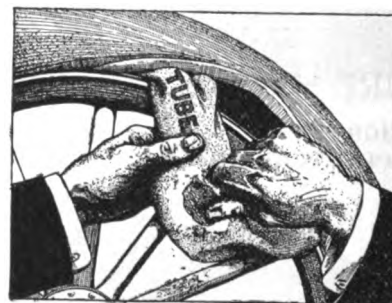

RUBBER PUTTY

Apply cement, let it partly dry.

Press in "Fixit," that's all.

Press in "Fixit," that's all.

HOW SIMPLE TO APPLY FIXIT

Repairs cuts, tears, punctures, blowouts, blisters and pockets, etc., without the use of heat, acids, patches, battery or tools.

No tools needed but the hands. Enough in each outfit to pay for itself several times in a year.

"Fixit" is easy to apply—dries quickly, makes absolutely permanent repairs.

Stays Fixed—will not tear off after hard service.

Any rubber article can be repaired perfectly and permanently with "Fixit" and anybody can do the job without tools or apparatus, other than their hands. In addition to rubber tires, casings and tubes, it makes easy the mending of rubber hose, hot water bags, syringes, rubber shoes and boots, rubber coats, etc.

NU-TIRE

Punch's Original

Preserves Tires, Renews Tires, Wears Like Rubber.

- | | |
|---|----------------------|
| No. 20—1 Pint Cans, White or Grey Shade..... | Per Dozen
\$ 6.00 |
| No. 25—1 Quart Cans, White or Grey Shade..... | 14.00 |

Punch's Original Nu-Tire is a scientific unvulcanized rubber solution made from genuine Para rubber gum. Flows readily from a brush. Fills up cuts and cracks before they have a chance to expand. Heals up the tiny sand cuts that allows road oil, water and dirt to work into casings, resulting in speedy decomposition and blowouts. Only a brush is needed, dries in 15 minutes. Apply once every week.

Note—When ordering, always state if White or Gray Shade is wanted.

TREAD FILLER**2 IN 1, DUTCH BRAND****Quick—Sure—Economical.**

A high grade compound in semi-liquid form for quickly filling small cuts and gashes in automobile and motorcycle casings. Requires no cement. Dries very hard and resilient. Makes tires last longer.

By using "2 in 1" Tread Filler in time on small cuts, many expensive jobs of vulcanizing can be avoided.

No. 2 in 1—1x6 inch Tubes, with Nozzle Point, 1 Dozen in a Box **\$4.00**

AUTO PUNCTURE CEMENT**DUTCH BRAND****For Extra Heavy Patchings.**

Manufactured from the finest Para rubber, thoroughly washed and dried, and mixed with chemical solutions of absolute reliability. This cement has stood the severest tests and has always proven satisfactory.

Per Dozen
 $\frac{3}{4}$ x4 inch Tubes **\$1.20**
 1 x4 inch Tubes **1.80**
 $\frac{1}{4}$ Pint Cans **3.30**

FLAKE GRAPHITE

Lubricates by attaching itself to the rough spots that produce friction and thus by smoothing out these rough spots it eliminates the high friction of metal to metal and exchanges the low friction of Graphite to Graphite.

The use of this Graphite prevents cutting or sizing in cylinders and bearings. Is not affected by heat, cold, acids or alkalies.

Each
 In 8 Oz. Cans **\$0.60**
 In 1 Lb. Cans **1.00**

SOAPSTONE**Finest Quality.**

No. 28—In 2x8 inch Carton Containing 1 Lb. **\$0.12**

SLIP-EASY TIRE TALC

Slip-Easy Tire Talc is the best grade of American talc we can buy for tire lubrication. After having repaired a tube don't omit to sprinkle the inside of the casing generously with Slip-Easy Tire Talc.

Each
 $\frac{1}{2}$ Lb. Fibre Tube **\$0.16**
 One Dozen in Box.

VULCANIZING CEMENT**DUTCH BRAND**

This Cement is made to cure quickly and effectively—dries rapidly. Never fails to effect a permanent job.

Per Dozen
 $\frac{1}{4}$ Pint Cans **\$3.00**
 1 Pint Cans **9.00**

RELINER CEMENT

Per Dozen
 $\frac{1}{4}$ Pint Cans **\$2.50**
 An exceptionally sticky cement. The reliner is in to stay when this cement is used.

ONE-PIECE WORK SUIT

Automobile Work Suit made in one piece, close buttoned at neck. Tabs at wrists and bottoms of trousers, so can be closed, protecting undergarments. Openings at side to get at trouser pockets.

A man wearing one of these suits can crawl around under automobiles, over the dirty, greasy floors, and not soil the regular clothes.

Just What You've Been Wanting.

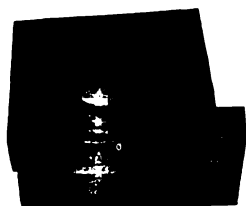

Make that adjustment—oil or grease the car—change a tire.
 —but protect your suit from that grease spot which means a cleaner's bill.
 —but protect your cuff or sleeve from grease stain which means another shirt ruined.
 —will save its cost times without number.

On or Off in a Jiffy.**Just slip it on and fasten.**

Per Suit
 No. 4025—Heavy Material. Strong, Serviceable Khaki. Sizes 40. 44. 48 **\$3.50**

VULCANIZERS

GREENE'S GASOLINE

Each

No. 2—Greene's, Gasoline Heated, Complete with Repair Rubber, Emery Cloth and Directions..... \$2.00

A reliable blow-out or puncture repair outfit. Gasoline gauge is the cross-bar separating the several sections. As many as three punctures can be repaired at the same time. Note special flame shield. Will fit in any tool box.

LIGHTING SYSTEM FOR FORD CARS

JEFFERSON MAGNETO LAMP REGULATOR

Prevents Your Headlights from Burning Out.

The Jefferson Magneto Lamp Regulator is designed primarily to allow for multiple wiring and the use of standard six-volt lamps. When the Regulator is installed, each light is operated separately and independently of the others, and if the light goes out the rest are not affected. It increases the lighting efficiency at low engine speed and prevents the lights from burning out at high engine speed. An improved Double Throw Switch is used in the circuit for dimming the lights for city driving.

With the present Ford lighting system the wiring is in series and if one light goes out, both lights are out. Another objectionable feature of the series wiring is the burning out of headlights when the engine is racing or the car is running at a high rate of speed. The Jefferson Regulator eliminates all these weaknesses. It is the only practical lighting system for Ford cars.

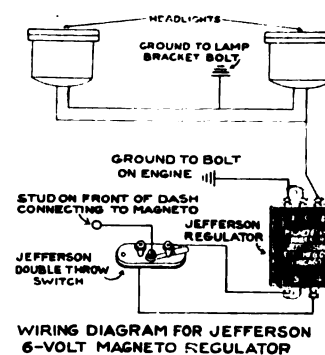

The Jefferson Regulator operates all lights on a Ford car—head-lights, side-lights, speedometer light, spot-light and tail-light. Owing to its high electrical efficiency, it will not interfere with the ignition and cause the engine to miss.

With the Jefferson lighting system, standard six-volt lamps are used. These lamps have a sturdier filament, can withstand vibration better, last longer and give better satisfaction. Six-volt lamps are carried in stock by all dealers and garages.

The Regulator is small, neat and compact. Assembled in a black enameled steel case, weighing only two and one-half pounds. Can be mounted in any convenient place on the dash under the engine hood. Has no moving parts and with ordinary care guaranteed to last a lifetime. Complete wiring diagram accompanies each Regulator. The installation is very simple and can be made in ten or fifteen minutes.

With this Regulator it is possible for the Ford owner to have a six-volt storage battery interchangeable with the Regulator, the battery to be used when the car is standing and the Regulator when the car is running. Understand that the Regulator and battery are entirely independent of each other.

Do not compare the Jefferson Regulator with any of the makeshift devices on the market, such as resistance, rheostats or impedances, as these devices only regulate by dissipating the energy in heat and causing the engine to miss.

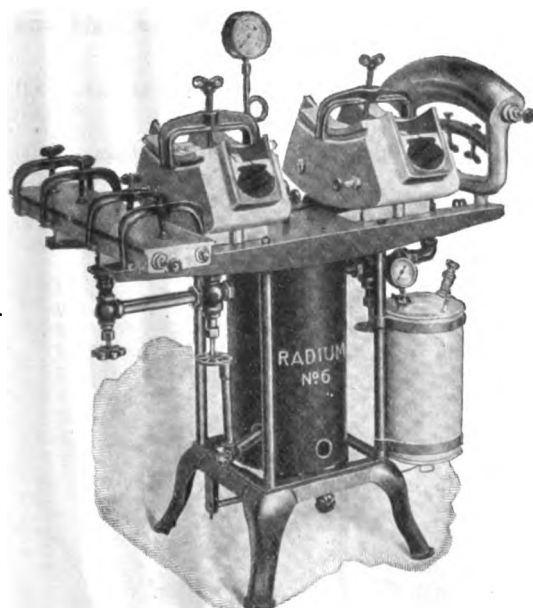

No. 50—Jefferson Magneto Lamp Regulator, Complete with Double Throw Switch, Weight Each 2 ½ Lbs.	Each \$3.50
No. 51—Extra Double Throw Switch.	.35

STEAM VULCANIZERS

RADIUM No. 6

Equipped with Gas or Gasoline Burners, Guaranteed.

This is the most popular and efficient Vulcanizer on the market at present. As shown by illustration, the frame is rigid and strong. The molds are fastened to the top plate of Vulcanizer and connected to the steam piping by ground unions and each mold has a valve in circuit between boiler and mold, so that when not in use steam can be turned off, saving fuel and time in raising steam.

The Boiler is of the regulation Flue Type, capacity 3 ½ gallons of water. Burners powerful and reliable and will raise 60 lbs. steam pressure in 18 to 20 minutes.

Gasoline Tank of ample capacity with air pressure gauge, Hand Pump and Schrader Valve so that air line can be used for producing the necessary pressure.

Vulcanizer completely equipped as shown, with one set of Inner Clamps for Clincher tires for each Sectional Mold, ready for instant work, with a small quantity of repair gum, fabric, cement, sand paper, etc., but no tools or air bags, which must always be mentioned when wanted and will be furnished at the lowest market prices.

As shown below this Vulcanizer has the most popular sized tire Sectional Molds, but will substitute any other molds, at no additional expense, except the difference in the net price of the molds.

MOLD EQUIPMENT

- 1—V159 Tube Mold, 24 in. Long, 5 ½ in. Wide.
- 1—V160 Sectional Mold for 3 to 3 ½ in. Tires.
- 1—V138 Sectional Mold for 4 to 4 ½ in. Tires.
- 1—V160 Inner Tube Mold, 16 in. Long, for 3 to 4 ½ in. Tires.

Each 300 Lbs.	\$200.00 \$150.00

STEAM VULCANIZERS

RADIUM No. 10

Equipped with Gas or Gasoline Burners, Guaranteed.

DESCRIPTION No. 10

Boiler—Height 30 in., diameter 11 in., flue type, water capacity 5 gallons, burns gas or gasoline, 2 water gauges, complete with steam gauge and all necessary connections and covered with asbestos. Shipping weight 120 lbs.

Length of Vulcanizer frame 7 ft., height to top of molds 42 in., extreme width 28 in., weight shown below.

MOLD EQUIPMENT

- 1—V151 Bicycle Tire Mold for 1½ in. Tires.
- 1—V153 Section Mold for 2 to 2½ in. Casings.
- 1—V143 Section Mold for 2½ to 3 in. Casings.
- 1—V146 Section Mold for 3½ to 4 in. Casings.
- 1—V139 Section Mold for 4½ to 5 in. Casings.
- 1—V150 Inner Lining Mold for any size Casing.
- 1—V157 Tube Mold 24 in. long by 5½ in. wide.

DESCRIPTION OF No. 9

We furnish a No. 9 Vulcanizer, exactly the same as the No. 10 but minus the No. 151 and 153 Section Molds, as per prices and weight shown below.

	Each
No. 9—Vulcanizer, Complete, Shipping Weight Each 615 Lbs. \$300.00	\$225.00
No. 10—Vulcanizer, Complete, Shipping Weight Each 650 Lbs. 335.00	250.00
Extra Boilers Only.....	68.00 50.00

This Vulcanizer has five sectional molds for casings from 1½ to 5½ in. in diameter and one Inner Lining and One Tube Mold as shown above.

We furnish this Vulcanizer with any other combination of molds as desired—see pages describing molds—at the difference in the price of the molds. All vulcanizers are guaranteed to work perfectly or money refunded.

Radium Steam Vulcanizers do Perfect Work.

RADIUM No. 5

Equipped with Gas or Gasoline Burners, Guaranteed.

The No. 5 has the same frame or base as the No. 3 or 4, and the same equipment, all complete, excepting that the molds will enable the user to do any kind of casing repairing, no matter what class of work may turn up.

As shown the vulcanizer has a 16 inch sectional mold large enough for sectional work—the mold shown being used for 4 to 4½ inch casings. Three sizes of this mold will enable the user to vulcanize casings from 2½ to 5½ inches in size and these extra molds can be secured at a very nominal cost as shown on page describing molds and can be quickly attached to this vulcanizer, in place of the Inner Lining or Rim-Cut Mold.

The vulcanizer is compact, easily accessible, does not take up much room and with the equipment mentioned, will do work as well as machines costing three or four times as much.

Burner is powerful and easily regulated, boiler capacity 9 pints of water, steam valves in circuit between molds and boiler, water gauge, safety valve, gasoline tank and pump all complete ready for work and full instructions for operating, and a small quantity of repair material. Boiler, cast iron, size 11 inch diameter, 10 inches high, flue type construction, capacity 9 pints of water.

DESCRIPTIONS

Frame—Cast iron base and top connected by piping and steel rods, rigid and strong.

Molds—Cast iron, all vulcanizing parts highly finished.

1—V138 Sectional Mold, length 16 inches, for 4 to 4½ inch casings. All molds with interchangeable clamps.

1 set of V138 Inner Clamps, for same size tires.

1—V115 Beading Mold with 2 sets of clamps, for 3½ to 4½ inch casings. Will vulcanize bead side of casing and tread.

1—V134 Tube Mold, length 16 inches.

	Each
No. 5—Vulcanizer Complete, Shipping Weight Each 250 Lbs. \$160.00	\$120.00

RADIUM No. 4

Equipped with Gas or Gasoline Burners, Guaranteed.

The No. 4 has the same base as the No. 3, but comes equipped with water gauge and steam valve in circuit between each mold and boiler, so that molds not in actual use can be shut off, saving time in raising steam as well as saving gasoline. The tube molds (2) are also larger, namely 16 inches long instead of 10 inches.

Illustration shows vulcanizer with Pressure Feed Gasoline Burner (blue flame), powerful, economical and reliable and now has pilot light attached that keeps gasoline chamber heated while burner is in use and capable of raising 60 pounds steam pressure in 18 to 20 minutes. Gasoline tank attached holds one gallon of gasoline and will last about six hours on one charge. Boiler flue type, capacity 9 pints of water.

Vulcanizer is shipped out complete with steam gauge, water gauge, steam valves, in circuit between molds and boiler, inner clamps for sectional mold, interchangeable clamps, all complete as shown, ready for instant work, with full instructions for operating.

DESCRIPTION

Frame—Cast iron base and top connected by piping and steel rods, rigid and strong.

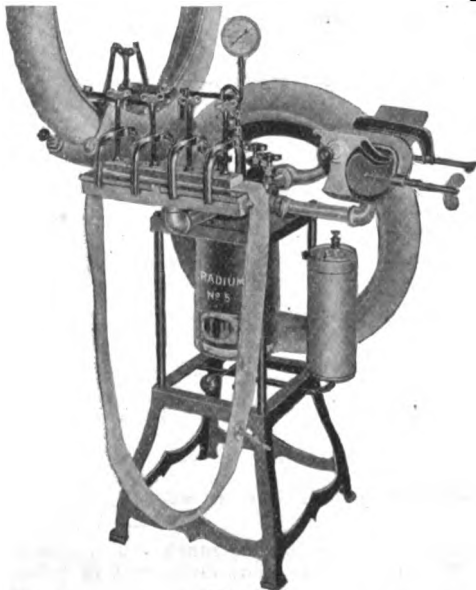

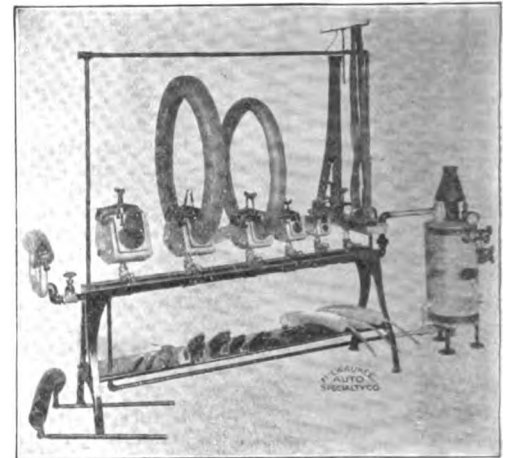

Molds—1 V138 Sectional Mold, length 16 inches, for 4 to 4½ inch casings, with Inner Clamps that fit over bead of casing for retreading, bead and rim-cut work.

2—V134 Tube Molds, length 16 inches.

1—V137 Concave Mold, length 6 inches for repairing small cut, etc., in any casing.

Any other molds as shown on pages describing same can be attached to this vulcanizer in place of those illustrated at no additional cost except the difference in the price of the molds.

	Each
No. 4—Vulcanizer, Complete, Shipping Weight 180 Lbs. \$113.00	\$85.00

No. 5.

1—V150 Inner Lining Mold, length 16 inches for 3½ to 4½ inch casings, for relining and reinforcing casings.

1—V134 Tube Mold, length 16 inches.

No. 4.

STEAM VULCANIZERS

RADIUM No. 1

Model 1915 Equipped with Either Gas, Gasoline or Kerosene Burner.

The No. 1 Vulcanizer fills the demand for a high grade, quickly heated tube vulcanizer, the mold being 32 inches long by 5 inches wide (No. V135) with six interchangeable clamps, with 4 inch 100 lb. steam gauge, safety valve, etc., all complete and ready for work.

Illustration shows vulcanizer with Pressure Feed Gasoline Burner and gasoline tank, one gallon capacity. This burner is powerful and will raise 60 lbs. steam pressure in from 12 to 15 minutes and can be adjusted to hold steam pressure at any point desired without attention.

Can be operated for about 10 hours on one gallon of gasoline and anyone can learn to operate and do perfect vulcanizing in one-half hour.

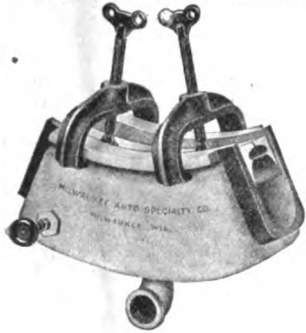

Steam connection of mold is 1 inch standard pipe thread and mold can quickly be detached from stand pipe and a retreading mold attached (see description under molds). This is a practical Vulcanizer, either for garage or private use and recommend either gas or gasoline burner equipment as the most satisfactory.

Purchasers can make any combination on this frame to suit their requirements, see prices of molds below.

No. 1 —Vulcanizer Complete, Weight Each 100 Lbs.....	\$50.60	Each
No. 1B—Base with Stand Pipe, Boiler, Base, Burner, Tank and Pump Complete	\$26 00	20.00

RADIUM SECTIONAL MOLDS

Sectional molds furnished complete with one set (2) Inner Clamps, either clincher or straight edge (Dunlap) type and unless mentioned the clincher type will be sent with vulcanizer. These clamps are needed in doing bead, rim-cut or retreading work and fit over bead of tire and in connection with sand bags or air bags enable the operator to press the casing tight to mold. Order molds by number and give sizes of tire for which clamps are wanted. When ordering extra Inner Clamps always mention number of mold upon which same are to be used and size of tire.

No. of Mold	Length, Inches	Size of Tire, Inches	Diameter, Inches	Clamps	Shipping Weight	Each with Inner Clamps

BEADING MOLDS

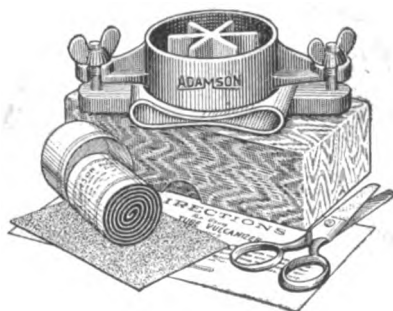

Tire can be clamped to either side of mold. One side for clincher, the other for Dunlap casings. Cures bead and side of casing to tread. Plates furnished that fit inside of casing to press same against mold in connection with 2 screw clamps as illustrated on the No. 4 Vulcanizer.

Each

No. V115—For 3 ½ to 4 ½ inch Casings, Weight Each 30 Lbs. \$16.70 \$12.50
No. V147—For 5 to 6 in. Casings, Weight Each 35 Lbs. \$18.00 13.50

VULCANIZERS

MODEL "M" FORD SPECIAL

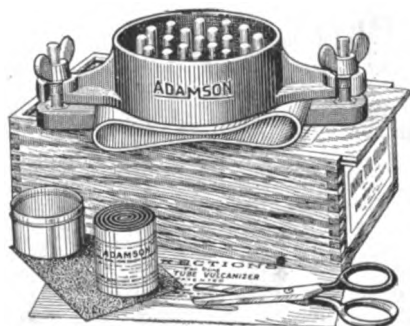

Especially adapted for repairing Motorcycle, Bicycle, Ford and Cyclecar Tubes.

This Vulcanizer operates the same as Model "T," but is smaller. It is designed for repairing 3 1/2 in. tubes and under. It's quick.

A complete outfit, with repair gum, ready for instant use.

Model "M"—Mailing Weight 2 Lbs. Each \$2.00

MODEL "T"

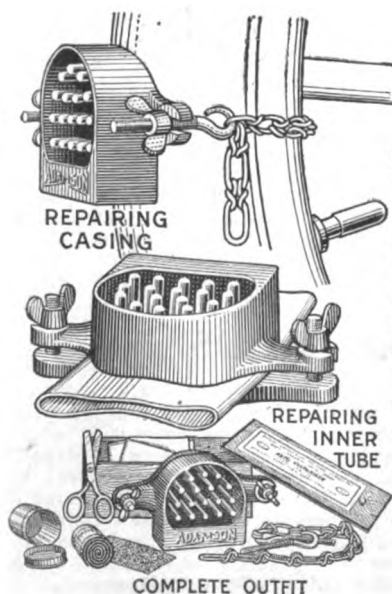

For Inner Tubes Only.

No cement or acid is used, the repair gum is placed on the tube according to directions. The Vulcanizer is applied by simply clamping it centrally over the repair gum and tube as illustrated. To vulcanize the repair, one ounce of gasoline is placed into the vulcanizer and ignited. It's quick.

A complete outfit, with repair gum, ready for instant use.

Model "T"—Mailing Weight 4 Lbs. Each \$3.00

MODEL "U"

For Tubes and Casings.

The tire is repaired without deflating or removing it from the car.

Absolutely Automatic—Place the patch—attach the Vulcanizer, put in gasoline—light it. No further attention required. It can't burn, scorch or injure tube or casings. It can't fail to do its work. So simple anyone can operate it.

A practical Vulcanizing Outfit complete with repair gum ready for instant use.

Model "U"—Mailing Weight 4 Lbs. Each \$4.00

SHALER TUBE-KIT

Type "F" for All Sized Tubes.

The Tube-Kit, which is intended to be carried in the tool box of a car for emergency repairs, mends all tube injuries quickly and permanently. It is as simple and easy to use as an unsatisfactory temporary patch. This model is all that is needed if one does not want to take care of casings.

The correct amount of heat is produced by a lamp which burns gasoline or alcohol without smoke, soot or dangerous exposed flame.

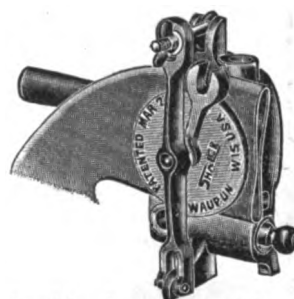

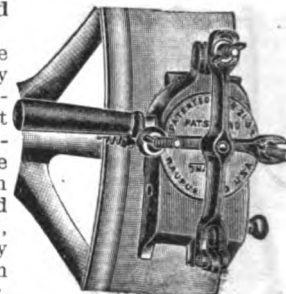

The fuel is contained in the lamp in such a way that accidental tipping over of the vulcanizer while in use would not cause trouble. A measure, graduated to give the proper fuel charge to cure every repair exactly right, is furnished with the vulcanizer so that no watching or regulating is necessary. The asbestos inlaid tube plate is swiveled to insure uniform pressure being applied to all parts of repair and so that the largest tube can be mended without pinching the edges. Vulcanizing surface 10 square inches. Each

No. 31—Tube-Kit, Nickel Plated, Complete with Repair Material, Detachable Handle, Weight 4 Lbs., Packed in Small Strong Box for Carrying with Car \$2.50

SHALER SAFETY VUL-KIT

Type "G" Complete for Casings and Tubes.

Besides making every practicable kind of tube repairs, in the same way as with the Tube-Kit, the Safety Vul-Kit has 3 1/2 x 4 in. surface curved to fit any sized tire for mending casing injuries. This is very valuable because while tubes are only mended when the tire goes flat, casings always need attention. Small cuts neglected, quickly become blowouts. It is easy to mend a small cut while tire is on wheel. Simply fill cut with rubber, clamp on the vulcanizer and in a few minutes you have a permanent repair. Casings cost several times as much as tubes. As this vulcanizer produces no exposed flame it can be used

close under a fender without scorching the paint. The lamp, which burns either gasoline or alcohol, contains the fuel in such a way that it is impossible to spill blazing liquid even if the vulcanizer were accidentally upset. The fuel supply is limited to that required for perfect vulcanization.

Tube repairs are cured on an asbestos inlaid plate, 3 1/2 in. in diameter, which is swiveled so that uniform pressure is automatically applied to all parts of the repair.

No. 32—Safety Vul-Kit, Nickel Plated and Polished, Complete with Repair Material, Weight 4 1/2 Lbs., Packed in Strong Box for Carrying in Car \$4.50

RADIO PORTABLE

Heated with Either Gasoline or Alcohol.

This illustration shows our Radio Gasoline Vulcanizer (heated with either gasoline or alcohol) standing on running board of auto, ready for work all complete, with detachable wire handle, clamp and chains for fastening tube or casing.

Dimensions—Height 5 1/4 in., width 4 in. Size of box 7 1/2 x 5 1/4 x 4 1/2 in. Shipping weight about 7 lbs.

Hot Plate Polished or Nickel Plated.

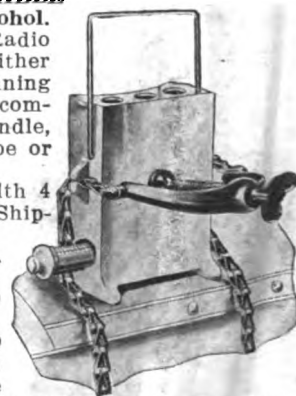

No. A—With Bench Clamp, Each \$4.00

No. B—Without Bench Clamp, Each \$4.00

Packed one in a wooden box, with clamp and removable wire handle

and a small quantity of repair gum, cement, paraffine paper, sand paper, ready for use. We guarantee vulcanizer to work perfectly.

This is by far the best and most practical alcohol heated vulcanizer on the market and guaranteed to work perfectly. The alcohol heater can be entirely removed for filling with alcohol. When operated the flame is entirely enclosed. One side of hot plate is flat, the other concave, for vulcanizing casings.

TIRE COVERS

CONGO INTERLOCK DOUBLE FLAP

**Finest Quality Black
Enameled Duck.**

High quality of material, snug fit, splendid workmanship.

Buttons easily and forms a natural watershed case.

Absolutely dustproof, adjustable to any make of tire.

Each
Congo Regular Style—All Sizes (for List of Sizes See Below)\$2.00

When ordering always state size tire cover is wanted for.

GORDON SEAT COVERINGS

Gordon Seat Coverings

**"Tailored to Fit"**

1000 Models of Automobiles

Cover the Cushions, Backs and Doors.

Pockets in Door Covers

Easily and quickly attached to any automobile.

Improve the "looks" 100 per cent.

Give cars a "dressed up" appearance that is envied by all.

Make old cars look like new.

Restore the new appearance to cushions that have become flattened out by long use.

Prolong the life of upholstery.

Protect clothes from streaks and spots.

Have no coloring matter to wear off and soil delicate garments.

Increase the joy of motoring.

Are more comfortable than leather or its imitations; cooler in summer and warmer in winter.

Are quickly cleaned with whisk broom or scrubbed with soap and water.

Give cars a better second-hand value than if the upholstery has not been protected.

Do not wear slippery.

Protect the upholstery from dust and dampness which ruins leather.

You will be dollars ahead if you put Seat Covers on your car.

Save time, patience, and expense of the dry cleaner.

Present a smooth, clean surface to the occupants.

Whisk them clean in a few seconds.

Add to the sales value of a used car.

Afford protection, comfort, pleasure and are an economy.

Style and Fit

Every Gordon Seat Cover is designed and made up with the same careful attention to detail as the finest garment.

We employ seat cover tailors,—they tailor every Gordon Seat Cover to fit perfectly so that the style never leaves it.

Trimmings

Trimmings are the best that money can buy; all seams and edges are bound with black upholstery leather; the arm rests are made of the same upholstery leather. The trimmings should not be confused with the cheaper enamelled goods bindings frequently used and which will peel off and crack in a short time, thus destroying the appearance of the covers.

Fastenings

Gordon Seat Covers are attached with glove fasteners—these come put in—anyone can attach

them to his car in half an hour's time—all you have to do is to screw in the studs—this is done with an ordinary screwdriver without injuring or marring the body in any way.

We use "celluloid covered" glove fasteners, made "extra strong,"—so that they will not fade, rust or wear out even when exposed to the weather as they constantly are on seat coverings.

Material

Many auto owners have purchased high-priced seat covers and had them wear full of holes in a short time.

Others had the seat cover material fade to a washed-out color.

Seat covers full of holes are useless, and faded seat covers look worse than no seat covers at all.

We determined to offer a seat cover that would wear for several seasons and would not fade,—and at a modest price.

We experimented with many fabrics,—tested them for wear,—tested them for color,—and we selected fabrics that stood the roughest wear and did not fade in the slightest degree.

We can supply these fabrics in various colors at a very modest price, for all the cars listed in this catalogue, and ship in three days' time. If your automobile is not mentioned, write for price and time of delivery.

Now that you can get a seat cover guaranteed to fit perfectly,—to give satisfactory wear and warranted fast color,—don't throw your money away on inferior coverings.

Buy Gordon No. 1074 Tan.

No. 1050 Gray.

No. 1032 Black and White.

No. 1027 Gray Diagonal.

Description of the Materials

No. 1046—Gray Mixture, will not fade or spot. Single texture, can be cleaned with gasoline, dry cleaned or laundered.

Has no arm rests or binding on seams.

No. 1000—Tan shade, waterproof material. The sun has a tendency to fade this material out in spots after a time and to any one wanting the tan colored material, we recommend the No. 1074.

No. 1027—Gray Diagonal, waterproof material, will not fade or spot; an excellent wearing fabric of splendid appearance, perfect match for linings of top on cars, such as Hudson, Cole, etc.

No. 1032—Gray Pin Check, waterproof material, neat and handsome design, met with instant favor and large sale; will not fade or spot; will give very satisfactory wear.

No. 1050—Gray Mixture, waterproof color, a very neat and serviceable pattern, a number that has a larger sale each season, will not fade or spot and wears exceptionally well.

No. 1074—Tan Mixture, waterproof material, with a rich color effect, will not fade or spot. Will give good wear and service; one of the most popular numbers.

Nos. 1000, 1027, 1032, 1050, 1074 are all double texture materials or two materials combined with rubber, making them water and dustproof and far superior to the lightweight single texture fabrics frequently offered at more money and which will not even keep out the dust let alone be waterproof. All these numbers can easily be cleaned with scrubbing brush, soap powder and water.

NOTE—Shipped Direct from Factory.

Ford Seat Covers

No. 1002. This Seat Cover is made of a tan color double texture waterproofed material. It will give good service, but the color is not guaranteed. Same material as No. 1000.

Trimnings are arm rests of English grain patent leather finish, binding to match on the door pieces only; attached with glove fasteners and cleaned with soap and water and a brush.

For Ford Touring Car.....	\$7.85
For Ford Runabout.....	4.45
Top Slip Cover.....	2.45
Piece to cover back of front seat, with pocket.....	1.15

No. 1004. This Seat Covering is made of gray single texture material, can be cleaned with gasoline, as it has no leather trimmings; attached with glove fasteners; made of same material as No. 1046.

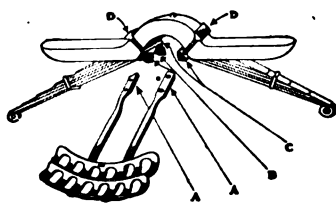

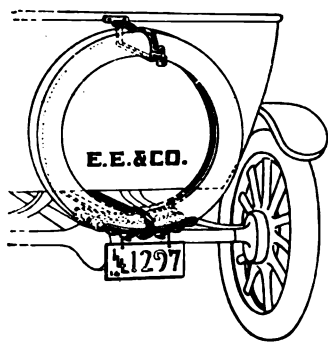

For Ford Touring Car.....	\$7.15
For Ford Runabout.....	4.25
Top Slip Cover.....	2.05
Piece to cover back of front seat, with pocket.....	1.05

Gordon Seat Covers are attached with glove fasteners,—these come put in,—any one can attach them to his car in half an hour's time. All you have to do is to screw in the studs. This is done with an ordinary screwdriver without injuring or marring the body in any way.

NOTE—Shipped Direct from Factory.

REAR TIRE HOLDERS

FOR FORD CARS

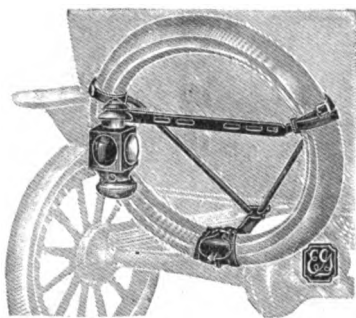

Cuts Showing Application.

No. 400—Made of Extra Heavy Malleable Iron and Steel, Finished in High Grade Black Rubber Finish, with Strap. Each \$4.00

This is the last word in Tire Holder construction. Will hold two tires or two demountable rims with tires. Guaranteed to last a lifetime. Easy to attach. Full directions for attaching with each outfit. Any padlock can be used to lock tires.

REAR TIRE HOLDER, LICENSE AND LAMP BRACKET

FOR FORD CARS

Attached by clamping it with one set of clips around the strong joint formed where the rear spring is bolted to the frame—no holes to drill. The hanger is a malleable casting, ground and well finished. The adjustable arms are made of $\frac{1}{8}$ inch steel rod, with malleable racks.

The License and Lamp Bracket are a steel stamping, bolted to the arms. Baked black enameled finish. Each set packed in a corrugated board box. Weight per set $12\frac{1}{2}$ lbs.

No. 5701—With Rear Tire Holder, License and Lamp Bracket Each \$6.48

SWITCH LOCKS

"BASCO," FOR FORD CARS

Very neat in appearance, beautifully finished in black and brass, practically indestructible.

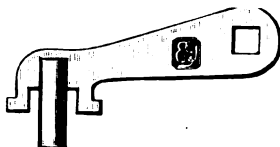

Has flat disc tumblers which cannot possibly stick or get out of order. The arrangement of these disc tumblers is such that it is impossible to pick the lock.

The installation is so simple that no mechanical skill is required.

No. SW—Basco, Ford Switch Lock Each \$4.70

SWITCH KEYS

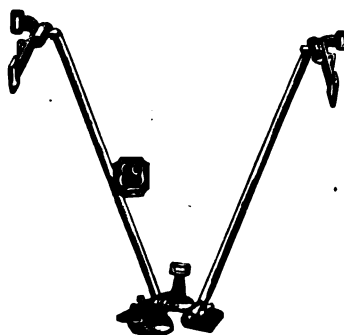

FOR FORD CARS

Steel stamping, two-piece, brassed. Switch Key of this type adopted by the Ford Motor Company, beginning with 1914 models. Can also be used as a gas tank opener.

No. 6212—Stamped Steel, Two-Piece, Brassed Per Dozen \$1.20

RUNNING BOARD TIRE HOLDERS

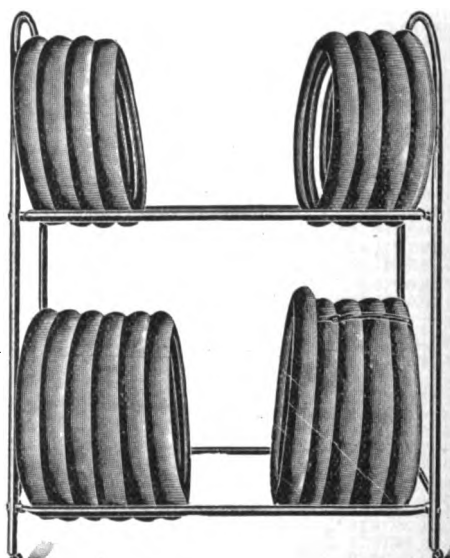

Running Board Tire Holder of refined design; built light and strong. The combination base and tire cradle is a sturdy malleable casting, ground smooth and well finished. The adjustable arms are made of steel rod, with ground malleable racks.

Base 7 inches long (open) and $3\frac{1}{4}$ inches (closed); arms $21\frac{1}{8}$ inches. Baked black enameled finish. For one or two tires up to $5\frac{1}{2}$ inch. Each set packed in a heavy corrugated board box. Weight about 10 lbs.

No. 5703—Running Board Tire Holder Per Set \$3.80

PORTABLE TIRE RACK

CYCLONE

Displays Your Automobile Tires where They Will Command Attention.

Specifications.

Made of heavy steel tubing $1\frac{1}{2}$ inches in diameter. Frame stands 76 inches high and 5 feet long. Bottom rack is 22 inches inside and 7 inches from floor. Top rack is 18 inches inside and 38 inches from bottom rack. Top and bottom racks are each made of one continuous piece with 4 bends, securely bolted to upright end pieces and fastened with

pressed steel corner fittings. Uprights are provided with four two-wheel casters, making it very easy to move load of tires from one place to another. Total capacity for mixed sizes of tires, thirty. Rack will carry tires any size from 30 to 42 inch.

No. 1—Painted with Heavy Coat of Gray Lead-and-Oil Paint Each \$10.50
Shipped Knocked Down.

SWITCH LOCKS

B. M.

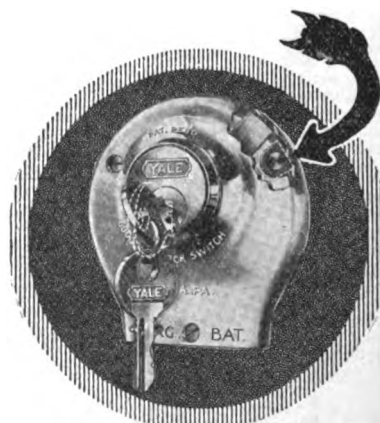

FOR FORD CARS.

For Fords with the metal coil box.

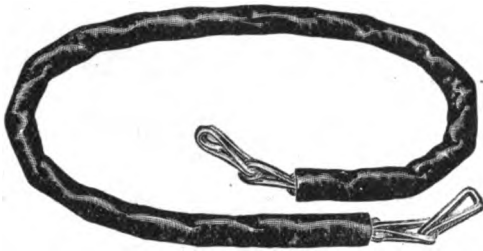

Replaces the cap on the switch, conceals its own screws and cannot be removed.

Positively cannot be bridged or picked.

A lock that is locked without effort so it will not be omitted when the car is left for only a minute.

No. BM—Ford Switch Lock Each \$4.70

"SAFETY FIRST" SPARE TIRE GUARDS

"Hodell" Link, Tensile Strength 400 Lbs., Luminized, the 'Satin Finish that Defies Corrosion, Leather Covered.

This is a patent flat link chain that combines extreme flexibility and neatness with great strength. It has an open link at each end to take the hasp of a padlock.

No. 1—36 inches Long, Leather Covered, Particularly Suitable for Securing Two Tires Carried Together. \$11.30
In use the tire guard is passed around the tire and some convenient part of the machine itself and locked on.

Per Dozen

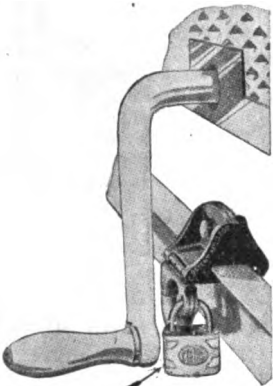

PADLOCKS FOR AUTO TIRE CHAIN

No. 3901—2 inch, Solid Brass Case, Polished, Formed Brass Key Cylinder, Steel Rod Automatic Action Shackle, Positive Stop on Case, Locks Both Sides of Shackle Nose, Key Changes All Different, 2 Heavy Rolled Steel Nickel Plated Keys. \$6.00

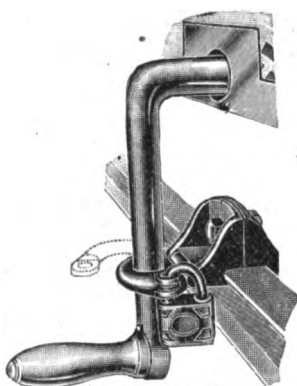

Per Dozen

AUTO CRANK LOCKS

B. & W.

Cut Showing Crank Unlocked.

Cut Showing Crank Locked.

For FORD and Other Makes of Automobiles.

B. & W.—Black Enameled, Complete with Strong Lock and 2 Keys. \$1.40

Absolutely locks the crank in engagement with crank shaft, making it an impossibility to start motor by pushing car or by jacking up the rear wheels. Can be attached by anyone in 10 minutes' time. It also protects the car against theft when left in the garage.

To attach the B. & W. Crank Lock, bolt to front axle, then draw up tight, having nut on inside, then rivet over bolt onto nut.

STARTING CRANK HANDLE HOLDER

Niagara—Made of Sole Leather, Adjustable to Any Size, Holds Handle in Any Position. \$0.70

Per Dozen

SAFE GUARD LOCK

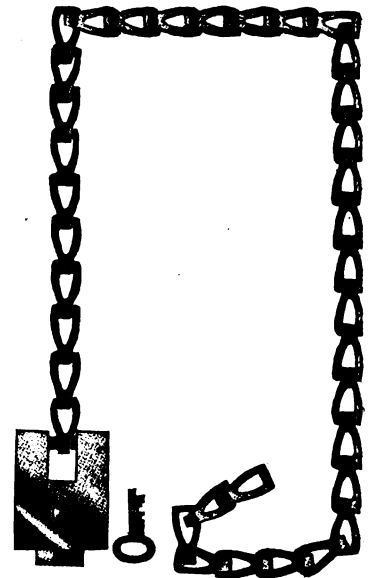

For Safeguarding Robes, Coats, Tires, Etc.

No. 25—With 25 inch Case Hardened Steel Chain \$16.00

No. 40—With 40 inch Case Hardened Steel Chain 18.00

Easy to put on, takes but a few seconds, locking at any link of the chain, won't tear or wear the articles secured. To lock push the slide. To unlock use key.

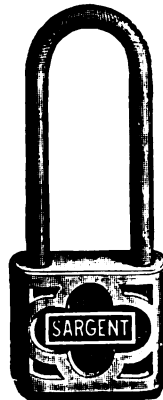

Protect your tires with the Safe Guard Lock. Fits any place, needs no extra equipment and can be used any place. Also used as a baggage guard by passing the chain through the handles of bags.

**AUTO PADLOCKS**

Extra Strong and Heavy.

Per Dozen

No. 948P.

MOTORCYCLE PADLOCKS**EAGLE PUSH-KEY AUTOMATIC**

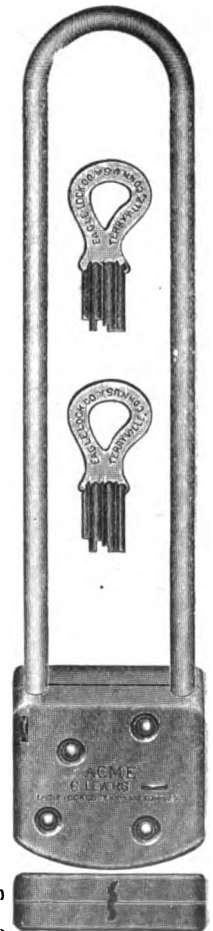

No. 4512—2 inch, Ivory Black Iron Case, 6 3/4 inch Automatic Self-Locking Spring Shackle, 6 Secure Levers, 12 Changes, 2 Nickel Plated Corrugated Steel Keys. \$10.00

Per Dozen

The shackle of the lock spans the front fork and a few spokes which positively prevents the wheel from turning.

There is no time lost in releasing the machine. The Push-Key feature insures quick action—the automatic working of the lock is instantaneous—all done in a second.

The interior of the lock is brass, there are six levers operated by corrugated keys which afford perfect security.

No. 4512.

TIRE CHAINS

WEED ANTI-SKID

Weed Tire Chain represents the highest development of an anti-skid device. They are made as carefully as the automobile on which they are used, and, as you probably have often heard said, "Every Weed is Guaranteed." The cross chains are made of special stock and the links are smoothly welded. They are hardened in furnace under pyrometer readings, and are then heavily brass plated. They are diamond-hard, yet not brittle, combining great strength and wearing quality. The Weed side chain is made of heavy wire of high tensile strength and is heavily galvanized to prevent rusting.

PRICE LIST OF WEED ANTI-SKID CHAINS

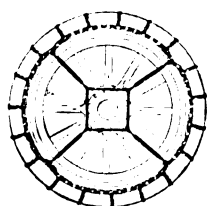

Size	Per Pair	Size	Per Pair	Size	Per Pair
28x2 1/2	\$3.50	32x4	\$6.00	40x4 1/2	\$11.00
30x2 1/2	3.75	33x4	6.50	32x5	12.50

Each	\$0.10	.12	.15	.18

WEED CHAIN ADJUSTERS

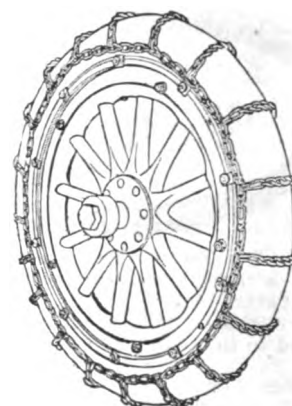

Weed Chain Adjusters are four springs, radiating from a center chain surrounding the hub, and are attached by simple hooks to the side chain. The Adjuster draws the Chains evenly to the tires—holds them right, fairly taut, but not tight. Allows the Chains to "creep," and that's the essential thing. When the Chains "creep" there isn't a ghost of a chance to cause injury to the tires.

PRICE LIST OF WEED CHAIN ADJUSTERS

	Per Pair
28, 30, 32, 34, 36	\$1.00
37, 38, 40, 42	1.50

RID-O-SKID

Rid-O-Skid is offered as an anti-skid device to meet the requirements of those to whom initial cheapness is the chief consideration. They are necessarily of inferior quality—are not made as carefully or of diamond-hard material as are Weed Tire Chains. If you ignore the maxim "Initial Cheapness is False Economy," and purchase Rid-O-Skid Chains instead of Weed Chains, you will at least be much wiser than the motorist who insists upon taking chances by "depending on rubber alone," and later experience will show you that Weed Chains give much greater mileage, and are, therefore, cheaper in the end.

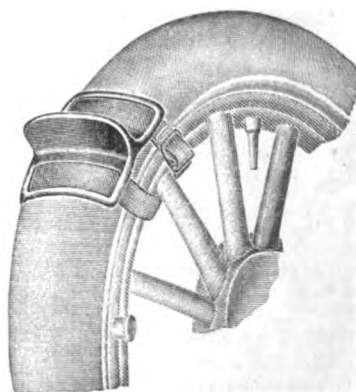

PRICE LIST OF RID-O-SKID CHAINS

Size	Per Pair	Size	Per Pair	Size	Per Pair
28x2 1/2	\$1.95	31x4	\$2.90	38x4 1/2	\$3.90

MUD HOOKS

HOOVER EMERGENCY

A Solid Casting with Heavy Web Strap and Extra Strong Buckle.

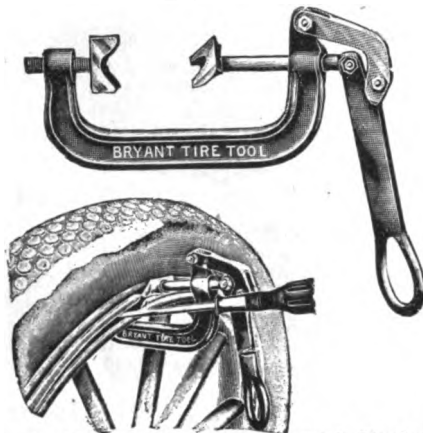

Notice how the strap runs all the way around the mud hook instead of being riveted to one side. This is important as the rivets are apt to tear out under the very severe strain when the wheel revolves.

Complete with One 1 1/4 inch Heavy Webb Strap with Heavy Tongueless Buckle.

	Per Pair
No. W1—For 3 to 4 1/2 inch Tires	\$1.80
No. W2—For 5 to 6 inch Tires	2.00

AUTO TIRE TOOLS

BRYANT

Cut shows inside ring forced back with Tool automatically locked on its full inthrow, holding inner ring for free removal of lock ring. Also used in replacing rings, forcing them over ring into position.

Bryant—Malleable Iron, Dull Nickel Finish.....**\$3.00**
Fits all styles and all sizes of rims. Used to remove and replace rings as well as for removing tires. Has enormous leverage, making easy work of the most stubborn tire—no matter how stiff or how firmly rusted. All work is done from outer side of wheel. Will loosen inner bead easily and quickly.

RIM CONTRACTORS

FRIESTEDT

No. 90—Plain Finish,
Opens, Contracts and
Relocks Straight Side
and Clincher Split De-
mountable Rims in-
stantly.

Each**\$2.50**

Extra Kelsley Dovetail
Lock Shoe Attachment.
Each**\$1.50**

Extra Baker Rim Adapter.
Each**\$1.50**

The Kelsley Dovetail
Lock Shoe not only con-
tracts and relocks, but

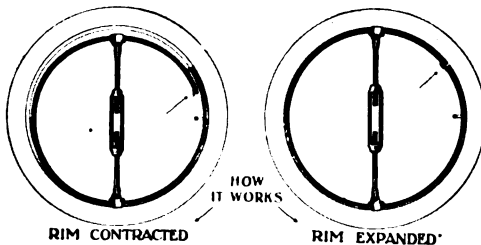

automatically opens the rim lock without having to pry it out of engagement with a screw driver. This shoe is interchangeable with the standard shoe.

The Baker Rim Adapter permits of the opening, overlapping and contracting Baker Split Rims.

RIM CONTRACTOR-EXPANDER

"BEST"

A Rim Tool that
Makes Tire
Changing Easy.

The strongest
and most practical
tool for removing
tires from clincher
and straight side
demountable rims.

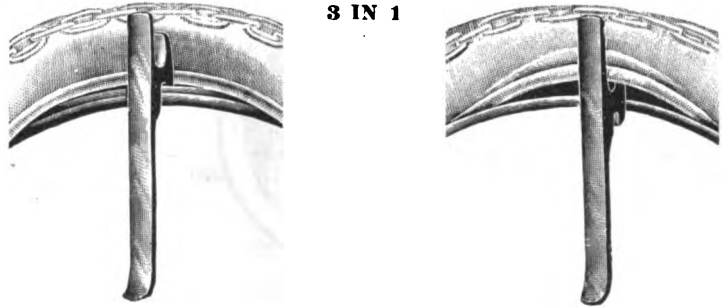

This tool both expands and contracts the rim. Eliminates all hard work in tire changing. Simple and strong.

| No. 3—For 36x4 1/2 inch and 5 inch Straight Side Clincher Rims | 2.70 |

TIRE IRONS

3 IN 1

The above cuts clearly show the 3 in 1 Tire Iron doing the work of one hand or one man in putting a tire on or taking one off of a clincher demountable rim, thus leaving both hands free to continue.

Malleable Iron, Aluminum Finish. Each
No. 12—12 inches Long.....**\$0.40**
No. 18—18 inches Long.....**.50**

HANDY

No. 5—8 1/4 inches Long, Solid Steel, Flat, for Applying and Removing Automobile Tires.....**\$0.40**

No. 6—16 inches Long, Solid Steel, with Bent Point and Prying Block.....**\$0.40**

For quick work, push under the bead and slide around the wheel.

AUTOMOBILE CLOCKS

KEYLESS EIGHT DAY

Rim Wind, Rim Set.

This is an offset model and does not set into the cowl board but rests on the outside of it. Once attached to the dash, it cannot be removed without the key and the key hole is concealed, thus making it theft-proof.

Black and Nickel Finish. Each
Model "M" Jr.—2 1/4 inch Dial, 3 1/2 inch Base, 2 3/4 inches Long**\$14.00**

To wind clock simply turn bezel once a week to the right. To set the hand, remove the bezel by turning to the left.

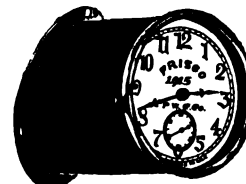

FRISCO COWL DASH

REAR WIND, THIRTY HOUR

A reliable clock at a price so low that none need ever be without a clock. A new type of 30 hour movement is used in its construction. The bezel is heavily plated and is fitted with a beveled crystal. The winding stem is concealed.

Black and Nickel Finish. Each
No. 2C—2 1/2 inch Dial, 2 5/8 inch Base, 3 5/8 inch Cowl Ring, Length of Clock Behind Cowl Ring 3 5/8 inches**\$5.00**

ONE DAY KEY WIND

Black and Nickel Finish.

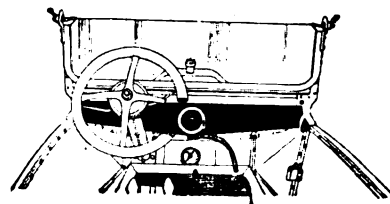

No. 1C—Special, 2 1/4 inches High, 2 1/4 inch Face, 3 1/4 inch Base**\$3.80**

STEWART SPEEDOMETERS AND COWL BOARDS

FOR FORD CARS

Cut Showing Stewart Model 100 Magnetic Type Speedometer for Ford Cars.

Cut Showing Stewart Cowl Board and Speedometer Attached to a Ford Car.

The **Stewart Magnetic Speedometer**, built on the proven Magnetic Principle, is permanently accurate under all conditions of temperature or climate, because it is compensated just like fine watches. The magnetic principle calls for only one moving part, which moves at a very much lower speed than any other principle used in speedometer manufacture. Low speed means little or no wear, insuring permanent accuracy.

The **Stewart Cowl Board** is made of metal and finished in bright black enamel. This new Cowl Board greatly enhances the appearance of the car. Besides it makes it possible to install the speedometer in a much more convenient position from where the figures can be easily read. Anyone can quickly install it. It is only necessary to remove the nuts from 4 screws which are already in the dash of the car, fit the board in place, replace the 4 nuts, and the job is complete.

Model 100—Stewart Speedometer for Ford Cars, 3 inch Etched Dial Face, Jeweled Bearings, Polished Steel Magnet, has Rotating Speed Dial with 60 Mile Capacity, and Stewart Odometer Consisting of 10,000 Mile Season Register and 100 Mile Trip Register, the Trip Register Can be Rapidly Reset to any Tenth of a Mile, Finished in Jet Lacquer with Brass Trimmings, Complete with Full Equipment Including Regular Flexible Shaft and Swivel Joint. **\$12.00**

Model 100U—Ford Flush-Type Model, Complete with Cowl Board Described Above and Driving Equipment. **14.00**

EXTRA PARTS FOR STEWART SPEEDOMETERS

GREASE CUP CAPS

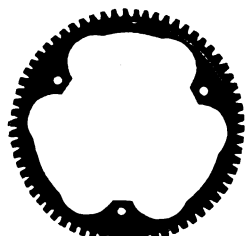

A Grease Cup is an integral part of all swivel joints made since 1911. Three types of grease cups have been used, so that in ordering caps it is necessary to note carefully the inside diameter of the cap. Determine which of these sizes you have and order by number.

1832— $\frac{5}{8}$ inch inside diameter. 1858— $\frac{3}{4}$ inch inside diameter. 1826— $\frac{7}{8}$ inch inside diameter.

AUTOMOBILE HORNS

MINERVA

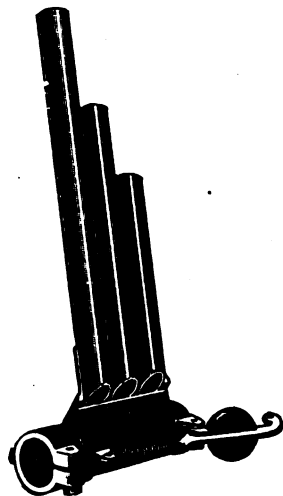

Made of Heavy Gauge Brass.

Complete with Cable, Pedal, Liner and Screws.

The clear, penetrating, yet musical tone of the Minerva Auto Horn gives a pleasant but emphatic warning of your approach.

Each

- No. 2—For Autos from 20 to 40 Horse Power, Fits Over Exhausts from 1 1/2 to 2 inch Diameter, Musical Chord: B Flat, E Flat, G 5.00

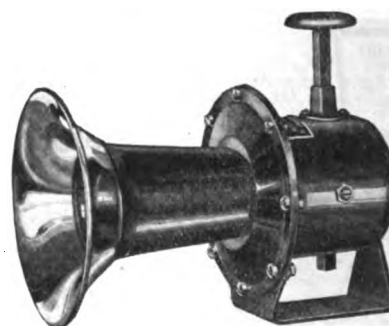

- No. 3—For Autos from 30 Horse Power Up, Fits Over Exhausts from 1 3/4 to 2 1/4 inch Outside Diameter, Musical Chord: B Flat, E Flat, G, B Flat..... 7.00

The Minerva Horn, which will blow with lung pressure, is attached to and forms a continuation of the exhaust of the muffler. It is easily installed—drive it on the exhaust, tighten the set screw, attach the pedal to the footboard, connect the cable and the horn is ready for action.

There are no batteries to run down, no valves to clog, no reeds to break. Only the waste exhaust is used to operate the Minerva Horn.

A-Y ORN

HAND OPERATED

The simplest, most durable and most practical mechanical hand operated auto horn on the market.

It produces a loud, clear, distinctive warning which carries far in advance.

It has a pleasing tone which does not frighten pedestrians, but warns them "effectively."

It is easily operated—a slight pressure of the hand or arm on the knob of the plunger is all that is required.

To fasten same to the car, all that is necessary is to remove the four small screws holding the bracket, and secure the bracket to the car with the two wood screws provided, then put the horn back on the bracket.

Each

- No. 3500—3 inch Diameter Cup, 5 inch Diameter Diaphragm, Bell is 5 inches Long and Flares from 2 inches in Diameter to 5 inches at the Extreme End.....\$3.40

SPARTON MOTOR HORNS

SPARTON HAND-OPERATED

Adjustment Made from Rear of Signal.

The Sparton Hand-Operated Signal has been brought out for those who do not wish to bother with wires or batteries. It gives a warning blast that is almost a duplicate in sound to the motor driven Sparton. The construction of this signal is simplicity itself. There is nothing to get out of order. All wearing parts are hardened and a rock-ribbed guarantee goes with each instrument.

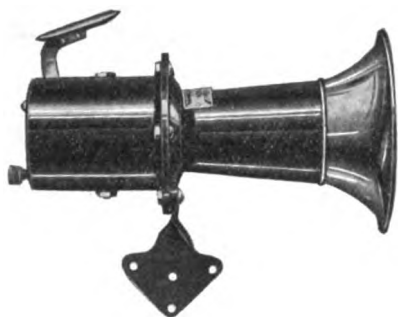

Sparton hand operated Safety Signals are constructed of the highest quality material. Time and skilled labor are devoted to the production of just the proper tone. Every tooth on the actuator is ground to a clean edge, every diaphragm is hand hammered.

Each Sparton is furnished with a rigid supporting arm ready to be attached to any handy place on the car and when properly installed can be operated with the hand, elbow, knee or foot. The Sparton can be installed with an ordinary screw driver in ten minutes.

Internal View.

Internal View—We show herewith a phantom cut which illustrates the internal construction of the "Sparton" Hand-Operated instrument. It is simplicity itself, nothing to get out of order, all wearing parts glass hard and each instrument positively guaranteed.

Model "PF"—Hand Operated, Length Over All 10 $\frac{1}{4}$ inches, Oval Bell 4 $\frac{1}{4}$ inches, Height 6 inches, Furnished in All Black, Packed One in a Box, Shipping Weight 4 Lbs.\$6.00

Sparton Model "M"—Hand Operated, Length Over All 6 $\frac{3}{4}$ inches, Round Bell 4 $\frac{3}{8}$ inches Diameter, Furnished in All Black, Particularly Suitable for Motor-cycles, Packed One in a Box, Shipping Weight 4 Lbs.\$3.00

SPARTON MOTOR DRIVEN

Adjustment Made from Rear of Signal.

The Sparton rips out a warning that is unmistakable a mile away or musically bugles a message near at hand that people of all lands know means, "Clear the Road."

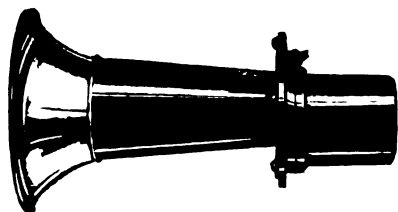

All models are much improved this year, as all now adjust by means of a knurled screw in the rear. Adjustment is made without taking Signal apart in any way. No special wrenches are needed. It is also more handy to get at the commutator. These are big points of convenience for the user.

Don't confuse the Sparton with a cheap buzzer horn. The Sparton has a small electric motor to operate it and consumes no more current than a buzzer horn, but gives five times the amount of warning sound. Six dry cells or a storage battery is all that is necessary to run it.

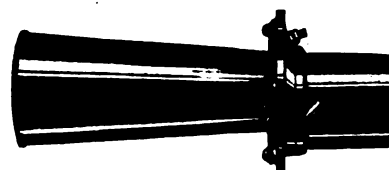

Internal View.

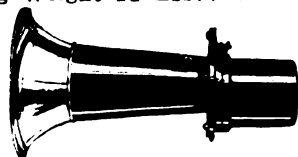

Internal View—Shows motor construction. Every part of the "Sparton" is made at the Sparks-Withington Co.'s factory from the very best of raw materials. The expert assembly assures the motorist of a perfect performance of duty under any conditions.

Model "PD"—Electric, Motor Driven, Length Over All 14 $\frac{3}{8}$ inches, Oval Bell 6 $\frac{1}{4}$ inches, Height 7 $\frac{1}{2}$ inches, Furnished in All Black, Packed One in a Box, Shipping Weight 11 Lbs.\$15.00

Model "PU"—Electric, Motor Driven, Length Over All 13 $\frac{1}{4}$ inches, Straight Projector 4 inch Diameter, Furnished in All Black, Packed One in a Box, Shipping Weight 10 Lbs.\$14.00

No. "PB"—Is the Same as "PD" Except as to Size and Price, Electric, Motor Driven, Length Over All 11 inches, Oval Bell 4 $\frac{1}{4}$ inches, Height 6 inches, Furnished in All Black, Packed One in a Box, Shipping Weight 5 Lbs.\$7.50

Note—Every motor driven Sparton is properly packed one in a box, complete with necessary cable, push button, supporting arm, screws for mounting and instruction book.

There is no mistaking the Sparton alarm cry. Its far-reaching imperative voice jolts the air with a threat of danger sharp and insistent. The winged call of the Sparton rises above all earth noises—a strong, penetrating call that sweeps the air.

Model "PJ"—Is the Same as "PU" Except as to Size and Price, Electric, Motor Driven, Length Over All 10 $\frac{1}{4}$ inches, Straight Beaded Projector 3 inch Diameter, Furnished in All Black, Packed One in a Box, Shipping Weight 5 Lbs.\$6.00

TIRE PRESSURE GAUGES

TWITCHELL

**The Twitchell Gauge Locks, Showing True Pressure or None.**

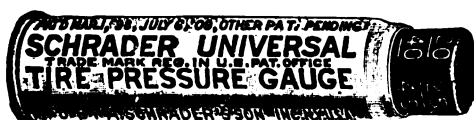

The New Twitchell may be operated with equal accuracy at any angle. This is important for two reasons, first for convenience, eliminating stooping entirely, second one can use this gauge in the smallest diameter of wheel because it may be applied at such an angle that the outcoming indicator will avoid striking the hub.

The base of this gauge is constructed so that it will open even those tire valves where the inside was screwed in too deep.

Each

No. 25—New Twitchell, Nickel Plated, Positive Lock Stop\$1.45

SCHRADER'S UNIVERSAL

This is an ingenious device for instantly determining the pressure in motor tires. Most of the tire troubles may be attributed to a wrong idea of what the actual pressure is. This gauge fits on valve after unscrewing the cap and gives the accurate pressure instantly. The record stays out as the gauge is removed from tire.

Each

No. 50—Schrader Universal, Nickel Plated.....\$1.46

AUTOMOBILE PUMPS

ROSE FRICTIONLESS

Best on Earth.

Frictionless, made of heavy 18 gauge seamless steel tubing.

Has a valve which permits a full supply of air below the plunger. Has no Vacuum in the cylinder, therefore has compression at every point. Continues to work at high pressure and is not a "Quitter." Its simplicity, durability and effectiveness commends it to the use of all.

Each

Rose\$3.00

BRISK BLAST STEEL

Built for Service, Works Easiest and Lasts Longest.

Very rigidly constructed. Has 17 inch 20 gauge seamless steel cylinders, 1½ and ¾ inch diameter, which screw into a heavy cast iron base.

Thoroughly japanned and baked, making it rust-proof and air-tight.

Has cold rolled steel plunger rods, hardwood handle and best grade of flexible hose with brass connection to fit any standard automobile or bicycle tire valve.

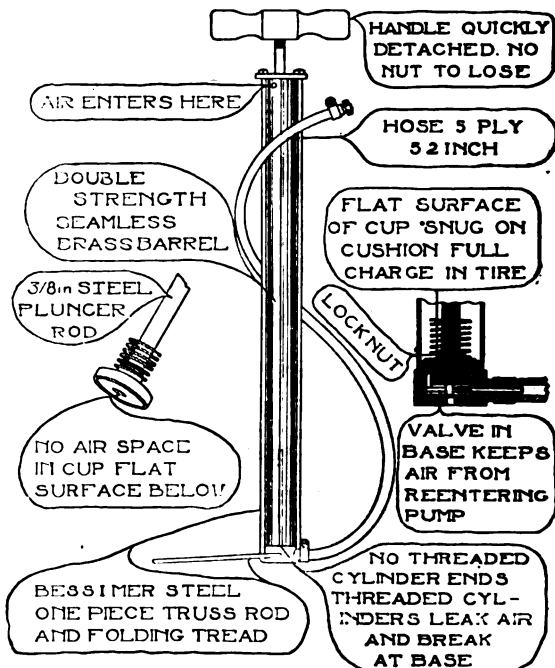

It is equipped with a special piston arrangement which utilizes every ounce of air.

Each

No. 100—Height Over All 20 inches.....\$2.40

AUTOMOBILE PUMPS

GOLDEN ROD

Each

Golden Rod—Seamless Brass Barrel, Bessemer Steel Truss Rods, ¾ inch Steel Plunger Rod, Machined Blued Steel Base, Detachable Handle, Folding Foot Rest, 32 inch 5-Ply High Pressure Hose.....\$4.00

TWO-CYLINDER COMPOUND

Seamless brass cylinders, malleable iron top, without gauge.

This pump is unlike any other Automobile Tire Pump on the market.

It is a very powerful, yet easy working pump.

The cylinders are made of seamless brass tubes and are fastened into the foot base in such a manner as to be absolutely air tight. There are no adjustment nuts or screw threads to cause a leak.

To take the pump apart there is only one nut to unscrew.

Each

No. 5—Without Gauge. Seamless Brass Cylinders, Iron Base, Brass Cylinders, Iron Base.....\$3.00

Extra Small Plunger Leathers.....\$0.50
Extra Large Plunger Leathers......60

YANKEE FOLDING

Makes hand inflation of auto tires a simple and easy matter.

Built to clamp quickly to the running board of any auto. Worked easily with one hand from a natural upright position.

Complete with Pressure Gauge and 8 feet of Hose.

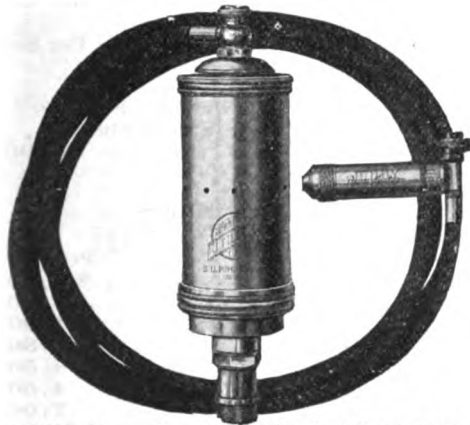

Yankee Folding Pump.....Each, \$6.00
AUTO PUMP HOSE—Extra Grade.....Per Foot, .12

AUTOMOBILE PUMPS

UTILITY SPARK PLUG "PNEU-METER"

FOR TIRE INFLATION CONTROL

Hand Finished and Lacquered Brass Parts, Heavily Nickered and Polished Steel Parts.

Utility Junior—Length Over All Including Adapter 7 ¼ inches, Outside Diameter 2 ½ inches, Pressed Steel Pump Barrel, Complete with Pressed Steel Spark Plug Hole Adapter with ⅞-18, ½ inch Standard or Metric Threads, 10 feet of Braid Covered Rubber Air Hose and Bar Brass "Pneu-Meter" with Engraved Pressure Scale 40 to 75 Lbs. in 5 Lb. Units, for Light Cars and Tires up to 3 ½ inch Diameter, Weight Each Boxed 3 Lbs. **\$13.00**

Utility—Length Over All Including Adapter 9 inches, Outside Diameter 2 ¾ inches, Heavy Brass Barrel and Piston, Complete with Two Pressed Steel Spark Plug Hole Adapters with ⅞-18 and ½ inch Standard Threads, 12 feet of Braid Covered Rubber Air Hose, Bar Brass "Pneu-Meter" with Engraved Pressure Scale 50 to 120 Lbs. in 5 Lb. Units, and Extra Tire Valve Core, for All Weights of Cars and Sizes of Tires, Weight Each Boxed 4 ½ Lbs. **16.00**

Utility does the rest. Works like a little engine. Pumps right up to the mark you set then—Presto! the air is automatically deflected to the outside with a perky little whistle that tells you your tire is ready. Three minutes does the trick if you are in a hurry.

The little "Pneu-Meter" does the watching for you and is always on the job.

MAYO SPARK PLUG

Pumps Only Clean Air—No Gas Enters the Tires.

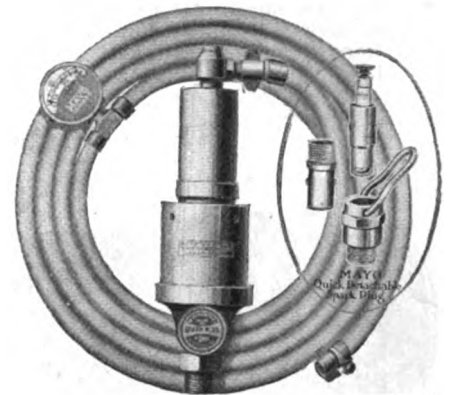

This is the original and the only satisfactory pump of this kind—the others are only imitations and look right only on the outside. The Skinner has ground piston rings, is compound action (giving 100 lbs. pressure) and will not break if the motor races. The imitations have leather pistons, are single action (giving only about 65 lbs. pressure) and will get out of order if the engine runs too fast.

Will work on any 2, 3 or 6 cylinder auto, except the Elmore. Pumps tire in 2 to 4 minutes to any pressure. Never gets out of order, needs no attention except oiling, and is as easy to carry as a hand pump. Works as well on a small car as on a large one and it always works.

Directions—Remove any spark plug, screw the pump in its place and run the engine slowly—that's all. (If there are two spark plugs in each cylinder, then remove the cable from the second plug.)

Size—10 inches long, 2 ½ inch diameter, shipping weight 5 ½ lbs. Fitted with 12 feet of hose and nipple. Fittings with each for ½ inch and A. L. A. M. size plug openings (metric fitting free when asked for).

No. 4—Mayo Spark Plug Pump, with Gauge. **\$12.80**

"MAYO" FORD SPARK PLUG.

A diminutive Mayo Spark Plug Pump built especially for the Ford car. A real, power tire pump which will inflate a 32x3 tire to 65 lb. pressure in two minutes and a 32x3 ½ tire to 70 lb. pressure in three minutes.

To attach, remove any convenient spark plug and turn the pump (with your hands only) into the spark plug opening. Attach hose between pump and tire, making sure the connections are perfectly air tight. Run the motor slowly until the gauge shows the amount of pressure desired.

The Mayo Ford Pump is for the Ford car only, but is as strongly constructed and as carefully made as our other pumps, so that we can guarantee the outfit to give permanent satisfaction.

Pure, Fresh Air, guaranteed to be the only source of inflation, is liberally supplied by the lower metal valve, compounded in the pump from the lower cylinder to the upper one and thence to the tire.

The construction is simple but strong and mechanically perfect—metal piston ring and valve—no wearing parts to get out of order. This pump is absolutely non-adjustable, requiring no attention other than occasionally a few drops of oil.

Each pump, before it is packed for shipment, is carefully tested on a Ford motor.

Size 9 inches long, 1 ¾ inches in diameter. Weight 1 ½ lbs. Black enamel finish with polished brass parts. Fitted with ½ inch connection and furnished complete with 10 feet superior hose with accurate gauge and connections. Packed one in a box.

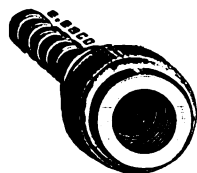

No. 40—"Mayo" Ford Pump. **\$8.00**

RADIOMETERS

Radiometer—With Red Liquid Column which Can be Seen from the Drivers' Seat and Large Bold-Face Figures which Enables One to Read the Temperature at a Glance, Protected by Outer Glass Casing which is Protected by Heavy Brass Shell, Will Fit Any Make of Car, Simply Drill a Hole in the Radiator Cap to Accommodate the Shank. **\$2.20**

No. 2718—Spindle Connecting Rod Bolt, $2\frac{1}{4} \times \frac{7}{8}$ inch. .28

VALVE ADJUSTER AND SILENCER FOR FORD CARS

A clever device for taking up the space between the push rod and valve stem, thereby eliminating the rattle and silencing the valve.

Place a cap over each push rod, having previously inserted a sufficient number of discs to take up the clearance between push rod and valve stem.

Per Set

- No. 67 Set—Consists of 8 Caps and 50 Discs..... \$0.30

AMPCO VALVES FOR FORD CARS

Each

- Ampco—Non-Carbonizing Valve for Ford Cars, Consists of a Head of an Exceptionally Hard Tough Bronze, Die-Cast Upon a Hardened Steel Stem, Ground and Finished..... \$0.50
- Eliminates constant regrinding because it positively will not carbonize, pit or corrode. Will outwear any nickel steel or cast iron valve.

It will pay many times to discard the troublesome cast iron and steel valves and replace them with "Ampco" Valves.

VALVES FOR FORD CARS

Each

- No. 87—A Good, Heavy Valve Made of High Quality Cold Rolled Steel with Welded Head, Stem is Drilled for Spring Ready for Use..... \$0.28

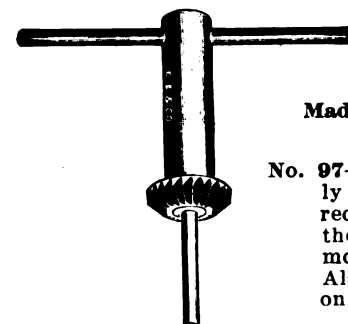

VALVE GRINDERS FOR FORD CARS

- No. 90—Steel, Nickel Plated, Mahogany Stained Wood Handle... \$0.44

The simplest device on the market for grinding Ford valves.

VALVE RESEATERS FOR FORD CARS

Made of Highest Quality Steel.

Each

- No. 97—Reseats the Valve Quickly and Accurately at a Correct Angle to Correspond with the Angle of the Valve, Removes All Carbon Deposits, Also Ridges, Grooves, Etc., on the Valve Seat..... \$0.72

VALVE SPRING LIFTERS

- No. 201—Pressed Steel, Black Enameled, with Spring Ratchet Device Each \$0.70

The Spring Ratchet Device holds the valve spring firmly in place after being compressed by the fulcrum action of the valve tool, enabling the pin to be easily extracted from the stem. It can be used on practically any type of motor.

FLEXIBLE CHAIN

The most practical tool ever made to remove valve.

Fits any motor. The lever has a narrow fork at one end and a wide one at the other to accommodate valves having split washers or pins to hold the spring on the stem.

- No. 200—12 inches Long, White Nickel Finish Each \$0.70

GAS AND SPARK CONTROL

PREMO

For Ford Cars.

The teeth on the quadrant of the Ford Spark and Throttle Control soon wear off. This allows the lever to slip down and open the throttle as the car takes the bumps of the road.

The device in the accompanying cut can be attached in less than ten minutes, simply by slipping the polished brass quadrant over the worn teeth of the old one and fastening the friction device to the levers.

The advantages of this new control are many. It will last indefinitely.

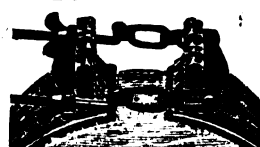

- No. 25—Premo Gas and Spark Control for Ford Cars... Each \$1.35

Note—When Ordering, Always State if Wanted for Cars Previous to 1915 or for Cars 1915 and Later.

TRANSMISSION BAND CLAMP

PREMO

For Ford Cars.

With this device the bands in the Ford Transmission can be replaced in one-quarter the time usually necessary to do this troublesome job. The bands are held firmly around the drums with the ears in perfect position to permit of slipping the three shafts in place as the cover goes down and the clamp is then removed through the small door in transmission case cover. This eliminates the danger of injuring the felt gaskets in attempting to fit the shafts in place one at a time while pushing down the cover and insures against oil leaks caused by torn or turned-over gaskets.

- No. 50—Premo Transmission Band Clamp for Ford Cars Each \$0.70

DOOR AND HOOD ANTI-RATTLE

C. B.

Flat Design.

Absolutely eliminates the rattle and noise of loose doors on your car.

Attached in a minute to the door-stop with two small screws.

Allows easy closing of doors without noise.

Throws open door when unlatched.

Nothing can catch to it.

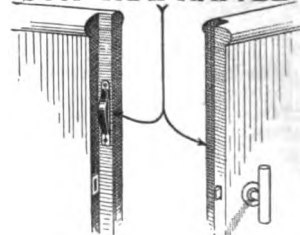

The very best for house doors and windows.

Cut Showing Anti-Rattle.

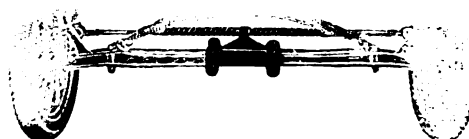

- No. C. B.—2 1/2 inches Long, Made of High Grade Clock Spring Steel, Complete with Screws..... Per Dozen \$3.50

STOP THAT RATTLE

Cut Showing Anti-Rattle Attached to Auto Door.

WALKER STEER-EZER FOR FORD CARS

Makes any Ford car steer as easily as the most expensive car equipped with an irreversible steering gear. Makes driving a real pleasure instead of a test of nerve strength.

The Steer-ezer keeps the car running straight, no matter how rough the roads. Strong reciprocating coiled springs take up the side play and practically last forever. Does not replace or interfere with any part of the regular Ford steering equipment. It simply increases its strength, efficiency and convenience.

- No. 17—Walker Steer-ezer for Ford Cars..... Each \$3.50

SHOCK ABSORBERS

STONE

Guaranteed to Make a Marked Improvement in the Riding Quality of Any Car.

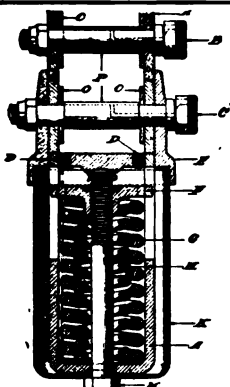

Two pair of busy, sturdy steel-coiled springs are always on the alert to catch the jars of the road on their way to the rider. Blows too big for the tires they smother and kill. Blows too quick for the springs cannot escape them.

Stone—Double Cushion Spring Construction, Adjustment for Road and Load Conditions with Range of 1500 Lbs., Double Bearing for Moving Parts, Coil Springs Have 2 in. of Action which Gives 25 Per Cent Greater Cushion Effect than Other Makes, Absorbs Jolts and Jars of Rough Roads, Absolutely Prevent Snappy Rebounds.....\$13.50

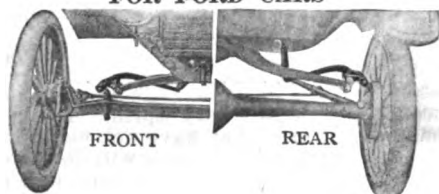

NOTE—When Ordering, Always Give Make, Model and Year of Car, Also State if Wanted for Roadster or Touring Car.

Applied to Three-Quarter Elliptic Spring.

Cut Showing Construction Details.

SINGLE CANTILEVER SPRINGS
FOR FORD CARS

Per Set of 4

No. 10—Single Arms, 4 Coil Springs to a Set, Bearings Bushed with Bronze, Spring Bolts Have Grease Cups, the Front Set Fits on the Regular Suspension Perch and a Special Perch for the Rear Set is Furnished..\$7.30

Built strongly and substantially and give real service. They absorb the short vibration when riding over the pavement and smooth out the big bump in the country road. The coil spring attached to the long lever arm compensates each jolt instead of transmitting it to the body of the car.

DOUBLE CANTILEVER SPRINGS
FOR FORD CARS

Front.

Rear.

Per Set of 4

No. 15—Double Arms, 8 Coil Springs to a Set, Bearings Bushed with Bronze, Spring Bolts Have Grease Cups, the Front Set Fits on the Regular Suspension Perch and a Special Perch for the Rear Set is Furnished.....\$10.70

These Double Cantilever Springs improve the riding qualities of a Ford car beyond belief. The thrust of the wheels against the body of the car is so softened that while the wheels and axle are in continuous vibration, still the car body floats along like a boat—free from jolt or jar.

"BEST" AUTOMATIC, FOR FORD CARS

Cushions of Comfort.

Two dependable compression springs form a perfect pneumatic cushion for each of four corners of the car.

Positively rigid as to end, fore and aft movement, thus adding to and not subtracting from regular spring equipment value.

So constructed that if any spring develops a break in service the running gear is still hooked up, thus guaranteeing absolute safety.

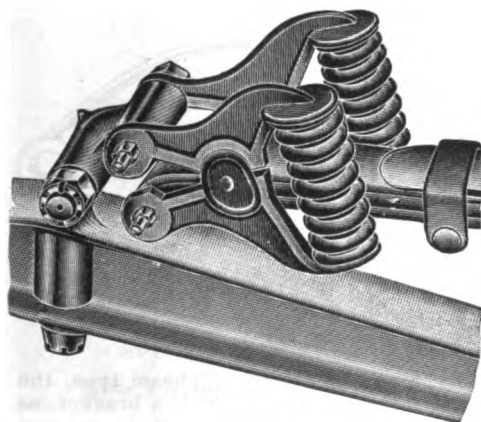

First cost is only cost. No installation charges, changing of parts, removing wheels, etc. Come ready set to slip in place, remove spring shackles, insert hollow bolts furnished, the absorbers are installed.

Made mechanically correct from finest malleable castings, equipped with hollow bolts and oil cups, guaranteed against breakage. One set complete in box.

Per Set of Four

No. 18—"Best" Automatic, for Ford Cars.....\$7.50

NOTE—When Ordering, Always Specify Whether for Touring, Runabout or Delivery Cars.

No. 18.

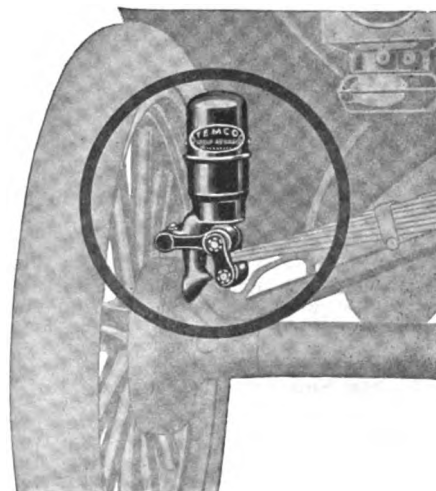

TEMCO, FOR FORD CARS ONLY

Temco Shock Absorbers represent the scientific application of a system of double spiral auxiliary springs—between the car and its body—to take and absorb the shock or jerk or jolt before it can reach the body and its occupants.

The old pitching, jerking and jolting over the rough places is a thing of the past. The irritating vibration ceases. Temco Shock Absorbers give a gentle up and down buoyant swing on the roughest going. They take up all the sharp jars of paved streets. Stiffness vanishes. They give the car great flexibility—making steering easy as on the smooth street—reduce friction between motor and running gear—preserve the alignment—save repair and upkeep expense—save tires—keep the car in better condition, thus adding to its sales value.

Per Set of Four

No. 20—Temco, for Ford Cars Only.....\$15.00

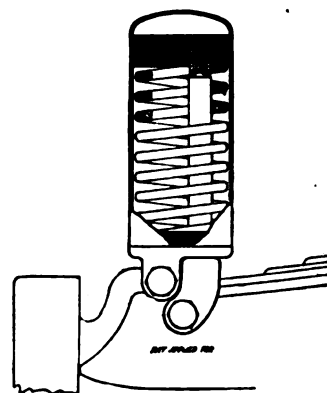

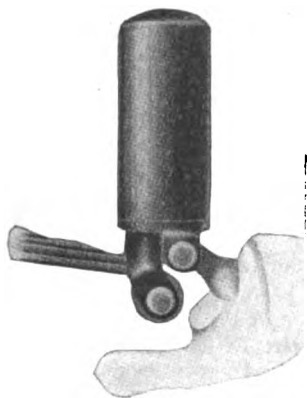

No. 20.

SHOCK ABSORBERS

NOXALL, FOR FORD CARS

No More Fictitious Values.

Noxall Shock Absorber—1915 Ford Special.....

Per Set of Four
\$5.00

The first high grade Shock Absorber for Ford cars at a medium price. Not an auxiliary spring, but a real Shock Absorber that actually absorbs shocks. It incorporates no materials or mechanical features that have not been tried.

Your car actually rides on air when you equip with Noxall. Note specifications carefully and you will decide on its merits.

Springs—Vanadium alloy, crucible steel; carefully tempered and tested. Are of flat coil spring type and the only flat coil springs used in Shock Absorbers of this type.

Finish—Smooth two coats hard black enamel, baked, making the most handsomely finished Shock Absorber that has ever been offered. The Noxall can be applied to any Ford car in twenty to thirty minutes, without the use of any tools but a wrench. It is not necessary to use a jack and does not require the removal of wheels or the changing of spring hangers.

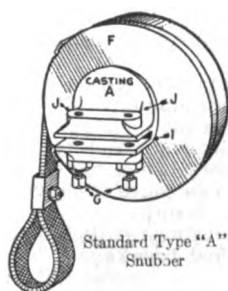

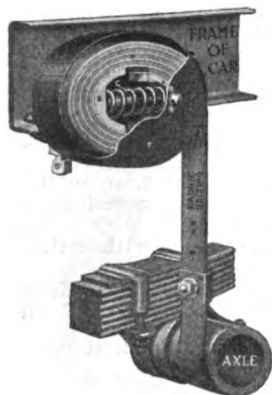

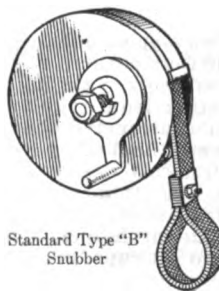

The Noxall is the easiest riding Shock Absorber that has ever been offered for use on Ford cars on account of its scientific patented construction, permitting the springs to vibrate without any strain other than that imposed by the load of the car. There is no side sway, strain or friction to reduce the vibration to secure perfect riding qualities.

Noxall Absorbers do not interfere with steering knuckles.

GUARANTEE—Guaranteed for life if properly lubricated. If we ever have to replace parts, we do so cheerfully and without cost. There is no time limit on our guarantee.

GABRIEL REBOUND SNUBBERS

A Device that Keeps You on the Seat When the Roads are Rough.

Standard Type "A"
SnubberStandard Type "B"
Snubber

Can furnish special type Snubbers for wood frames or steel frames with filler.

No Noise, Rattle or Adjustment.

Snubbers are a necessity on every type of car regardless of its size or style of spring suspension.

The Type "A" Snubber is easily attached by clamping on the flange of the channel frame without drilling or disfiguring it.

The Type "B" Snubber is for use on the front of the car where special parts prevent the mounting of the Type "A" Snubber on the inside of the flange. The Type "B" Snubber is also used in extremely rare cases on the rear end of the car, where there may be obstructions preventing the mounting of Type "A" Snubber on the inside of the frame.

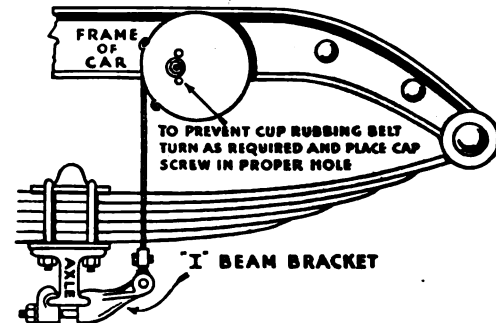

A Set of Gabriel Snubbers Consists of Two for the Front Springs and Two for the Rear Springs.
Black Enameled.

	Per Set	Per Pair
No. 1—1½ x 4 7/8 inch Cup, for Cars Weighing Less than 2000 Lbs.	\$36.00	\$18.00
No. 2—1½ x 5 7/8 inch Cup, for Cars Weighing 2000 to 3200 Lbs.	48.00	24.00
No. 3—1½ x 5 7/8 inch Cup, for Cars Weighing More than 3200 Lbs., Also for Light Delivery Trucks	60.00	30.00

NOTE—Above Prices are for Standard Type "A" and Type "B" Snubbers. There is an Extra Charge of \$1.00 to \$2.50 for Special Snubbers or Fittings.

NOTE—When Ordering Mention Name, Model and Year of Car; if Pairs Only are Wanted State Whether for Front or Rear of Car.

No matter how easy a car may ride, snubbers will make it ride better because they do not spoil any of the good qualities of the springs, but assist them in doing their work by keeping them under perfect control at all times, regardless of road conditions or weight of load.

If the axle is of the "I" beam type, the belt is fastened to same with a bracket, as above illustrated, otherwise it is secured snugly around the axle. Only a few minutes are required for fitting.

AUTOMOBILE BUMPERS

GEMCO

This page describes several models of the Gemco Bumpers. If you wish to order any that are not listed, including Bumpers for 1917 cars, merely specify on your order blank the particular car and the year that it was made, and we will then be able to give you exactly what is wanted. Of course, it is necessary to always state which kind of a Bar is desired, whether Diamond or Channel style.

All of the different types of Gemco Bumpers have been designed so that they can be fitted to the many different cars without requiring alterations or changes on the frame or the mud pans. Not even do holes have to be drilled into the frames. Neither will bolts have to be removed.

NOTE—Always order by Stock Number if the particular Bumper as mentioned on this page is suited for the particular Car, and always specify whether Channel or Diamond Bar is wanted.

GEMCO SPECIAL

Gemco Special Bumpers are positively universal in their adaptation to practically every car that has a projecting frame, also those that have mud pans.

Cut Shows Diamond Bar.

Its adjustable clutch, with which the Bar may be raised or lowered to arrange for the desired angle of the frame, makes this Bumper so generally suitable.

Folded.

Pickup Pliers—21 inches Long when Extended, 7 inches Long when Folded, Nickel Plated.....\$8.00

A handy device for automobile use, such as picking out wrenches, spark plugs, screw drivers, bolts, nuts or anything that might drop in the pan, transmission case, gas tank, etc.

Can also be used for cleaning the motor by placing a piece of waste in the end and dipping in gasoline, thereby reaching any part of the motor.

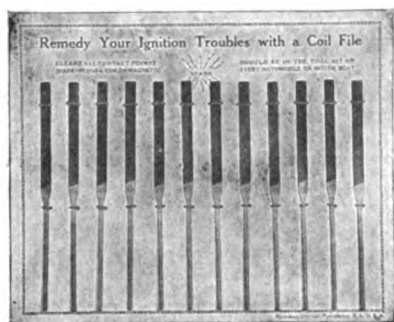

AUTO SCREW DRIVERS

A screw driver for the heavy work. One you can't break. Made for the hardest abuse and will stand any amount of it. Handle is fluted and natural finish. Square steel blade—that you can't hurt with a wrench.

No. 112—2 1/2 inch Blade, Fluted Hardwood Handle...\$8.85
No. 112—3 inch Blade, Fluted Hardwood Handle... 4.35

PLATINUM AND COIL FILES

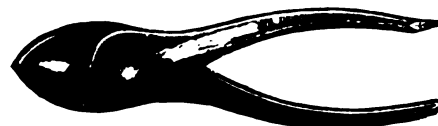

Keep Clean All Spark Gaps, Spark Plugs, Magnetos, Ignition Coils and Contact Points, Make Motors Run Smoothly.

No. 12—Highest Grade File Steel, Uniform Thickness, Bevel Pointed, with Handle in One Piece.....\$2.70

One Dozen on a Card to Stand on Counter.

COMBINATION PLIERS

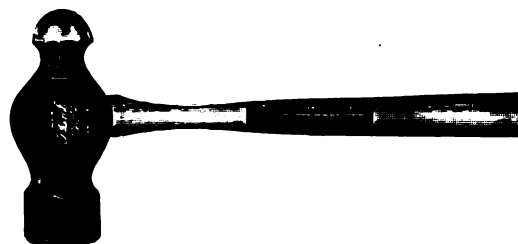

BADGER

Badger—5 inches Long, Forged Steel, Nickel Plated, Fully Warranted\$5.00

One in a Box.

HAMMERS

No. 0872—Ball Pein, Octagon Body, Hand Forged Steel, Non-Rusting Finish, 10 inch Hickory Handle, Weight Each without Handle 12 Oz., Fits Into a Regular Auto Tool Kit.....\$7.00

AUTOMOBILE SPADES

TRUE TEMPER

No. ASW—5 1/2 x 6 inch Hand Forged Tool Steel Blade with Solid Shank, Polished and Gold Lacquered, Polished White Ash Handle with Malleable Iron D, Plain Ferrule and Cap, Length Over All 19 inches, without Canvas Bag, Weight Each 22 Oz.....\$9.00

Extra—Canvas Bag for Covering Blade of Spade, Fitted with Glove Fasteners..... 2.00

Very light, can be carried in tool box or under seat, and can be used in close quarters in mud-hole or snow-bank. Just the thing for digging ferns and wild flowers on holiday trips.

AUTOMOBILE ENGINE HEATERS

HUGHES

A Warm Automobile in a Cold Garage.

Just connect to your electric light socket the Hughes Electric Heater, place heater in automobile hood, and turn on the current.

Car Safe in Freezing Weather.

No matter how cold the weather gets during the night, your automobile radiator remains safe from freezing.

Warm and Ready in the Morning.

A warm engine, a warm radiator. No damage and loss of time from freezing. And all at a small expense.

No. 1—Complete with 10 feet Cord and Attachment Plug, Can be Attached to Any Electric Light Socket and Uses Either Direct or Alternating Current, Delivers a Powerful, Uniform Heat for Less than 1 Cent an Hour.....\$4.00

AUTOMOBILE JACKS

ALL STEEL, FORD

The all steel Jack is a light, strong, compact ratchet Jack for cars weighing 2000 lbs. or under. Built and finished in high grade manner.

No. 10—Capacity 1000 Lbs., Height 10 inches, Raise 10 inches, Weight Each 2 3/4 Lbs.,\$1.20

BADGER FOOT LIFT

Most powerful one ton Jack made. Best material and workmanship, short stroke, pawls automatically lock. Foot lift for different height axles.

No. 7—Capacity 1 Ton, Height 11 inches, Raise 11 inches, Height of Foot 7 1/2 inches, Weight Each 10 Lbs.....\$3.60

BADGER ADJUSTABLE FOOT LIFT

Designed to be used on cars with different height front and rear axles, also to meet conditions when touring. The foot may be set at any height that the axle may be from the ground.

No. 6—Capacity 1 Ton, Height 11 inches, Raise 6 inches, Foot Lift Adjustment Exclusive of Raise; Lowest 4 3/4 inches, Highest 10 3/4 inches, Weight Each 12 Lbs.....\$4.20
No. 06—Capacity 3/4 Ton, Otherwise Same as No. 6, Weight Each 9 Lbs..... 3.40

PERFECT SCREW

Malleable Iron, Steel Screw.

Strong malleable iron stand, gears and handle, cut steel screw, not cheap rolled thread, gears accurately machined and mesh perfect. Strong and will stand hard use.

No. 1P—Capacity 1 Ton, Height 10 inches, Raise 7 1/2 inches, Weight Each 5 Lbs.....\$1.50

EUREKA SCREW

Per Set of Four	\$3.00	4.00	4.74

PORTABLE JACK AND CRANE

ALBEN GIANT

Built of Steel.

Each

Alben—Guaranteed Lifting Capacity 4000 Lbs., Height Fully Extended 9 feet 3 in., Roller and Ball Bearings, High and Low Speed, Hinged Lifting Arms, Weight Each 300 Lbs. \$170.00

No Chains or Ratchet. It is so constructed that it locks automatically at any point, and the load may be raised or lowered to a decimal fraction of an inch.

Has Two Speeds. One for heavy lifting and a very speedy arrangement for lowering the load or for light work.

A One Man Operated Time, Labor Saving and Safety Device. Every garage needs it as it is particularly adapted for taking out transmissions, engines, etc. If arms are in the way when using Boom only, they can be pushed back out of the way.

The Boom can be easily taken out when using arms only as a Giant Jack.

Machine Shops find it very handy for lifting castings, forgings, machinery, etc., and on account of the fine thread raising screw, machinery may be spotted with ease and exactness.

AUTO BLOCKS

LITTLE GIANT

Roller Bearing.

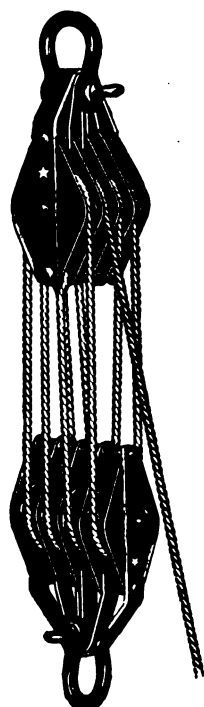

All automobiles should have a set of Little Giant Auto Blocks included in their repair kits.

No. 501—Little Giant Auto Blocks consists of 2 Four Sheave Blocks with Iron Sheaves Equipped with Hardened Steel Roller Bearings, Which Reduces Friction to a Minimum, Steel, Forged Steel Shackle Attachment, for ½ inch Rope, Without Rope \$6.00

Weight Per Set 8 Pounds.

One pound pull on the rope of this set of blocks means about eight pounds pull on the object to be moved or lifted.

These Blocks are light and compact and not only handy for road emergencies but are useful for lifting purposes in and around garages.

AUTOMOBILE TOW LINES

EXCELSIOR

This Tow Line is capable of holding over 3 tons, yet occupying less than one-third the space of a manila rope of equal strength. Easily handled and may be attached to car by two soft manila slings which will not mar the car in the least.

Each

No. 516—½ inch Best Quality Excelsior Steel Wire Rope, with Two Soft Manila Slings Preventing Damage to Paint, Weight Only 6½ Lbs., Put Up in a Compact Coil of About 12 inches Diameter and Packed in a Neat Canvas Bag..... \$6.00

HOOKLESS

Cut Showing Method of Attaching.

Very Best Manila Rope.

Has no hooks to shake loose or other metal parts to scratch or mar the car. Easy to attach and remove. All parts hand spliced. No knots to tie or untie. Can be used for a hundred and one different purposes that would ruin a steel wire rope.

Each

No. 28—28 feet Long, ⅝ inch Diameter, Breaking Strain 4000 Lbs. \$2.40

SPRING LEAF SPREADERS

KNOWLSON'S

Lubricate your spring properly and your car will ride 100% easier.

The annoying squeak will be stopped, assuring you more comfort and pleasure.

Easily operated and adjustable to any size spring. Clips need not be loosened or removed. It spreads the leaves just enough to insert the lubricant without marring the paint, operates quick and easy.

Each

No. 94—Made of Drop Forged Steel, Handsomely Nickel Plated and Polished, Weight 15 Oz., Stops the Squeak \$2.00

HARGRAVE, FOR FORD CARS

Per Dozen

No. 95—Frame Made of Best Malleable Iron, with Pointed Chrome Nickel Steel Screw Hardened and Drawn in Oil, Very Easily Adjusted, Prevents Breaking and Bending, for Springs 1¼ to 3 inches Wide, Weight Per Dozen 5 Lbs. \$4.50

COMBINATION DASH LIGHT AND ILLUMINATED CLOCK

NEVEROUT, FOR FORD CARS

Made to attach to 1915, 1916 and 1917 Model Ford cars with the cowl dash and clamps directly to angle iron beneath windshield. The time piece is securely attached to prevent its being stolen. The dial is very legible and an opening in bottom reflector shield illuminates dial plainly at night.

Beneath the reflector shield is the bulb which illuminates the entire dash and foot board and shining up through the opening at the same time illuminates dial of time piece.

The bulb is run direct from magneto.

No. 202—Japanned Steel Frame and Clamps, Complete with Clock, Bulb and Wire.....\$4.50

ELECTRIC FANS

POLAR CUB

The Polar Cub Fan solves the problem of the individual fan for office, home, store, hotel, hospital, etc.

It operates on either direct or alternating current—105 to 115 volts—30 to 60 cycle at the same rate of speed for either current.

The average cost is six hours for one cent.

It is impossible to get a shock from this fan.

No. 500—Finished in Rich Velvet Black, Nickel Plated Standard and Blades, Nickel Plated Brush Holders, Heavy Felt Padded Base, Complete with Cord and Plug, Net Weight Each 3 1/2 Lbs.\$8.30
One in a Carton.

DEFLECTOR LENSES

OSGOOD

A prismatic glass lens that fits into the lamps in place of plain glass. Does not dim or diffuse the light, but deflects it downward along the ground.

Lights ample distance ahead for highest speed.

No blinding glare.

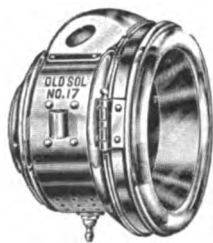

Places light where needed.

The Osgood Lens—because of its deflecting power due to its prismatic principle—casts the light rays exactly where you need them—on the road far ahead and to both sides. With rays only $3\frac{1}{2}$ feet high, they are below the eye level of approaching drivers or pedestrians.

One in a Box; 12 in a Case.

FRANCO TUBULAR FLASHLIGHTS

Franco Fibre Cases are equipped with patented features which make them more desirable than any other case on the market.

The wireless feature prevents breakage or loose connections from any of the many causes which break the strip in the ordinary fibre case.

All Franco Cases, both fibre and nickel plated, are so constructed that they cannot short circuit when placed in tool box, or when they come in contact with metal, or when laid on a metal surface. This eliminates any accidentally exhausted batteries.

All Franco Cases are equipped with especially constructed reflectors which throw a brilliant white light without any black spots or filament reflections.

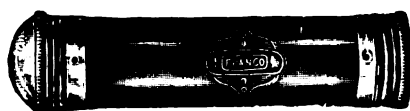

Every Franco Case will from now on be equipped with a genuine Franco Mazda lamp and all renewal lamps will be of Mazda manufacture.

Franco Cases won the Gold Medal at the Panama-Pacific Exposition, the highest award given any flashlight.

TUBULAR AND VEST POCKET FLASHLIGHTS

NEW STYLE, CANNOT SHORT CIRCUIT

These new style fibre cases are made of the best polished fibre and highly nickeled brass parts.

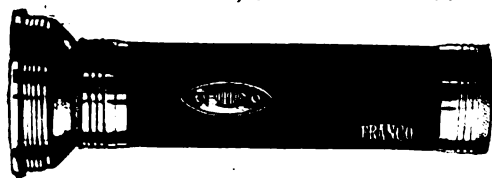

They are so constructed that they cannot short circuit when in contact with metal or when placed on any metal surface, but they have not the patented wireless feature that is used in the regular Franco line.

- Each
- No. 9681—5x1 1/4 inches, Vulcanized Fibre Case, with No. 520 Bulb, without Battery.....\$0.76
- No. 1029—Extra Radio Battery, 3 3/4 x1 inches..... .32
- No. 520—Extra Mazda Bulb, 2.7 Volt.....

- Each
- No. 9684—6 1/2 x1 1/2 inches, Vulcanized Fibre Case, with No. 520 Bulb, without Battery.....\$0.98
- No. 1028—Extra Radio Battery, 4 3/4 x1 3/8 inches..... .32

DISPLAY CABINETS

Here's a Display Cabinet of 80 Franco Mazda Lamps so selected that they care for the wants of 90 per cent of American made cars. A large assortment with a small-stock investment. The cabinet itself is a salesman. On counter or in window it's a persistent auto lamp advertiser. No trouble to handle auto lamps, and the profits are sweet. Cabinet contains the following lamps:

Headlight.

- 5—15 Candle Power 6.8 Volt G-16 1/2 Double Contact.
- 5—15 Candle Power 6.8 Volt G-16 1/2 Single Contact.
- 5—12 Candle Power 6.8 Volt G-12 Double Contact.
- 5—15 Candle Power 9 Volt G-16 1/2 Double Contact.

Sidelight.

- 10—4 Candle Power 6.8 Volt G-8 Double Contact.
- 10—4 Candle Power 6.8 Volt G-8 Single Contact.

Rearlight and Speedometer.

- 10—2 Candle Power 6.8 Volt G-6 Double Contact.
- 10—2 Candle Power 6.8 Volt G-6 Single Contact.
- 10—2 Candle Power 3.4 Volt G-6 Double Contact.
- 10—2 Candle Power 3.4 Volt G-6 Single Contact.

Per Cabinet

Display Cabinet—Complete as Described Above.....\$18.00

Note—When ordering Lamps for renewals, care should be taken to specify that they are to be packed for Display Cabinets.

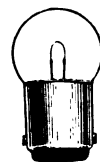

Candelabra
Base.Double Ediswan
Base.Single Ediswan
Base.

SPECIAL NOTICE

When ordering Lamps, always state whether Candelabra, Double Ediswan or Single Ediswan Base and Candle Power wanted.

RENEWAL MAZDA LAMPS

For Bicycle and Dry Cell Lanterns or Any Item Using Either One or Two Standard No. 6 Batteries.

1 inch Diameter.

Style G-8 Tipless.

For Use with One No. 6 Battery.

No.	Volts	Amp.	Base	List
551	1.5	.65	Cand.	\$0.24
552	1.5	.65	S. E.	.24
553	1.5	.65	D. E.	.24

For Use with Two No. 6 Batteries.

PUSH BUTTON SWITCHES

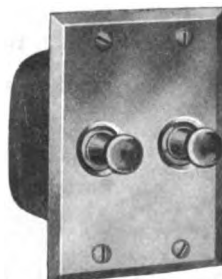

FOR AUTOMOBILES

Three Gang Switch in Tandem.

Single Gang Switch.

Two Gang Switch in Parallel.

NOTE

When ordering 2, 3 or 4 Gang Switches, always State if Parallel or Tandem Style Switches are wanted.

These are very dependable and positive switches.

The snap mechanism makes and breaks the circuit quickly which reduces sparking to a minimum, increasing the life of the switch.

Nickel Plated.

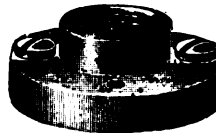

- No. 1—Single Switch **Each \$1.00**
- No. 2—2 Gang Switch, Parallel or Tandem..... **1.60**
- No. 3—3 Gang Switch, Parallel or Tandem..... **2.40**
- No. 4—4 Gang Switch, Parallel or Tandem..... **3.20**

SWITCHES

- No. 51—1 Point, 2 1/4 inch Diameter Wood Base, Natural Finish **Per Dozen \$1.70**

RECEPTACLES

- No. 2—Candelabra Porcelain Receptacle **Each \$0.09**
- No. 4—Miniature Porcelain Receptacle **.09**

AMERICAN IGNITION

No. 66S.

RELIANCE

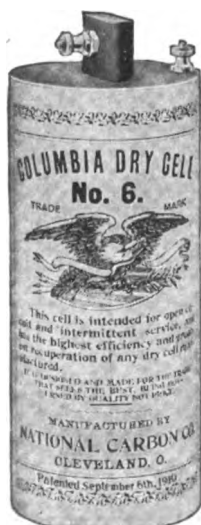

No. 6R.

RELIANCE IGNITION

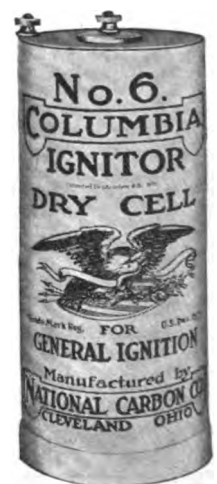

No. 6S.

COLUMBIA

No. 60R.

COLUMBIA IGNITOR

No. 600R.

American Ignition Dry Batteries are made especially for supplying energy for ignition systems, gas and gasoline engines, electric horns, and for all classes of heavy service work.

These Batteries are scientifically made under the supervision of experts. Materials used are the best obtainable and the workmanship is of the very best quality.

No. 66R—American Ignition, Round, $2\frac{1}{2} \times 6$ inches, Tests 30 Amperes and Over.

Light Red Color Case.

	Each
In Full Barrel Lots of 125.....	\$.....
In Lots of 50 to 100.....	
In Lots Less than 50.....	

No. 8—American Ignition, Round, $3\frac{1}{2} \times 8$ inches, Tests 40 Amperes and Over.

Light Red Color Case.

	Each
In Full Barrel Lots of 50.....	\$.....
In Lots Less than 50.....	

No. 66S—American Ignition, Square, $2\frac{1}{2} \times 6$ inches, Tests 30 Amperes and Over.

Light Red Color Case.

In Lots of 50 to 100.....	
In Lots Less than 50.....	

Reliance Batteries have been developed especially for a general utility battery, such as for bell use and telephones, and so forth, and will also give satisfactory service for gas and gasoline engine ignition where requirements are not too heavy.

No. 6R—Reliance, Round, $2\frac{1}{2} \times 6$ inches, Tests 25 Amperes and Over.

Dark Red Color Case.

	Each
In Full Barrel Lots of 125.....	\$.....
In Lots of 50 to 100.....	
In Lots Less than 50.....	

No. 6S—Reliance, Square, $2\frac{1}{2} \times 6$ inches, Tests 25 Amperes and Over.

Dark Red Color Case.

	Each
In Full Barrel Lots of 125.....	\$.....
In Lots of 50 to 100.....	
In Lots Less than 50.....	

No. 60R—Columbia, Round, $2\frac{1}{2} \times 6$ inches.

No. 60S—Columbia, Square, $2\frac{1}{2} \times 6$ inches.

Dark Red Color Case.

For all classes of battery service. Particularly adapted to work when the current drain is not high.

Can be used for ignition purposes.

Long life and reliability makes the Columbia Dry Battery famous.

A general service cell of unequalled quality. Each cell represents care, accuracy and long experience in battery construction.

	Each
In Full Barrel Lots of 125.....	\$.....
In Lots of 50 to 100.....	
In Lots Less than 50.....	

No. 600R—Columbia, Ignitor, Round, $2\frac{1}{2} \times 6$ inches.

No. 600S—Columbia, Ignitor, Square, $2\frac{1}{2} \times 6$ inches.

Dark Red Color Case.

This Battery is especially made for all classes of heavy service work. For the ignition of gas and gasoline engines it is unequalled. Connected to any circuit, it is practically a battery insurance policy, insuring proper operation of your device during the life of the cell. Economical and efficient.

	Each
In Full Barrel Lots of 125.....	\$.....
In Lots of 50 to 100.....	
In Lots Less than 50.....	

NOTE—Prices on Batteries Quoted on Request.

Storage of Dry Batteries—Best results can be obtained from dry batteries by observing a few points regarding their storage. After the barrel is received, the batteries should be taken out and placed on the shelf, unless they are to be reshipped. In the latter case, keep the barrel with the address end up. The batteries should be stored in a cool, dry place, about 75 degrees Fahrenheit, devoid of acid fumes.

DRY BATTERIES

COLUMBIA MULTIPLE

The Columbia Multiple Battery is made from specially selected cells arranged and connected to give various voltages and capacities.

The cells are connected by means of heavy copper ribbon soldered to the terminals. Every cell is insulated from the case and from the other cells in such a way as to make a waterproof and practically damage proof unit battery.

Enclosed in an hermetically sealed, handsomely enameled metal case, with convenient handles for carrying.

Nos.	266	256	356
Voltage	9	7½	7½
Length, Inches	11	13¾	13¾
Width, Inches	8½	5½	8½
Height, Inches	8¾	8¾	8¾
Each	\$8.64	7.20	10.80

Note—The first figure of above numbers shows the number of cells connected in multiple. In other words, by multiplying the amperage of one cell by the first figure you will get approximately the short circuit current of the battery. The second figure shows the number of cells connected in series. The third figure shows that the battery is made up of 6 in. cells. The fourth shows the number of rows of cells.

COLUMBIA HOT SHOT

The Columbia Hot Shot is a unit battery in an attractive red moisture-proof case. Soldered copper strips connect the individually tested cells, which are entirely surrounded by a waterproof insulating compound. It is only necessary to connect two wires to the binding posts. The battery is then ready to operate.

Particularly useful for ignition where the variety of sizes makes it adaptable for motors of all sorts—stationary, vehicle or motor boat. Very satisfactory for carriage lighting outfits.

Nos.	1562	2562	2962
Voltage	7½	7½	9
Length, Inches	7¾	13¾	15¾
Width, Inches	5	5¾	5¾
Height, Inches	7¾	7¾	7¾
Each	\$3.30	6.60	7.92

STORAGE BATTERIES

FRANKLIN

For Starting, Lighting and Ignition

A strictly high grade battery. The case containing the jars is hardwood ¾ and ¾ in. thick, boiled in paraffine and tarred to withstand the action of the solution and the gases.

The jars are hard rubber of the best grade obtainable. The plates are of the staggered design, allowing free expansion and contraction, assuring long life.

The Separators are of the most approved type, allowing free circulation of the fluid.

The top connections and plates are cast in one piece out of chemically pure lead—no corrosion to short circuit the battery or cause trouble. The connections are also brought out to the top so that the individual cells can be tested when desired.

The two terminal nuts are hard rubber, ¾ in. in diameter, large enough so that they can be fastened down by hand without the use of pliers.

The handles are of the sliding type and can be pushed out of the way when not wanted.

The Height and Width are Alike on All Batteries.

Height 9 inches, Width 7¾ inches.

Nos.	Length, Inches	Volts	Amperes	Plates Per Cell	Weight Pounds	Each
5	9	6	70	5	24	\$30.00
7	10¾	6	100	7	34	36.00
9	13	6	125	9	50	42.00
11	14¾	6	150	11	65	48.00
13	16½	6	175	13	74	54.00
15	18½	6	200	15	80	60.00

FRANKLIN, JR.

For Lighting and Ignition

The best medium priced batteries on the market today.

The plates are hard and porous, non-sulphating, with large non-corroding terminals, the cells either glass or rubber as shown below, encased in a hard wooden box, chemically treated to withstand the action of the acid, compact and strong and will give years of service.

Nos. 5J to 8J are intended for ignition and lighting on automobile and motor boat, the larger sizes for light power and house lighting purposes. We can however furnish this battery as also the Franklin described on this page in any desired Voltage or Amperage. Prices quoted on application

The Height and Width are Alike on All Batteries.

Height 8½ inches, Width 5 inches.

Nos.	Length, Inches	Volts	Amperes	Plates Per Cell	Jar	Weight Pounds	Each
5J	8½	6	50-60	5	Glass	24	\$15.00
6J	8½	6	50-60	5	Rubber	24	18.00
7J	10½	6	70-80	7	Rubber	33	22.50
8J	10½	6	90-100	9	Rubber	39	28.50
13J	30	18	70-80	7	Rubber	98	51.00
14J	30	18	90-100	9	Rubber	116	54.50
15J	39	24	70-80	7	Rubber	132	106.00
16J	39	24	90-100	9	Rubber	156	146.00

"READRITE" AMMETERS**FOR TESTING DRY CELLS**

No. 1000—2 inch Diameter, 0 to 30 Amperes, Nickel Plated Case, Complete with Flexible Insulated Cord, Connection to Battery Can be Made with the Case Instead of Cord in Lots of 10....\$0.80
Less Quantity..... 1.00

The "Readrite" Dry Cell Tester has stood the test for years, dependable and accurate. The pointer stops almost instantly at the correct amperage or voltage. This dead beat function is not due to friction or springs. Readrite has the lightest movement. Do not test storage batteries with ammeter.

"READRITE" VOLT-AMMETERS**FOR TESTING DRY CELLS OR STORAGE BATTERIES.**

No. 400—2 inch Diameter, 0 to 8 Volts, 0 to 30 Amperes, Nickel Plated Case, Complete with Flexible Insulated Cord, Connection to Battery Can be Made with the Case Instead of Cord..\$1.80

When compared with other battery testers, the Readrite consumes less current and will thus show more accurately the true condition of batteries.

**BEARING BRONZE CORED BARS**

"Ampco" Bearing Bronze is guaranteed to outwear any other bearing metal on the market, regardless of price, to produce less friction, to require less oil for lubrication, to wear smoother without injuring the shaft, to be non-corrodible and to cost less, service considered, than any other bearing metal now sold.

"Ampco" Bearing Bronze is not common brass or phosphor-tin composition, but a new alloy, different from any other known. Its peculiar composition gives it the property of wearing smoother and resisting wear better than any other alloy so far discovered.

"Ampco" Bearing Bronze—Prepared in 12 inch Lengths, in Ten Sizes as Described Below, Average Weight Per Ten Sizes 47 Lbs., Put up in a Box.....\$1.20

Outside Diameter, Inside Diameter and Average Weight of Twelve Lengths of "Ampco" Bearing Bronze Cored Bars Put up in a Box.

Outside Diam., Inches.....	$\frac{3}{4}$	1	1 $\frac{1}{4}$	1 $\frac{3}{8}$	1 $\frac{1}{2}$
Inside Diam., Inches.....	Solid	$\frac{1}{2}$	$\frac{3}{8}$	$\frac{3}{4}$	$\frac{3}{8}$
Ave. Weight Each, Lbs....	1 $\frac{1}{2}$	1 $\frac{3}{4}$	2 $\frac{3}{4}$	3 $\frac{3}{4}$	3 $\frac{3}{4}$
Outside Diam., Inches.....	1 $\frac{1}{8}$	1 $\frac{1}{4}$	2	2 $\frac{1}{4}$	2 $\frac{1}{2}$
Inside Diam., Inches.....	$\frac{7}{8}$	1	1 $\frac{1}{8}$	1 $\frac{3}{8}$	1 $\frac{1}{2}$
Ave. Weight Each, Lbs....	4 $\frac{3}{4}$	5 $\frac{1}{4}$	7	8	9

Note—Any Other Size Furnished on Short Notice.

ECLIPSE AMMETERS

No. 20—2 inch Diameter, 0 to 30 Amperes, Nickel Plated Case, Flexible Cord\$2.50

Indicates in any position and with either direction of current. Connecting cord is very flexible and can be quickly detached if desired. In testing single cells, the cord is not necessary, as the contact spur can be touched to one battery terminal and the case to the other terminal.

A very high grade instrument. Guaranteed accurate.

BATTERY SYRINGE HYDROMETERS**"BREAK NOT"**

For Determining Exact Condition of Storage Battery.

No. 1—10 $\frac{1}{2}$ inches Long Over All, Red Rubber Bulb and Base, Glass Center, 4 $\frac{3}{4}$ inches Inside Hydrometer with Specific Gravity Readings from 1100 to 1300, Shot Weighted.....\$1.20
No. 1G—Extra Glass Jars......16
No. 1T—Extra Thermometers40

This instrument enables you to determine the exact condition of the battery and is also serviceable in transferring the liquid in and out of the battery and adding fresh water or fresh acid.

The construction of the hydrometer is such that the instrument can be taken apart and cleaned easily and breakage is reduced to a minimum.

Full directions furnished with each outfit.

BATTERY CONNECTORS**INDESTRUCTIBLE**

No. 10—3 $\frac{3}{8}$ inches Full Length, 2 $\frac{7}{8}$ inches from Center to Center of Holes, Soft Copper Insulated.....\$3.00

"QUICK ACTION" KNURL NUT TYPE

No. 150—Stamped from Soft High Conductivity Copper Ribbon, Wound with White Adhesive Tape, Screws Under the Knurl of the Cell.....\$1.50

HOLDFAST

Holdfast—4 $\frac{1}{2}$ inches from Center to Center of Holes, Heavily Insulated, Grips Threads of Battery Binding Post\$4.00

FAHNESTOCK

No. 155—Special Type Fahnestock Spring Clips, Flexible Insulated Wire.....\$6.00

A neat, quick connector which may be used over and over again. The nuts are removed from the binding posts and the connector slipped over the post.

IGNITION WIRE

RED-RIB

The insulation of Red-Rib Cable is a rubber compound of the highest grade. The proof of quality is its extreme pliability. The conductors are centered in the insulators and all layers are thoroughly vulcanized to prevent leakage and the impregnation of oil, water and grease.

RUBBER COVERED IGNITION CABLE

- No. 70M—Magneto Secondary, Black Rubber, $\frac{3}{8}$ inch (7m.m.), 5 Layers, 14 Gauge, Weight Per 100 Foot Coil 6 $\frac{1}{2}$ Lbs. \$9.60

BRAIDED IGNITION CABLE

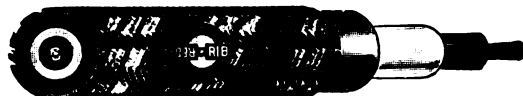

- No. 100DV—Primary, Double Brown Braid, Varnished, $\frac{1}{2}$ inch (5m.m.), 1-Layer Rubber, 14 Gauge, Weight Per 100 Foot Coil 2 $\frac{1}{2}$ Lbs. \$3.90

- No. 70BV—Magneto Secondary, $\frac{1}{2}$ inch (4 $\frac{1}{2}$ m.m.), 3-Layer Rubber, 14 Gauge, Weight Per 100 Foot Coil 6 Lbs. \$10.00

- No. 300BV—Medium Secondary, $\frac{3}{8}$ inch (10m.m.), 3-Layer Rubber, 14 Gauge, Weight Per 100 Foot Coil 7 Lbs. \$12.00

- No. 200B—Heavy Secondary, $\frac{1}{2}$ inch (12m.m.), 3 Layers, 14 Gauge, Weight Per 100 Foot Coil 15 Lbs. \$16.00

MULTIPLE LIGHTING CABLE

- 2 Lead Primary, $\frac{3}{8}$ inch Wide, 16 Gauge, Weight Per 100 Foot Coil 4 $\frac{1}{2}$ Lbs. \$7.00

TWISTED COTTON LAMP CORD

- No. 18—18 Gauge, Weight Per 500 Foot Coil 9 Lbs. \$3.00

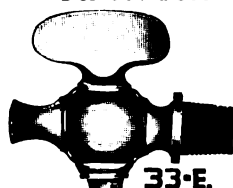

STARTER CABLE

- No. 2—Flexible, Rubber Insulated, Double Black Weatherproof Braid, $\frac{1}{2}$ inch, 2 Gauge, Weight Per 500 Foot Coil 180 Lbs. \$31.00

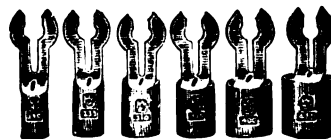

PET COCKS

Polished Brass.

- No. 33E— $\frac{1}{8}$ inch Iron Pipe Thread \$0.30
No. 34E— $\frac{1}{4}$ inch Iron Pipe Thread32

CLIP TERMINALS

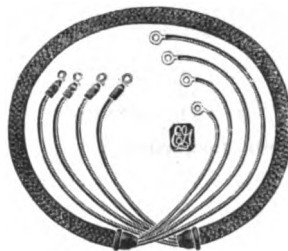

One Piece Brass Stamping.

Fits all Spark Plugs, Conductors. Made fast by a drop of solder into hole in the ferrule. Per Package of 100

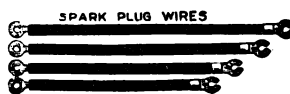

- No. 5324—.190 Inside Diameter, Single, Braided and Primary Rubber \$3.40
No. 5325—.235 Inside Diameter, Double Braided Primary 3.40
No. 6257—.280 Inside Diameter, Rubber Magneto, 100 of a Size in an Envelope 3.40
No. 5326—.310 Inside Diameter, Rubber Magneto and Braided Magneto 3.40
No. 5327—.325 Inside Diameter, Rubber Secondary 3.40
No. 5328—.400 Inside Diam. Medium, Braided 3.40
No. 5329—.475 Inside Diameter, Braided Secondary and 12 m.m. Rubber 3.40

TIMER AND SPARK PLUG WIRES

FOR FORD CARS UP TO 1914

This outfit consists of four differently colored primary wires enclosed in circular loom, for connecting timer and coil, with eye terminals on one end and the strands of the other ends bared and looped in a fibre sleeve; also four secondary or high tension wires cut to the proper length, to reach from the spark plugs to the coil connections on the dash, with eye terminals on one end and clip terminals on the other.

- No. 5080L—Set of Timer Wires Enclosed in Circular Loom and 4 Spark Plug Wires \$1.50
No. 5086L—Timer Wires Only, Enclosed in Circular Loom 1.00
No. 5145—Set of 4 Secondary Braided Spark Plug Wires Only60

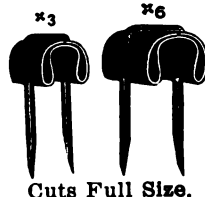

TIMER AND LIGHTING WIRES

FOR 1917 FORD CARS EQUIPPED WITH ELECTRIC HEADLIGHTS

- No. 6031L—Set Consists of 4 Primary Wires for Connecting Timer and Coil and 1 Weatherproof Wire for Connecting the Headlights, Cut to Proper Length, with all Necessary Terminals Attached, All Enclosed in Circular Loom. \$1.20

INSULATED STAPLES

BLAKE FIBRE

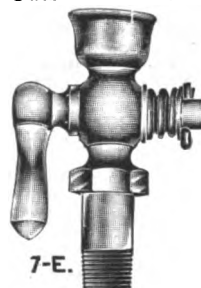

- No. 3— $\frac{3}{4}$ in. Long, for General Use, for Twisted Pair and Single Wires \$0.30
No. 5— $\frac{5}{8}$ in. Long, for Hardwood, for Twisted 3-Wire and Extra Heavy Pair Wire36
No. 6— $\frac{3}{4}$ in. Long, for General Use, for Twisted 3-Wire and Extra Heavy Pair Wire34

The fibre insulation on these staples cannot come off in driving.

100 in a Package.

PRIMING CUPS

Polished Brass, Long Shank.

- No. 7E— $\frac{1}{8}$ inch Iron Pipe Thread \$0.40
No. 8E— $\frac{1}{4}$ inch Iron Pipe Thread42

CHAMPION SPARK PLUGS

Champion Spark Plugs are standard factory equipment on 4 out of every 5 automobiles, tractors and stationary engines made in America. They are the recognized standard in the spark plug field.

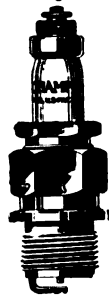

CHAMPION "X" SPECIAL ½ INCH FOR FORD CARS

No. 16—Porcelain Insulation

10 to 100.....	Each, \$0.86
In Single Lots.....	Each, .90

Adopted by the Ford Motor Co. as Standard Equipment on the Ford Car since 1911.

CHAMPION REGULAR Porcelain Insulation

	10 to 100	Single Lots
No. 24—½ in. Standard...Each,	\$0.94	\$1.00
No. 25—¾ in.-18 Thread...Each,	.94	1.00
No. 26—Metric.....Each,	.94	1.00

A most reliable plug. Sturdy in construction, patented cup gasket assembly, making compression leakage impossible.

Adopted as standard factory equipment on Maxwell, Lambert, Luverne, Regal and other well known cars.

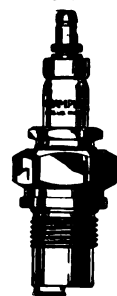

CHAMPION "O" OVERLAND ½ INCH

No. 70—Porcelain Insulation

10 to 100.....	Each, \$0.94
In Single Lots.....	Each, 1.00

Specially built for use in the Overland car. Adopted as factory equipment.

Numerous testimonials from car owners prove it to be the one dependable plug for the Overland under all conditions.

CHAMPION BUICK ¾-18 LONG FOR BUICK CARS

No. 17—Porcelain Insulation

10 to 100.....	Each, \$0.94
In Single Lots.....	Each, 1.00

Specially made for the Buick Car. Has long shell, conical porcelain and Buick Terminal.

The long shell allows the spark to ignite within the cylinder instead of in a pocket, as occurs when the ordinary type plug is used.

CHAMPION CONICAL Porcelain Insulation

	10 to 100	Single Lots
No. 24C—½ in. Standard...Each,	\$0.94	\$1.00
No. 25C—¾ in.-18 Thread...Each,	.94	1.00

Adopted by the Studebaker Corporation as standard factory equipment on all Studebaker cars.

Also standard equipment on Allen, Hollier, Elco, Dixie Flyer, Elgin, Grant and others.

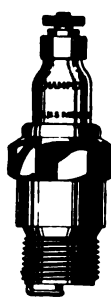

CHAMPION HEAVY DUTY One Piece Stone Insulation

	10 to 100	Single Lots
No. 75—½ in. Standard...Each,	\$0.94	\$1.00
No. 76—¾ in.-18 Thread...Each,	.94	1.00

Built for efficiency on the very highest type. The one piece construction makes leakage impossible.

Standard factory equipment on the Briscoe, Abbott-Detroit, Jackson, King, Stearns-Knight, Scripps-Booth, Velie, Winton and a large number of tractors and trucks.

CHAMPION ONE PIECE HEAVY STONE

	10 to 100	Single Lots
No. 18—½ in. Standard...Each,	\$1.20	\$1.30
No. 19—¾ in.-18 Thread...Each,	1.20	1.30
No. 20—Metric.....Each,	1.20	1.30

Specially made for racing cars and those of high power. Extra heavy material throughout. Absolutely compression tight.

Regular factory equipment on such cars as Moline-Knight, Owen Magnetic, Overland Six, Pathfinder, Peerless, Willys-Knight, White.

CHAMPION TWO PIECE HEAVY STONE

	10 to 100	Single Lots
No. 21—½ in. Standard...Each,	\$1.20	\$1.30
No. 22—¾ in.-18 Thread...Each,	1.20	1.30
No. 23—Metric.....Each,	1.20	1.30

A highly efficient plug for such cars as Chalmers, Cadillac, Chandler, Franklin, Hudson, Locomobile, Mitchell, Oldsmobile, Packard and Pierce-Arrow.

CHAMPION PRIMING

Porcelain Insulation

Will start any motor any time on the first quarter turn. Has key lock attached to needle valve for easy opening and closing. Brings the gasoline right at the sparking point.

	10 to 100	Single Lots
No. 27—½ in. Standard...Each,	\$1.00	\$1.70
No. 28—¾ in.-18 Thread...Each,	1.00	1.70
No. 29—Metric.....Each,	1.00	1.70

METZ ½ INCH, EXTENSION

No. 80—Porcelain Insulation

10 to 100.....	Each, \$0.94
In Single Lots.....	Each, 1.00

Adopted in 1913 as standard equipment on Metz cars.

Has extra long shell, bringing the spark well down into the cylinder.

Was used in the Metz car which won the Glidden tour in 1913, as well as many other victories.

CHAMPION HEAVY DUTY MOTORCYCLE

One Piece Stone Insulation

	10 to 100	Single Lots
No. 85—½ in. Standard...Each,	\$0.94	\$1.00
No. 86—¾ in.-18 Thread...Each,	.94	1.00

Standard factory equipment on the Harley-Davidson, Cleveland, Dayton, Flying Merkel, Smith, Motor Wheel and Seichel Motorcycles.

CHAMPION MOTORCYCLE

Mica Insulation

	10 to 100	Single Lots
No. 30—½ in. Standard...Each,	\$0.94	\$1.00
No. 31—¾ in.-18 Thread...Each,	.94	1.00
No. 32—Metric.....Each,	.94	1.00

Built to "stand the gaff." Has special oil resisting construction. Impossible to break. Absolutely gas tight.

Factory equipment on all Thor motorcycles.

NOTE—For Extra Porcelains See Following Page.
NOTE—SPECIAL PRICE ON CHAMPION PLUGS IN 100 LOTS.

CHAMPION SPARK PLUG PORCELAINS

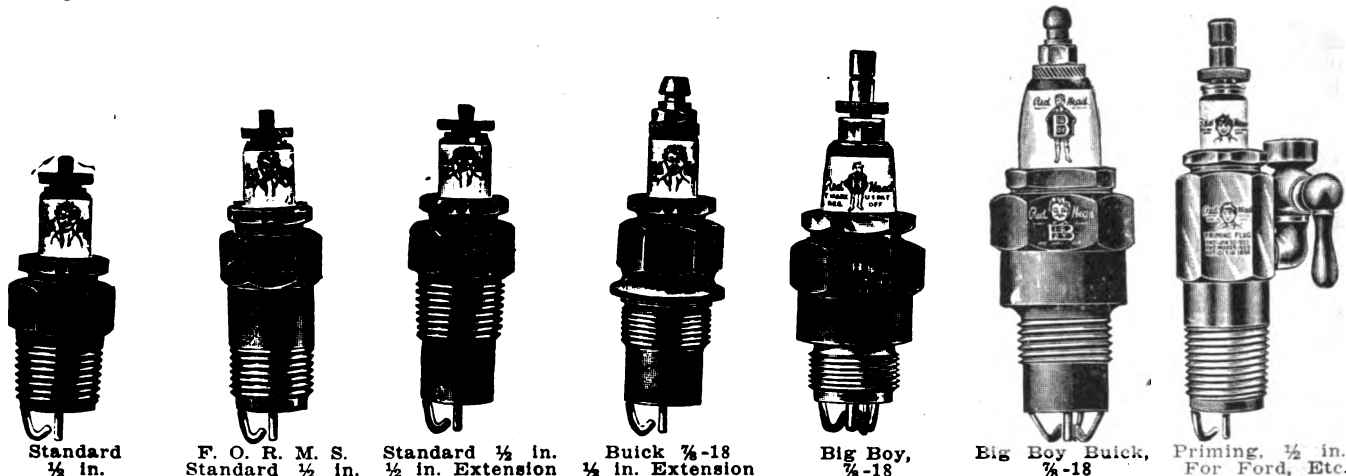

All Champion Spark Plug Porcelains are guaranteed against heat breakage. Made of special heat proof composition. Gaskets are included with each porcelain.

NOTE—When Ordering Always State Type of Plug You are Using.

	Less Than 100	100
No. 33—Champion X	\$0.60	\$0.54
No. 34—Champion Regular	.66	.60
No. 34C—Champion Conical	.66	.60
No. 35—Champion Heavy Stone	.70	.66
No. 36—Champion Priming	.70	.66

RED HEAD VITRISTONE SPARK PLUGS

Red Head Spark Plugs are guaranteed—not for one year—but forever. Printed guarantee packed with each plug. Red Head "Big Boy" Spark Plugs are recommended for high-powered cars, commercial vehicles, tractor service, stationary engines, etc. VITRISTONE represents a great advanced step in perfecting the Spark Plug. VITRISTONE can be had only in Red Head Spark Plugs.

	100 Lots	Single Lots		100 Lots	Single Lots
No. 40—1/2 inch Standard	\$85.00	\$0.90	No. 45—Big Boy, 1/2 inch Standard	\$125.00	\$1.30
No. 41—7/8 inch-18 Thread	85.00	.90	No. 46—Big Boy, 7/8 inch-18 Thread	125.00	1.30
No. 42—1/2 inch F. O. R. M. S. for Ford, Overland, Reo, Maxwell and Studebaker Cars	85.00	.90	No. 47—Big Boy Buick, 7/8-18, with 1/2 in. Extension	125.00	1.30
No. 43—1/2 inch with 1/2 inch Extension, for Reo and Overland Cars	85.00	.90	No. 48—Big Boy Overland, 1/2 inch, with 1/2 inch Extension	125.00	1.30
No. 44—Buick, 7/8-18, with 1/2 inch Extension	125.00	1.30	No. 49—Priming, 1/2 inch, for Ford and Other Cars	140.00	1.50

HOW TO MEASURE SPARK PLUGS

On all 1/2 inch plugs the base of the shell measures 1 1/8 inch at the top; 3/4 inch at the bottom. This makes a tapered thread, thus doing away with the gaskets used in 3/8-18 plug. It is called the 1/2 inch standard pipe thread on account of an expression used by the pipe people because of it being 1/2 inch diameter at the bore.

The 3/8-18 plug is 3/8 inch diameter at both the top and bottom of threads, and as there are 18 threads to the inch, the name is obtained in that way.

Metric thread is a French name; is approximately 1 1/8 inch outside diameter top and bottom. There is no taper in this at all. This is sometimes called 18 millimeter thread.

No. 2—Fits 1/2 inch Spark Plug..... 3.60

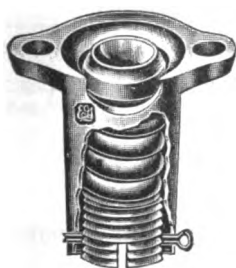

ANTI-RATTLING BALL SOCKETS**FOR FORD CARS**

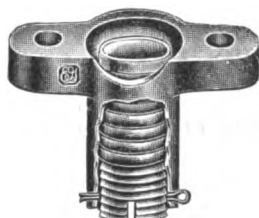

The rear ends of the radius rod on Ford cars form a ball, which on all models prior to 1914 is held by a solid steel cap. This ball joint wears from vibration and the result is an annoying rattle. The later models are equipped with an exposed spring device intended to compensate wear, but it soon loses its effectiveness and must be replaced.

Both ends of the steering gear connecting rod also form a ball and socket joint held by a solid cap, which also develops wear and rattles.

These Anti-Rattling Ball Sockets are the only relief.

No. 5142.

No. 5155.

No. 5142—For Radius Rod, Hard Brass Casting, Black Enameled, with Screw Adjustment to Take up Wear \$0.40

No. 5155—For Steering Rod, Hard Brass Casting, Black Enameled, with Screw Adjustment to Take up Wear, Two Required on Every Ford Car..... \$0.52

DOUBLE-BALL BRAKE ROD SUPPORT FOR FORD CARS

The regular pressed steel support for the brake rod is not provided with an adjustment to take up the wear and soon loses its effectiveness, causing the brake rod to rattle.

This Brake Rod Support has a spring for the automatic adjustment of wear. The brake rod slides between two steel balls, which action allows the rod to work freely and eliminates the wear. It also permits the brakes to be operated with the minimum of effort.

No. 6059—Malleable Iron Housing, Baked Black Enameled \$0.68

TIMERS FOR FORD CARS**MILWAUKEE**

Designed for the Model T Ford car and will fit the late 1912, 1913, 1914, 1915 and 1916 cars. The main case or cover is a one-piece casting, lathe-turned to fit the counter-bore of the engine gear cover. The contact surfaces are ground with greatest possible care, and are insulated with the highest grade grey fiber. The carrier is a bronze casting and is fitted with a wide, hardened, tool steel roller.

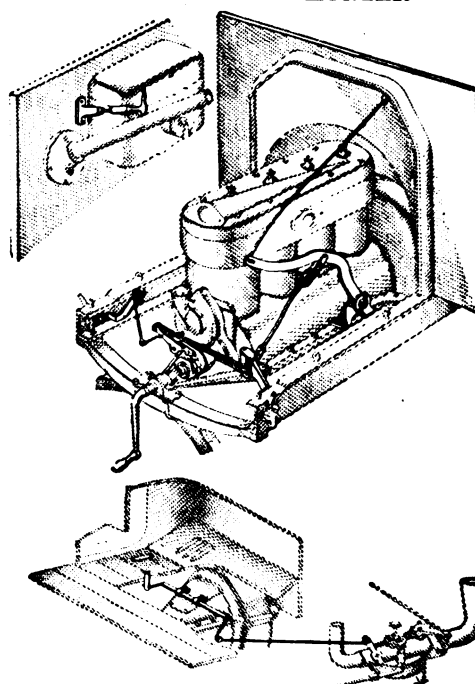

Furnished regular without oil cup and terminal screws, as these parts can be taken from old timer.

No. FT18—Without Oil Cup and Terminal Screws.... \$2.40

R. C. W. MASTER VIBRATORS**BUILT EXPRESSLY FOR USE ON FORD CARS****WHY YOU SHOULD HAVE AN R. C. W. MASTER VIBRATOR:**

1. It gives motor more power.
2. It has large Tungsten Vibrator Points.
3. It makes spark 50 per cent stronger.
4. It makes your cylinders fire perfectly.
5. It makes your engine run smoothly.
6. It makes your engine run slower on high speed.
7. It does away with adjusting four separate Vibrators.
8. It makes your car start easier.
9. It can be used on batteries or Ford cars.
10. The hot spark will prevent carbon on spark plugs.
11. Every R. C. W. Master Vibrator is guaranteed to have 25 per cent stronger and hotter spark than any other vibrator on the market.

R. C. W. Master Vibrator..... \$10.00

STARTERS FOR FORD CARS**HUNTER**

A new principle applied to a mechanical starter to turn a motor easier from the seat than at the crank and permit the most simple method of installation.

The only mechanical starter with a multiplied leverage. Ratio is about twelve to one against eight to one with regular crank.

The long leverage obtained is what makes the "Hunter" so easy to operate.

You can positively start your car winter or summer. A priming attachment for starting in cold weather is furnished which is positively reliable.

Every part under the hood except the handle on the dash. This handle is nickel plated. All parts of the starter are applied where holes already exist except the hole through the dash for the flexible rod, between the vibrator box and steering column. Does not remove the crank. Not a part or accessory removed or interfered with.

Hunter Starter—For Ford Cars..... \$18.75

FOOT PEDALS

Malleable Iron, Baked Black Enamel.

No. 5219—A Large, Heavy Lock Pedal.....Each \$0.84

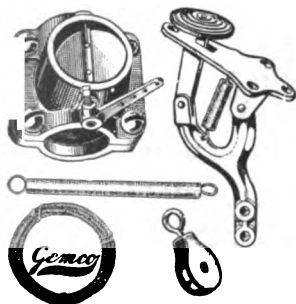

Malleable Iron, Baked Black Enamel.

CUT-OUT OUTFITS

GEMCO, FOR FORD CARS

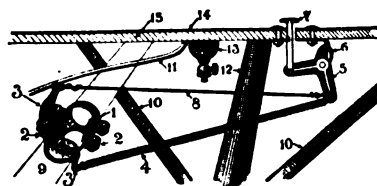

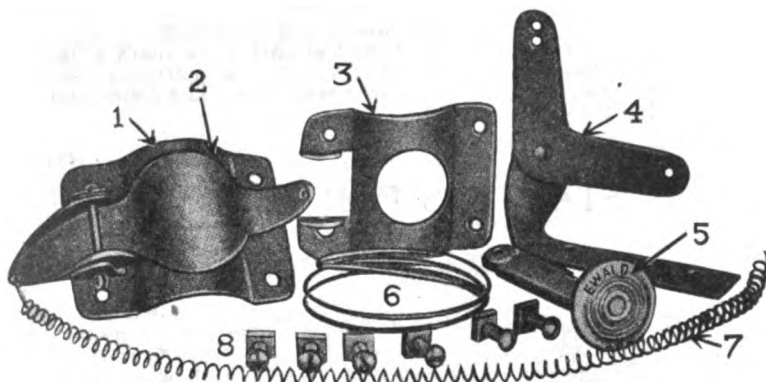

Every Ford owner should have his car equipped with a Cut-Out so he knows whether his motor is working perfectly.

Increases the horse power by allowing the gases to escape freely through the Cut-Out.

No. 3—Consists of 1 Iron Cut-Out Bored to Proper Size, 1 Spring Actuated Lock Pedal, 1 Spring and 4 feet of Wire Cable.....Each \$1.00

EWALD'S ALL STEEL, FOR FORD CARS

Cut Showing Ewald's All Steel Cut-Out Installed.

Releases the strain on your engine caused by gases in the muffler.

Helps the car over the hills.

Aids you locating engine trouble, as you can tell at once if your engine is missing fire.

Gives a more positive cut-out than any other on the market, as it throws the exhaust direct into the air and not through another pipe or cast tee.

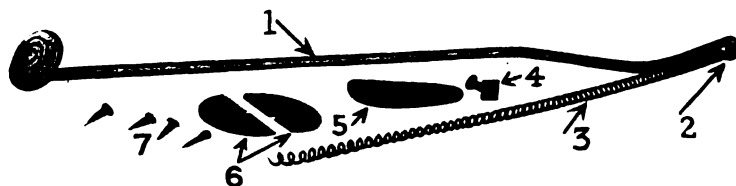

It is impossible to break or wear out as it is constructed of solid steel.

No. 1 in the above picture represents the Steel Cut-Out with Damper (2) attached. (3) the upper half of Cut-Out (4) Bell-Crank and Bracket. (5) Plunger with Polished Brass Cap. (6) Connecting Wire. (7) Spring. (8) Bolts. See Photo to the right for complete assembly.

No. 75—Complete with All Necessary Attachments.....Each \$1.00

FOOT ACCELERATORS

EWALD'S

FOR FORD CARS

Simple, Light and Durable.

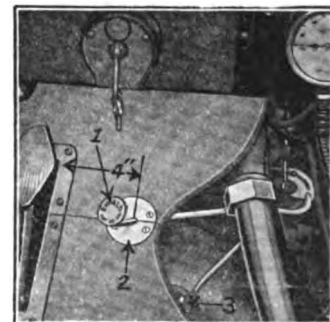

Easy to Put On.

Can be Attached by Anyone in a Few Minutes.

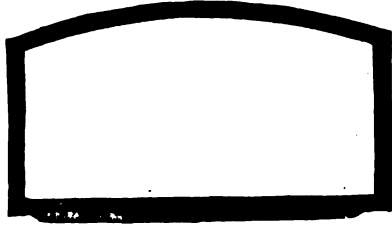

No. 1 is the Accelerator push rod. No. 2, hole in which to lock spring No. 3. No. 4, bolt to fasten plate (5) to the carburetor. No. 6, two guide plates which are fastened to the floor boards by screws (7).

Does not interfere with the handling of the hand throttle. Increases the flexibility or quickness of your motor from 25 to 50%. Enables the driver to get the car under full speed almost instantly. Leaves the driver's hand free to operate the steering wheel, horn or brakes. Insures safety first. The instant you take your foot from the accelerator to apply your brake, the motor slows down.

No. 50—Made of the Best Steel Obtainable, Foot Pedal has Polished Brass Cap, Complete.....Each \$0.90

REAR CURTAIN LIGHTS FOR FORD CARS

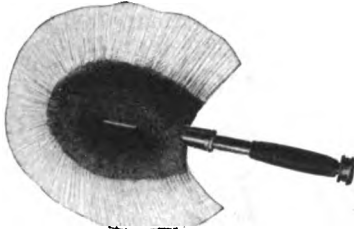

No. 10—Full Size, Fits 1914 to 1917 Ford Cars.....\$12.00

A light to replace a broken light in a rear curtain. Requires only a penknife and five minutes' time to attach it securely and neatly. Saves taking the rear curtain off, and costs less than having new celluloid sewed in the curtain.

The light is provided with an extra long rain flap, and attaches securely all the way round.

AUTO BRUSHES SANITAX FOUNTAIN

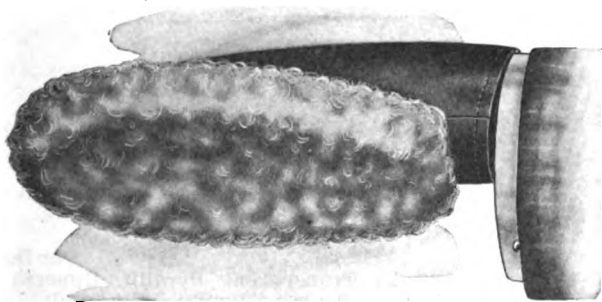

The Sanitax Fountain Auto Brush is automatic in action—removes the hardest clay, mud or grit from the surface to which it is applied almost instantly, without a scratch or streak.

The constant stream of clear, running water passing through the brush from an ordinary garden hose, not only loosens the mud but washes it away. The sand, grit, gravel or sandy particles, that become imbedded in the pores of an ordinary carriage sponge, never find lodgment in the Sanitax. This is the secret of its soft, non-scratching action—the secret of its efficiency and satisfaction wherever used.

Each Sanitax Fountain Auto Brush.....\$4.50

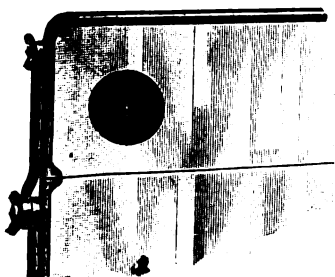

POLISHING MITTENS BULLY WOOLY

No. 1BW—Made from Best Quality Selected Bark Tanned Sheep Skin, Finished on Back with Heavy Duck, Made without Thumb and Can be Worn on Either Hand.....\$4.50

Polishes anything, Auto Bodies, Woodwork, Furniture, Stoves, Motorcycles, Brass Ware, Windows, etc.

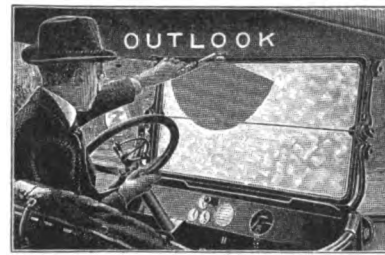

KILGLARE DIMMERS

No. 44—5 inch Diameter, Made of Celluloid, Green Color, Fitted with Rubber Suction Cup by which it is Attached to Wind Shield.....\$3.00

Serves to dim the glare of headlights of oncoming machines. Makes night riding a pleasure.

WINDSHIELD CLEANERS "OUTLOOK"

No. 17—Adjustable Best Grade Rubber Wiper, Black or Nickel Finished Metal Frame, Weight Each About 12 Oz.....\$18.00

Fits any wind shield. Attached in two minutes. Cleans without leaving your seat.

For driving safely when the wind shield is up, whether in summer showers or winter storms, this cleaner is absolutely needed.

Note—When Ordering, Always State if Black or Nickel Finish is Wanted.

LUNCH BOXES

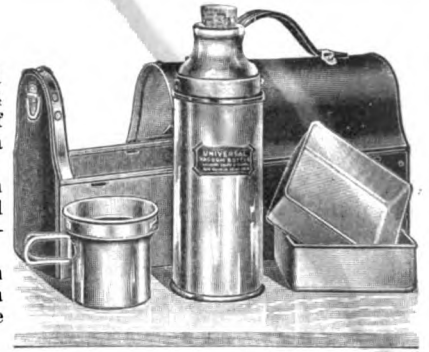

UNIVERSAL

The Universal Vacuum Bottle has a capacity of 1 pint and warranted to keep the contents hot for 24 hours or cold for 72 hours. The bottle is made of highly silvered glass and is held in place inside of a heavy tin guard case by a metal spring container.

The food drawer, when closed, is held securely in place by an automatic spring catch. There is no need of strap or other additional locking device. The automatic spring catch is thoroughly dependable.

Free circulation of air throughout the box when closed is made possible by a number of vent holes in the top and sides, which keeps the box sweet and the food within it fresh, appetizing and wholesome.

AUTO WAX

JOHNSON'S

Unsurpassed for polishing body, hood and fenders of automobiles, electrics and limousines.

Per Dozen
No. 5—5 Oz. Automobile
Size, One Dozen in a
Display Carton \$4.20

Johnson's Prepared Wax is in paste form. It cleans, polishes and finishes in one operation. It imparts a perfectly hard, dry, glass-like polish which sheds water and does not gather dust. It

preserves and protects the varnish, covers up mars and scratches and prevents checking and cracking. It sheds water like a duck's back.

CARBON REMOVER

JOHNSON'S

A liquid preparation. Very easy to use, simply pour an ounce into each cylinder at night through the petcocks or spark plug openings and in the morning drive off with a perfectly clean engine. The pulverized carbon blows out of the exhaust as your car is operated.

This preparation has met with unqualified success everywhere.

AUTOMOBILE OILS

NORTHLAND

Highest quality, suitable for use in all makes of cars. 1 and 5 gallon cans have spouts and are beautifully lithographed.

Note—Prices in barrel lots are for oil in wooden barrels. See bottom of next page for extras.

NORTHLAND SPECIAL

A highly filtered Pennsylvania oil with very high fire test and with practically no free carbon. Used most successfully on fast running, expensive cars with close fitting bearings. If bearings are not perfectly ground will burn up quickly without residue. Used most successfully on any make of car.

Barrel Lots	Per Gallon, \$0.76
5 Gallon Lithographed Cans, 1 in a Case.....	Per Case, 5.30
1 Gallon Lithographed Cans, 6 in a Case.....	Per Case, 6.70

NORTHLAND PALE ZERO

Very highly refined oil. Considering refining and lubricating merit there is not a better oil made. Especially adapted for winter use.

Barrel Lots	Per Gallon, \$0.76
5 Gallon Lithographed Cans, 1 in a Case.....	Per Case, 5.30
1 Gallon Lithographed Cans, 6 in a Case.....	Per Case, 6.70

BARTLES MOBILINE

A very high refined oil. Considering price it is impossible to secure an oil of better lubricating merit.

Can be used in most any make of car with good results.

No. 1—Medium.

Barrel Lots	Per Gallon, \$0.68
5 Gallon Lithographed Cans, 1 in a Case.....	Per Case, 4.80
1 Gallon Lithographed Cans, 6 in a Case.....	Per Case, 6.20

No. 3—Just a Little Lighter in Consistency than No. 1.

AUTOMOBILE PUMP OILERS

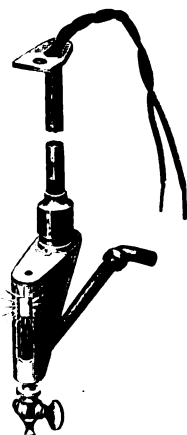

Body Drawn Seamless in One Piece from 20 Gauge Cold Rolled Steel, Heavily Copper Plated and Lacquered.

Nos.	802	804
Capacity, Pints	$\frac{1}{2}$	1
Diameter, Inches	$3\frac{3}{4}$	$4\frac{1}{4}$
Length of Spout, Inches.....	9	9
Per Dozen	\$19.00	20.25

Equipped with a Special Pump and the delivery of oil can be regulated by the distance of the stroke of the Plunger.

ILLUMINATING OIL GAUGES

CRANNER'S FOR FORD CARS

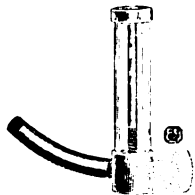

No. 100—Complete with Cord, Bulb, Switch and Pipe Connection...\$4.50

Conveniently ascertains the accurate amount of oil in crank case. You will not have to crawl under the car to get your oil level.

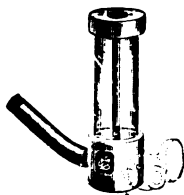

Turn on switch when car is standing on a level. If oil level is $\frac{1}{2}$ inch below top of gauge you know you have the correct amount of oil.

OIL GAUGES

E. G. FOR FORD CARS

No. 500.

No. 503.

Heavy Brass Base and Cap, Imported Heavy Glass Sight, 3 inch Bent Iron Pipe, Threaded on Both Ends.

No. 500—3 $\frac{1}{4}$ inches Long, $\frac{3}{4}$ inch Diameter.....\$0.30
No. 503—3 $\frac{1}{2}$ inches Long, 1 inch Diameter, with Blued Steel Base and Cap in Place of Brass Base and Cap. .48

Indicates the oil level in the crank case. Without it the owner takes chances of burning out the bearings as the result of insufficient lubrication, or of flooding the transmission case and causing carbonization and smoke.

Replaces the lower petcock in the crank case and is attached by means of the threaded pipe furnished. The petcock is threaded into the gauge and acts as a drain.

OIL CUPS

E. G. FOR FORD CARS

This cup is identical to the standard Ford Oil Cup. Accurately turned from brass stock. The snug-fitting revolving sleeve prevents leakage. Made in $\frac{1}{4}$ inch pipe thread. Size $\frac{3}{4}$ inch in diameter, $\frac{1}{2}$ inch long. Weight of 100 packed in a cardboard box, 2 lbs.

No. 5122B—Brass	Per 100
No. 5122N—Nickel	\$ 8.00
Same as above, but fitted with spring which prevents vibration from revolving the sleeve.	10.00
No. 5122BS—Brass	\$ 9.00
No. 5122NS—Nickel	12.00

GREASE CUPS

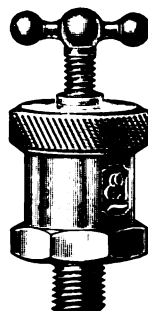

E. G., Polished Brass.

Turned from solid brass stock on special automatic machines to insure accuracy and clean-cut threads.

Fitted with a screw plunger with leather washer to prevent leakage.

Capacity, Oz....	$\frac{1}{4}$	$\frac{1}{2}$	1	$\frac{1}{4}$
Threads, Inches.	$\frac{3}{8}$	$\frac{1}{2}$	$\frac{3}{8}$	$\frac{1}{4}$
Per 100.....	\$20.00	35.00	48.00	20.00

*NOTE—Nos. 200, 201 and 202 are the Proper Sizes for FORD Cars.

NON-RISING STEM

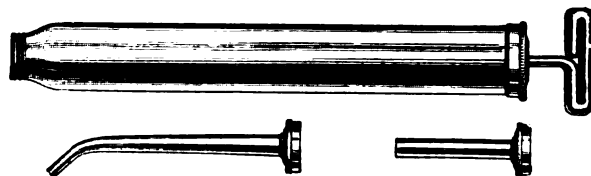

A high grade Grease Cup, made with a non-rising stem, so that the handle will not break off.

Provided with ratchet construction which prevents the shell from working loose, cup shaped leather plunger. Highest grade workmanship and finish.

No. 105N—Capacity $\frac{3}{4}$ Oz., $\frac{1}{8}$ inch I. P. Thread, Polished.....\$0.60

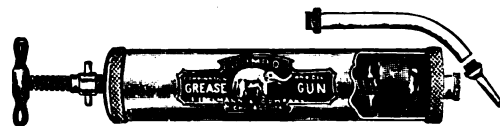

OIL AND GREASE GUNS

WISCETTE COMBINATION

Wiscette—9x1 $\frac{1}{4}$ inch Heavy Steel Cylinder, Satin Nickel Finish, Specially Selected Cork Plunger, Complete with One 5 inch Curved Oil Spout and One 2 inch Straight Grease Spout.....\$7.20

JUMBO COMBINATION

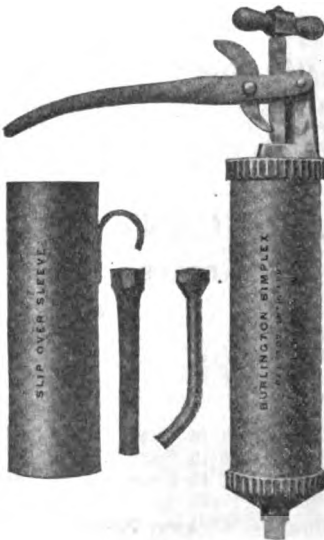

Jumbo—11x2 $\frac{1}{4}$ inch Extra Heavy Sheet Brass Cylinder, Polished, Quickly Changed from Grease to Oil by Turning Small Thumb Nut by Hand, Combination Curved Spout.....\$4.00

This Gun is high grade in every respect. Has large cork plunger and rapid feed for grease, will last as long as the car.

BURLINGTON SIMPLEX

No. 1—Kit Size, 7x2 inch, $\frac{1}{2}$ Lb. Size, Heavy Steel Cylinder, Polished and Nickel Plated, Lever Ratchet Movement, 2 Spouts.....\$2.70

Easy to load—simply remove the lower cylinder cap, insert the gun in the grease and pull up the plunger. No paddles, no tire-some unwindings, no air pockets. Just pull up the plunger and the gun fills.

Easy to operate—just replace the lower cap and pump home the grease.

The tightest places can be reached without the least trouble. Guaranteed to give satisfaction.

FILLING FUNNELS

SCHWYLER'S

Nine-tenths of your carburetor trouble is caused by water and dirt. Most Gasoline and Oil Stove troubles are due to the same causes. Manufacturers of and dealers in gasoline and oil consuming devices demand that gasoline and oil used in same should be clean.

Gasoline or Kerosene Users Know the Troubles from water and impurities in the same. Gasoline and kerosene come from the refineries clear and pure, but in transferring, more or less dirt is accumulated. When stored in large tanks, there is condensation, and the water settles to the bottom, and is drawn off with the oil.

It is a new and scientifically constructed Funnel—five times faster than chamois skin funnels.

Well made, heavily coppered and lacquered to prevent corrosion. In the bottom of the funnel is a fine brass strainer, and above that is a removable ring which is covered with a special filtering fabric. When this special filtering fabric is saturated with gasoline or oil, water or dirt will not pass through it.

Wicks in lamps and stoves clog with dirt and other impurities which get into the oil in handling, causing poor combustion.

Generators, pipes and valves on gasoline stoves and engines get clogged, and the user generally condemns the manufacturer of the device, or the producer of the gasoline, when the trouble can be stopped only by filtering your own oil and gasoline as you use it.

FIRE EXTINGUISHERS

J-M

The J-M Fire Extinguisher is the most efficient weapon yet devised for fighting incipient fires. It is compact, handy, safe, sure in action, effective against any blaze, and gives the operator a choice and freedom of operation, enabling him to attack any blaze from any quarter effectively.

It can be pumped and aimed simultaneously, or by easy pumping enough air pressure is developed to shoot a steady stream, always under your control at the nozzle lever. Can be used with one hand in awkward quarters, where pumping and aiming at the same time are difficult, if not impossible.

Sealed for safety. The unbroken seal at the nozzle indicates readiness for instant use—shows the contents are intact.

Inspected, Tested and Labeled by the Underwriters' Laboratories, Inc., and listed as an Approved Fire Appliance by the National Board of Fire Underwriters.

Length $14\frac{1}{2}$ inches, Diameter 3 inches, Filled Ready for Use.

Saves 15 per cent insurance by equipping your auto with Pyrene.

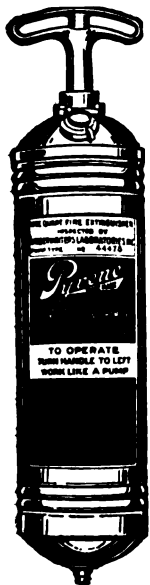

The sight of burning automobiles along the highway is still common enough in spite of improvements in their construction.

Few people who see an occasional motor car consumed by flames realize the great number of cars that are burned annually in the United States, and the amount of money wasted, the inconvenience caused and, worst of all, the number of lives lost as a result.

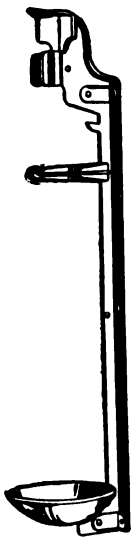

In numberless cases, automobiles that meet with accidents catch fire immediately, and the story of victims buried beneath these cars and burned to death without a chance of being rescued is all too familiar.

None of these automobile fires and their resulting deaths are necessary. The Pyrene Fire Extinguisher can be relied upon to kill the most stubborn automobile blaze, no matter where it is, quickly and without damage to engine or car. A few well-directed shots from a Pyrene Extinguisher sent at the flames instantly smother the fire.

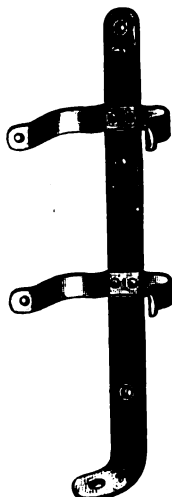

EASY TO OPERATE

No. 10.

No. 5 Auto Bracket.

No. 6 Wall Bracket.

Metal Box.

Costs Little or Nothing.

In spite of the fact that Pyrene is invincible in fighting automobile fires, it actually costs the motorist little or nothing. All insurance companies in the United States allow a 15% reduction in automobile insurance rates for cars equipped with Pyrene Extinguishers.

The Pyrene Extinguisher is easily operated and may be refilled as readily as a kerosene lamp. It is handsomely finished and may be carried in our special holder on the dashboard or any convenient point of your car.

Motorists can purchase Pyrene from all automobile supply dealers, and at hardware stores. Write to us for name of nearest dealer.

Pyrene will not hurt your motor, woodwork or clothes.

Don't use sand on an automobile fire. It spoils bearings and engine.

Remember that water spreads gasoline fires.

Note—There is within the container a manually operated double acting pump which throws a continuous stream. It is absolutely reliable and dependable, always ready for instant use. There is no time lost at the start of a fire in pumping up air, opening different valves, etc.

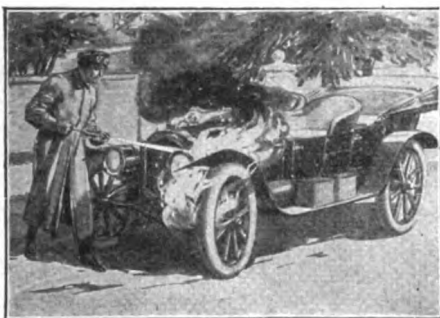

PYRENE LIQUID

Pyrene Liquid is a combination of purely organic materials, having an aromatic odor and a high specific gravity.

Pyrene contains neither acid, alkali, salts nor moisture, and will not stain or injure anything with which it may come in contact.

Pyrene Liquid does not lose its strength or deteriorate with age and will not freeze at a temperature of 60 degrees F. below zero.

PYRENE FOR AUTOMOBILES

Light, and takes up little room in car—can be operated by any one.

PYRENE FOR HOMES

Protect your home and property—can be operated by a child—so simple.

PYRENE EXTINGUISHERS

Length 14 inches, Diameter 3 inches, Weight Filled Ready for Use 6 Lbs. Each

No. 10B—Brass Lacquered, with Enameled Auto Bracket \$8.00

No. 10N—Nickel Plated, with Enameled Auto Bracket 9.00

PYRENE BRACKETS

No. 5E—For Auto, Enameled Black \$0.50

No. 5B—For Auto, Brass Finish75

No. 5N—For Auto, Nickel Plated 1.00

- No. 5750 Assortment—120 Spring Cotter Pins, Assorted Sizes, All the Necessary Sizes for Automobile Work, Put up in a Cardboard Box with Metal Screw Cover and Metal Bottom.....\$0.20

ASSORTED LOCK WASHERS

- No. 5751 Assortment—A. O. or National Pattern; the Style and Also the Identical Washers Used on Most High Grade Cars, Ten Each $\frac{1}{4}$, $\frac{3}{8}$ and $\frac{1}{2}$ inch, Three Each $\frac{7}{8}$, $\frac{1}{2}$ and $\frac{3}{4}$ inch, Put up in a Cardboard Box with Metal Screw Cover and Metal Bottom.....\$0.20

NEVER SLIP LOCK WASHERS

The advantages of the Never Slip Lock Washers over all other types are—that the corrugated surface on both sides prevents slipping both of the nut and the washer, and the surface it comes in contact with—a condition which cannot be obtained where both sides of the washer are smooth.

ASSORTED AUTOMOBILE SPRINGS

An Assortment of Compression and Extension Springs of various sizes.

Price, Packed 24 Springs to the Box.....\$0.50

VALVE SPRINGS

High grade Oil Tempered Springs, guaranteed to retain their tension indefinitely.

For Model T Ford Cars.....	\$5.00
To replace inlet and exhaust springs.	
For Overland Cars.....	7.00

Suitable for the intake exhaust valves of all Overland Motors, for Models 79, 69 and 59.

AUTOMOBILE SPRINGS

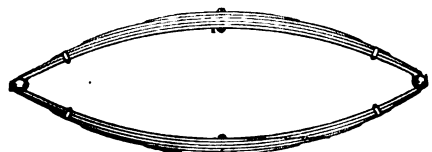

Style "A"

Regular half spring with center bolt or center nib.

Style "B"

Style "D"

Quality—Listed springs are made of the best carbon auto spring steel and always equal to and often better than original, especially when we can remedy some defect in the original design.

250D	2	1/4	4 1/4	54.20
------	---	-----	-------	-------

SPRING BUMPERS

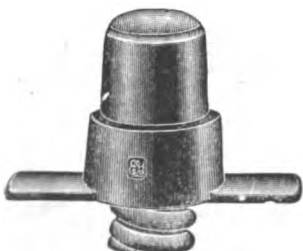

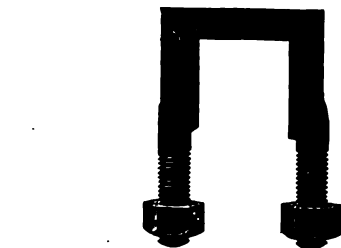

EVER GOOD

Their function is to relieve and prevent strains on the springs when the car is heavily loaded "E. G." Spring Bumpers are superior to ordinary rubber bumpers, because the coil spring and telescopic housing offer greater resiliency and there is no disintegration.

A rubber plug acts as a cushion when the springs come into contact with the spring bumper.

Light, Medium and Heavy Compression Springs Furnished According to Model of Car.

No. 50—Spring Bumpers, Average Weight Per Pair 5 Lbs. Per Pair \$1.25

BICYCLE TIRES

ROYAL, SINGLE TUBE

Royal Tires are made to meet the requirements of trade wanting a good article at a low price. In air-holding quality they are equal to any tires made, and will give satisfactory service.

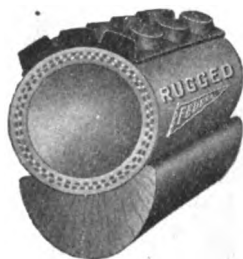

Guarantee—We agree to replace or repair, free of charge, any Royal Tire, which, in our judgment, is defective, either in material or workmanship, if returned to us transportation charges prepaid, within the calendar year in which it was bought. This guarantee positively expires by limitation December 31st of the year in which tires were purchased.

We will not replace tires that have been punctured and plugged.

Red Studded Tread.

	Per Pair
28x1 1/2 inch	\$6.00
28x1 5/8 inch	6.00
26x1 1/2 inch	5.80
24x1 5/8 inch	5.60

FEDERAL, SINGLE TUBE

Blue Rugged Tread.

Rugged Tread Single Tube Tires have an extra heavy pure gum inner tube and are made with automobile quality white cover stock and blue non-skid oil-proof tread. The motorcycle fabric used is both resilient and strong, preventing blowout and resisting punctures.

	Per Pair
28x1 1/2 inch	\$11.00
28x1 5/8 inch	11.00

FEDERAL, DOUBLE CLINCHER

Blue Rugged Tread.

Are made in double clincher type with the same high quality materials as used in the single tube tire. The clincher construction is absolutely correct and the Rugged Tread Double Clincher Tire is the premier of that popular type.

Tires Complete.	Per Pair
28x1 1/2 inch	\$14.90
28x1 5/8 inch	14.90

Casings Only.	Each
28x1 1/2 or 1 5/8 inch	\$5.40

FEDERAL, SINGLE CLINCHER

Blue Rugged Tread.

The same material is used in the Rugged Tread Single Clincher Casing as in the Rugged Tread Double Clincher and Single Tube. The construction has been adopted to permit the use of a high grade tire on the popular Single Clincher rim.

Tires Complete.	Per Pair
28x1 1/2 inch	\$14.90
28x1 5/8 inch	14.90

Casings Only.	Each
28x1 1/2 or 1 5/8 inch	\$5.40

GOODRICH SINGLE TUBE

White Safety Tread.

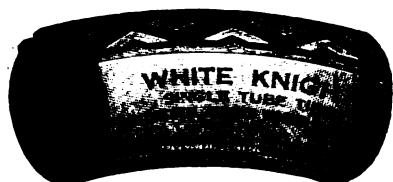

This Tire is attractive in appearance and built to give service. The same high grade of pure white rubber put into the tread is also used in the tube and friction. This unit construction assures absolute satisfaction and freedom from tire troubles.

Three full plies of fabric render it very hard to puncture. Will not creep on rim.

	Per Pair
28x1 1/2 inch	\$7.00
28x1 5/8 inch	7.00

WHITE KNIGHT SINGLE TUBE

White Non-Skid Tread.
Red Side Strip.

Built with two plies of high grade fabric, with two additional plies on tread, making it a four ply tire, high grade friction, inner tube extra quality.

	Per Pair
28x1 1/2 inch	\$6.30
28x1 5/8 inch	6.30

GUARANTEED VITALIC, SINGLE TUBE

1-EXTRA HEAVY TUBE MADE OF PURE WHITE RUBBER
2-GENUINE MOTORCYCLE FABRIC
3-PURE WHITE RUBBER FRICTION
4-GENUINE MOTORCYCLE FABRIC
5-TREAD MADE OF PURE WHITE RUBBER EXTRA THICKNESS

	Per Pair
28x1 1/2 inch	\$10.20
28x1 5/8 inch	10.20

Guaranteed Vitalic Tires are absolutely sound from tube to tread. The fabric is woven from Vitalic triple twisted thread. The rubber is naturally dried, milled and compounded, and then combined with the fabric.

Guaranteed Vitalic Tires are made of honest rubber, so tough, so elastic, so enduring that no reasonable cause can puncture them. They will stand up, mile after mile, month after month, until you have got your money's worth in actual mileage.

HUMMER SINGLE TUBE

Corrugated Tread.

Two ply American fabric Inner Tube and Cover. High grade rubber.

	Per Pair
28x1 1/2 inch	\$4.20
28x1 5/8 inch	4.20

A good cheap tire; not guaranteed.

	Per Pair	\$2.00
Pair—One Each Front and Rear Hubs		

The Cups and Cones of the above Hubs are absolutely perfection in toughness and hardness and are fully guaranteed.

COASTER BRAKES

NEW DEPARTURE

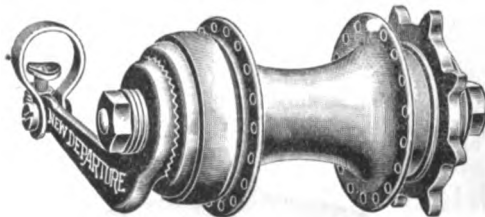

The 1917 New Departure is as far ahead of previous models as the first New Departure was ahead of the old fashioned spoon brake.

For cycling under the most strenuous conditions for either business or pleasure, the New Departure is now faultless. It can't slip, it won't bind nor lock. It is indestructible. It will never fail you.

All parts of the 1917 New Departure are heavier than in previous models.

The hub shell is thicker and extra thick in the brake drum.

All wearing surfaces are super-hardened and are as impregnable as glass for resisting wear.

Nickel Plated.

The size of the spoke flange has been increased and spoke holes have been made larger to take the bigger spokes with which wheels are now equipped.

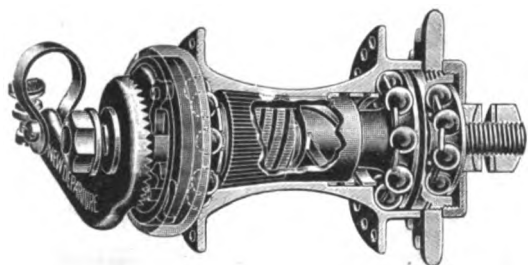

New Departure—Length Over All $4\frac{3}{4}$ inches, Chain Line $1\frac{1}{2}$ or $1\frac{5}{8}$ inches, 8, 9 or 10 Tooth Sprocket, for $\frac{1}{8}$ inch Chain and 36 Spokes	Each	\$6.50
--	------	--------

COASTER BRAKE PARTS

NEW DEPARTURE

NOTE

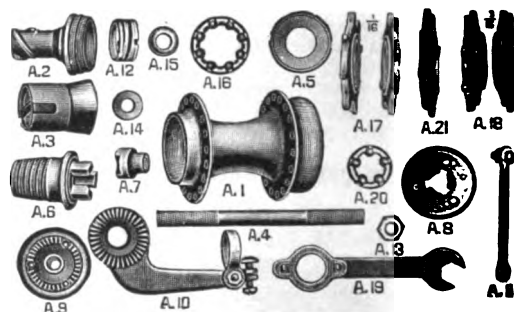

Notwithstanding the changes made in the 1917 New Departure Brake, all Parts of the new Brake are absolutely interchangeable with the Parts of all New Departure Coaster Brakes made since 1908.

Description and Operation.

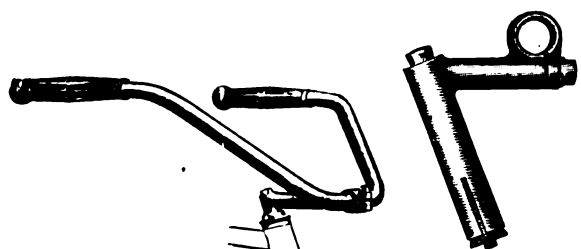

The New Departure Coaster Brake is made entirely of steel. Each part is hardened and otherwise treated scientifically to give it exactly the quality needed for performing its work successfully. The care with which the New Departure Coaster Brake is manufactured may be judged from the fact that from the time the bar steel is put into the automatic machines to the final inspection, there are 317 distinct and separate operations, 160 of which occur in the course of manufacture and 157 occur in the extremely careful inspection and test of the brake both in its separate parts and assembly.

There are very few parts to the New Departure and no parts to easily break or get out of order. The brake mechanism really consists of three simple parts—the worm drive (E), the sliding clutch sleeve (D), and the brake actuator (C). The sprocket (G) is screwed to the worm driver which projects within the hub shell (A) and operates the three-in-one brake (H).

Noonan's—6 inches Long, Black Finish, Long and Curved Jaws, Just what is Wanted for Inserting Rubber Plugs Each
\$0.54

REPAIR TOOLS

Wald Repair Tool—Black Japanned. Each
\$0.30

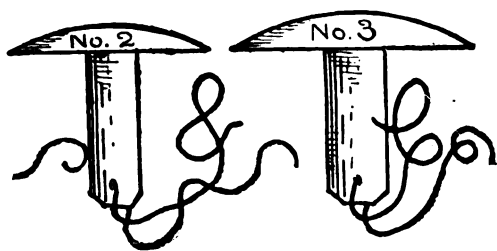

With the use of this tool you can repair your puncture in one minute at a cost of $\frac{1}{4}$ of a cent. By repairing tires this way the puncture in tires remains the same size, while by the old way you are compelled to make the puncture again as large in order to force the plug in. Can also be used for repairing holes in double tube casings to prevent the inner tube from creeping.

HOW TO USE IT.

First get the size of your puncture. Put rubber bands on the tool by stretching them well (see cut). For small puncture use one or two rubber bands, for large punctures three or four bands, according to the size of the hole. When you have your tool filled up with rubber bands, dip it into rubber cement, then insert in the puncture at once; don't wait until the cement dries; release the catch by putting your thumb below and lifting up the catch and withdraw the tool by turning it from side to side; wait a few minutes and your tire is ready to ride.

REPAIR PLUGS

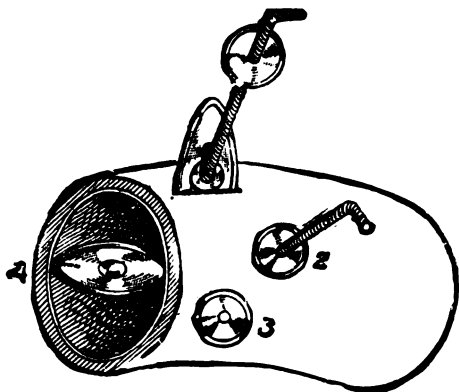

RUBBER

No. 1R—Small Size	Per Dozen

Large side book space, two paper spaces, one drawer with lock and two keys, one small drawer.

QUEEN SAFES

A Family Safe that is Fireproof.

No 1 Closed.

No. 1 Open.

Three Tumbler, Non-Pickable Combination Lock.

No. 1—Outside Dimensions, 16 ½ inches High, 10 ¼ inches Wide, 14 inches Deep, Inside, 10 inches High, 6 ¾ inches Wide, 8 inches Deep, Weight About 100 Lbs.....\$20.00

VICTOR FIRE-PROOF SAFES

No. 2.

Three-Tumbler Non-Pickable Combination Lock.

Each

No. 2—Outside Dimensions 21½ inches High, 13½ inches Wide, 16 inches Deep, Inside 11½ inches High, 7½ inches Wide, 8½ inches Deep, Weight About 225 Lbs. \$30.00

Sub-treasury, 4x4x7, with duplicate flat keys. One drawer and book space, 11x3½x8½. In addition to furnishing ample room for papers, it will take in with ease several books, 11 inches high by 7 inches wide.

This No. 2 Safe is our great Farmers' and Household Safe. Thousands are now being sold in every part of the world. We have fully awakened the farmers and housekeepers to a realization of their needs, and have brought out this size especially to meet their requirements.

Each

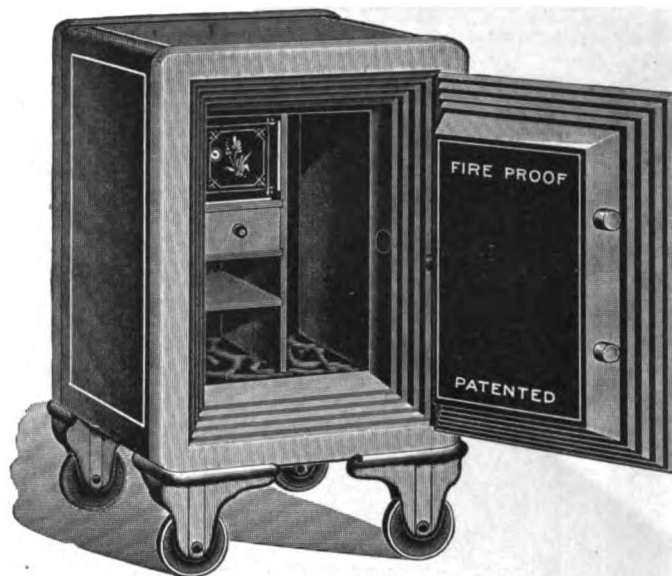

No. 2½—Outside Dimensions, 26½ inches High, 16½ inches Wide, 18½ inches Deep, Inside, 13 inches High, 9 inches Wide, 10 inches Deep, Weight About 400 Lbs. \$35.00

Sub-treasury 5x5x9, with duplicate flat keys. Drawer and pigeon hole under sub-treasury. Book space, 12½x3½x10.

No. 4½.

Note—We make no charge for lettering names on safes when so ordered. We letter the name on the space above the door when requested in order. Send name in print if possible.

Nos. 3 and 3½.

Four-Tumbler Non-Pickable Combination Lock.

Each

No. 3—Outside Dimensions, 29 inches High, 18 inches Wide, 19½ inches Deep, Inside, 15 inches High, 10 inches Wide, 10 inches Deep, Weight About 500 Lbs. \$40.00

Sub-treasury, 5x5x8, with duplicate flat keys and metal cash tray. Drawer and two pigeon holes under sub-treasury. Book space, 15x4½x10.

This safe is one of our leaders. It gives to the professional man ample capacity, not only for books and papers, but for instruments. It is sufficiently roomy for quite a large business, holding ledger, journal and cash book of standard size, with room for other small books. Sub-treasury, drawers and pigeon holes furnish more room for money, papers, etc., than is really necessary to an ordinary business.

We also recommend No. 3 for household use. Purchasers are fully justified in paying the slight difference in price over the smaller sizes.

Each

No. 3½—Outside Dimensions, 31 inches High, 20 inches Wide, 22 inches Deep, Inside, 17 inches High, 12 inches Wide, 12 inches Deep, Wt. About 600 Lbs. \$50.00

Sub-treasury, 5x5x8, with duplicate flat keys. Drawer and two pigeon holes under sub-treasury. Book space, 17x6½x12.

This safe is well suited to the wants of merchants and dealers whose requirements are limited. It will receive a large set of books of standard sizes, and the drawer and pigeon holes are ample in size. We guarantee it will give satisfaction in every respect.

Four-Tumbler Non-Pickable Combination Lock.

Each

No. 4—Outside Dimensions, 33 inches High, 22 inches Wide, 24 inches Deep, Inside, 19 inches High, 13½ inches Wide, 13 inches Deep, Weight About 700 Lbs. \$60.00

Sub-treasury, 5x6x9, with duplicate flat keys and metal cash tray. Drawer and two pigeon holes under sub-treasury. Book space, 19x8½x13.

Special inside Bessemer Steel door covering entire front of safe, with duplicate flat key lock. This is our great postal service, express and railroad safe; also county official safe. We reach an excellent class of business men with No. 4½. Many offices requiring a large safe capacity are now adopting the plan of providing each desk with our No. 3 or No. 4½ safe for special books, papers, etc., belonging to it.

Each

No. 4½—Outside Dimensions, 36 inches High, 24 inches Wide, 24½ inches Deep, Inside, 20 inches High, 14½ inches Wide, 13 inches Deep, Weight About 900 Lbs. \$75.00

Special inside Bessemer steel door covering entire front of safe, with duplicate flat key lock.

Sub-treasury 5x6x9, with duplicate flat keys and metal cash tray.

Two knob drawers and two pigeon holes. Small book space, 8 inches high, 5 inches wide, 13 inches deep.

Large book space, 17 inches high, 9½ inches wide, and 13 inches deep.

This safe is one of our most popular sizes, weighing about nine hundred pounds and being large enough for almost any kind of ordinary business.

VICTOR FIRE-PROOF SAFES

No. 5.

Four-Tumbler Non-Pickable Combination Lock.

Each

No. 5—Outside Dimensions, 40 inches High, 26 inches Wide, 26 ½ inches Deep, Inside 22 inches High, 15 inches Wide, 13 inches Deep, Weight About 1200 Lbs. \$90.00

One Dozen in a Case.

RAKE

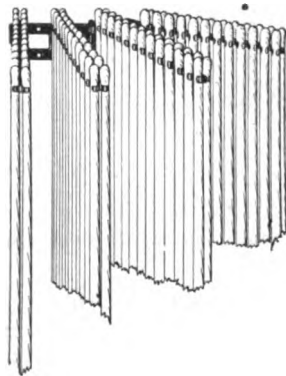

No. 2—11x15 inch Malleable Iron, Black Enameled, Each Bracket Will Hold 8 Rakes. **\$9.60**
Weight Per Dozen 42 Pounds.
One Dozen in a Case.

HOE

No. 3—17 inches, One Arm, Malleable Iron, Black Enameled, Each Bracket Will Hold 8 Hoes. **\$6.60**
Weight Per Dozen 30 Pounds.
One Dozen in a Case.

"HAWKES" REPAIR HANDLE RACK

The spring clips are of tempered steel and will not mar the handle finish. Wall socket plate is malleable iron, while arms are of rolled tool steel. Unless otherwise specified each rack is fitted up to hold Five Dozen Fork Handles and Three Dozen Rake or Hoe Handles.

No. HHR—Complete as Shown. **\$5.00**
Single Arm **1.25**

Holds eight dozen repair handles for Steel Goods, Shovels or Axes, and holds them in such a way that they cannot bend or warp.

Total space required for rack 5x14x20 inches, and is fastened to wall by six $\frac{3}{8}$ inch lag screws. Where only plaster partition is available, use expansion bolts. Each arm holds 24 handles and any handle is accessible because the arms swing in their sockets.

★WALL PLATES, CAST IRON, JAPANNED

No. 24—24 inches Long, Suitable for Any Size Bracket, Weight Each 4 Lbs. **\$0.50**

The Koch Brackets are supported by a number of catches on either side, by means of which each is held firmly in place, there being no sideplay in these Brackets, or liability to slip down accidentally. Yet it is an easy matter to raise or lower the shelf much or little without taking the same down, or in many cases disturbing the stock upon it. Any one or more Brackets or shelves may be readily removed or added, without taking apart or interfering in the least with the rest, and without marring either shelving or walls in the least.

The Wall Plates are provided with screw holes for every six inches of their length, so they can be fastened sufficiently to the walls to prevent springing and to make the shelves secure and rigid enough for any purpose.

★Shipped Direct from Factory.

ROLLING STORE LADDERS

MYERS' TROLLEY

CUSHION TIRE NOISELESS

Each

No. 20—Myers' Ladder and Trolley, Complete Ready to Set Up\$26.00

Average Weight Each Crated 60 Pounds.

TRACK FOR ABOVE LADDERS

Per Foot

Track—For Myers' Ladders, Complete with Hangers.....\$0.39

The Ladder is constructed of the best clear Georgia Pine, nicely finished, filled and varnished; has open panel sides 5 inches wide, with 5 inch Steps. Each Step is supported at ends with Special Malleable Dowel Tee, which makes the strongest construction possible. Width of Ladder is 12 inches.

The Track is the well known Double Angle Steel Rail, is very neat and strong, and is suspended from ceiling by means of lag screws, either jointed or rigid, or by flanged plates and wood screws. By these means the Track hangs close to the ceiling and can be leveled on an uneven ceiling without the least trouble and without any blocking or bridging, as is the case in many other tracks.

The Trolley is self-adjusting and made of Malleable Iron, fitted with Turned Steel Bearings and 3 inch Anti-Rattler Wheels, turned and bored on lathe and fitted with Special Rubber Tires. It runs without friction or noise.

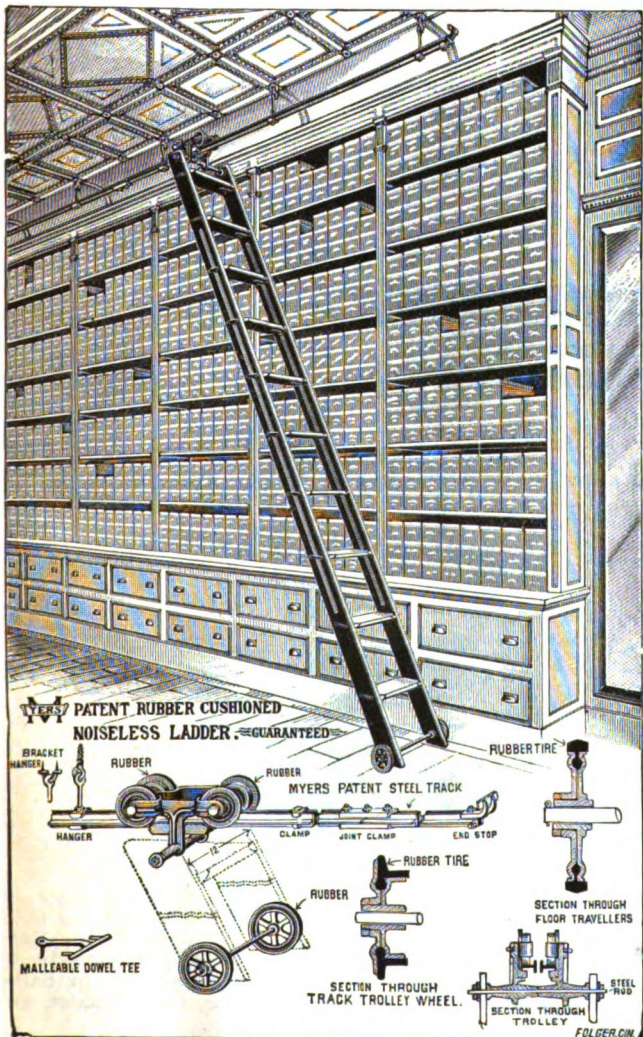

The Floor Travelers are 5 inches in diameter, composed of metal sides with rubber cushion tires clamped in such position as to be impossible to get off or come loose. These Wheels are placed on a steel axle which revolves with one of the wheels, the other running loose. In this manner the ladder will adjust itself to the floor. In operation this Equipment is noiseless, and finds easy preference over other makes on that account.

When the Ladder is not the proper length for ceiling, cut off at the bottom and replace the lower traveler shaft by boring new holes and the Fitting will be done at Factory.

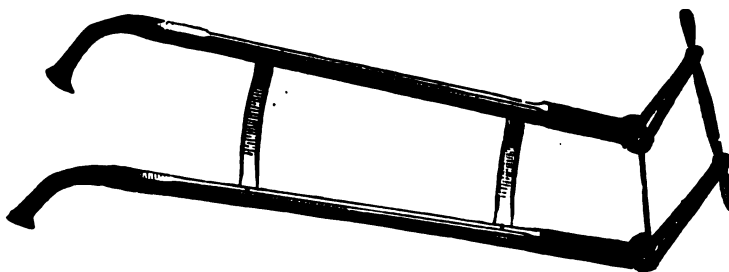

DIRECTIONS FOR FITTING MYERS' CUSHION TIRE STORE LADDER

Give the exact Height of Ceiling and the Length of each Track and the Fitting will be done at Factory.

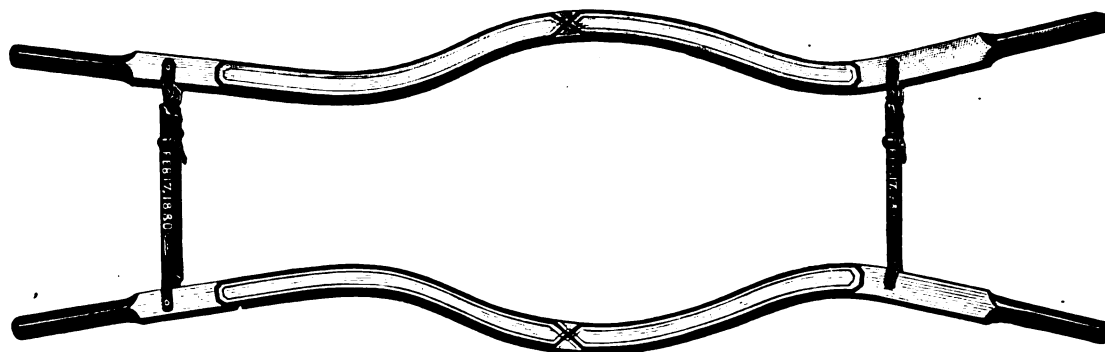

Note—Not Carried in Stock; Sold Only for Shipment Direct from Factory.

STOVE CARRIERS

No. 100—Useful and Convenient for Wheeling or Carrying Stoves Each \$9.00

No. 30—Gem Stove Carriers, Wood Bars, Iron Ratchet Bars and Sockets Each \$9.00
Extra Ratchet Bars and Sockets for Gem Stove Carriers..... .90

BALTZLY

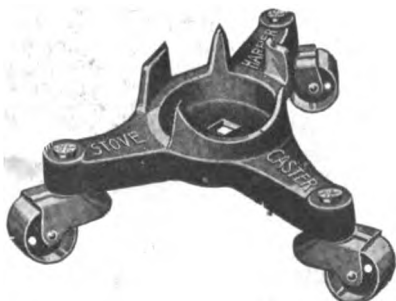

No. 204—Baltzly, All Steel and Iron, with Lever to Lower and Lift Each \$9.00

This Truck will handle any stove, the frame can be lowered to allow the truck to pass under stove and raised taking stove along.

STOVE CASTERS

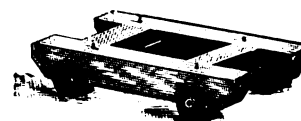

IMPROVED HARPER

No. 1—Malleable Iron, Japanned, 1½ inch Iron Swivel Wheels, Height of Center 3 inches, Diameter of Cup 2½ inches.....\$14.00
Will Carry 2000 Pounds.

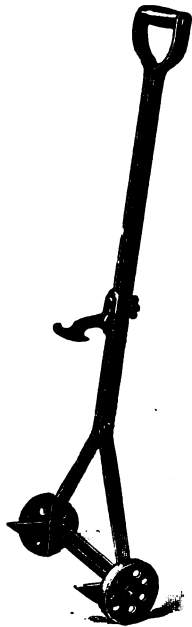

Per Dozen Sets of 4

BOX TRUCKS

No. 752—16x24 inch, 3½ inch Wheels, 3x3 inch Frame. \$4.00
Strong and well made, for handling large boxes or bales. Sharp cone head bolts to prevent slipping, turned axles and bored wheels.

NAIL KEG AND BARBED WIRE TRUCKS

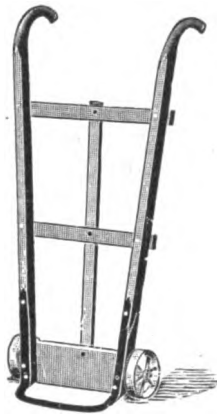

No. 200—Wrought Steel, Galvanized Each \$5.00

Takes hold of a keg automatically, without tipping keg to get under it, also drops keg automatically, requiring only one hand, leaving the other free. Adjustable to any height kegs and many barrels, also spools of barbed wire, which it will handle as easily as a keg of nails. Will handle a keg partly filled as well as a full keg.

Each	\$5.50	6.20	9.50

VALUABLE INFORMATION FOR BUILDERS

The following very useful and practical calculations will be found exceedingly handy, as guides to the builder, in making up his figures when he is called upon to estimate for all portions of a job, many of which are not entirely in his own particular line:

PINE SHINGLES.

Number and Weight of Pine Shingles to Cover One Square Roof
Table based on 4 inch width. For other widths multiply given number by 4 and divide by the width in question.

1 Square = 100 Square Feet.

Number of Inches Exposed to Weather.	4	4½	5	5½	6
Number of Shingles per Square of Roof.	900	800	720	655	600
Weight in Lbs. of Shingles on One Square of Roof.	216	192	173	157	144

The number of shingle per square is for common gable roofs. For hip roofs, add 5% to these figures. The weights per square are based on the number per square. Shingles come 250 to the bundle; 4 inch shingles weigh 240 lbs. to 1,000.

Find the number of shingles required to cover a roof 38 feet long, and the rafters on each side 14 feet. Shingles exposed 4½ inches.

$28 \times 38 = 1064$ (sq. ft.) $\times 8 = 8,512$ Shingles. Ans.

The best shingles are of white cedar. When of good quality they will last 40 to 50 years in our northern states. Cypress and white pine are much used for shingles, but will not last half as long as white cedar.

One bundle 16 inch shingles will cover 30 square feet.

One bundle 18 inch shingles will cover 33 square feet.

When laid 5½ inches to the weather, 5 lbs. 4d or 3½ lbs. 3d nails will lay 1,000 shingles.

To find the length of rafters giving the roof one-third pitch: Take three-fifths of the width of the building. If the building is 30 feet wide, they must be 18 feet long, exclusive of projection.

CLAPBOARDS.

One bundle laid 3½ inches to the weather will cover 26 square feet.

SLATING.

A square of slate or slating is 100 superficial feet.

In measuring, the width of the eaves is allowed at the widest part. Hips, valleys and cutting are to be measured lineal, and 6 inches width extra is allowed.

The thickness of slates range from $\frac{3}{8}$ to $\frac{1}{2}$ of an inch, and their weight varies from 2.6 to 4.5 lbs. per square foot.

The lap of slates varies from 2 to 4 inches. The standard is assumed to be 3 inches.

To compute the number of slates of a given size required per square—Subtract 3 inches from the length of the slate, multiply the remainder by the width and divide by 2. Divide 14,400 by the number so found, and the result will be the number of slates required.

The pitch of a slate roof should not be less than 1 inch height to 4 inch length.

ROOFING SLATE.

Table of Sizes and Number of Slates in One Square of Roof.
1 Square=100 Square Feet.

Size in Inches.	No. of Slate in a Square.	Size in Inches.	No. of Slate in a Square.	Size in Inches.	No. of Slate in a Square.	Size in Inches.	No. of Slate in a Square.
6x12	533	9x14	291	10x18	192	11x22	137
7x12	457	10x14	261	11x18	174	12x22	126
8x12	400	12x14	218	12x18	160	14x22	108
9x12	355	8x16	277	14x18	137	12x24	114
10x12	320	9x16	246	10x20	169	14x24	98
12x12	266	10x16	221	11x20	154	16x24	86
7x14	374	12x16	185	12x20	141	14x26	89
8x14	327	9x18	213	14x20	121	16x26	78

The weight of a square of Slate is estimated in a general way (varying according to the thickness of the different makes) at from 600 to 700 lbs. per square.

Weight Per Square Foot.

Thickness, in.	1/8	3/8	1/2	5/8	3/4	7/8	1
Weight, Lbs.	1.81	2.71	3.62	5.43	7.25	9.06	10.87

Weight per cubic foot, 174 pounds.

It requires, on account of laps, an average of nearly 2½ square feet of slate to make one of slating.

APPROXIMATE WEIGHTS OF VARIOUS ROOF COVERINGS

For preliminary estimates the weights of various Roof Coverings may be taken as below:

Name.	Weights in lbs., per square of roof (100 sq. ft.)
Cast Iron Plates, ¾ inch thick	1500
Copper	80-125
Felt and Asphalt	100
Felt and Gravel	800-1000
Iron Corrugated	100-375
Iron Galvanized Flat	100-350
Lath and Plaster	900-1000
Sheathing, Pine, 1 inch Thick, Yellow Northern	300
Sheathing, Pine, 1 inch Thick, Yellow Southern	400
Spruce, 1 inch Thick	200
Sheathing, Chestnut or Maple, 1 inch Thick	400
Sheathing, Ash, Hickory or Oak, 1 inch Thick	500
Sheet Iron, ⅝ inch Thick	300
Sheet Iron, ⅝ inch Thick, and Laths	500
Shingles, Pine	200
Slates, ¾ inch Thick	900
Skylights, (Glass, ⅝ to ½ inch Thick)	250-700
Sheet Lead	500-800
Thatch	650
Tin	70-125
Tiles, Flat	1500-2000
Tiles (Grooves and Fillets)	700-1000
Tiles, Pan	1000
Tiles, with Mortar	2000-3000
Zinc	100-200

BRICKWORK.

Brickwork is estimated by the thousand, and of various thickness of walls, runs as follows:

8¼ in. Wall, or 1 Brick in thickness, 14 Bricks per superficial ft.

12¼ in. Wall, or 1½ Brick in thickness, 21 Bricks per superficial ft.

17 in. Wall, or 2 Brick in thickness, 28 Bricks per superficial ft.

21½ in. Wall, or 2½ Brick in thickness, 35 Bricks per superficial ft.

Any ordinary Brick measures about 8¼x4x2 inches, which is equal to 66 cubic inches or 26.2 Bricks to a cubic foot. The average weight is 4½ lbs.

Corners are not measured twice as in stonework. Openings over 2 feet square are deducted. Arches are counted from the spring. Fancy work counted 1½ bricks for 1. Pillars are measured on their face only.

The average weight of smaller sized bricks is about 4 lbs., of the larger about 6 lbs.

Dry bricks will absorb about one-fifteenth of their weight in water.

A load of mortar measures a cubic yard or 27 cubic ft., requires a cubic yard of sand and 9 bushel of lime, and will fill 30 hods.

A bricklayer's hod, 1 ft. 4 in. by 9 in. by 9 in., equals 1,296 cubic in. in capacity, and contains 20 bricks.

A single load of sand and other materials equals a cubic yard, or 27 cubic ft., a double load twice that quantity.

One thousand old brick loosely stacked occupy about 56 cubic ft. One thousand old brick, cleaned and loosely stacked, occupy about 72 cubic ft.

One superficial foot of gauged arches requires ten bricks.

One superficial foot of facing requires seven bricks.

One yard of paving requires 36 stock bricks laid flat, or 52 on edge, and 36 paving bricks laid flat, or 82 on edge.

The bricks of different makers vary in dimensions, and those of the same maker vary also, owing to varying degrees of heat in burning. The calculations given above are therefore approximate.

One hundred yards of plastering will require 1,400 laths, 4½ bushels of lime, four-fifths of a load of sand, 9 lbs. of hair, and 9 lbs. nails, for two-coat work.

Three men and one helper will put on 450 yards in a days work, of two-coat work, and will put on a hard finish for 300 yards.

A bushel of hair weighs, when dry, about 15 lbs.

Putty, for plastering, is a very fine cement made of lime only. It is thus prepared: Dissolve in a small quantity of water, as two or three gallons, an equal quantity of fresh lime, constantly stirring it with a stick until the lime be entirely slacked, and the whole becomes of a suitable consistency, so that when the stick is taken out of it, it will but just drop therefrom; this, being sifted or run through a hair sieve, to take out the gross parts of the lime, is fit for use. Putty differs from fine stuff in the manner of preparing it, and its being used without hair.

VALUABLE INFORMATION FOR BUILDERS

ESTIMATES OF MATERIALS.

To find the number of bricks required in a building: Rule—Multiply the number of cubic feet by $22\frac{1}{2}$. The number of cubic feet is found by multiplying the length, height and thickness (in feet) together. Bricks are usually made 8 inches long, 4 inches wide and 2 inches thick; hence it requires 27 bricks to make a cubic foot without mortar, but it is generally assumed that the mortar fills one-sixth of the space.

PLASTERING.

Estimate of Material for 100 Square Yards.

Materials.	Two Coats Slipped Coat Finish.	Three Coats with Hard Finish.
Quicklime	3 $\frac{1}{2}$ casks	4 casks
Quicklime, for fine stuff		$\frac{3}{4}$ cask
Plaster of Paris		$\frac{1}{2}$ cask
Laths	2,000	2,000
Hair	3 bushels	4 bushels
Common Sand	6 loads	7 loads
White Sand		2 $\frac{1}{2}$ bushels
Nails	13 lbs.	13 lbs.
Mason's Labor	3 $\frac{1}{2}$ days	4 days
Laborer	2 days	3 days

WEIGHTS PER CUBIC FOOT.

Material.	Weight, Lbs.	Material.	Weight, Lbs.
Cast Iron	450	Cast Silver	656
Tin	456	Lead	708
Wrought Iron	480	Gold	1,103
Steel	490	Platinum	1,340
Cast Brass	527	Fresh Water	63 $\frac{1}{2}$
Gun Metal	540	Salt	64 $\frac{1}{2}$
Bronze	545	Ice	56 $\frac{1}{2}$
Sheet Copper	547		

PAINTING.

For outside woodwork, paint made from white lead ground in linseed oil is most used. If the oil is raw, or un-boiled, dryer is added; if boiled, no dryer is necessary. Not less than four coats should be applied—five are better.

Paint, ready mixed, put up in cans or kegs, may be procured from dealers. Our paints are ready for use and do not have to be thinned. One pound will cover about two square yards of first coat, three yards of second, and four yards of each subsequent coat; or one and three-eighths pounds to the square yard will be required for four coats, and one and five-eighths pounds to five coats.

For inside work, white lead is used, and for good work four coats are necessary.

For iron exposed to the weather, metallic paints, such as yellow and red iron ochres or pure graphite, finely pulverized and mixed with oil or dryer, are best.

For iron subject to the action of water, red lead is best.

Plastered walls should stand a year before painting.

Painting is measured by the square yard, girding every part of the work that is covered by paint and allowing an addition to the actual surface for the difficulty of covering, deep quirk of mouldings and for "cutting in" as in sash and shelving, or where there is a change of color on same work.

PAINT REQUIRED FOR A GIVEN SURFACE.

It is impossible to give a rule that will apply in all cases, as the amount varies with the kind and thickness of the paint, the kind of wood or other material to which it is applied, the age of the surface, etc. The following is an approximate rule: Divide the number of square feet of surface by 200. The result will be the number of gallons of liquid paint required to give two coats; or divided by 18 and the result will be the number of pounds of pure ground white lead required to give three coats.

FLOORING AND SIDING.

In estimating matched flooring, a square foot of $\frac{3}{4}$ inch stuff is considered to one foot Board Measure.

If the flooring is 3 inches or more in width, add $\frac{1}{4}$ to assumed Board Measure to allow for the forming of tongue and groove; for less than 3 inches in width, add $\frac{1}{8}$.

A square foot of $1\frac{1}{4}$ inch finished flooring is considered to be $1\frac{1}{4}$ feet Board Measure.

To calculate the Board Measure of same, figure as if 1 inch thick and add 60 per cent. to cover extra thickness and waste in tonguing, grooving, etc.

Siding is measured by superficial foot.

6 inch Siding nominal width actually measures 5 $\frac{1}{2}$ inches.

TABLE OF RELATIVE VALUE OF NON-CONDUCTING MATERIAL.

Substances.	Value.	Substances.	Value.
*Loose Wool	3.35	*Wood across grain .40 to .55	
*Loose Lampblack	1.12	Loam, dry and open55

Wt. in Lbs. Per Sq. of Roof ...	250	350	500	700

In the above table no allowance is made for lap.

HOW TO MIX PAINTS FOR TINTS.

Red and black make	Brown
Lake and white make	Rose
White and brown make	Chestnut
White, blue and lake make	Purple
Blue and lead color make	Pearl
White and carmine make	Pink
Indigo and lampblack make	Silver Gray
White and lampblack make	Lead Color
Black and Venetian red make	Chocolate
White and Green make	Bright Green
Purple and white make	French White
Light green and black make	Dark Green
White and green make	Pea Green
White and emerald green make	Brilliant Green
Red and yellow make	Orange
White and yellow make	Straw Color
White, blue and black make	Pearl Gray
White, lake and vermilion make	Flesh Color
Umber, white and Venetian red make	Drab
White, yellow and Venetian red make	Cream
Red, blue and black make	Olive
Yellow, white and a little Venetian make	Buff

VALUABLE INFORMATION FOR BUILDERS

NAILS REQUIRED FOR DIFFERENT KINDS OF WORK.

For 1,000 shingles, 3½ to 5 lbs. 4d nails, or 3 to 3½ lbs. 3d.
 For 1,000 laths, about 7 lbs. 3d fine.
 For 1,000 feet clap boards, about 18 lbs. 6d box.
 For 1,000 feet covering boards, about 20 lbs. 8d common, or 25 lbs. 10d.
 For 1,000 feet upper floors, square edge, about 38 lbs. 10d floor, or 41 lbs. 12d floor.
 For 1,000 feet upper floors, matched and blind-nailed, 38 lbs. 10d. or 42 lbs. 12d common.
 For 10 feet partitions, studs or studding, 1 lb. 10d common.
 For 1,000 feet furring, 1x3, about 45 lbs. 10d common.
 For 1,000 feet furring, 1x2, about 65 lbs. 10d common.
 For 1,000 feet pine finish, about 30 lbs. 8d finish.

HINTS FOR ROOFERS.

The average width of a shingle is four inches. Hence, when shingles are laid four inches to the weather each shingle averages 16 sq. in., and 900 are required for a square of roofing (100 sq. ft.). If 4½ in. to the weather, 800; 5 in., 720; 5½ in., 655; 6 in., 600. In hip-roofs, where the shingles are cut more or less to fit the roof, five per cent should be added to these figures.

One thousand shingles laid four inches to the weather will require five pounds of shingle nails. Six pounds of 4d nails will lay 1,000 split pine shingles.

A carpenter will carry up and lay on the roof from 1,500 to 2,000 shingles per day, or two squares to two squares and a half of plain gable-roofing.

The pitch of a slated roof should be about one in height to four in length. The usual lap is about 3 in., sometimes 4 in. Each slate should be fastened by two 3d slate nails, either of galvanized iron, copper or zinc. On roofs of gas-houses the nails should be of copper or yellow metal.

The sides and bottom edges of roof slates should be trimmed and the nail-holes punched as near the head as possible. When slates are not of uniform size they should be sorted, and the smallest placed near the ridge.

In a first-class slate roof the top course on ridge, and the slate from two to four feet from gutters, and one foot each way from valleys and hips, should be bedded in elastic cement.

Roof-boards for slate roofs should be covered with one or two thicknesses of tarred felt roofing paper before slates are laid. Dry or rosin-sized felt should not be used on roofs.

COMPARATIVE STRENGTH, TIMBER AND CAST IRON.

Table Showing the Transverse Strength of Timber and of Cast Iron, One Foot Long and One Inch Square.

Material	Breaking Weight, Lbs.	Weight Borne with Safety.
Ash, seasoned	175	105
Chestnut, seasoned	170	115
Hickory, seasoned	270	200
White Oak, seasoned	240	196
White Pine, seasoned	135	95
Yellow Pine, seasoned	150	100
Iron (cast)	5,781	4,000

WEIGHTS OF FLOORS AND THE LOAD UPON SAME.

The dead weight of a fire-proof floor will average 70 lbs. per square foot; the live weight, equal to a dense crowd of people, 80 lbs. per square foot or a total for an office building of 150 lbs. per square foot. The following loads are exclusive of weight of arches and beams:

	Lbs. Per Sq. Ft.
Dense crowd of people	80
For floors of houses	50
Theaters and churches	80
Ball rooms	90
Warehouses	250
Factories	200 to 450
Snow (30 inches deep)	15
Brick walls	(cubic ft.) 112
Stone (limestone dressed)	(cubic ft.) 160

The dead weight of a wooden floor, including wood joists:

	Lbs. Per Sq. Ft.
Double flooring and plastering will average	25
If deafened	35
Stud partition of wood plastered each side	20

In estimating the weight of flat ceiling and roof it will be safe to assume the following:

	Lbs. Per Sq. Ft.
Ceiling of wooden construction	15
Ceiling of iron construction	25 to 65
Roof of wooden construction	45
Roof of iron construction	65 to 100

The weight of roof includes the wind pressure and snow.

Strength of piers—Granite will sustain 40 tons per sq. ft.; berea (sandstone), 30 tons per sq. ft.; limestone (magnesium), 29 tons per sq. ft.; Portland (sandstone), 13 tons per sq. ft.; brick in cement, 3 tons per sq. ft.; rubble masonry, 2 tons per sq. ft.; lime, cement foundation, 2½ tons per sq. ft.

WEIGHTS AND MEASURES

WEIGHT OF VARIOUS MATERIALS.

Weight of stones—Granite (averages), per cubic foot, 170 lbs.; limestone (magnesium), 144 lbs.; berea (sandstone), 140 lbs.; freestone, 140 lbs.; gypsum, natural state, 140 lbs.

One ton of vein marble is 13 cubic feet; of statuary marble, 13½; granite 13½; of berea stone, 14½; of limestone (magnesium), 13¾.

Weight of masonry—Granite, per cubic foot, 160 lbs.; of berea stone range, 140; of limestone rubble, 140; of brick, dry, 115; of brick, dry (press), 130; of brick, dry (fire), 150; of brick masonry in mortar, 110; of brick masonry cement, 112.

Weight of marble slabs—One-half inch thick, per square foot, 7.17 lbs.; ¾ inch thick, 10.75; 1 inch thick, 14.32; 1¼ inch thick, 17.92; 1½ inch thick, 21.05; 1¾ inch thick, 25.08; 2 inches thick, 28.67; 2½ inches thick, 35.83.

Cement and lime—One bushel of Portland cement weighs 96 lbs.; of Rosendale, 70; of Louisville, 62; of quick lime well shaken, 80; of quick lime loose, 70.

Iron and wood—One cubic foot of wrought iron weighs 480 lbs.; of cast iron, 450; of oak (seasoned), 48; of pine (seasoned), 36.

Miscellaneous weights—Per cubic foot—Ordinary quick lime, 53 lbs.; old mortar, 90; new mortar, well tempered, 115; new mortar, 110; river sand (average), 107; river sand (screened), 95; clay with gravel, 130; earth (vegetable), 90; earth (loamy), 100; earth (semi-fluid), 110.

WEIGHT OF LUMBER, DRY.

	Lbs.
Flooring, dressed and matched, per 1,000 ft.	1,800
Siding, dressed, per 1,000 ft.	800
Ceiling, ¾ inch thick, per 1,000 ft.	800
Ceiling ½ inch thick, per 1,000 ft.	900
Boards, dressed one side, per 1,000 ft.	2,100
Boards and dimensions, rough, per 1,000 ft.	2,500
Shingles, per 1,000	250
Lath, per 1,000 pieces	500
Pickets, dressed, per 1,000 pieces	1,800
Pickets, rough, per 1,000 pieces	2,500

AVOIRDUPOIS WEIGHT.

Avoirdupois weight is that used in weighing produce, coal, iron, groceries, etc.

16 drams (dr)	=1 ounce	oz.
16 ounces	=1 pound	lb.
25 pounds	=1 quarter	qr.
4 quarters	=1 hundred-weight	cwt.
20 hundred-weight	=1 ton	T.

The following measures are of every-day use:

56 lbs. of butter	=1 firkin.
196 lbs. of flour	=1 barrel.
300 lbs. of beef or pork	=1 quintal.
100 lbs. of dry fish	=1 quintal.
100 lbs. of nails	=1 keg.

TROY WEIGHT.

Troy weight is used in weighing gold, silver, gems and jewels.

24 grains (gr.)	=1 pennyweight	dwt.
20 pennyweights	=1 ounce	oz.
12 ounces	=1 pound	lb.

LONG MEASURE.

Long measure is used in measuring length and distance.

12 inches	=1 foot	ft.
3 feet	=1 yard	yd.
5½ yards or 16½ feet	=1 rod	rd.
40 rods	=1 furlong	fur.
8 furlongs	=1 mile	mi.
3 miles	=1 league	lea.

SURVEYORS' MEASURE.

Surveyors' measure is used in measuring land and boundaries.

7.92 inches (in.)	=1 link	li.
25 links	=1 rod	rd.
4 rods	=1 chain	ch.
80 chains	=1 mile	mi.

SURFACE OR SQUARE MEASURE.

Square measure is used in measuring areas or surfaces.

144 square inches (sq. in.)	=1 square foot	sq. ft.
9 square feet	=1 square yard	sq. yd.
30¼ square yards or	=1 sq. rod or perch	rd. or p.
272¼ square feet	=1 acre	A.
160 square rods	=1 square mile	sq. mi.
640 acres	=1 square mile	sq. mi.

CUBIC MEASURE.

Cubic measure is used for computing the contents of volumes or solids.

1728 cubic inches (cu. in.)	=1 cubic foot	cu. ft.
27 cubic feet	=1 cubic yard	cu. yd.

WOOD MEASURE.

16 cubic feet	=2 cord feet	cd. ft.
8 cord feet or 128 cubic feet	=1 cord	cd.
24¼ cubic feet	=1 perch or stone of masonry	pch.

LIQUID MEASURE.

Liquid measure is used in measuring liquids.

4 gills (gi.)	=1 pint	pt.
2 pints	=1 quart	qt.
4 quarts	=1 gallon	gal.=231 cu. in.

DRY MEASURE.

Dry measure is used in measuring grain, fruit, salt, soft coal, etc.

2 pints	=1 quart	qt.
8 quarts	=1 peck	bu.
4 pecks	=1 bushel	bu.

MEASUREMENT OF STONE WORK.

Stone masonry is usually estimated by the perch.

A perch of stone is 16½ ft. long, 1 ft. high and 1¼ ft. thick, and is equivalent to 24¼ cu. ft.

The following is the common rule to find the contents of a wall or other stone work:

Rule—Find the contents in cubic feet, and divide by 24.75.

MEASUREMENT OF GRAIN AND HAY.

Grain is usually measured in the United States by the bushel.

The standard bushel is 2150.42 cu. in.

Since a cubic foot is 1728 cu. in., a cubic foot is nearly .8 of a bushel; hence the

Rule—To find the contents of any quantity of grain in bushels, find the contents in cubic feet and multiply by .8.

For the same reason any number of bushels increased by ¼ the number will equal the number of cubic feet.

APOTHECARIES' WEIGHT.

20 grains make 1 scruple, 3 scruples make 1 drachm, 8 drachms make 1 ounce, 12 ounces make 1 pound.

CIRCULAR MEASURE.

60 seconds make 1 minute, 60 minutes make 1 degree, 30 degrees make 1 sign, 90 degrees make 1 quadrant, 4 quadrants or 360 degrees make 1 circle.

TIME MEASURE.

60 seconds make 1 minute, 60 minutes make 1 hour, 24 hours make 1 day, 7 days make 1 week, 4 weeks make 1 lunar month, 28, 29, 30 or 31 days make 1 calendar month (30 days make 1 month in computing interest), 52 weeks and 1 day, or 12 calendar months make 1 year, 365 days, 5 hours, 48 minutes and 49 seconds make 1 solar year.

WEIGHTS AND MEASURES

WEIGHTS OF CORDWOOD.

	Pounds.	Carbon.
One Cord of Hickory	4,468	100
One Cord of Hard Maple	2,864	58
One Cord of Beech	3,234	64

To ascertain contents of a piece of timber, find in the table the contents of one foot and multiply by the length, in feet, of the piece.

Example: What is contents (Board Measure) of a piece of timber 10 inches x 7 inches, 20 feet long?

Answer: 5.83 x 20 = 116.6 feet Board Measure.

GAUGES AND THEIR EQUIVALENT.

In Fraction of Inch, Approximately.

WIRE GAUGES.

There are about a dozen different gauges in common use.

The following comparison of standard gauges will show that no two of them are alike.

For common practice it may be sufficiently accurate to designate the gauge. But, as in gauges made by the same person serious discrepancies often exist, where absolute accuracy is required, the only safe way is to express dimensions in parts of an inch.

COMPARISON OF WIRE GAUGE.

VALUABLE INFORMATION

HOW TO DETECT COUNTERFEIT MONEY

In the space at disposal here, it is impossible, of course, to give a complete illustrated counterfeit detector, but the following simple rules, laid down by Bank Note Examiner Geo. R. Baker, will be found extremely valuable.

Examine the form and features of all human figures; if graceful, and features distinct, examine the drapery. Notice whether the folds tie naturally, and observe whether the fine strands of the hair are plain and distinct.

Examine the lettering. In a genuine bill it is absolutely perfect. There has never been a counterfeit put out but was more or less defective in the lettering.

Counterfeiters rarely, if ever, get the imprint or engraver's name perfect. The shading in the background of the vignette and over and around the letters forming the name of the bank, on a good bill, is even and perfect, on a counterfeit it is uneven and imperfect.

The die work around the figures of the denomination should be of the same character as the ornamental work surrounding it.

Never take a bill deficient in any of these points.

DOMESTIC POSTAGE

First-Class Matter (Letters, etc.)2¢ an oz.
Second-Class (Newspapers and Periodicals)1¢ for 4 oz.
Third-Class (Books, Circulars)1¢ for 2 oz.
Fourth-Class (Merchandise)1¢ an oz.
Registration Fee (Additional Postage) 8¢
Immediate Delivery Stamp (Addition to Regular Postage)	..10¢
Postal Order (\$1 to \$100)3¢ to 50¢
Postal Note (\$5 or less), Each 3¢

(See below for explanations and exceptions.)

First-Class Matter—Letters and all other written matter (whether sealed or not), except manuscript copy accompanying proof sheets, also all matter sealed (see below), 2 cents an ounce, excepting drop letters at non-carrier offices, 1 cent an ounce. (Postal cards 1 cent each).

Second-Class—Newspapers and periodicals, published quarterly and oftener, and not for gratuitous distribution. The general public pay by affixing stamps at rate of 1 cent for each 4 ounces or part thereof when not sealed.

Third-Class—Books (printed, not blank), circulars, other printed matter, proof sheets and manuscript copy accompanying same, valentines, sheet music, heliotypes, chromos, posters, lithographs and printed advertising matter in general, all, when not sealed, 1 cent for 2 ounces or fraction.

Fourth-Class—Merchandise and samples, including printed matter in quantity, blank books and papers, or all matter not included in any of the other classes, and not in its nature perishable or liable to injure the contents of the mail. (By express ruling the postage on seeds, cutting roots, scions and plants is at the rate of 1 cent for each two ounces.) All, when not sealed, and not exceeding 4 pounds in weight, 1 cent an ounce or fraction.

Sealing—Any matter is regarded as sealed when it is not so wrapped as to allow a thorough examination without in any way injuring the wrapper or contents. The name and address of the sender and a description of the contents can be written on the wrapper of unsealed packages, or a business card may be printed, pasted or impressed on such a wrapper.

Registration—First, third and fourth-class matter may be registered at any post office by affixing 8 cents in stamps in addition to the regular postage.

Postal Order Rates—Under \$5, 5¢; \$10, 8¢; \$15, 10¢; \$30, 12¢; \$40, 15¢; \$50, 18¢; \$60, 20¢; \$70, 25¢; \$80, 50¢; \$100, 50¢.

Postal Notes—For amounts under \$5, cost 3¢.

Postage to Canada and Mexico—Same as domestic rates excepting fourth-class matter to the amount of 4 pounds 6 ounces, with the exceptions of liquids, pastes, confections, and fatty substances, and publications, which violate any copyright law. To Canada, except sealed packages. To Mexico, except sealed packages and liquids. Com. papers to both countries at usual rates.

FOREIGN POSTAGE

Almost all the principal countries are included in the Postal Union, to which the rates are as follows: Letters, per half ounce, 5 cents; second and third-class matter, per 2 ounce, 1 cent; postal cards, 2 cents each.

The following are the only countries not in postal union, and that have special rates: Cape of Good Hope, Natal and South Africa, 10 cents per half ounce.

SHORT INTEREST RULES

To find the interest on a given sum for any number of days at any rate of interest, multiply the principal by the number of days and divide as follows:

At 3 per cent, by 120	At 9 per cent., by 40
At 4 per cent., by 90	At 10 per cent., by 36
At 5 per cent., by 72	At 12 per cent., by 30
At 6 per cent., by 60	At 15 per cent., by 24
At 7 per cent., by 52	At 20 per cent., by 18
At 8 per cent., by 45	

MILWAUKEE THE BEAUTIFUL

A FEW FACTORS THAT GIVE MILWAUKEE PRE-EMINENCE IN THE BRIGHT GALAXY OF AMERICAN CITIES,
NAME IT. MILWAUKEE MAKES IT

A MARVEL OF
INDUSTRIAL GREATNESS

A LEADER IN TRADE
AND COMMERCE

MILWAUKEE is a rapidly growing city. According to latest statistics it now has a population of 450,000 inhabitants. In ten years its increase was more than 36 per cent.

MILWAUKEE as a manufacturing center is destined to outrank all others, because of its superior location—its rail and water transportation facilities—its freedom from labor difficulties—its close proximity to the great sources of supplies—the excellence of its public utilities, including its pure and unlimited water supply.

MILWAUKEE is the greatest port of the Great Lakes, according to government statistics, in point of its registered vessel tonnage. Total arrivals for the past year aggregated more than 9,000,000 tons.

MILWAUKEE has more than twenty-five miles of improved dockage along its various rivers. By reason of there being no tunnel obstructions and their unusual depth, Milwaukee rivers permit the passage of the largest craft of the Great Lakes.

MILWAUKEE is the greatest coal distributing point of the Northwest. Coal receipts for the year aggregate 5,588,483 tons.

MILWAUKEE makes more outboard, detachable rowboat motors than any other city in the world.

MILWAUKEE tanneries are among the greatest in the world.

MILWAUKEE, according to its population, makes more candy and chocolates than any city in the United States.

MILWAUKEE has the largest general automobile accessory manufacturers in the United States.

MILWAUKEE stands as the eleventh city in the production of clothing.

MILWAUKEE leads the world in the manufacture of highest quality motorcycles, the value of the product last year being \$4,199,303.

MILWAUKEE is the largest trunk manufacturing center in the world.

MILWAUKEE is becoming famous as a manufacturing center for boots and shoes. Its twenty factories are producing an annual output of 8,000,000 pairs.

MILWAUKEE stands with the foremost cities of the United States in the percentage of its increase in building operations, due to a steady increase in the number of residences and a marked increase in the erection of large manufacturing plants.

MILWAUKEE is the second center in the United States for the manufacture and shipment of flour with an annual output aggregating nearly

MILWAUKEE is distinguished for the diversity of its manufacturing industries—in the metals, for instance, it makes everything from a steel tack to mammoth Corliss engines. The aggregate value of its manufactured product last year was \$401,440,513. The iron and steel industries of Milwaukee exceed all others, as shown by the value of the output last year. The value of the year's production (1915) for ten leading industries was as follows:

Iron, Steel and Machinery.....	\$76,092,820
Packed and Prepared Meats.....	45,266,500
Leather and Leather Products.....	42,545,500
Coal and Wood Products.....	34,763,988
Beer and Malt Tonics.....	29,747,865
Building Materials	24,625,654
Electric and Telephone Supplies....	18,737,000
Flour and Mill Products.....	14,358,127
Paints and Varnishes.....	9,200,000
Millinery and Straw Goods.....	6,821,000

Followed by eighty-five other important industries aggregating a total production of \$401,440,513 last year.

MILWAUKEE has attained mammoth proportions in its jobbing trade—valued last year at \$446,514,011, with the world for its market.

MILWAUKEE is an ideal home city, favored in situation on the shores of Lake Michigan, with delightful climate and distinguished for beautiful parks and boulevards, art galleries, museums, libraries, public and private schools, a cultured citizenship, a lack of congested tenement house districts, and the smallest percentage of crime of any city in its class in the country.

MILWAUKEE is the leading convention center of the United States. Hundreds of thousands of visitors testify to its beauties and the hospitality of its people.

MILWAUKEE is a real summer resort, with all the comforts of a large city and innumerable beauty spots for rest and recreation. A royal welcome awaits every visitor to Milwaukee. We shall be glad to supply special information concerning Milwaukee and the particular advantages it offers to manufacturers and to those in quest of an ideal place in which to locate. Write us for booklets, statistics, etc.
